1. The term *"softwood lumber"* covers those products included in the *Tariff Schedules of the United States (1982) (TSUS)* in items 202.03–202.30 (rough, dressed, or worked softwood lumber). Specifically excluded are drilled and treated lumber, wood siding, and edge-glued or end-glued wood not over 6 feet in length or over 15 inches in width. "Rough lumber" is lumber just as it comes from the saw, whether in its original sawed size or edged, resawn, crosscut, or trimmed to smaller sizes. "Dressed lumber" is lumber which has been dressed or surfaced by planning on at least one edge or face. "Worked lumber" is lumber which has been matched (tongue-and-grooved), shiplapped (rabbeted or lapped joint), or

patterned on a matching machine, sticker, or molder.

2. The term *"softwood shakes and shingles"* refers to wood products most frequently made from red cedar, that are used for roofing or siding. "Softwood shakes" are approved durable wood or random widths ranging from 4 inches to 14 inches which come in four types: hand-split and resawan, taper-split, straight-split and taper-sawn. "Softwood shingles" are tapered pieces of approved durable wood, sawed both sides, of random widths ranging from 3 inches to 14 inches and in lengths of 16 inches, 18 inches or 24 inches. For purposes of this investigation, the term "softwood shakes and shingles" refers only to those products designated in TSUS as item 200.55.

3. The term *"softwood fence"* refers to three types of fences: picket, stockade, and rail. Picket fences are made of wood pickets nailed to horizontal back rails which are fastened to the supporting posts. The pickets vary in length and thickness, lengths range from 24" to 92", and thickness varies from ¾" to 3". The species of wood used in picket fences is usually cedar for the posts and conifers or softwoods for the backrails and pickets. Rail fences consist of line posts and horizontal rails. Cedar is generally used for the line posts and cedar or conifers or northern softwoods are used for the rails. Stockade fences vary in height from 3 feet to 10 feet. Widths are usually 7 feet or 8 feet. Line posts are generally cedar, and stockade sections are made from northern softwoods. This investigation covers softwood fences both assembled and unassembled, which fall under TSUS item 200.75.

Appendix B

Provincial Stumpage

Provincial Crown lands account for 81 percent of the productive forest lands in Canada. Under the terms of the Canadian Constitution, provincial crown lands fall under the jurisdiction of the provincial governments who are exclusively responsible for the management and administration of the forests on these lands.

Alberta

Background

Approximately two-thirds of Alberta is covered by forests, almost all of which are owned by the provincial government. Much of the forested area is inaccessible, and logging can only be carried out during winter when the ground is frozen. According to the provinical government, cold-weather logging increases timber harvesting costs. Managed by the Alberta Forest Service under a long-term sustained yield policy, the forests are divided into forest management units which are allocated under the stumpage allocation arrangements described below. Only 60 percent of the annual allowable cut (AAC) has been allotted under the stumpage allocation arrangements because supply exceeds demand. Any company, including foreign companies, registered in Alberta or Canada can be awarded stumpage rights under the various allocation arrangements.

Softwood lumber is the only product under investigation manufactured in Alberta. Lumber accounted for 61.7 percent by volume of the coniferous round timber harvested in 1981. Plywood accounted for 8.9 percent and pulpwood 25.9 percent.

Stumpage Allocation Arrangements

There are five stumpage allocation arrangements in Alberta:

- Forest Management Agreement (FMA)
- Timber or Coniferous Quota Certificate (Quota)
- Commercial Timber Permit (CTP)
- Local Timber Permits
- Forest Products Tags

FMA's and quotas are 20-year allocations while the CTP's can range from 1 to 5 years, and the Local Timber Permits and Forest Products Tags are limited to terms of 1 year or less. The rights to cut standing timber under any of these allocation arrangements do not vary by the type of product that will be manufactured from the stumpage, but they do vary by type of allocation arrangements. These arrangements can cover both coniferous and deciduous timber; however, different requirements and dues rates are specified for each type of timber. Under all the allocation arrangements, the Forest Service retains primary responsibility for fire prevention and suppression, as well as for insect and disease control.

Forest Management Agreement

Currently, there are six Forest Management Agreements (FMA's) outstanding which account for 35.8 percent of the allocated annual allowable cut (AAC). The term of each FMA is 20 years with renewal rights for an additional 20 years. The procedure for acquiring stumpage rights through an FMA is as follows.

The Forest Service advertises a development area and invites proposals for one year. The proposals are analyzed by the Forest Service and public hearings are held, after which the successful proponent is selected by the government. After selection, the actual agreement is negotiated and approved by the Cabinet through an Order-in-Council.

The government's intent in allocating timber under an FMA is to ensure sustained long-term yield of the timberland. In order to achieve this, the company holding an FMA is required to develop a management plan to ensure sustained yield, and to develop inventory studies, conduct reforestation and regeneration, conduct on-going silviculture, develop roads, and make a capital investment ranging from Canadian $25,000 to Canadian $2,000,000 in the development area.

In addition to undertaking these responsibilities, the company must pay stumpage dues on the sawlogs harvested. All FMA holders except one pay the regulation rate of dues set forth in the Timber Management Regulations of the Forest Act of 1971. The Regulations state that the General Rate of Crown Dues on green coniferous timber suitable for lumber manufacture is Canadian $0.70 per cubic meter. Holders must also pay annual holding and protection charges which cover ground rent and protection costs.

Under the FMA's the provincial government must approve the management plan and the annual allowable cut in accordance with Timber Management Regulations.

Timber Quota Certificates

The quota certificate (Quota) is a long-term right to harvest a share of the AAC of a forest management unit. Implemented in 1966, the Quota system replaced the short-term competitive bid system. Currently, the Quota system accounts for 19.9 percent of the allocated AAC. The purpose of the Quota system was threefold:

1. To eliminate abuses inherent in the bid system, such as speculation resulting in timber being held and not cut;

2. To ensure that a fair price would be paid and that timber would be cut; and

3. To provide timber operators with a long-term secure stumpage supply in order to encourage industry to make capital investments in the area.

In 1966, quotas were granted to all established timber operators for up to 20 years based on each operator's average production from 1960 through 1964. Most Quotas issued since 1966 have been sold competitively.

The 20-year term of the Quota is divided into 5-year periods. At the end of every 5-year period, a Quota holder is subject to penalties, including revocation of the Quota, if the amount of timber harvested is not within 10

percent of the total of the annual allowable cuts for the 5-year period.

In order to cut the timber authorized in the Quota, a holder must submit, for Forest Service approval, an annual operating plan. The Quota holder is also responsible for regeneration and reforestation as well as for road construction and silviculture.

Stumpage dues paid by the Quota holder are determined through an appraisal formula which modifies the regulation rate of dues according to logging conditions. The appraisal factor is based on four elements and is fixed for five years:

1. Average haul distance to nearest usable trackage point;
2. Average gross volume per harvestable acre;
3. Average gross volume per tree; and
4. Average cull as a percentage of gross volume.

Timber Management Regulations provide that the minimum rate of dues under the Quota system, after taking into account the appraisal factor, cannot be less than 25 percent of the regulation rate. The appraisal system, in effect, provides incentives to log the poorer, more distant stands of timber. Quota holders must also pay annual holding and protection charges.

Under the Quota system, the Forest Service is responsible for the sustained yield management plan. The Forest Service lays out the cutting sequence and selects the areas to be logged, thereby limiting the annual allowable cut under the Quota.

Commercial Timber Permit

The Commercial Timber Permits (CTP's) are short-term (1 to 5 years with an average of 2 to 3 years) arrangements which are sold at public auction to the highest bidder except when issued to Quota holders for the salvage of dead or damaged timber. Only 2.4 percent of the allocated AAC is allotted under CTP's. Generally, to obtain a CTP the permittee must own or operate a mill within the area and must not hold any other active stumpage arrangement.

The bidding process for a CTP determines the actual amount of dues to be paid. The minimum starting bid equals the regulation rate of dues plus the appraisal factor which can be a positive or negative number. This starting bid becomes the upset price which is added to the highest bid rate in order to establish the rate of dues to be paid. In addition to dues, the CTP holder must deposit a performance guarantee, pay a reforestation levy, and pay holding and protection charges.

As with the Quota system, CTP holders must submit an annual operating plan for Forest Service approval. Under a CTP the Forest Service is responsible for selection of the stands to be cut, silviculture and reforestation (the company pays a reforestation levy).

The CTP differs from a Quota in that the CTP represents the right to cut standing timber while the Quota grants the right to a certain share of the AAC. As such, while the "value" of the stumpage forms the basis of the bid price for a CTP, the Quota bid cannot be based on the "value" of the stumpage since the share of AAC provided under the Quota varies in accordance with the changes in the AAC.

Local Timber Permit (LTP)

Issued for a term of one year or less, the LTP authorizes logging for the permittee's own use or to supplement his income by selling logs to local mills. LTP's account for 1.5 percent of the allocated AAC. LTP's are issued on a first-come first-served basis unless demand is high, in which case they are issued by draw.

The dues charged are the regulation rate in effect at the time the LTP is issued. Permittees are exempt from cruising, holding and protection charges, and only pay a reforestation levy if the volume harvested is over 130 cubic meters.

Forest Products Tags

Forest Products Tags are 30-day authorizations to cut timber for personal use or for small volumes of Christmas trees, firewood and fenceposts. The Tag is non-renewable and non-refundable. The holder pays the regulation rate of dues but no other charges. The percentage of AAC allocated under Forest Products Tags is negligible.

British Columbia

Background

There are seven different forest tenure arrangements in British Columbia: Three Farm Licenses, Forest Licenses, Timber Sale Licenses (Major), Timber Sale Licenses (Minor), Timber Sales, Pulpwood Agreements and Woodlot Licenses. Annual rents represent a charge for reserving the use of the resources under license.

On request or independently, the Minister of Forests may advertise and invite applications for licenses. A license may not be entered into unless there has been an advertisement and a public hearing has been held on all applications. In addition, an evaluation of the proposal in terms of social benefits in the province (increased employment), management and use of Crown timber, environmental issues must be made, and the development of Crown objectives and revenues must be appraised. Stumpage rights can be awarded to non-Canadian persons and/or companies doing business in British Columbia. However, a non-Canadian company must register in British Columbia before acquiring the license.

The tenure agreements are described in detail below:

1. *Tree Farm License.*

A tree farm license shall:

(a) Be for a term of 25 years, and can be revised at each succeeding 10-year anniversary under an "evergreen arrangement" which initiates a new 25-year replacement license with revised conditions;

(b) Describe a tree farm license area composed of Crown land and private tenures;

(c) Require its holder to pay to the Crown stumpage or royalty, in addition to a bonus bid (which is fully paid when the license is issued);

(d) Require its holder to submit for the approval of the Chief Forester, once every five years, a management and working plan prepared by a registered professional forester;

(e) Grant to its holder the exclusive right to harvest timber (chosen by licensee) from the tree farm license area during the term of the license;

(f) Provide for cutting permits to be issued by the Crown to its holder authorizing the annual allowable cut (determined by the Chief Forester) to be harvested from specific areas in the tree farm license area within plus or minus 50 percent on a yearly basis and within plus or minus 10 percent on a five-year basis, subject to a penalty assessment;

(g) Require that each year during its term a volume of timber chosen by the licensee shall be harvested by persons under contract with its holder;

(h) Reserve to the Crown the right to enter into a free use permit on the tree farm license area with a person other than the holder of the tree farm license.

A tree farm license cutting permit authorizes timber harvesting operations on a specific portion of the tree farm license area. It provides for the determination of stumpage rates payable through an appraisal system established under section 84 of the Forest Act and for periodic rate adjustments based on changes in the average market value of the logs or lumber products. Separate permits are issued for operations on different geographic parts of the license, where separate stumpage rate determinations are appropriate or where different cutting permit conditions are needed.

Tree farm licenses account for 28.6 percent of the Province's total annual allowable cut.

2. *Forest Licenses* (formerly Timber Sale Harvesting Licenses).

The timber sale harvesting license was a license to harvest timber within a public sustained yield unit at a stipulated annual rate. These licenses, granted under the former Forest Act, were not replaced by forest licenses until the latter part of 1982. We assume that the timber sale harvesting licenses in effect during the period of investigation are very similar to the forest license explained below.

A forest license:

(a) Shall be for a term not exceeding 20 years, and can be revised at each succeeding 5-year anniversary under an "evergreen arrangement" which initiates a new 15-year replacement license with revised conditions;

(b) Shall describe a public sustained yield unit of a timber supply area within timber may be harvested;

(c) Shall specify an annual allowable cut (determined by the Chief Forester) that may be harvested under the license from specific areas of land, subject to annual and five-year cut control provisions;

(d) Shall require its holder to pay to the Crown stumpage and a bonus, if any, in the amount offered in the application;

(e) Shall require its holder to submit, for the approval of the regional manager, a management and working plan prepared by a professional forester;

(f) Shall require that if the allowable annual cut of the timber supply area declines, the licensees must accept proportional reduction in harvesting rates without compensation;

(g) May make provisions for timber to be harvested by persons under contract with its holder.

A forest license cutting permit is identical to the tree farm license cutting permit.

Forest licenses account for 61 percent of the Province's total annual allowable cut.

3. *Timber Sale Licenses* (Major).

The timber sale licenses (major) have the same requirements as the new "forest licenses." The award of a new timber sale license (major) is by the appropriate Regional Manager or District Manager. The Forest Act requires the award be made to the applicant submitting the highest bonus bid.

This license is used in circumstances where an evergreen replacement feature would not be appropriate; for example, a situation where an ongoing supply of timber is not intended (flood area, fire, insect infestation), but where the volume comprises part of the approved annual allowable cut and a limit is therefore imposed on the rate of harvesting.

A timber sale license (major):

(a) Shall be for a term not exceeding 10 years; there is no provision for replacement and rights are renewable pursuant to section 18(5);

(b) Shall describe an area of land within which Crown timber may be harvested;

(c) May specify an annual allowable cut (determined by the Forest Service) that its holder is eligible to harvest, subject to annual and five-year cut control provisions;

(d) May provide for cutting permits to be issued by the Crown to its holder to authorize an annual allowable cut to be harvested, within the limits provided in the license;

(e) Shall require its holder to pay to the Crown stumpage and a bonus, if any, in the amount bid;

(f) Shall require its holder to submit, for the approval of the Chief Forester, a management and working plan prepared by a registered professional forester.

Timber sale licenses (major) account for 1.3 percent of the Province's total annual allowable cut.

4. *Timber Sale Licenses* (Minor).

The award of a timber sale license (minor) is made by the appropriate Regional or District Manager of the Forest Service to the highest bidder.

This license is used for sales of timber under the small business enterprise program and other instances where the volume of timber is not sufficient to warrant delegation of major forest management responsibilities for investments.

A timber sale license (minor):

(a) Shall be granted through a competitive bid process which determines the total amount of stumpage dues payable (although the appraisal system determines the base rate of stumpage due, adjusted monthly and subject to annual reappraisal);

(b) Shall be for a term from one to three years, without provision for replacement;

(c) Shall allow the licensee to cut the timber, within site-specific areas, at any rate within the terms of the license and the periodic cut control requirements;

(d) Requires small business enterprises without timber processing facilities to sell all harvested logs, small business enterprises with timber processing facilities to process a pre-specified portion of the logs harvested.

Timber sale licenses (minor) account for 7.2 percent of the Province's total annual allowable cut.

5. A pulpwood agreement shall:

(a) Be for a term not exceeding 25 years, with "evergreen replacement" at 10-year intervals;

(b) Describe an area of land as a pulpwood area;

(c) Require its holder to construct, expand or continue a timber processing facility in accordance with his application.

6. A woodlot license shall:

(a) Be for a term not exceeding 15 years, with an "evergreen replacement" at 5-year intervals with satisfactory performance;

(b) Describe a woodlot license area determined by the regional manager or district manager to be composed of private land and not more than 400 hectares of Crown land;

(c) Give to its holder the exclusive right to harvest timber on the Crown land for its term subject to five-year cut control provisions (determined by the Forest Service);

(d) Require its holder to pay to the Crown stumpage in respect of timber harvested from land and a bonus bid, if any, in the amount tendered;

(e) Provide for cutting permits to be issued to its holder to authorize timber to be harvested from specific areas in the woodlot license area.

Woodlot licenses account for 0.7 percent of the Province's total annual allowable cut; however, there have been no woodlot licenses offered to date.

7. A timber license shall:

(a) Describe an area of Crown land over which it is to apply;

(b) Be for a term that expires with the tree farm license (when in a tree farm license area), and for terms based on a required schedule for the continued orderly logging of all the timber licenses held by the licensee (when not in a tree farm license area);

(c) Grant to its holder the exclusive right during its term to harvest all merchantable timber in the area of Crown land;

(d) Where the timber license is in a tree farm license area, require its holder to harvest timber in accordance with the tree farm license and the management and working plan approved under it;

(e) Where a timber license is not in a tree farm license area, require its holder to submit an operating plan prepared by a professional forester which is used by the Forest Service to determine the annual allowable cut;

(f) Provide for cutting permits to be issued by the Crown to its holder authorizing timber to be harvested from specific areas of land described in the timber license;

(g) Require its holder to pay to the Crown stumpage or royalty;

(h) Requires its holder to carry out reforestation or other treatment for the re-establishment of the forest on the land described in the timber license.

Timber licenses comprise approximately five percent of harvest but are not subject to any allowable cut restrictions. There have been no new timber licenses offered, and the Forest Act does not provide for any to be offered in the future.

Stumpage prices for all forest tenure agreements in British Columbia are established when an authority to cut has been issued. Prices are determined by using historical operating and milling costs trended to the mid-point of the appraisal period and the average market values in force at the time of appraisal. The stumpage price is subject to monthly adjustments based on selling price fluctuations and an annual reappraisal. Licensees pay at the adjusted rate in effect for each species during the month the timber was scaled. Charges due are payable upon receipt, with interest due after 30 days, at prime plus one percent. The Ministry of Forests of the British Columbia provincial government is responsible for fee collection.

Because of the type and quality of trees in British Columbia, there are two appraisal systems in operation. The coastal appraisal system emphasizes quality and the interior appraisal system emphasizes quantity. Stumpage prices are established by appraisal to an "average efficient operator." The costs, harvesting methods or equipment and milling practices or equipment of the purchaser or expected purchaser are not considered in the appraisal. All Crown timber in British Columbia is sold without regard as to intended use or category of purchaser.

A. *Coastal British Columbia Appraisal System.*

Sales Value of End Products

Coastal appraisals are based on log prices and exclude manufacturing costs. Three-month rolling average prices for each species are established monthly by log grades from a monthly survey of domestic log sales representing arm's length transactions. "These prices apply in the appraisal on a graded basis relating to the cutting permit cruise log grade percent distribution."

Operating Costs

Logging costs account for all costs of development, harvesting, transportation, contractural obligations, administration and tenure agreement responsibilities. The "average efficient operator" concept is used by the Ministry for appraisal purposes. Costs are derived from industry experience (as determined from annual surveys) to estimate what costs would be incurred by an efficient operator in harvesting timber and the expected recovery value of that timber in terms of revenue. In the appraisal, logs are assumed to be transported to the point which would result in the highest total stampage price, no consideration is given to the location of the purchaser's mill.

Minimum Stumpage Prices

This is the lowest price at which the government would sell its timber resource. The minimum rate is used whenever the appraised rate falls below the minimum rate, and their is no compensation provision.

"Timber quality is determined at the time of the timber cruise, by a determination of percentage of log grades for each species." Log quality influences the logging cost estimate in the appraisal.

B. *Interior British Columbia Appraisal System.*

Sales Value of End Products

In the interior, the appraisal assumes the end value to be lumber and by-product pulp chips. Three-month rolling averages are established monthly from lumber sales in the five interior selling price zones, based on sales f.o.b. mill, consummated in each of these zones. Approximately 80 mills report monthly lumber sales transactions which are audited by the Ministry of Forests. These prices are single averages for each of the species by zone. The same method is used to derive a separate set of prices for stud-only-producing mills. Stud producers, generally working in small timber, have their sales appraised using stud prices and stud manufacturing costs.

Lumber selling prices are in dollars per thousand board feet and standing timber is cruised (measured) for appraisal purposes in cubic meters. A "lumber recovery factor" is used to convert cubic measures of timber into the value of the end product. By-product pulp chip prices are set around Canadian $10 per bone-dry unit. The government contends that the introduction of an actual chip value would not have a significant effect on stumpage fees.

Stud producers and small operators (those having annual production less than 3775 cubic meters) are separately classed. Although the appraisal system is identical in structure for all categories, product prices, operating practices and costs which are pertinent to these groups are taken into consideration in the appraisal.

Operating Costs

The same method is used as in the coastal appraisal system, supra.

Milling Costs

Manufacturing costs are required for interior appraisals, where lumber and by-product chips are the appraisal products, rather than logs, as is the case on the coast. The manufacturing costs are obtained from an annual survey of about 55 sawmills deemed to represent the efficient segment of the industry. Separate zonal milling costs have been established for the Prince George-Quesnel area, Ft. Nelson area, two isolated milling centers north of Ft. Saint James, and the remainder of the interior of the Province. A second survey is made for stud-producing mills.

Minimum Stumpage Prices

Interior statutory minimum stumpage rates are established for each species at three percent of the selling price of lumber and by-product pulp chips (on a sale-by-sale basis).

The statutory minimum rate may be reduced to 0.75 percent for salvage timber.

Timber is cruised and classified according to species, size, and visual defect.

Stumpage prices change by two methods:

A. *Stumpage Price Adjustment Method.*

The stumpage price of any species will change at the beginning of each month: provided the selling price of lumber (interior) of that species departs Canadian $5.00 per 1000 board feet or more from the selling price last used to determine the existing stumpage price; or whenever the selling price of logs (coast) of that species departs by Canadian $1.00 per cubic meter or more from the selling price last used to determine the existing stumpage price. The entire difference in the selling price is used in the recalculation of the stumpage price adjustment.

B. *Annual Stumpage Price Reappraisal.*

A full reappraisal, allowing for changes to product prices, logging costs, milling costs and profit ratio, is made annually at the anniversary date of the contract or cutting permit. Again, the entire difference in the selling price is used in the recalculation of the stumpage price adjustment.

Manitoba

Background

Manitoba is a farm-oriented province with its timber resources in the north.

Most of its timber (80 percent) is not very large (10" in diameter). Forest harvesting operations are small and include a fair proportion of part-time operators.

Stumpage Rights and Payments

Prior to 1965 timber rights were allocated through a competitive process, by auction or sealed tender, for one to five years. In 1965 the Timber Quota System was introduced. This system provided long-term (15 years) fixed allocations to then established operators at set (regulation) stumpage rates. Surplus timber was advertised and sold competitively.

The Timber Quota System was revised in 1980 to continue for another ten years. Stumpage rates were increased and set to be revised annually thereafter according to the national forest product price indices for lumber and paper and pulp companies, weighted as they are produced in Manitoba.

Uncommitted surplus timber is either offered for sale at established stumpage rates plus a lump sum bid, or available for development and allocation on a negotiable basis for companies with sufficent capital to undertake the commitments involved.

Cutting rights for Manitoba Crown timber are allocated by the Forestry Branch and are classfied as "major" or "minor." "Minor" allocations are based on volume and area where mature timber is ready for harvest. They run for a 10-year period, renewable depending on performance of the licensee. Prices are based on regulation rates (mentioned above), reviewed and indexed annually to reflect product price increases. Prices also reflect location of timber relative to mill and distance of mill from market.

For "major" licenses an initial rate is negotiated at the start of the contract (contracts run for 20 years with a renew option). The initial rate takes into account geography, timber supply and demand, and basic (regulation) stumpage rates. Prices are adjusted according to dates and indices specified in each contract.

New Brunswick

Background

The three categories of ownership of timberland in New Brunswick are: the province (Crownlands 48.5 percent), the "forest industry" (industrial holdings 21.0 percent), and individual (non-industrial 30.5 percent).

The products under investigation are all manufactured from the primary product, softwood logs. Over half of these logs have come from the private sector during the past five years. The actual breakdown is: Crownlands, 46.6 percent; company-owned lands, 30.4 percent; and private lands, 23.0 percent.

New Brunswick has no surplus timber to allocate to new plants or for expansion. The current annual supply of softwood species is 7.6 million cubic meters. This accounts for 80 percent of the industrial timber requirement for softwood species. Of the 7.6 million cubic meters harvested, only 5.5 million cubic meters are reforested naturally. The deficiency is made up by silviculture inputs.

The province has undergone a major restructuring of its forest management policy. The change was instituted in early 1982 (no specific date given). The purpose of the change was to effect the organizational structure of the licensing system. The previous 85 licensees were divided into 6 licensees and 79 sub-licensees, and were issued 10 licenses and 105 sub-licenses, respectively.

Stumpage Allocation under Old System

Stumpage rights were allocated by area-based licenses under the old system. The issuance varied from 1 to 50 years and 250 to 450,000 hectares. The licenses were renewable upon satisfactory review. The differences in the licenses were a result of fluctuating supply and applicant's demand.

The licensee was responsible for operational costs including operational cruising, inventories, and some management planning. The province retained overall responsibility for forest management including silviculture, reforestation and fire protection. Areas of dual responsibility were road construction and pest control.

Stumpage Allocation under New System

Under the new system there is a license and sub-license classification. The license is area-based and conveys responsibility for many of the duties previously carried out by the province. The sub-license is volume-based, and is issued to parties either not wanting to or incapable of carrying out the forest management duties.

The license is a 25-year renewable license with 5-year reviews. The licensee must submit a 25-year forest management plan and is responsible for the forest management. This includes: road construction and maintenance planning; inventory and records; specified silviculture; boundary lines maintenance; management activities including sub-license obligations; fire protection of harvest operation; submission of management plans for private lands; and payment of stumpage royalties.

The sub-license is issued for 5 years and is renewable depending upon satisfactory performance. The sub-licensee must submit a 10-year operating plan and must maintain and operate a processing plant as specified in the plan. Other responsibilities include submission of a plan for private lands, cooperation with the licensee and payment for his services, and payment of royalty on stumpage harvested.

Newfoundland

Background

The sawmill industry in Newfoundland is very small and the great majority of sawmills are not mechanized. Newfoundland's only lumber exports are approximately 1 MMfbm/yr. of dunnage, which is rough sawn softwood lumber used for blocking (i.e., as packing material) in shipments of rolls of newsprint. This production is only about 0.19 percent of the total harvest or 2 percent of the total lumber production.

Stumpage Rights and Payments

Stumpage rights are allocated on the basis of an annual permit, which is renewable. A sawmill permit costs Canadian $20, and a cutting permit costs Canadian $10. A sawmill applies to the Province for stumpage rights, specifying the volume and location of timber required (in accordance with established regulations). Rights are granted depending on availability of timber and previous performance of the applicant. Anyone is eligible to apply.

Stumpage fees are paid to the Department of Forest Resources and Lands on the basis of harvested volume, currently Canadian $7 per thousand board feet. The price is set legislatively and, as of January 1983, is indexed annually to the implicit price index of government goods and services and selling price index of lumber. The price is lower in designated salvage areas, or higher where government-built roads are used for harvesting sawlogs (see below). No stumpage is sold through competitive sale.

The government assumes responsibility for the construction of main roads, as well as for forest management, silviculture, fire and disease protection, etc. The roads become public upon completion with unrestricted access. Where these roads are used for harvesting sawlogs, the stumpage rate is 40 percent higher than in areas where the operator provides his own access.

Stumpage and tensive rights differ for pulpwood, but the same formula is used for setting stumpage rates for bott pulpwood and lumber.

Nova Scotia

Background

Nova Scotia is the second smallest province in Canada. About 25 percent of all forested area is Crown land. Average annual harvest for the province over the last five years has been slightly in excess of 3.3 million cubic meters of softwood timber. The sawmilling industry is of the small local variety. About 73 percent of the annual harvest is used in the production of pulp and paper; 27 percent is used for sawlogs.

Most of the province's very limited exports of softwood lumber go to Europe, with only one to two percent of total production being exported to the U.S. Nova Scotia does not export shakes, shingles, or fence.

Stumpage Rights and Payments

Crown timber is allocated to pulp and paper companies by means of long-term licenses (40+ years). One of the pulp and paper companies holding a license also operates a sawmill and produces softwood sawlogs. In 1981 approximately 37 percent of softwood sawlogs produced from Crown lands originated under this particular pulp and paper license agreement. (No agreements of this type have been negotiated in the past ten years.) Under such agreements the mills have the right to standing timber within certain defined areas, with annual allowable harvest set by the provincial government.

The province is responsible for fire prevention and fighting as well as insect and disease protection. However, each pulp and paper company is responsible for silviculture, regeneration and reforestation, and the building of roads. Stumpage rates are negotiated between the province and the company for each license. By and large, rates for the pulp and paper companies are lower (than for sawmills) in exchange for the companies' long-term commitments to bear the costs of forest management, roads, etc.

Wood harvested by pulp and paper companies under license agreements must be used in the mill(s) operated by the licensee.

Agreements negotiated with sawmilling companies accounted for approximately 51 percent of the softwood sawlog harvest from Crown lands in 1981. These agreements are similar to those with pulp and paper companies except that they normally run for 10 years (with a 10-year renew option), and the Province retains forest management responsibilities. The companies do pay for road construction and maintenance. Base stumpage rates are determined by the Province at the time of the agreement, as a percentage of end-product prices, based on tender sales in the area and the rate accorded under similar agreements elsewhere in the Province. Provisions for periodic review and adjustment are included in the agreements; adjustment is based on an indexing mechanism which relates to the market price for softwood lumber of various sizes.

The Nova Scotia government responds to applications for license agreements on a "first-come first-served" basis. One agreement was awarded in 1981, and one in 1982. No payments were received to acquire stumpage rights under this type of arrangement during these years. All stumpage fees are collected by the Nova Scotia Department of Lands and Forest.

In addition to license agreements, the province disposes of small lots of sawlogs by public tender from time to time, either as standing timber or as logs piled at road side. In 1981, such tender sales accounted for about 11 percent of sawlogs sold from Crown lands. These sales involve a small amount of timber, and all terms, including volume and location, are set by the province. Prices are established under a competitive bidding system with an upset price based on the knowledge of going rates in the area.

Ontario

Licensing System

The primary type of timber cutting license in Ontario has traditionally been the Order-in-Council License (OCL). OCL's were introduced in the 1920's to accommodate the timber needs of scattered pulp and paper mills in northern Ontario. During the 1940's and 1950's, sawmill operators began using the system, first for salvage operations and then increasingly for undamaged timber. Technological advances during the 1960's and 1970's led to higher volume demand by sawmill operators, until all of the available yield in the province's forestland was allotted.

OCL's are gradually being replaced by Forest Management Agreements (FMA), which cover large areas and convey many forest management responsibilities to the licensee. Other types of licenses in Ontario are Salvage Licenses, which permit expedient harvesting of damaged timber; District Cutting Licenses, which are issued primarily to individuals; and a few competitively bid Sale Licenses, which are awarded in small areas of high demand.

To acquire stumpage rights on Crown lands in Ontario, an applicant must be incorporated to carry on timber harvesting activities in the province, or own and operate a mill, or have a contract to supply wood to a mill. Stumpage licenses are managed by the Ministry of Natural Resources of Ontario.

Ontario identifies 12 criteria used by the Ministry to evaluate license applications. These fall under three paramount factors, which are timber and land characteristics, viability of the applicant, and impact on the provincial economy. This last factor includes revenues expected, employment to be generated, and other economic, social, and environmental objectives.

In Ontario, the Crown approves management and operating plans which specify the volume to be cut annually on each license. These plans also allow provincial direction of all forest management activities. The extent to which the province also performs these activities depends on the license type or the amount of area which has been licensed to one company within a management unit. The Ministry has divided the entire provincially owned forest into Crown Management Units (CMU) to administer its forest management policies.

Stumpage rights in Ontario are granted under equal terms to Canadian and non-Canadian companies, although exports of logs are banned by the province. A study in 1972 indicated that approximately 40 percent of the total area under license was granted to non-Canadian controlled companies, and the province estimates that this percentage is still accurate.

Payment for Stumpage

The payment system for stumpage in Ontario is also managed by the Ministry of Natural Resources, which maintains procedures for wood measurement and financial services. Stumpage fees consist of an area charge, Crown dues, a bonus price, and in the case of sale licenses, a tendered bid. Interest is charged at one percent a month for all overdue stumpage payments.

The area charge in Ontario is rent for ground used and is not related to the volume of timber cut. It is designed to cover fire protection and other management costs. The charge is uniform and increases by 10 percent a year; it is currently Canadian $60.00 per square mile.

Crown dues cover most of the total stumpage fees. They are specified under the Crown Timber Act of 1980 for major species and product categories. Ontario states that the dues are designed to provide a fair return to the province and are based on past provincial costs to maintain, improve, and regenerate the resource.

The Crown Timber Act specifies two sets of Crown dues. The first set uses a minimum price for the competitively bid sale licenses and also applies to district cutting licenses. The second set applies to volume agreement prices. Volume agreements were introduced in the 1960's to allow for OCL's to be issued for species not being cut by long-term license holders who cut other species in the same area. They now encompass virtually all areas under license.

Regulation 234 of the Crown Timber Act sets out the schedule for the two sets of Crown dues. The dues are then tied to a base and are adjusted in proportion to a six-month, rolling-average Commodity Selling Price Index produced by Statistics Canada, a federal agency. The rolling average is updated quarterly, so both sets of Crown dues change with it on a quarterly basis.

The bonus price is a negotiated payment in addition to Crown dues. It is expected to take into account material differences in the location and quality of stumpage obtained by a firm. It is updated much less frequently than Crown dues, ranging in review period from one to five years depending on the license type.

Order-in-Council Licenses (OCL's)

Order-in-Council Licenses (OCL's), originating in the 1920's, are still the widespread vehicle for stumpage allocation in Ontario. OCL's currently cover 74 percent of timber area under license and represent 83 percent of licenses in issuance. Three hundred ninety eight OCL's are outstanding, but they are expected to be phased out in favor of Forest Management Agreements during the 1980's.

The duration and the area of coverage of OCL's vary widely and are at the discretion of the Ministry of Natural Resources. Other terms and conditions of OCL's are negotiated, but tend to be consistent from one license to the next. Renewals are permitted on OCL's only to complete the harvesting intended for the original term. OCL's may be transferred, but not for the profit of the original licensee.

Forest management activities under OCL's are managed by the Crown through the negotiation of annual operating and management plans. Normally, the province supervises the harvesting and conducts the renewal and improvement of the forest. Fire prevention and insect and disease protection are also largely performed by the Crown. Some forest management activities may be performed by the company with the approval of the Crown.

Stumpage fees for OCL's consist of the basic Crown dues and the negotiated bonus price. The bonus price is reviewed every three years, unless otherwise specified in the license.

Forest Management Agreements

After all softwood in Ontario became fully committed in the 1960's, the province made plans to intensify forest management. Such extensive improvements were needed that major responsibilities had to be assigned to timber licensees. Thus, forest management agreements were developed to replace existing licenses. Currently these agreements have been reached strictly with pulp and paper manufacturers, although the province expects to extend their coverage to all Crown forest areas during the upcoming decade.

Stumpage fees under forest management agreements consist of Crown dues and the negotiated bonus price. The bonus price is reviewed at five-year intervals only.

Other Licenses

Ontario issues Salvage Licenses to hasten harvesting of damaged timber. Fifty Salvage Licenses are outstanding, cover less than one percent of the total area under license. They are issued normally for one-year periods and generally convey no management responsibilities to the licensee. Stumpage fees are negotiated and may be less than the applicable Crown dues.

District Cutting Licenses are issued in Ontario to cover very small areas for one year. Roughly 20,000 of these licenses are issued annually to individual or small commercial operators. The total area under these licenses is less than one percent of the area under license.

Forest management responsibilities under District Cutting Licenses are retained by the Crown. Stumpage fees consist of Crown dues, which are set separately by statute from dues under other license types (except sale licenses), and a bonus price set by the province.

Ontario also issues about 15 competitively bid Sale Licenses per year which cover less than one percent of the total area under license. These are used for the sale of small areas of timber in locations where demand exceeds available supply, usually in high quality hardwood stands. Sale Licenses are normally issued for one or two years and convey no forest management responsibility to the licensee.

For Sale Licenses, the Crown dues and a bonus price set by the district office form the starting bid price. Sealed tender offers above the starting price become the basis for issuance of the license.

Prince Edward Island

Background

There are approximately 20.9 million cubic meters of standing timber in Prince Edward Island (P.E.I.), most of which is generally poor quality. The province owns about 10 percent of the total volume. Many of the 50 small mills comprising the lumber industry are part-time operations supplementing other sources of income.

Most of the lumber is not graded according to official standards and is of non-exportable quality. The response shows that none of the lumber produced was exported during 1981 and 1982. No shakes, shingles or fence are exported from P.E.I.

Stumpage Rights and Payments

There is no allocation process. Stumpage rights and prices for standing timber on Crown land are determined through a competitive bid process. The Crown advertises "stump tenders" (offers of blocks of standing timber) once a year. Advertisements appear in provincial newspapers at least three weeks prior to closing date, and bids are opened at a public meeting. The highest bidder is normally awarded the contract, except where that bidder's record of past performance is demonstrably poor. Stumpage prices are in effect for one year; *i.e.*, the duration of the contract.

A minimum base price ("upset price") may be established by the provincial Forest Service to ensure that bids do not come in below known stumpage rates in the industry. Estimation of expected stumpage values are based on the Forest Service staff estimations of the volume of logs, pulpwood, etc. which could be removed. The price of finished products, transport costs, recovery factor, or mill costs are not used in setting stumpage upset prices.

Rights do not differ between millers and pulpwood contractors. The P.E.I. Forest Service establishes the volume of timber allowed to be cut under the contracts. Once the timber has been paid for and removed, the contractor

may dispose of it within any market as he/she wishes.

Quebec

Background

Québec's supply of standing timber is a mixture of deciduous and coniferous species, generally sparsely scattered and consisting of rather small trees. The vast majority of these timber resources (approximately 90 percent) is located on Crown lands.

Until the early 1970's, the relatively poor quality of Québec's timber combined with inadequate technology made it inefficient and uneconomical for use in the sawmill industry. Consequently, most of Québec's timber was used by the pulp and paper industry, and the only timber allocation system in the province—the timber limit system—had been set up with the needs of that industry for long-term timber supplies in mind.

Early in the 1970's, however, technological advances in the sawmill industry in the form of sophisticated, computerized machinery, made it possible to process this timber into lumber and its by-products. As a result of these changes, Québec started to allocate stumpage under a new system—supply agreements from domanial forests—whose purpose was to increase the profits derived from provincial timberlands and to make the timber resource more accessible to other possible users, including the sawmill industry.

Accordingly, no additional timber limit concessions have been awarded since 1974; all new concessions since then have been in the form of supply agreements from domanial forests. The province, through the retrocession or outright revocation of timber limits as they come up for renewal, aims to make domanial forests the only form of tenure and supply agreements the sole form of allocation of stumpage.

Under both systems, all fees and dues are administratively set by the province through Orders-in-Council, sometimes through negotiation. There is no system of competitive bidding for stumpage in Québec. The specific features of both allocation systems are described below.

Timber Limits

Under the timber limit system, "limit holders" are assigned all rights to standing timber in a given area. The limit holder is responsible for forest management and silviculture within his area. Accordingly, he must submit on a regular basis a forest management plan to the provincial authorities. The government grants an annual cutting license to the limit holder, based on its estimate of the concession's sustained yield possibilities.

Under the timber limit system, the province traditionally provided the sawmill industry with that portion of timber not used by limit holders at lower stumpage dues, given the poor quality of the timber.

Supply Agreements (Domanial Forests)

Domanial forests are public lands managed by the provincial government of Québec. The province enters into supply agreements for standing timber from these forests with any interested companies. For sawmills, the duration of these agreements varies from five to twenty years, depending on each mill's size. In effect, these are fixed-term timber purchase agreements in which the holder's rights to timber are limited to areas specified by the province. This contrasts with the earlier system, whereby the holder can select the areas to be harvested each year within the concession area up to the total amount specified by the cutting license. Another difference between the two systems is that under supply agreements, timber cut from a domanial forest can be used only to supply the holder's mills and cannot be resold.

Renewal of the supply agreements depends on the yield and performance of the agreement holder. The province is responsible for devising and implementing forest management plans. The agreement holder prepares an annual logging plan for submission to the provincial authorities, who then issue annual cutting permits for a specific volume of wood defined by species.

Saskatchewan

Background

Saskatchewan's major industries are farming and mining. Its forest industry is underdeveloped, and softwood timber is small and scattered. In order to attract mills, long-term agreements with negotiable conditions were initiated.

Stumpage

In Saskatchewan, stumpage rights are allocated in two ways: (1) under a timber permit, which is granted annually; and (2) under Forest Management License Agreements (FMLA's). About 13 percent of the production of the softwood industry under investigation is allocated by permit, and the balance by FMLA's.

A timber permit authorizes the holder to harvest a stated volume of timber, is valid for one year, and is renewable. FMLA's are negotiated separately with each company and therefore their terms vary. Stumpage rights can be awarded for up to 20 years with a renew option. Under both arrangements, the Forestry Branch of the provincial government specifies the annual allowable cut. The area to be harvested is selected by the permittee or company, subject to government approval.

For timberland under the permit system, the province is responsible for management, silviculture, main road construction, reforestation, fire and disease prevention, etc. In contrast, under FMLA's the company is completely responsible for forestry management, but other services may be carried out by the province with the company paying partial costs, according to the individual agreement; *e.g.*, the company might pay Canadian $0.20 per cord on all timber harvested toward the costs of reforestation. The province is always responsible for fire and disease protection. Main roads are constructed by the Province up to a negotiated quantity specified in each contract. If a company requires additional roads, it must construct them at its own expense.

Stumpage fees are paid on a monthly (or sometimes quarterly) basis to the Forestry Branch. Timber permit allocations pay on the lumber outturn of the mill. Rates take into account timber quality. FMLA's are of two types: volume agreements and area agreements. Volume agreement stumpage dues are paid on the mill outturn and can be renegotiated periodically. Area agreement fees are paid on scaled volume delivered to the mill yard and are indexed.

Federal Stumpage

Background

Federal Crown lands represent 11 percent of productive timberlands in the Dominion of Canada. Management of the federal timberlands is divided among the Departments of National Defense (DND), Parks Canada (DPC), and Indian and Northern Affairs (DINA). Ninety-five percent is managed by DINA and is located in the Yukon and Northwest Territories. This ninety-five percent is administered under terms of the Territorial Land Act and under Indian Timber Regulations of the Indian Act. The Canadian Forestry Service administers the remaining 5 percent of the federal forests on behalf of the DND and the DPC under appropriate Acts and Agreements.

Of the 11 percent federal Crown lands, 90 percent is inaccessible for economical supply of North American timber markets, and other acreages are

dedicated to parks, defense establishments and Indian Reserves. On about 130 thousand square kilometers (km^2) of national parks, logging is prohibited. Federal lands controlled by DND are dedicated to military matters. Indian Reserves are subject to a wide array of muses including some wood production. Territorial lands are beyond effective market areas, and parks are reserved for recreational uses.

In 1981, 0.8 percent of total Canadian timber (hardwoods plus softwoods) harvested from the federal Crown lands was cut in small quantities from small tracts of federal lands in five provinces and two territories, with most of the volume cut from Indian Reserves.

In every instance, stumpage was allocated according to "volume agreements," whereby an allowable cut is specified. The two largest sales were made from DND lands and one park where cutting is allowed. Each of these two sales was made under the particular stumpage sales procedures of the province in which the timber was located.

All other timber sales on federal lands in the provinces were made under provisions of the Forestry Development and Research Act, Forestry and Timber Regulations. These regulations apparently provide for two systems of stumpage sales:

(a) *Permits:* Where dues (total stumpage fee) do not exceed Canadian $2,500; the Minister may establish stumpage rates.

(b) *Agreements:* Where estimated stumpage dues exceed Canadian $2,500,

—the Minister or Forest Officer shall publicly advertise and invite tenders for cutting;
—after public advertising, an auction shall be held and bids accepted for cutting.

In addition, the *Territorial Lands Act* provides for the issuing of permits in the Yukon and Northwest Territories, with flexibility for setting terms of sale. The Governors may:

—issue permits;
—prescribe terms and conditions for the payment of ground rent;
—prescribe permit fees;
—prescribe dues to be paid for volume of timber cut.

For timberlands within the Indian Reserves, stumpage sales are made under *Indian Timber Regulations.* These provide for two types of permits and one form of license. A permit may be issued to cut timber free of dues to an Indian Group or band members. The second type of cutting permit is granted for selling timber to a member of a band or to a group, with stumpage dues set at prevailing rates for timber cut on band land.

Under the license procedure, tenders to purchase timber on Indian Reserves are invited by public advertising, or, the Minister may dispense with advertising and dispose of timber by any other method he may deem advisable. However, stumpage dues are not to exceed a total of Canadian $2,500. Licenses also provide for the charging of ground rent each year at Canadian $10.00 per sq. mile, and a license fee of Canadian $10.00 annually. The licensee is responsible for and pays all costs of fire protection and suppression on the cutting area under license.

BILLING CODE 3510-25-M

Kansas State University; Decision on Application for Duty-Free Entry of Scientific Instrument

The following is a decision on an application for duty-free entry of a scientific instrument pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued pursuant thereto (15 CFR Part 301 as amended by 47 FR 32517).

A copy of the record pertaining to this decision is available for public review between 8:30 a.m. and 5:00 p.m. in Room 1523, Statutory Import Programs Staff, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, D.C. 20230.

Docket No.: 81-00283R. Applicant: Kansas State University, Department of Chemistry, Manhattan, Kansas 66506. Instrument: Vapor Synthesis Reactor with Accessories. Application is a resubmission, notice of which was published in the **Federal Register** of August 17, 1981.

Comments: No comments have been received with respect to this application. Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign instrument, for such purposes as this instrument is intended to be used, was being manufactured in the United States at the time the foreign instrument was ordered (May 5, 1981). Reasons: This application is a resubmission of Docket Number 81-00283 which was denied without prejudice to resubmission on November 4, 1982 for informational deficiencies. The foreign instrument can vaporize tungsten as well as other heavy transition metals. The National Bureau of Standards advises in its memorandum dated January 31, 1983 that: (1) The capability of the foreign instrument described above is pertinent to the applicant's intended purpose and (2) it knows of no instrument or apparatus of equivalent scientific value to the foreign instrument for the applicant's intended use which was being manufactured in the United States at the time the foreign instrument was ordered.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign instrument, for such purposes as this instrument is intended to be used, which was being manufactured in the United States at the time the foreign instrument was ordered.

BILLING CODE 3510-25-M

Cornell University; Decision on Application for Duty-Free Entry of Scientific Instrument

The following is a decision on an application for duty-free entry of a scientific instrument pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued pursuant thereto (15 CFR Part 301 as amended by 47 FR 32517).

A copy of the record pertaining to this decision is available for public review between 8:30 a.m. and 5:00 p.m. in Room 1523, Statutory Import Programs Staff, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, D.C. 20230.

Docket No.: 82-00172R. Applicant: Cornell University, Department of Chemistry, Baker Laboratory, Ithaca, NY 14853. Instrument: Excimer Laser, Model TE-861M-2 with 505FX and 503RX Quartz Optics and Dye Laser. Application is a resubmission, notice of which was published in the **Federal Register** of May 20, 1982.

Comments: No comments have been received with respect to this application. Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign instrument, for such pruposes as this instrument is intended to be used, was being manufactured in the United States at the time the foreign instrument was ordered (December 30, 1981). Reasons: This application is a resubmission of Docket Number 82-00172 which was denied without prejudice to

resubmission on September 7, 1982 for informational deficiencies. The foreign instrument is a system composed of an excimer laser integrated to a dye laser. At the time the foreign instrument was ordered there were domestic manufacturers of excimer lasers who could combine their respective products with a dye laser produced by another manufacturer. However this would not constitute a "reasonable combination of instruments" within the meaning of § 301.5(d)(1)(i) of the regulations unless (a) the domestic manufacturer offering to furnish the combination undertakes to functionally integrate the instruments as a single operating unit and (b) establish through appropriate test procedures the overall performance specifications of the excimer and dye laser system. (See decisions on Gas Chromatograph/Mass Spectrometer Docket Number 68–00516–01–11000, 33 FR 11097, August 3, 1968 and Docket Number 69–00116–01–11000, 34 FR 13336 and 13337. August 16, 1969.) We note that at the time of order of the foreign instrument there were no such domestic combinations manufactured in the United States.

The foreign instrument provides an amplified spontaneous emission of less than one percent. The National Bureau of Standards advises in its memorandum dated January 4, 1983 that: (1) The amplified spontaneous emission of the foreign instrument is pertinent to the applicant's intended purposes and (2) it knows of no instrument or apparatus of equivalent scientific value to the foreign instrument for the applicant's intended use which was being manufactured in the United States at the time the foreign instrument was ordered.

The Department of Commerce knows of no other combination of instruments of equivalent scientific value to the foreign instrument, for such purposes as this instrument is intended to be used, which was being manufactured in the United States and was being offered as a functionally integrated single instrument at the time the foreign instrument was ordered.

BILLING CODE 3510-25-M

University of California, Regents; Decision on Application for Duty-Free Entry of Scientific Instrument

The following is a decision on an application for duty-free entry of a scientific instrument pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued pursuant thereto (15 CFR Part 301 as amended by 47 FR 32517). A copy of the record pertaining to this decision is available for public review between 8:30 a.m. and 5:00 p.m. in Room 1523, Statutory Import Programs Staff, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, D.C. 20230.

Docket No.: 82-00029R. Applicant: The Regents of the University of California, Davis, UCD Nuclear Magnetic Resonance Facility, Davis, California 95616. Instrument: 11.74 Testla NMR Magnet and Accessories. Application is a resubmission, notice of which was published in the **Federal Register** of December 8, 1981.

Comments: No comments have been received with respect to this application. Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign instrument, for such purposes as this instrument is intended to be used, is being manufactured in the United States at the time the foreign instrument was ordered (December 19, 1979). This application is a resubmission of Docket Number 82-00029 which was denied without prejudice to resubmission on September 7, 1982 for informational deficiencies. The foreign instrument provides an uncompensated drift rate of five hertz and a high field strength of 11.7 Testla. Reasons: The Department of Health and Human Services advises in its memorandum dated December 20, 1982 that: (1) The capability of the foreign instrument described above is pertinent to the applicant's intended purpose; and (2) it knows of no instrument or apparatus of equivalent scientific value to the foreign instrument for the applicant's intended use which was being manufactured in the United States at the time the foreign instrument was ordered.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign instrument, for such purposes as this instrument is intended to be used, which was being manufactured in the United States at the time the foreign instrument was ordered.

BILLING CODE 3510-25-M

University of Texas Health Science Center at Dallas; Decision on Application for Duty-Free Entry of Scientific Instrument

The following is a decision on an application for duty-free entry of a scientific instrument pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued pursuant thereto (15 CFR Part 301 as amended by 47 FR 32517).

A copy of the record pertaining to this decision is available for public review between 8:30 a.m. and 5:00 p.m. in Room 1523, Statutory Import Programs Staff, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, D.C. 20230.

Docket No.: 82-00311. Applicant: University of Texas Health Science Center at Dallas, 5323 Harry Hines Blvd., Dallas, TX 75235. Instrument: Topical Magnetic Resonance System. Manufacturer: Oxford Research Systems, United Kingdom. Intended use of instrument: See Notice on page 41409 in the **Federal Register** of September 20, 1982.

Comments: No comments have been received with respect to this application. Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign instrument, for such purposes as this instrument is intended to be used, was being manufactured in the United States at the time the foreign instrument was ordered (July 7, 1982). Reasons: The foreign instrument provides a 30 centimeter bore size magnet with a large probe. The Department of Health and Human Services advises in its memorandum dated December 15, 1982 that: (1) The capability of the foreign instrument described above is pertinent to the applicant's intended purpose; and (2) it knows of no instrument or apparatus of equivalent scientific value to the foreign instrument for the applicant's intended use which was being manufactured in the United States at the time the foreign instrument was ordered.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign instrument, for such purposes as this instrument is intended to be used, which was being manufactured in the United States at the time the foreign article was ordered.

[FR Doc. 83-6313 Filed 3-10-83; 8:45 am]

BILLING CODE 3510-25-M

University of Washington; Decision on Application for Duty-Free Entry of Scientific Instrument

The following is a decision on an application for duty-free entry of a scientific instrument pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued pursuant thereto (15 CFR Part 301 as amended by 47 FR 32517).

A copy of the record pertaining to this decision is available for public review between 8:30 a.m. and 5:00 p.m. in Room 1523, Statutory Import Programs Staff, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, D.C. 20230.

Docket No.: 83-29. Applicant: University of Washington, Seattle, WA 98195. Instrument: (3) TGA-3A Water Level Gauges and (2) Model 2860 Printers. Manufacturer: Anderaa Instruments, Norway. Intended use of instrument: See Notice on page 53083 in the **Federal Register** of November 24, 1982.

Comments: No comments have been received with respect to this application. Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign instrument, for such purposes as this instrument is intended to be used, is being manufactured in the United States. Reasons: The foreign instrument provides: (a) A deployment capability of greater than one year; (b) a deployment depth of 650 meters; and (c) a serial 10 bit word long and short pulse, capable of interfacing with the translation system in the applicant's possession. The National Oceanic and Atmospheric Administration advises in its memorandum dated January 31, 1983 that: (1) The capabilities of the foreign instrument described above are

pertinent to the applicant's intended purpose; and (2) it knows of no domestic instrument or apparatus of equivalent scientific value to the foreign instrument for the applicant's intended use.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign instrument, for such purposes as this instrument is intended to be used, which is being manufactured in the United States.

BILLING CODE 3510-25-M

National Oceanic and Atmospheric Administration

Receipt of Application for Permit; Dolphin Biology Research Associates, Inc.

Notice is hereby given that an Applicant has applied in due form for a Permit to take marine mammals as authorized by the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361–1407), and the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR Part 216).

1. Applicant: Mr. Randall S. Wells (P319), Dolphin Biology Research Associates, Inc., 163 Siesta Drive, Sarasota, Florida 33581.

2. Type of Permit: Scientific Research.

3. Name and Number of Animals: Atlantic bottlenose dolphins (*Tursiops truncatus*) up to 105.

4. Type of Take: The dolphins are to be captured, sampled, marked and/or tagged, and released. The purpose of the research is to examine a free ranging population of Atlantic bottlenose dolphins to determine the age and sex structure of the population and the relationships between individuals.

5. Location of Activity: Central West Coast of Florida.

6. Period of Activity: Two years.

Concurrent with the publication of this notice in the **Federal Register**, the Secretary of Commerce is forwarding copies of this application to the Marine Mammal Commission and the Committee of Scientific Advisors.

Written data or views, or requests for a public hearing on this application should be submitted to the Assistant Administrator for Fisheries, National Marine Fisheries Service, U.S. Department of Commerce, Washington, D.C. 20235, within 30 days of the publication of this notice. Those individuals requesting a hearing should set forth the specific reasons why a hearing on this particular application would be appropriate. The holding of such hearing is at the discretion of the Assistant Administrator for Fisheries.

All statements and opinions contained in this application are summaries of those of the Applicant and do not necessarily reflect the views of the National Marine Fisheries Service.

Documents submitted in connection with the above application are available for review in the following offices:

Assistant Administrator for Fisheries, National Marine Fisheries Service, 3300 Whitehaven Street, NW., Washington, D.C.; and

Regional Director, National Marine Fisheries Service, Southeast Region, Duval Building, 9450 Koger Boulevard, St. Petersburg, Florida 33702.

Dated: March 7, 1983.

R. B. Brumsted,

Acting Chief, Protected Species Division, Office of Protected Species and Habitat Conservation, National Marine Fisheries Service.

BILLING CODE 3510-22-M

Receipt of Application for Permit; Maine Department of Marine Resources

Notice is hereby given that an Applicant has applied in due form for a Permit to take endangered species as authorized by the Endangered Species Act of 1973 (16 U.S.C. 1531–1543), and the National Marine Fisheries Service regulations governing endangered fish and wildlife permits (50 CFR Parts 217–222).

1. Applicant: Maine Department of Marine Resources (P134C), State House—Station 21, Augusta, Maine 04333.

2. Type of Permit: Scientific Purposes.

3. Summary of Request: To capture and release an unspecified number and to tag up to 1,000 adult shortnose sturgeon (*Acipenser brevirostrum*) to study the spawning stock. The applicant is also requesting to retain specimens accidentally killed or found dead.

4. Location of Activity: Androscoggin, Kennebec, and Sheepscot Rivers, Maine.

5. Period of Activity: 5 years.

Written data or views, or requests for a public hearing on this application should be submitted to the Assistant Administrator for Fisheries, National Marine Fisheries Service, U.S. Department of Commerce, Washington, D.C. 20235, within 30 days of the publication of this notice. Those individuals requesting a hearing should set forth the specific reasons why a hearing on this particular application would be appropriate. The holding of such hearing is at the discretion of the Assistant Administrator for Fisheries.

All statements and opinions contained in this application are summaries of those of the Applicant and do not necessarily reflect the views of the National Marine Fisheries Service.

Documents submitted in connection with the above application are available for review in the following offices:

Assistant Administrator for Fisheries, National Marine Fisheries Service, 3300 Whitehaven Street, NW., Washington, D.C.; and

Regional Director, National Marine Fisheries Service, Northeast Region, 14 Elm Street, Federal Building, Gloucester, Massachusetts 01930.

Dated: March 8, 1983.

[Modification No. 2; Permit No. 363]

University of California

Notice is hereby given that pursuant to the provisions of § 216.33(d) and (e) of the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR Part 216), Scientific Research Permit No. 363 issued to Drs. Jennifer Buchwald, Carl Shipley, and Robin Fisher, University of California, Los Angeles, California 90024 on January 4, 1982, as modified on January 6, 1983 (48 FR 684), is further modified as follows:

Special Condition B–1 is deleted and replaced by:

1. The animals shall be taken by administering drugs as recommended by a competent doctor of veterinary medicine, or by shooting as described in the application.

This modification became effective on March 3, 1983.

The Permit as modified and documentation pertaining to the modification are available for review in the following offices:

Assistant Administrator for Fisheries, National Marine Fisheries Service, 3300 Whitehaven Street, NW., Washington, D.C.; and

Regional Director, National Marine Fisheries Service, Southwest Region, 300 South Ferry Street, Terminal Island, California 90731.

Dated: March 3, 1983.

R. B. Brumsted,

Acting Director, Office of Protected Species and Habitat Conservation, National Marine Fisheries Service.

Public Information Collection Requirement Submitted to OMB for Review

The Department of the Navy has submitted to OMB for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35). Each entry contains the following information: (1) Type of Submission; (2) Title of Information Collection and Form Number if applicable; (3) Abstract statement of the need for and the uses to be made of the information collected; (4) Type of Respondent; (5) An estimate of the number of responses; (6) An estimate of the total number of hours needed to provide the information; (7) To whom comments regarding the information collection are to be forwarded; (8) The point of contact from whom a copy of the information proposal may be obtained.

Extension

Application for MSC Afloat Employment (MSC FORM 12310/1)

This report is used to establish eligibility for Military Sealift Command (MSC) afloat (seagoing) positions. Because of the need for specific licenses and certification information involved in afloat emloyment a custom form is required. This form, used instead of SF-171, is being submitted for extension of approval under the Federal Reports Act.

Applicants for Military Sealift Command afloat employment: 11,250 responses, 16,000 hours.

Forward comments to Edward Springer, OMB Desk Officer, Room 3235, NEOB, Washington, D.C. 20503, and John V. Wenderoth, DOD Clearance Officer, OASD(C), IRMS, IRAD, Room 1A659, Pentagon, Washington, D.C. 20301, telephone (202) 697-1195.

A copy of the information collection proposal may be obtained from Commander, Military Sealift Command (Code M-14), Department of the Navy, Washington, D.C. 20390, telephone (202) 282-2623.

Dated: March 8, 1983.

M. S. Healy,

OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 3810-01-M

Privacy Act of 1974; Amendments to Systems of Records

AGENCY: Department of the Navy (U.S. Marine Corps), DOD.

ACTION: Notice of a new system of records.

SUMMARY: The U.S. Marine Corps proposes to add a system of records to its inventory of systems of records subject to the Privacy Act of 1974. The notice for the new record system is set forth below.

DATES: The proposed action will be effective without further notice on April 11, 1983, unless comments are received which would result in a contrary determination.

ADDRESSES: Send any comments to the system manager identified in the system notice.

FOR FURTHER INFORMATION CONTACT: Mrs. B. L. Thompson, Privacy Act Coordinator, Headquarters, U.S. Marine Corps, Washington, D.C. 20380, telephone 202/694-1452.

SUPPLEMENTARY INFORMATION: The U.S. Marine Corps systems notices for records systems subject to the Privacy Act of 1974, 5 U.S.C. 552a (Pub. L. 93-579; 88 Stat. 1896 *et al.*) were published in the **Federal Register** as follows:

FR Doc. 81-897 (46 FR 6639) January 21, 1981;

FR Doc. 82-674 (46 FR 2829) January 18, 1982;

FR Doc. 82-2406 (46 FR 4328) January 29, 1982;

FR Doc. 82-9405 (46 FR 14939) April 7, 1982;

FR Doc. 82-18001 (46 FR 28964) July 2, 1982.

A new systems report as required by 5 U.S.C. 552a(o) was submitted on February 3, 1983.

M. S. Healy,

OSD Federal Register Liaison Officer, Department of Defense.

March 7, 1983.

MMN00048

SYSTEM NAME:

Performance Evaluation Review Board System

SYSTEM LOCATION:

The Career Planning Branch (Code MMCP), Personnel Management

Division, Headquarters, U.S. Marine Corps, Washington, D.C. 20380

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Any member or former member of the Marine Corps who has submitted a petition to the Performance Evaluation Review Board.

CATEGORIES OF RECORDS IN THE SYSTEM:

The file contains identifying data on the petitioner, date of request, action requested, activity member attached to at time of alleged error, any subsequent board decisions and record of petitioner notification.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

10 U.S. Code 5031; 5 U.S. Code 301

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

INTERNAL:

Headquarters, U.S. Marine Corps—Used by the Career Planning Branch to monitor petitions submitted to the Performance Evaluation Review Board. Information is used to determine the status of any particular request at any given time and to record statistical information/trends of petitions.

Board for Correction of Naval Records will have access to cases forwarded to that agency for resolution of petitioner's request.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are stored on magnetic disks and back-up generations are stored on magnetic tape; paper records are stored in file folders.

RETRIEVABILITY:

Records are accessed by social security number and docket number.

SAFEGUARDS:

System information is protected by the following software features: user account number; user identification number; password and the file is restricted to authorize personnel only. The office where the terminal is located is locked after official working hours. Access to the building where the terminal and the computer system is located is protected by security guards who require positive identification for admission.

RETENTION AND DISPOSAL:

Records are retained 1 year after completion of case and then destroyed by erasing magnetic tapes. Back-up tapes are maintained approximately 3 years and then erased.

SYSTEM MANAGER(S) AND ADDRESS:

Commandant of the Marine Corps (Code MMCP), Headquarters, U.S. Marine Corps, Washington, D.C. 20380.

NOTIFICATION PROCEDURES:

Inquiries should be directed to the system manager at the address indicated.

RECORD ACCESS PROCEDURES:

Requests for access should be addressed to the Commandant of the Marine Corps (Code MMCP), Headquarters, U.S. Marine Corps, Washington, D.C. 20380. Written requests for information should contain the full name of the individual, social security number and signature. Individuals may inquire in person at the Career Planning Branch (Code MMCP), Federal Office Building #2, Columbia Pike and Arlington Ridge Road, Arlington, Virginia. For personal visists, the individual should provide military indentification or driver's license for proof of identification.

RECORD SOURCE CATEGORIES:

Information in the system is obtained from the individual, Manpower Management System and the Performance Evaluation Review Board.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None.

[FR Doc. 83-6817 Filed 3-10-83; 8:45 am]
BILLING CODE 3810-01-M

DEPARTMENT OF ENERGY

Economic Regulatory Administration

[ERA Case No. 53146-3804-03-04-82]

Availability of Tentative Staff Analysis; Powerplant and Industrial Fuel Use Act of 1978

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Notice of availability of tentative staff analysis.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) hereby gives notice of availability of the Tentative Staff Analysis on the pending prohibition order proceedings relating to the Virginia Electric and Power Company's (Vepco) Possum Point Generating Station Units 3 and 4 (hereafter referred to as Possum Point 3 and 4), located in Dumfries, Virginia.

The proposed prohibition orders for Possum Point 3 and 4, issued on May 16, 1980 (45 FR 34346 (May 22, 1980)) and January 17, 1980 (45 FR 5365 (January 23, 1980)), respectively, will, if finalized, prohibit the units from burning petroleum or natural gas as a primary energy source. ERA's Tentative Staff Analysis concludes that the findings of technical capability and financial feasibility required by former section 301(b) of FUA can be made, and accordingly, recommends that final prohibition orders be issued to Possum Point 3 and 4. The Tentative Staff Analysis does not represent ERA's decision to issue final prohibition orders, however. That decision will be made following the expiration of the comment period established below, and will be based upon the evidence contained in the entire record of the proceeding, including any comments received in response to this notice.

The prohibition order procedures for facilities electing continued coverage under former section 301 of FUA [1] are found at 10 CFR 501.51, and 504.7. Additional information on the proceedings and a discussion of the Tentative Staff Analysis appear in the **SUPPLEMENTARY INFORMATION** section, below.

DATES: Written comments on the proposed prohibition orders and the Tentative Staff Analysis are due on or before March 25, 1983. A request for a public hearing must be made within the same 14 day period. (See explanation of comment periods in the **SUPPLEMENTARY INFORMATION** section below.)

ADDRESSES: Fifteen copies of written comments or any requests for public hearing should be submitted to: Economic Regulatory Administration, Case Control Unit (Fuel Use Act), Room GA-093, 1000 Independence Avenue, SW., Washington, D.C. 20585.

[1] The Omnibus Budget Reconciliation Act of 1981, Pub. L. 97-35 (OBRA), which became law on August 13, 1981, amended Title III of FUA in several important respects, including the limitation of DOE's unilateral authority to issue orders prohibiting the use of petroleum and natural gas or certain mixtures including these fuels as a primary energy source in an existing electric powerplant. Under former section 301, DOE could order the involuntary conversion of such powerplants. On October 1, 1981, ERA issued final rules pursuant to OBRA (46 FR 48118), providing procedures whereby an existing powerplant issued a proposed prohibition order under former section 301 (b) or (c) of FUA as of August 13, 1981, the date of enactment of OBRA, could elect to continue the current prohibition order proceeding under the provisions of former section 301. In accordance with the procedures provided, Vepco, on November 23, 1981, notified ERA of its election to have Possum Point 3 and 4 remain subject to former section 301(b) of FUA and thus to become "electing powerplants" as defined in 10 CFR 500.2.

ERA Case No. 5316-3804-03-04-82 should be printed clearly on the outside of the envelope and on the document contained therein.

FOR FURTHER INFORMATION CONTACT:

Steven E. Ferguson, Director, Fuels Conversion Division, Economic Regulatory Administration, Department of Energy, 1000 Independence Avenue, SW., Forrestal Building, Room GA-093, Phone: (202) 252-1316.

Marya Rowan, Esq., Office of General Counsel, Department of Energy, Forrestal Building, Room 6B-222, Washington, D.C. 20585, Phone: (202) 252-2967

The public file containing a copy of the Tentative Staff Analysis and other documents and supporting materials on this proceeding is available for inspection upon request at: the Department of Energy Freedom of Information Reading Room, Forrestal Building, Room 1E-190, 1000 Independence Avenue, SW., Washington, D.C., Monday through Friday, 8:00 a.m.-4:00 p.m.

SUPPLEMENTARY INFORMATION: ERA issued proposed prohibition orders to Vepco's Possum Point 3 and 4 on May 16, 1980 (45 FR 34346 (May 22, 1980)) and January 17, 1980 (45 FR 5365 (January 23, 1980)), respectively, commencing thereby proceedings designed to prohibit the use of petroleum or natural gas as the primary energy source in these units if the required findings of section 301(b) of FUA, discussed below, could be made. In accordance with 10 CFR 501.51(b) of the FUA procedural regulations applicable to existing powerplants, the issuance of the proposed prohibition orders to Possum Point 3 and 4 commenced an initial three-month public comment period, in each case, respectively, during which period interested parties, including Vepco, were given the opportunity to challenge ERA's initial finding that Possum Point 3 and 4 have or previously had the technical capability to use coal as their primary energy source. During this same period, Vepco and any other interested parties were required to furnish ERA with any evidence bearing upon the other statutory findings which former section 301(b) of FUA requires ERA to make prior to the issuance of final prohibition orders to Possum Point 3 and 4. Vepco was additionally required, during this period, to identify any exemptions for which it believed Possum Point 3 and 4 might qualify, but was not required to submit evidence supporting the claim of entitlement to any exemption at that time. The initial public comment period on the Possum Point 3 and 4 proposed prohibition orders expired on August 22, 1980 and April 25, 1980 respectively. No comments contrary to ERA's initial finding were received. Vepco did, however, submit evidence relating to the other statutory findings that ERA has to make under former section 301(b) and tentatively identified the potential exemption qualifications that might be asserted against the application of final prohibition orders to Possum Point 3 and 4. (These potential exemption qualifications were noted and identified in the respective Notices of Intent to Proceed, cited below.)

On the basis of the evidence available to it following the expiration of the initial comment periods, ERA determined to continue with the order proceedings involving Possum Point 3 and 4 and, accordingly, issued its Notices of Intent to proceed with the proceedings on July 9, 1982, (47 FR 31040 (July 16, 1982)) and January 8, 1981 (46 FR 3269 (January 14, 1981)), respectively. These actions commenced a second three-month public comment period in each case, which periods expired on August 16, 1982 and April 16, 1981, respectively, without receipt of comment and without the demonstration by Vepco of its entitlement to any of the potential exemptions identified during the initial comment periods as potentially available to Possum Point 3 and 4.

Tentative Staff Analysis: Summary

Since the expiration of the second public comment periods, the ERA staff has prepared a Tentative Staff Analysis in which it concludes that the findings required by former section 301(b) of FUA can be made and supported on the basis of reliable, probative and substantial evidence in the complete administrative record. The required findings include the initial finding that, under former section 301(b)(1), the powerplants have or previously had the technical capability to use coal as a primary energy source; the finding under former section 301(b)(2) that the powerplants could have the technical capability to use coal (if they do not currently have such capability) without substantial physical modification of the units or substantial reduction in their rated capacities; and the finding under former section 301(b)(3) that it is financially feasible to use coal as the primary energy source in the powerplants.

The criteria which ERA used in assessing the evidence in support of the required findings are described in the proposed prohibition orders.

Finding of Technical Capability

The finding of technical capability for Possum Point 3 and 4 is based upon design specifications which indicate that the units were designed and constructed to burn coal as their primary energy source (Contract Data Sheets dated November 27, 1961 and December 21, 1954). Evidentiary statements on the record, submitted by Vepco, indicate that the units have so operated in the past (Unit #3, 1955 thru 1969; Unit #4, 1962 thru 1969) and that their current conversion will require no modifications to the boilers and will result in no deratings of unit capacity (Vepco letter dated February 24, 1983, submitted in response to an ERA request for additional information).

Finding of Financial Feasibility

The finding of financial feasibility is based upon calculations conducted by the ERA staff using the general cost calculation formula prescribed by 10 CFR 504.12, which indicates that the use of coal as the primary energy source for Possum Point 3 and 4 will not substantially exceed the cost of using imported petroleum. (The costs used in the calculations are consistent with those by Vepco in the letter dated February 24, 1983, referred to, above). The ERA staff calculations conclude that the savings over the remaining useful life of the units that will result from the use of coal, as opposed to the use of oil, will amount to $29 million for Possum Point 3 and $106 million for Possum Point 4. In accordance with 10 CFR 504.6(f)(1), the ERA staff, therefore, presumed that the use of coal as the primary energy source for the units is financially feasible. In addition to ERA's cost calculations, however, the record contains evidence submitted by Vepco (letter dated March 25, 1980) which indicates that the conversion to and operation of Possum Point 4 on coal is financially feasible. The staff review of the entire record also did not reveal any potential inability on the part of Vepco to raise the necessary capital to finance the conversions.

To the contrary, the record indicates that the conversion of Possum Point 3 was commenced in 1981 and that of Possum Point 4 in 1980 (letter from Vepco dated February 24, 1983, submitted in responses to ERA's request for additional information).

Procedures

The publication of this Notice of Availability would normally commence a 45-day written comment period on the Tentative Staff Analysis. Vepco has, however, by letter dated February 28,

1983, requested that the public comment periods be reduced to the minimum period permitted under ERA regulations which is 45 days from the time of publication of the proposed orders (10 CFR 501.51(b)). This minimum had, at the time of Vepco's request, been exceeded. Accordingly, ERA, in granting Vepco's request, is herby giving notice of a reduced comment period of 14 days provided for the purpose of receiving comment on the proposed prohibition orders and the Tenttive Staff Analysis. The comment period shall commence with the publication of this notice. Any requests for a public hearing must also be made during this 14-day period. If a hearing is requested, it will be held in accordance with Subpart C of 10 CFR Part 501.

The Tentative Staff Analysis does not constitute a decision by ERA to issue final prohibition orders to Possum Point 3 and 4. At the close of the comment period established by this notice, ERA shall determine whether the final prohibition orders will be issued, based upon its review of the entire administrative record of the proceedings, as required by 10 CFR 501.51(c).

Any final prohibition orders issued, together with a summary of the basis therefor, will be published in the **Federal Register**. The final orders shall not take effect earlier than sixty days after such publications.

Issued in Washington, D.C. on March 7, 1983.

Robert L. Davies

Deputy Director, Office of Fuels Programs, Economic Regulatory Administration.

BILLING CODE 6450-01-M

Revocation of Export Authorizations and Presidential Permits

AGENCY: Economic Regulatory Administration (ERA), DOE.

ACTION: Revocation of Export Authorizations PP–1–A and PP–37–A and Presidential Permits PP–1 and PP–37.

SUMMARY: Pursuant to the Order published herein, ERA rescinds the export authorizations granted to the Arizona Public Service Company (APS) in ERA Dockets No. PP–1–A and No. PP–37–A, and the companion Presidential Permits. On November 23, 1982, APS notified the DOE that it had disconnected service under export authorization PP–1–A at the request of its customer, Comision Federal de Electricidad de Agua Prieta (CFE/Agua Prieta). On the same day, APS also notified DOE that service authorized in PP–37 was discontinued on October 19, 1982 at the request of its customer, CFE/Sonoyta. Interconnection facilities for both transmission lines were removed by APS on or before December 31, 1982.

FOR FURTHER INFORMATION CONTACT:

Lise Courtney M. Howe, Office of General Counsel (GC–11), Department of Energy, Forrestal Building, Mail Stop 6F–094, 1000 Independence Avenue, S.W., Washington, D.C. 20585, (202) 252–2900

Garet Bornstein, Division of Petroleum and Electricity (RG–44), Office of Fuels Programs, Department of Energy, Forrestal Building, Room GA–017, 1000 Independence Avenue, S.W., Washington, D.C. 20585, (202) 252–5935

SUPPLEMENTARY INFORMATION:

Order Rescinding Export Authorizations and Presidential Permits Issued to Arizona Public Service Company ERA Dockets PP–1 and PP–37

The Arizona Public Service Company (APS) notified the Department of Energy (DOE) on November 23, 1982, that it had disconnected service under export authorization PP–1–A, at the request of the customer, Comision Federal de Electricidad de Agua Prieta (CFE/Agua Prieta) and that it also had disconnected service under export authorization PP–37–A, at the request of its customer, Comision Federal de Electricidad Division Baja, California (CFE/Sonoyta). The interconnection facilities for both transmission lines were removed by APS on or before December 31, 1982.

Presidential Permit No. PP–1 originally was issued to the Arizona Edison Company, Inc. (AEC), on July 30, 1941, in Docket No. IT–5331. The Permit was transferred to APS on August 28, 1952, when the AEC merged with the Central Arizona Light and Power Company, becoming the Arizona Public Service Company. The electricity exported was delivered to the CFE/Agua Prieta via a transmission line running from Fairview Station, north of Douglas, Arizona, to the Mexican border at Agua Prieta, Sonora, Mexico, with an authorized maximum transmission rate of 5,500 KW per year. On August 12, 1981, APS was authorized to increase the delivery voltage of the electric transmission facilities from a three phase 2.4 kilowatt system to a 7.2/12.5 kilowatt system.

APS discontinued service and removed the interconnection facilities, including two spans of interconnecting wire, recloser device, circuit breaker, capacitor banks, and meter on or before December 31, 1982. CFE as been providing energy to meet its own requirements since December 1980.

On October 20, 1965, a second Presidential Permit, PP–37, was issued to APS in Docket No. E–7224. Construction of this line provided transmission of electricity to CFE for the community of Sonoyta, Sonora, Mexico. The transmission facility crossed the international boundary near Lot 4 of U.S. Customs Immigration Reserve at Lukeville, Arizona, with an authorized transmission rate of 400 KW per year.

Service to CFE for Sonoyta was discontinued at CFE's request on October 19, 1982. In addition, the interconnection facilities, which included a 30-foot span of wire, a transmission metering pole and line, and current transformers, also were removed by APS on or before December 31, 1982. CFE now is supplying sufficient energy to meet Sonoyta's needs.

DOE Finds:

(A) That the termination of service by APS under export authorization PP–1–A and PP–37–A, to CFE/Agua Prieta and to CFE/Sonoyta, respectively, and the removal of the interconnection facilities at the U.S./Mexican border, authorized in Presidential Permits No. PP–1 and PP–37, are consistent with the public interest, because such terminations have been requested by APS's customers.

DOE Orders:

(1) The authorization to export electric energy to CFE/Agua Prieta, issued pursuant to section 202(e) of the Federal Power Act in Docket No. IT–5331 (PP–1–A), and the Presidential Permit PP–1, issued pursuant to Executive Order 10485, as amended, are rescinded.

(2) The authorization to export electric energy to CFE/Sonoyta, issued pursuant to section 202(e) of the Federal Power Act in Docket No. E–7224 (PP–37–A), and Presidential Permit PP–37, issued pursuant to Executive Order 10485, as amended, are rescinded.

Issued in Washington, D.C. on March 3, 1983.

Rayburch Hanzlik,

Administrator, Economic Regulatory Administration.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. ER83-329-000]

The Cleveland Electric Illuminating Co.; Filing

March 7, 1983.

The filing Company submits the following:

Take notice that on February 17, 1982, The Cleveland Electric Illuminating Company (CEI) tendered for filing an executed Service Agreement and Exhibits A and B thereto, providing for the sale to the City of Cleveland, Ohio of 40 MW of power and associated energy generated by Big Rivers Electric Corporation, Henderson, Kentucky, at the cost of CEI of purchasing it from Ohio Power Company, and transmitted from the 345 kv interconnection point on CEI's Juniper-Canton Line with Ohio Power Company to the City in accordance with the terms and conditions of CEI's FERC Transmission Service Tariff.

CEI has requested waiver of the FERC's 60-day notice requirement in order to permit commencement of transmission service on February 1, 1983.

Any person desiring to be heard or to protest said application should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR § 385.211 and § 385.214). All such petitions or protests should be filed on or before March 18, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this application are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. TA83-2-32-000]

Colorado Interstate Gas Co.; Proposed Changes in Rates Under Purchased Gas Adjustment Clause Provision

March 7, 1983.

Take notice that Colorado Interstate Gas Company (CIG), on February 24, 1983, tendered for filing proposed changes in its FERC Gas Tariff, Original Volume No. 1. The proposed changes would increase the commodity rate under CIG's jurisdictional rate schedules by .24 cent per Mcf and decrease the demand rate by 34.00 cents per Mcf. This filing reflects a net annual decrease in purchased gas costs of approximately $5.0 million.

The filing was made to enable CIG to reflect in its rates, pursuant to Section 21 of CIG's FERC Gas Tariff, Original Volume No. 1, net decreased purchased gas costs it will experience as of April 1, 1983, as the result of a rate filing made by Northwest Pipeline Corporation.

CIG requests that the instant filing be made effective on April 1, 1983.

Copies of the filing have been served upon the Company's jurisdictional customers and other interested persons, including public bodies.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Sections 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such petitions or protests should be filed on or before March 17, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. TA83-2-34-000]

Florida Gas Transmission Co.; Proposed Changes in Rates and Charges Under Purchased Gas Adjustment and Incremental Pricing Provisions

March 7, 1983.

Take notice that on February 28, 1983, Florida Gas Transmission Company (FGT), P.O. Box 44, Winter Park, Florida 32790, tendered for filing the following tariff sheets to its F.E.R.C. Gas Tariff to be effective April 1, 1983.

Original Volume No. 1

30th Revised Sheet No. 3–A
Seventh Revised Sheet No. 3–B

Original Volume No. 2

20th Revised Sheet No. 128

The aforementioned tariff sheets contain changes in FGT's resale rates, under Rate Schedules G and I, and in Rate Schedule T–3 resulting from the purchased gas adjustment clause and incremental pricing provision of FGT's Tariff. FGT proposes to make the rate changes effective April 1, 1983.

Southern Natural Gas Company (Southern) supplies natural gas to FGT under SNG's rate schedule OCDL–1 and also under SNG's Rate Schedule AOL–1. FGT states that it has been advised by Southern that Southern intends to file alternative tariff sheets (55th Revised Sheet No. 4–A and Substitute 55th Revised Sheet No. 4–A) with a proposed effective date of April 1, 1983. FGT's 30th Revised Sheet No. 3–A of Original Volume No. 1 and 20th Revised Sheet No. 128 of Original Volume No. 2 reflect Southern's rates pertaining to FGT as set forth on Southern's Substitute 55th Revised Sheet No. 4–A.

The net effect of the above-mentioned adjustments for Rate Schedule G and I is to decrease the currently effective rate by 1.523¢/therm. Based on estimated G and I sales for the next 12 months, this results in an annual revenue decrease of approximately $12,932,700. The net effect on the above-mentioned adjustments for Rate Schedule T–3 is a decrease of 1.23¢/Mcf. The annual effect on revenues from Rate Schedule T–3 is a decrease of approximately $784,100.

According to FGT, the changes contained on 30th Revised Sheet No. 3–A and 20th Revised Sheet No. 128 are made in accordance with the purchased gas cost adjustment and incremental pricing provision in its tariff (Section 15, General Terms and Conditions). FGT also states that Seventh Revised Sheet No. 3–B contains the estimated incremental pricing surcharges by customer by month for the adjustment period.

FGT states that a copy of its filing has been served on all customers receiving gas under its FERC Gas Tariff, Original Volume Nos. 1 and 2 and interested State Commissions and is being posted.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Sections 211 and 214 of the Commission's Rules should be filed on or before March 17, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies

of this application are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. CP83-212-000]

Michigan Wisconsin Pipe Line Co.; Application

March 8, 1983.

Take notice that on March 2, 1983, Michigan Wisconsin Pipe Line Company, One Woodward Avenue, Detroit, Michigan 48226 (Applicant), filed in Docket No. CP83-212-000 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing an interruptible transportation service for Michigan Consolidated Gas Company (MichCon), all as more fully set forth in the application on file with the Commission and open to public inspection.

The application indicates that pursuant to an agreement dated February 24, 1983, MichCon has agreed to sell to Indiana Glass Company (Indiana Glass) up to 4,000 dt equivalent per day and 1,500,000 dt equivalent of natural gas per year subject to interruption to the extent the gas supplies are required by MichCon to provide adequate service to its distribution customers. The term of the agreement is for an initial period of two years commencing from the date of first deliveries and is extendable for successive two-year periods. In an affidavit by the president and general manager of Indiana Glass, included in the application, it is estimated that the purchase of gas from MichCon would result in annual fuel cost savings of approximately $1.2 million and would likely prevent permanent extensive lay-offs of employees. Applicant further states that upon authorization of the requested service, 425 employees currently laid off would be recalled.

Applicant states that it has entered into an agreement with MichCon dated February 23, 1983, which provides for the transportation of up to 4,000 dt equivalent per day of natural gas. Applicant would receive the natural gas from MichCon by displacement at an existing point of delivery at Applicant's Willow Run Station in Ypsilanti Township, Washtenaw County, Michigan, and would deliver thermally equivalent volumes to Indiana Gas Company, Inc. (Indiana Gas), at an existing delivery point located near Muncie in Delaware County, Indiana. Since the transportation service is by displacement, Applicant states, MichCon has agreed to pay it two cents for each dt equivalent of natural gas delivered to Indiana Gas for the account of MichCon based on Applicant's administrative and general expenses.

Any person desiring to be heard or to make any protest with reference to said application should on or before March 21, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-6235 Filed 3-10-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket Nos. RP81-49-009 and RP82-62-001]

Natural Gas Pipeline Company of America; Change in Rate Design

March 7, 1983.

Take notice that on February 18, 1983, Natural Gas Pipeline Company of America (Natural) submitted for filing as part of its FERC Gas Tariff, Third Revised Volume No. 1, the below listed tariff sheets to be effective April, 1, 1983:

Fiftieth Revised Sheet No. 5
Nineteenth Revised Sheet No. 5A
Eighth Revised Sheet No. 5B

Natural states that the purpose of the filing is to revise its rates, which are currently designed on the *United* method, to reflect a *Seaboard* method of rate design the redesigned rates are being filed pursuant to Article II of Natural's Stipulation and Agreement at Docket No. RP81-49-000.

A copy of this filing has been mailed to Natural's jurisdictional customers, all parties to Docket Nos. RP81-49 and RP82-62 and interested state regulatory agencies.

Any person desiring to be heard or to protest said filing should file a motion to interve or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with the requirements of Rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such motions or protests must be filed on or before March 17, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. RP83-50-000]

Northwest Pipeline Corp.; Tariff Filing

March 7, 1983.

Take notice that on February 25, 1983, Northwest Pipeline Corporation ("Northwest") tendered for filing and acceptance the following tariff sheets.

Original Volume No. 2 Tariff

Seventh Revised Sheet No. 2
Third Revised Sheet No. 2-B

First Revised Volume No. 1 Tariff

Seventh Revised Sheet No. 10-A

Pursuant to the provision contained on Sheet Nos. 2 and 2-B of Northwest's Volume No. 2 Tariff and Section 7.3 of Rate Schedule T-1 in its First Revised Volume No. 1 Tariff, Northwest is filing to reflect new Fuel Reimbursement Percentages to be effective April 1, 1983

based on the calendar year ending December 31, 1982.

The proposed effective date of the tendered tariff sheets is April 1, 1983.

A copy of this filing has been served on Pacific Interstate Transmission Company, Northwest's jurisdictional customers, and affected state regulatory commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with sections 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such petitions or protests should be filed on or before March 17, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public convenience.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. TA 83-2-37-001 (DCA83-2)]

Northwest Pipeline Corp.; Change in Rates Pursuant to Demand Charge Credit Adjustment

March 7, 1983.

Take notice that Northwest Pipeline Corporation ("Northwest"), on February 15, 1983 tendered for filing proposed changes in its FERC Gas Tariff, First Revised Volume No. 1, filed pursuant to the Commission's order issued March 29, 1974, at Docket No. RP74-72 and Article 13.7 of Northwest's FERC Gas Tariff, First Revised Volume No. 1. The change in rates will result in .000¢ per therm for Rate Schedules ODL-1, DE-1 and PL-1. As more fully explained in the instant filing, the demand charge credit adjustment reflected on Northwest's Statement of Rates is zero.

Northwest is concurrently filing a notice of change in rates applicable to Article 16, Purchased Gas Cost Adjustment Provision contained in its First Revised Volume No. 1 Tariff. Both rate adjustments are reflected on the tendered First Amended Eighth Revised Sheet No. 10 which is proposed to become effective April 1, 1983.

Copies of this filing have been served upon Northwest's jurisdictional customers and affected state commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the FERC, 825 North Capitol Street, N. E., Washington, D.C. 20426, in accordance with Sections 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such petitions of protests should be filed on or before March 17, 1983. Protests will be considered by the Commission in determining the appropriate actions to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-6236 Filed 3-10-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. TA83-2-39-000 (PGA 83-2 and IPR 83-2)]

Pacific Interstate Transmission Co.; Proposed Changes in FERC Gas Tariff Pursuant to Purchased Gas Cost Adjustment Provision

March 7, 1983.

Take notice that Pacific Interstate Transmission Company (Pacific Interstate) on March 1, 1983, tendered for filing as part of its FERC Gas Tariff, Original Volume No. 2, the following sheets:

Twenty-second Revised Sheet No. 4
Sixth Revised Sheet No. 4-A
Seventeenth Revised Sheet No. 5

Pacific Interstate states that these tariff sheets are issued pursuant to Pacific Interstate's purchased Gas Cost Adjustment (PGA) provision and incremental pricing provision as set forth in Sections 16 and 17, respectively, of the General Terms and Conditions of its FERC Gas Tariff, Original Volume No. 2. The proposed effective date of these tendered tariff sheets and the rates reflected thereon is April 1, 1983.

Pacific Interstate also states that the above-tendered tariff sheets reflect a proposed April 1, 1983 Pacific Interstate Rate Schedule S-G-1 commodity rate of 268.34¢ per decatherm, an increase of 15.25¢ per decatherm from the 253.34¢ perdecatherm rate effective October-2, 1982, the date of the last S-G-1 commodity rate change, and that such increase reflects a current Gas Cost Adjustment and a change in the Surcharge Adjustment.

Pacific Interstate states that the Current Gas Cost Adjustment is based on an annualized gas cost increase of $4,585 and that the Surcharge Adjustment is designed to recover, over a six-month period beginning April 1, 1983 an amount of $2,911.66, which is the amount of Pacific Interstate's Unrecovered Purchased Gas Cost account at December 31, 1982. Furthermore, Pacific Interstate states that there is no incremental pricing surcharge adjustment applicable to this filing, since its only customer has no surcharge absorption capability.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, Washingto, D.C. 20426, in accordance with Section 211 and 214 of the Commission's rules of Practice and Procedure (18 CFR 385.211, 385.214). All such petitions or protests should be filed on or before March 17, 1983. Protest will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. TA83-2-7-000(PGA83-2)]

Southern Natural Gas Co.; Proposed Changes in FERC Gas Tariff

March 7, 1983.

Take notice that Southern Natural Gas Company (Southern), on March 1, 1983, tendered for filing proposed changes in its FERC Gas Tariff, Sixth Revised Volume No. 1, to become effective April 1, 1983. Such filing is pursuant to Section 17 (Purchased Gas Adjustment) of the General Terms and Conditions of Southern's FERC Gas Tariff, Sixth Revised Volume No. 1. The proposed changes would increase Southern's rates as a result of the following items.

(1) A Current Adjustment pursuant to § 17.3 of the General Terms and Conditions of Southern's Tariff, reflecting an annual decrease in the cost of purchased gas to jurisdictional customers of $19,074,923 or approximately 3.837¢ per Mcf.

(2) A Surcharge Adjustment for Unrecovered Purchased Gas Costs of 14.019¢ per Mcf which is an increase of 3.758¢ from the present Surcharge Adjustment. This Surcharge Adjustment will amortize the $69,701,070 balance in Southern's Deferred Account which was accumulated during the period July through December, 1982 over the estimated sales for the twelve-month period commencing April 1, 1983. Southern has requested a waiver of the Commission's Regulations and section 17.4 of its tariff in order to amortize the current unrecovered balance over a twelve-month period. In the event Southern's requested waiver is denied, Southern's Surcharge Adjustment, effective April 1, 1983, would become 37.091¢ per Mcf, an increase of 26.830¢ over the present Surcharge Adjustment rate.

(3) A Surcharge Adjustment for estimated Demand Charge Credits pursuant to § 9.6(3) of the General Terms and Conditions of Southern's Tariff of (.006¢) per Mcf which is an increase of .065¢ from the present Surcharge Adjustment.

Pursuant to § 282.602(a)(1)(ii) of the Commission's Regulations, Southern is also filing Seventh Revised Sheet No. 45R with a proposed effective date of April 1, 1983. Such tariff sheet reflects Southern's projected incremental pricing surcharge for the six-month period beginning April 1, 1983 to be zero.

Copies of the filing were served upon the Company's jurisdictional customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E. Washington, D.C. 20426, in accordance with the Commission's Rules of Practice and Procedure (18 CFR 385.211 or 385.214). All such petitions or protests should be filed on or before March 17, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wising to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[Docket No. TA83-2-41-000 PGA83-2]

Southwest Gas Corp.; Change in Rates Pursuant to Purchased Gas Cost Adjustment

March 7, 1983.

Take notice that Southwest Gas Corporation ("Southwest") on February 28, 1983 tendered for filing Eighteenth Revised Sheet No. 10 and Sixth Revised Sheet No. 10A pursuant to Section 9, Purchased Gas Adjustment Clause ("PGA"), of the General Terms and Conditions contained in its FERC Gas Tariff, Original Volume No. 1. The purpose of said filing is to reflect a decrease in rates occasioned by a decrease in rates from Southwest's northern Nevada sole supplier of gas, Northwest Pipeline Corporation, effective April 1, 1983. The proposed increase in rates is April 1, 1983.

Southwest states that a copy of this filing has been mailed to the Nevada Public Service Commission, the California Public Utilities Commission, Sierra Pacific Power Company and CP National.

Any person desiring to be heard, or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Sections 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such petitions or protests should be filed on or before March 17, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. TA83-1-17-000]

Texas Eastern Transmission Corp.; Proposed Changes in FERC Gas Tariff

March 7, 1983.

Take notice that Texas Eastern Transmission Corporation (Texas Eastern) on March 1, 1983 tendered for filing as part of its FERC Gas Tariff, Fourth Revised Volume No. 1, the following sheet: Substitute Third Substitute Sixty-fourth Revised Sheet No. 14.

The above sheet is being issued in substitution for that sheet filed February 15, 1983 which reflected a revision to Texas Eastern's semiannual PGA tracking adjustment to be effective February 1, 1983. The sole purpose of the above substitute sheet is to reflect the Commission's approved reduction in Texas Eastern's Rate Schedule SS-II and ISS-II space charges. Such reduced space charges were accepted to be effective January 1, 1983 by the Commission's order dated February 16, 1983 in Docket No. TA83-1-17.

The proposed effective date of the above substitute tariff sheet is February 1, 1983.

Copies of the filing were served on Texas Eastern's jurisdictional customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of

Practice and Procedure. All such motions or protests should be filed on or before March 17, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. RP83-53-000]

United Gas Pipe Line Co.; Proposed Changes in FERC Gas Tariff

March 7, 1983.

Take notice that United Gas Pipe Line Company (United), on March 1, 1983, tendered for filing proposed changes in its FERC Gas Tariff, First Revised Volume No. 1. The proposed changes are based on the twelve-month period ending November 30, 1982, as adjusted, and would increase jurisdictional revenues by $88,053,188.

United states that the proposed rate increase is necessary to permit it to recover its jurisdictional cost of service for the test period of twelve months ended November 30, 1982, as adjusted. The cost of service reflects increases in all levels of cost, except gas costs which are reflected in the cost of service on the basis of the average unit cost of gas purchased as contained in United's PGA rate change which became effective January 1, 1983, as reflected on Sixty-First Revised Sheet No. 4 to United's FERC Gas Tariff.

Copies of the filing have been served upon United's jurisdictional customers and the public service commissions of the States of Alabama, Florida, Louisiana and Mississippi, and the Texas Railroad Commission.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Sections 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such petitions or protests should be filed on or before March 17, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

VOL 48 49
ISS
MR 11 1983

The above notices of determination were received from the indicated jurisdictional agencies by the Federal Energy Regulatory Commission pursuant to the Natural Gas Policy Act of 1978 and 18 CFR 274.104. Negative determinations are indicated by a "D" before the section code. Estimated annual production (PROD) is in million cubic feet (MHCF). An (*) before the Control (JD) number denotes additional purchasers listed at the end of the notice.

The applications for determination are available for inspection except to the extent such material is confidential under 18 CFR 275.206, at the Commission's Division of Public Information, Room 1000, 825 North Capitol St., Washington, D.C. Persons objecting to any of these determinations may, in accordance with 18 CFR 275.203 and 275.204, file a protest with the Commission within fifteen days after publication of notice in the **Federal Register**.

Categories within each NGPA section are indicated by the following codes:

Section 102–1: New OCS lease
- 102–2: New well (2.5 mile rule)
- 102–3: New well (1000 ft. rule)
- 102–4: New onshore reservoir
- 102–5: New reservoir on old BCS leave

Section 107–DP: 15,000 feet or deeper
- 107–GB: Geopressured brine
- 107–CS: Coal seams
- 107–DV: Devonian shale
- 107–PE: Production enhancement
- 107–TF: New tight formation
- 107–RT: Recompletion tight formation

Section 108: Stripper well
- 108–SA: Seasonially affected
- 108–ER: Enhanced recovery
- 108–PB: Pressure buildup

Kenneth F. Plumb,

Secretary.

The above notices of determination were received from the indicated jurisdictional agencies by the Federal Energy Regulatory Commission pursuant to the Natural Gas Policy Act of 1978 and 18 CFR 274.104. Negative determinations are indicated by a "D" before the section code. Estimated annual production (PROD) is in million cubic feet (MMCF). An (*) before the Control (JD) number denotes additional purchasers listed at the end of the notice.

The applications for determination are available for inspection except to the extent such material is confidential under 18 CFR 275.206, at the Commission's Division of Public Information, Room 1000, 825 North Capitol St., Washington, D.C. Persons objecting to any of these determinations may, in accordance with 18 CFR 275.203 and 275.204, file a protest with the Commission within fifteen days after publication of notice in the **Federal Register**.

Categories within each NGPA section are indicated by the following codes:

Section 102–1: New OCS lease
102–2: New well (2.5 mile rule)
102–3: New well (1000 ft rule)
102–4: New onshore reservoir
102–5: New reservoir on old BCS lease
Section 107–DP: 15,000 feet or deeper
107–GB: Geopressured brine
107–CS: Coal seams
107–DV: Devonian shale
107–PE: Production enhancement
107–TF: New tight formation
107–RT: Recompletion tight formation
Section 108: Stripper well
108–SA: Seasonally affected
108–ER: Enhanced recovery
108–PB: Pressure buildup

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-6346 Filed 3-10-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. ER83-345-000]

Connecticut Light and Power Co.; Filing

March 8, 1983.

Take notice that on February 22, 1983, Connecticut Light and Power Company (CL&P) tendered for filing as an initial rate schedule an agreement (the Exchange Agreement) between CL&P, the Hartford Electric Light Company (HELCO), Western Massachusetts Electric Company ((WMECO), and together with HELCO and CL&P, the NU Companies) and Montaup Electric Company (Montaup). The Exchange Agreement, dated as of June 30, 1982, provides for an exchange of excess capacity and associated energy from the NU Companies' system, "system power" for an equal amount of capacity from certain generating units on Montaup's system (the Exchange Units). CL&P states that the timing of the exchanges cannot be accurately estimated but that the NU Companies and Montaup would enter into an exchange only when it was economic for both to do so.

Montaup will pay an hourly energy reservation charge to the NU Companies for each hour of each exchange in an amount equal to the capacity exchange amount (expressed in kilowatts) for such exchange, times an amount not to exceed $0.007 per kilowatt. Montaup will pay a fuel charge to the NU Companies for each exchange in an amount equal to the kilowatt hours provided by the NU Companies during such exchange, times a fuel charge rate. The fuel charge is based on the heat rate and the New England Power Exchange's replacement fuel price of the generating unit(s) which the NU Companies determine to be available to provide system power at the time of an exchange.

The NU Companies will pay Montaup a fuel charge for each exchange in an amount equal to the kilowatthours provided by Montaup during such exchange, times a fuel charge rate. The fuel charge rate associated with Montaup's generating units is based on the heat rate and the New England Power Pool Exchange's replacement fuel price for each such unit. The NU Companies will pay a variable maintenance charge to Montaup for any portion of an exchange made from any gas turbine type generating units equal to the product of the applicable variable maintenance rate (expressed in $/hour of operation) and the NU Companies' fractional entitlement in each such unit. The NU Companies will also pay an additional variable maintenance charge associated with Montaup's gas turbine type generating units equal to the product of the applicable additional variable maintenance charge rate (expressed in $/hour of operation) and the NU Companies' fractional entitlement in each such unit.

CL&P requests an effective date of June 30, 1982 and therefore request wavier of the Commission's notice requirements.

Copies of this filing have been served upon HELCO, WMECO and Montaup.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426. in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before March 23, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-6338 Filed 3-10-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. ER83-341-000]

Gulf States Utilities Co.; Filing

March 8, 1983.

Take notice that on February 23, 1983, Gulf States Utilities Company (Gulf States) tendered for filing an Agreement between Gulf States and the Louisiana municipality of New Roads, together with Service Schedules LTS (Transmission Service), ES (Emergency Service), RE (Replacement Energy) and ECON (Economy Energy Supply).

GSU proposes that the Agreement and related Service Schedules become effective no later than June 1, 1983, or the date that all facilities required to implement the Interconnection Agreement are in service. GSU expects service under the filing to commence on June 1, 1983.

Copies of the filing have been served on the municipality of New Roads, the Public Utility Commission of Texas and the Louisiana Public Service Commission.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211, and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before March 23, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the

Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. ER80-594-000]

Iowa Power and Light Co.; Settlement Compliance Report

March 8, 1983.

Take notice that on February 18, 1983, Iowa Power and Light Company filed a Settlement Compliance Report pursuant to the Commission's order issued February 2, 1983.

Any person desiring to be heard or to protest this filing should file comments with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, on or before March 24, 1983. Comments will be considered by the Commission in determining the appropriate action to be taken. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-6330 Filed 3-10-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP83-212-000]

Michigan Wisconsin Pipe Line Co.; Application

March 8, 1983.

Take notice that on March 2, 1983, Michigan Wisconsin Pipe Line Company, One Woodward Avenue, Detroit, Michigan 48226 (Applicant), filed in Docket No. CP83-212-000 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing an interruptible transportation service for Michigan Consolidated Gas Company (MichCon), all as more fully set forth in the application on file with the Commission and open to public inspection.

The application indicates that pursuant to an agreement dated February 24, 1983, MichCon has agreed to sell to Indiana Glass Company (Indiana Glass) up to 4,000 dt equivalent per day and 1,500,000 dt equivalent of natural gas per year subject to interruption to the extent the gas supplies are required by MichCon to provide adequate service to its distribution customers. The term of the agreement is for an initial period of two years commencing for the date of the first deliveries and is extendable for successive two-year periods. In an affidavit by the president and general manager of Indiana Glass, included in the application, it is estimated that the purchase of gas from MichCon would result in annual fuel cost savings approximately $1.2 million and would likely prevent permanent extensive lay-offs of employees. Applicant further states that upon authorization of the requested service, 425 employees currently laid off would be recalled.

Applicant states that it has entered into an agreement with MichCon dated February 23, 1983, which provides for the transportation of up to 4,000 dt equivalent per day of natural gas. Applicant would receive the natural gas from MichCon by displacement at an existing point of delivery at Applicant's Willow Run Station in Ypsilanti Township, Washtenaw County, Michigan and would deliver thermally equivalent volumes to Indiana Gas Company, Inc. (Indiana Gas), at an existing delivery point located near Muncie in Delaware County, Indiana. Since the transportation service is by displacement, Applicant states, MichCon has agreed to pay it two cents for each dt equivalent of natural gas delivered to Indiana Gas for the account of MichCon based on Applicant's administrative and general expenses.

Any person desiring to be heard or to make any protest with reference to said application should on or befor March 21, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regualtions under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without futher notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. ER80-181-000]

Northern States Power Company (Wisconsin); Refund Compliance Report

March 8, 1983.

Take notice that on February 12, 1982, Northern States Power Company (Wisconsin) submitted for filing a refund compliance report pursuant to the Commission's letter order dated February 20, 1981 approving settlement.

Any person desiring to be heard or to protest this filing should file comments with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, on or before March 24, 1983. Comments will be considered by the Commission in determining the appropriate action to be taken. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. ER83-340-000]

Otter Tail Power Co.; Filing

March 8, 1983.

Take notice that on February 22, 1983, Otter Tail Power Company (Otter Tail) tendered for filing rate schedules covering scheduling and dispatching service provided to Cooperative Power Association (Association) and Central Power Electric Cooperative (Central). An effective date of April 1, 1983 is requested for the increase, estimated at approximately $7,617 per year, in rates to be charged the Association per Supplement No. 3 to Otter Tail's Rate Schedule FERC No. 154. An effective date of March 20, 1983 is requested for the increase estimated at approximately $2,175 in rates to be charged Central per Supplement No. 3 to Otter Tail's Rate Schedule FERC No. 171.

Otter Tail requests waiver of the Commission's notice requirements to allow these two schedules to become effective on April 1, 1983 and March 20, 1983, respectively.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before March 22, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection

[Docket No. ER83-338-000]

Pacific Power & Light Co.; Filing

March 8, 1983.

Take notice that Pacific Power & Light Company (Pacific) on February 22, 1983, tendered for filing an Agreement providing for temporary wheeling services for the City of Gillette, Wyoming.

Pacific requests an effective date of January 1, 1983, and therefore requests waiver of the Commission's notice requirements.

Copies of the filing were supplied to the City of Gillette, Wyoming and the Public Service Commission, the State of Wyoming.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before March 22, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Puget Sound Power & Light Co.; Filing

March 8, 1983.

Take notice that Puget Sound Power & Light Company (Puget), on February 18, 1983, tendered for filing Puget's Schedule 5 to Appendix 1 to the Residential Purchase and Sale Agreement between Puget and the Bonneville Power Administration (BPA). Schedule 5 to Appendix 1 reflects BPA's average system cost calculations.

Puget requests an effective date of October 1, 1982, and therefore requests waiver of the Commission's notice requirements.

Puget has sent notice of this filing to the parties who commented to BPA regarding Schedule 5.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before March 25, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-6336 Filed 3-10-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. ER83-342-000]

Vermont Electric Power Company, Inc.; Filing

March 8, 1983.

Take notice that on February 23, 1983, Vermont Electric Power Company, Inc. (VELCO) tendered for filing an amendment to its Three-Party Power Agreement with Central Vermont Public Service Company and Green Mountain Power Corporation. That agreement assigns to VELCO the entitlements of Central Vermont and Green Mountain to the output of the Vermont Yankee nuclear power plant located in Vernon, Vermont. VELCO, in turn, makes the output of that unit available to all Vermont utilities elected to participate. The proposed amendment is necessitated by a filing submitted by Vermont Yankee Nuclear Power Corporation to begin the collection of decommissioning charges. The amendment would permit VERLO to pass those decommissioning charges through to the Vermont participants.

VELCO requests that the proposed amendment be accepted effective April 24, 1983 but that it be permitted to defer inclusion of decommissioning charges until September 1, 1983 to track the relief requested by Vermont Yankee. If the decommissioning charge had been in effect for the full calendar year 1983, the increase to the Vermont participants would have been 7.8 percent or $4,561,150. Of that amount approximately one-half represents the collection of taxes. If Vermont Yankee is able to obtain a favorable tax ruling, which it is seeking, the dollars collected for taxes will be refunded to its customers, including the Vermont participants.

VELCO states that copies of this filing, and of the complete Vermont Yankee filing, have been served on all affected customers and state regulatory commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211,

385.214). All such motions or protests should be filed on or before March 23, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-6337 Filed 3-10-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. ER83-343-000]

Vermont Yankee Nuclear Power Corp.; Filing

March 8, 1983.

Take notice that on February 23, 1983, Vermont Yankee Nuclear Power Corporation (Vermont Yankee) tendered for filing an amendment to Section 7 of the Power Contract between Vermont Yankee and its ten owner-sponsors governing the sale of the output of Vermont Yankee's nuclear power plant located in Vernon, Vermont. The amendment would permit Vermont Yankee to begin collecting decommissioning charges. The ten owner-sponsors of Vermont Yankee are: Central Vermont Public Service Corporation, Green Mountain Power Corporation, New England Power Company, The Connecticut Light and Power Company, Central Maine Power Company, Public Service Company of New Hampshire, the Hartford Electric Light Company, Western Massachusetts Electric Company, Montaup Electric Company, and Cambridge Electric Light Company.

Vermont Yankee requests that the proposed amendment to Section 7 of the Power Contract be permitted to become effective April 24, 1983 but that it be permitted to defer inclusion of the decommissioning charge until September 1, 1983. The proposed amendment to Section 7 of the Power Contract would, according to the Company, have increased revenues by 7.8 percent or $8,293,000 if the decommissioning charge had been in effect for the full calendar year 1983. Of that amount approximately one-half represents the collection of taxes. Vermont Yankee indicates that it is seeking a ruling that decommissioning charges are not subject to federal income tax. If it prevails, the amounts collected for federal income taxes will be refunded to its customers.

Vermont Yankee states that copies of the filing have been served upon each of the customers taking power from Vermont Yankee, both the owner-sponsors and the secondary purchasers who have contracted for a portion of the entitlement of an owner-sponsors. Copies of the filing have also been served on each state regulatory commission.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 29426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before March 23, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. ID-2032-000]

William F. Miller; Application

March 8, 1983.

Take notice that on February 15, 1983, William F. Miller filed an application pursuant to Section 305(b) of the Federal Power Act to hold the following positions:

Director, Pacific Gas & Electric Company
Director, Fireman's Fund Insurance Company

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before March 31, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

Office of Hearings and Appeals

Issuance of Proposed Decisions and Orders; Period of January 10 Through January 28, 1983

During the period of January 10 through January 28, 1983, the proposed decisions and orders summarized below were issued by the Office of Hearings and Appeals of the Department of Energy with regard to applications for exception.

Under the procedural regulations that apply to exception proceedings (10 CFR Part 205, Subpart D), any person who will be aggrieved by the issuance of a proposed decision and order in final form may file a written notice of objection within ten days of service. For purposes of the procedural regulations, the date of service of notice is deemed to be the date of publication of this Notice or the date an aggrieved person receives actual notice, whichever occurs first.

The procedural regulations provide that an aggrieved party who fails to file a Notice of Objection within the time period specified in the regulations will be deemed to consent to the issuance of the proposed decision and order in final form. An aggrieved party who wishes to contest a determination made in a proposed decision and order must also file a detailed statement of objections within 30 days of the date of service of the proposed decision and order. In the statement of objections, the aggrieved party must specify each issue of fact or law that it intends to contest in any further proceeding involving the exception matter.

Copies of the full text of these proposed decisions and orders are available in the Public Docket Room of the Office of Hearings and Appeals, Room 1111, New Post Office Building, 12th and Pennsylvania Ave. NW., Washington, D.C. 20461, Monday through Friday, between the hours of 1:00 p.m. and 5:00 p.m., except Federal holidays.

March 3, 1983.

George B. Breznay,

Director, Office of Hearings and Appeals.

Piedmont Petroleum Company, Middleburg, Virginia; HEE-0045, No. 2, Distillate

On October 13, 1982, Piedmont Petroleum Company (Piedmont) filed an Application for Exception from the Energy Information Administration's reporting requirements. The exception request, if granted, would permit Piedmont to be relieved of the obligation to file Form EIA–9A, "No. 2 Distillate Price Monitoring Report." On January 25, 1983, the Department of Energy issued a Proposed Decision and Order which determined that the exception request be denied.

Rogers Fuels, Inc., Middleburg, Virginia, HEE–0045, No. 2, Distillates

Rogers Fuels, Inc. (Rogers) filed an Application for Exception from the reporting requirements of the Energy Information Administration. The exception request, if granted, would relieve Rogers of the responsibility of filing Form EIA–9A. On January 26, 1983, the Department of Energy issued a Proposed Decision and Order which determined that the exception request be denied.

Spring Brook Ice & Fuel Company, Waterville, Maine, HEE–0048, No. 2, Distillates

On November 10, 1982, Spring Brook Ice & Fuel Company (Spring Brook) filed an Application for Exception from the reporting requirements of the Energy Information Administration. The exception request, if granted, would permit Spring Brook to discontinue filing a monthly report, Form EIA–782B, "Monthly No. 2 Distillate Sales Report." On January 27, 1983, the Department of Energy issued a Proposed Decision and Order which determined that the exception request be denied.

BILLING CODE 6450-01-M

Objection to Proposed Remedial Orders Filed; Week of January 17 Through January 21, 1983

During the week of January 17 through January 21, 1983, the notices of objection to proposed remedial orders listed in the Appendix to this Notice were filed with the Office of Hearings and Appeals of the Department of Energy.

Any person who wishes to participate in the proceeding the Department of Energy will conduct concerning the proposed remedial orders described in the Appendix to this Notice must file a request to participate pursuant to 10 CFR 205.194 within 20 days after publication of this Notice. The Office of Hearings and Appeals will then determine those persons who may participate on an active basis in the proceeding and will prepare an official service list, which it will mail to all persons who filed requests to participate. Persons may also be placed on the official service list as non-participants for good cause shown.

All requests to participate in these proceedings should be filed with the Office of Hearings and Appeals, Department of Energy, Washington, D.C. 20461.

March 3, 1983.

George B. Breznay,

Director, Office of Hearings and Appeals.

Brownlie, Wallace, Armstrong & Bander, Inc., Denver, Colorado; HRO–0112, Crude Oil

On January 20, 1983, Brownlie, Wallace, Armstrong, Bander, Inc. (BWAB), 555 17th Street, Suite 3300, Denver, Colorado 80202, filed a Notice of Objection to a Proposed Remedial Order that the Economic Regulatory Administration of the DOE issued to the firm on December 22, 1982. In the PRO the ERA determined that during the period from January 1, 1979 through December 31, 1980, BWAB misapplied the provisions of 10 CFR 212.79 and Ruling 1980–3 and as a result improperly classified and priced crude oil sold from the Burlington-Northern 11–21 property located in McKenzie County, North Dakota. According to the PRO the BWAB violation resulted in $370,234.34 of overcharges.

Mira Oil Co., Spring Valley, New York; HRO–0113, Motor Gasoline

On January 20, 1983, Mira Oil Co., 53 Main Street, Spring Valley, New York 10977, filed a Notice of Objection to a Proposed Remedial Order which the DOE Northeast District Office of Enforcement issued to the firm on December 2, 1982. In the PRO the Northeast District found that during the period June 1, 1979 through December 31, 1979, Mira charged prices in excess of the maximum lawful selling price in its sales of motor gasoline. According to the PRO the Mira Oil Co. violation resulted in $112,949.96 of overcharges.

Osborne Energy Corp., Houston, Texas; HRO–0116, Crude Oil

On January 21, 1983, Osborne Energy Corp., Eleven Greenway Plaza, Suite 626, Houston, Texas 77046, filed a Notice on Objection to a Proposed Remedial Order which the DOE Houston Office of Special Counsel of the Economic Regulatory Administration issued to the firm on January 6, 1983. In the PRO the Houston Office found that during the period October 1980 through December 1980, Osborne, a crude oil reseller, charged prices for crude oil in excess of the actual purchase price without providing any service or function traditionally and historically associated with the resale of crude oil. According to the PRO Osborne received illegal revenues for the period October through December 1980 totalling $3,002,029.71. In the exercise of its administrative prosecutorial discretion, the ERA proposes in the PRO that the firm refund $978,637, the amount of its gross profits from sales of crude oil during the October through December 1980 period, plus the appropriate interest.

Transco Trading Company and Refiners & Producers Marketing, Inc., Midland, Texas; HRO–0114, Crude Oil

On January 21, 1983, Kenneth Cory, Controller of the State of California c/o Lobel, Novins & Lamont, 1523 L Street, NW., Washington, D.C. 20005, filed a Notice of Objection to a Proposed Remedial Order which the DOE Office of Special Counsel of the Economic Regulatory Administration issued to Transco on December 21, 1983. On February 3, 1983, Transco 230 West Wall Street, Suite 612, Commerce Bank Building, Midland, Texas 79709, filed a Notice of Objection to the PRO. In the PRO the Office of Special Counsel found that during the period July 1978 through May 1980, Transco, a crude oil reseller, sold crude oil at prices in excess of those permitted under 10 C.F.R. Part 212. According to the PRO the Transco violation resulted in $21,187,493.46 of overcharges.

Zephyr Oil & Trading Co., Houston, Texas; HRO–0115, Motor Gasoline

On January 21, 1983, Zephyr Oil & Trading Co., 4801 Woodway, Suite 300–D, Houston, Texas 77024 filed a Notice of Objection to a Proposed Remedial Order which the DOE Northeast District Office of Enforcement issued to the firm on December 21, 1982. In the PRO the Northeast District found that during the period July 1, 1978 through October 30, 1979, Zephyr charged prices in excess of the Maximum Lawful Selling Price for Motor Gasoline. According to the PRO the Zephyr violation resulted in $618,627.00 of overcharges.

BILLING CODE 6450-01-M

Objection to Proposed Remedial Order Filed; Period of January 24 Through February 4, 1983

During the period of January 24 through February 4, 1983, the notice of objection to proposed remedial order listed in the Appendix to this Notice was filed with the Office of Hearings and Appeals of the Department of Energy.

Any person who wishes to participate in the proceeding the Department of Energy will conduct concerning the proposed remedial order described in the Appendix to this Notice must file a request to participate pursuant to 10 CFR 205.194 within 20 days after publication of this Notice. The Office of Hearings and Appeals will then determine those persons who may participate on an active basis in the proceeding and will prepare an official service list, which it will mail to all persons who filed requests to participate. Persons may also be placed on the official service list as non-participants for good cause shown.

All requests to participate in this proceeding should be filed with the Office of Hearings and Appeals, Department of Energy, Washington, D.C. 20461.

March 3, 1983.

George B. Breznay,

Director, Office of Hearings and Appeals.

Kelly Trading Corp., Houston, Texas; HRO–0117, Crude Oil

On February 2, 1983, Kelly Trading Corp. (Kelly), 5065 Westheimer, Suite 805 East, Houston, Texas 77056, filed a Notice of Objection to a Proposed Remedial Order which the DOE's Economic Regulatory Administration (ERA) issued to the firm on January 6, 1983. In the PRO the ERA found that during the period January through November, 1980, Kelly violated the crude oil pricing regulations found in 10 CFR 212.186, 210.62 and 205.22. According to the PRO the Kelly violation resulted in $360,906.25 of overcharges.

BILLING CODE 6450-01-M

Cases Filed; Week of February 4 Through February 11, 1983

During the Week of February 4 through February 11, 1983, the appeals and applications for other relief listed in the Appendix to this Notice were filed with the Office of Hearings and Appeals of the Department of Energy. A submission inadvertently omitted from an earlier list has also been included.

Under DOE procedural regulations, 10 CFR Part 205, any person who will be aggrieved by the DOE action sought in these cases may file written comments on the application within ten days of service of notice, as prescribed in the procedural regulations. For purposes of the regulations, the date of service of notice is deemed to be the date of publication of this Notice or the date of receipt by an aggrieved person of actual notice, whichever occurs first. All such comments shall be filed with the Office of Hearings and Appeals, Department of Energy, Washington, D.C. 20461.

George B. Breznay,

Director, Office of Hearings and Appeals.

March 3, 1983.

LIST OF CASES RECEIVED BY THE OFFICE OF HEARINGS AND APPEALS

[Week of February 4 through February 11, 1983]

Date	Name and location of applicant	Case No.	Type of submission
Feb. 3, 1983	Texaco Inc., Washington, D.C.	HRZ-0134	Interlocutory order. If granted: The Office of Special Counsel would be required to supplement its response to the Motion for Discovery filed by Texaco Inc. (Case No. HRO-0077).
Feb. 7, 1983	Economic Regulatory Administration/Texaco Inc., Dallas Tex.	HRS-0021	Request for stay. If granted: The proceeding involving the Proposed Remedial Order issued to Texaco Inc. (Case No. HRO-0012) would be stayed through March 31, 1983, pending settlement negotiations between the firm and the Economic Regulatory Administration.
Feb. 8, 1983	Economic Regulatory Administration/Texaco Inc., Dallas Tex.	HRS-0029	Request for stay. If granted: The proceeding involving the Proposed Remedial Order issued to Texaco Inc. (Case No. BRO-1467) would be stayed through March 31, 1983, pending settlement negotiations between the firm and the Economic Regulatory Administration.
Feb. 9, 1983	Economic Regulatory Administration/Texaco Inc., Dallas Tex.	HRS-0030	Request for stay. If granted: The proceeding involving the Proposed Remedial Order issued to Texaco Inc. (Case No. HRO-0032) would be stayed through March 31, 1983, pending settlement negotiations between the firm and the Economic Regulatory Administration.
Feb. 10, 1983	Edward G. Connor, Washington, D.C.	HFA-0018	Appeal of an information request denial. If granted: The January 10, 1983, Freedom of Information Request Denial issued by the Director of Personnel would be rescinded and Edward G. Connor would receive access to further documents regarding the vacancy announcement number 82-21C, Program Analysts GM-345-15.

BILLING CODE 6450-01-M

Issuance of Proposed Decision and Order; Week of February 14 Through February 18, 1983

During the week of February 14 through February 18, 1983, the proposed decision and order summarized below was issued by the Office of Hearings and Appeals of the Department of Energy with regard to an application for exception.

Under the procedural regulations that apply to exception proceedings (10 CFR Part 205, Subpart D), any person who will be aggrieved by the issuance of a proposed decision and order in final form may file a written notice of objection within ten days of service. For purposes of the procedural regulations, the date of service of notice is deemed to be the date of publication of this Notice or the date an aggrieved person receives acutal notice, whichevef occurs first.

The procedural regulations provide that an aggrieved party who fails to file a Notice of Objection within the time period specified in the regulations will be deemed to consent to the issuance of the proposed decision and order in final form. An aggrieved party who wishes to contest a determination made in a proposed decision and order must also file a detailed statement of objections within 30 days of the date of service of the proposed decision within 30 days of the date of service of the proposed decision and order. In the statement of objections, the aggrieved party must specify each issue of fact of law that it intends to contest in any further proceeding involving the exception matter.

Copies of the full text of these proposed decisions and orders are available in the Public Docket Room of the Office of Hearings and Appeals, Room 1111, New Post Office Building, 12th and Pennsylvania Avenue, N.W., Washington, D.C. 20461, Monday through Friday, between the hours of 1:00 p.m. and 5:00 p.m., except Federal holidays.

March 3, 1983.

George B. Breznay,

Director, Office of Hearings and Appeals.

Wyoming Energy Conservation, Cheyenne, Wyoming, HEE-0035

The Wyoming Energy Conservation Office filed an Application for Exception from the provisions of 10 CFR 455.83. The exception request, if granted, would permit Wyoming in utilizing grant monies under Cycle IV of the Institutional Conservation Program, to spend more than five percent of the funds to defray administrative expenses associated with the program.

BILLING CODE 6450-01-M

Motion To Terminate Proceeding

AGENCY: Office of Hearings and Appeals, DOE.

ACTION: Notice of Motion To Terminate Investigation of Common Carrier Pipelines, Ex Parte 308 (Sub-No. 1), Case No. DOP-0003.

SUMMARY: On February 10, 1983, the Economic Regulatory Administration (ERA) of the Department of Energy filed a motion with the Office of Hearings and Appeals (OHA) requesting that OHA issue an order terminating the investigation of common carrier petroleum pipelines initiated by the Bureau of Investigation and Enforcement of the Interstate Commerce Commission on February 24, 1976. Responsibility for conducting that investigation was transferred to the ERA upon the establishment of the Department of Energy. Comments on the ERA motion may be filed within 20 days of the publication of this Notice in the **Federal Register**. An original and one copy of all comments should be sent to: The Office of Hearings and Appeals, Department of Energy, Washington, D.C. 20461. Comments should contain the OHA case number (DOP–0003) and a certificate of service indicating that copies of the comments have been served upon the parties named on the service list in the Appendix to this Notice, and upon Theodore A. Miles, Assistant General Counsel for Administrative Litigation, Department of Energy, 1000 Independence Ave., S.W., Washington, D.C. 20585. Comments should not contain any proprietary, confidential information.

SUPPLEMENTARY INFORMATION: On February 24, 1976, the Interstate Commerce Commission (ICC) initiated an investigation of Common Carrier Pipelines, pursuant to Section 11 of the Clayton Act, 15 U.S.C. 21, and Sections 12 and 13 of the Interstate Commerce Act, 49 U.S.C. 12 and 13. the purpose of the ICC investigation, which was designated Ex Parte 308 (Sub-No. 1), was to determine whether ownership and active control of common carrier petroleum pipelines by their shippers may tend substantially to lessen competition or to create a monopoly, in violation of Section 7 of the Clayton Act, 15 U.S.C. 18. All common carrier pipelines subject to the provisions of Part I of the Interstate Commerce Act were made respondents in the proceeding.

On July 8, 1976, the respondents were served with eight interrogatories propounded by the ICC Bureau of Investigations and Enforcement (BIE), concerning their operations during the period from 1960 through 1975. Approximately 93 respondents submitted answers in whole or in part. In an order served on March 2, 1977, an ICC administrative law judge directed those respondents that had not responded to the interrogatories do so within 30 days, and specified procedures to maintain the confidentiality of the material submitted in response to the interrogatories. On June 7, 1977, the BIE served two additional interrogatories on the respondents. On September 30, 1977, the ICC modified the March 2 order by specifying procedures for the transmittal of confidential material to the Federal Trade Commission Bureau of Competition; and the ICC established a number of conditions regarding use by the Bureau of Competition of confidential data which the Bureau received in connection with its participation in Ex Parte 308 (Sub-No. 1).

Pursuant to the Department of Energy Organization Act, 42 U.S.C. 7101 *et seq.*, as implemented by E.O. 12009, FR 46267(September 15, 1977), and DOE Delegation Order No. 0204–4, the existing proceedings under Ex Parte No. 308 (Sub-No. 1) were transferred from the ICC to the Economic Regulatory Administration (ERA) of the DOE. On January 4, 1978, the Administrator of the ERA determined that the Office of Enforcement of the ERA would perform all functions previously performed in Ex Parte 308 (Sub-No. 1) by the BIE. 43 FR 1639-40 (January 11, 1978). All records in this matter which were in the possession of the BIE were subsequently transferred to the DOE Office of Enforcement. In addition, in that January 11, 1978 Federal Register Notice, the DOE Office of Administrative Review (OAR), the predecessor of the office of Hearings and Appeals, was designated to perform all functions in connection with the proceeding that were previously performed by the members of the ICC or by the administrative law judge designated by the ICC to hear and decide any aspect of the matter. *Id.* Accordingly, all records which were held by the Secretdary of the ICC and the administrative law judge designated by the ICC to oversee the investigation were transferred to the OAR.

On January 6, 1978, the OAR issued a Decision and Order that stayed the provisions of the September 30 ICC order regarding disclosure of confidential information to the Bureau of Competition, pending a determination with respect to motions for reconsideration of the September 30 order which had been filed by several respondents. *Common Carrier Pipelines,* 1 DOE ¶82,020 (1978). On February 10, 1978, the OAR issued a Proposed Decision and Order in which it specified the procedures that it proposed to follow in connection with Ex Parte 308 (Sub-No. 1). *Investigation of Common Carrier Pipelines,* Case No. DOP-0003, 43 FR 7017 (February 17, 1978). Written comments on the Proposed Decision were invited, and the OAR received 17 submissions on behalf of 43 respondents in the investigation. No final procedures for this proceeding were ever issued.

On February 10, 1983, the ERA filed a "motion to Terminate Proceeding" with the OHA. After summarizing the history of this proceeding, the motion states:

> At this time, the Administrator of the ERA has determined not to pursue the investigation of common carrier pipelines initiated by the ICC Bureau of Investigations and Enforcement.

Accordingly, the ERA requests that the OHA issue an order terminating Ex Parte No. 308 (Sub-No. 1). If the ERA motion were granted, the OHA would dismiss the proceeding pending before it (Case No. DOP-0003) and all confidential material furnished to the ICC would be treated pursuant to the provisions of the March 2, 1977 order. In accordance with that order, the Administrative Litigation Division of the DOE Office of General Counsel, as counsel for the DOE Office of Enforcement, the successor to the BIE, would return to the supplying respondents all confidential material in the possession of the Office of Enforcement, and the Office of Hearings and Appeals, as successor to the ICC and the administrative law judge, would seal all confidential information in its possession. *(1)* A complete copy of the ERA motion may be inspected in the Public Docket Room of the Office of Hearings and Appeals, Room 1111, New Post Ofice Building, 12th and Pennsylvania Ave., N.W., Washington, D.C. 20461, Monday through Friday, between the hours of 1:00 p.m. and 5:00 p.m., except Federal holidays.

Footnote

(1) Paragraphs 8 and 9 of the Protective Order appended to the March 2, 1977 order provide that:

8. [N]o later than thirty (30) days following the conclusion of this proceeding, all confidential discovery materials, all extracts, tabulations and compilations containing portions of such materials, all copies thereof, and all computerizations thereof, and indices thereto, in any form, shall be returned to such supplying repondent by counsel of record for the [ICC] Bureau [of Investigations and Enforcement]. Receipt of such material by the supplying respondent shall be acknowledged in writing. If a tabulation or compilation contains confidential information supplied by more than one respondent, that tabulation or compilation will be destroyed.

9. In the event that any document containing Confidential information is filed with the Secretary of the Commission, the Administrative Law Judge, or with the Commission or members thereof, or with any United States court, in support of or as a part of a motion or other pleading or otherwise as

a part of the record in this proceeding, the Confidential portion shall be filed in sealed envelopes or other appropriate containers and shall be endorsed to the effect that the envelopes are sealed pursuant to the instant Order and by reason of containing Confidential documents in the instant proceeding.

The existing service list in this proceeding does not contain the full names or current addresses of each person who may be interested in this proceeding. Accordingly, and in view of the importance of the motion, this Notice is being published in the **Federal Register** in order to provide an opportunity for all interested persons to comment.

Dated: March 3, 1983.

Second State Refund Procedures

AGENCY: Office of Hearings and Appeals, DOE.

ACTION: Notice of implementation of section stage refund procedures.

SUMMARY: The Office of Hearings and Appeals of the Department of Energy has issued a Decision and Order concerning second stage refund procedures to be implemented for distribution of the consent decree fund remitted to the DOE by PVM Oil Associates, Inc.

FOR FURTHER INFORMATION CONTACT: Thomas O. Mann, Deputy Director, Office of Hearings and Appeals, Department of Energy, 1200 Pennsylvania Avenue, NW., Washington, D.C. 20461 (202) 633–8377.

SUPPLEMENTARY INFORMATION: The Decision an Order which appears below establishes procedures for distribution of the $215,000 consent decree fund remitted to the DOE by PVM Oil Associates, Inc. (PVM). The entire balance of this fund, plus all interest accrued to date, remain unclaimed following the expiration of the deadline for firms who purchased fuel oil marketed by PVM to submit applications for refund. In this Decision, the Office of Hearings and Appeals (OHA) orders the distribution of 11.35 percent of the consent decree fund, or $24,402 plus accrued interest, to the General Electric Lamp Division, and 57.04 percent of the fund, or $122,636 plus accrued interest, to the Missouri Pacific Railroad. The OHA has ascertained that both of these firms were end-users of No. 2 fuel oil which was marketed or brokered by PVM, and were injured as a result of PVM's alleged violations. Disbursement to Missouri Pacific is conditioned on receipt of a statement by the firm indicating that it has notified its governing regulatory agency of the refund, and explaining how the refund will be passed on to its customers. The purpose of this requirement is to ensure that those persons likely to have been injured as a result of PVM's alleged violations will receive the benefit of the refund.

The remaining 31.61 percent of the consent decree fund, or $67,961 plus accrued interest, will be distributed to New York State, upon approval by the OHA of a plan submitted by the state which will provide restitutionary benefits to consumers of No. 2 fuel oil in the New York City metropolitan area. These consumers were the end-users of the remainder of the fuel oil covered by the PVM consent decree. The state government is an appropriate body to formulate a distribution plan in this proceeding which will provide effective and efficient restitution to fuel oil consumers in the New York City metropolitan area.

Issued in Washington, D.C., on March 4, 1983.

George B. Breznay,
Director, Office of Hearings and Appeals.
March 4, 1983.

Decision and Order of the Department of Energy

Supplemental Order

Name of Petitioner: Office of Enforcement, Economic Regulatory Administration: In the Matter of PVM Oil Associates, Inc.

Date of Filing: December 15, 1982.

Case Number: HQF–0012.

On May 20, 1982, the Office of Hearings and Appeals of the Department of Energy issued a Decision and Order establishing special refund procedures for distributing funds obtained by the DOE through consent orders entered into with Panhandle Eastern Pipeline Company, PVM Oil Associates, Inc. (PVM), Loveladdy Oil Company, Armstrong and Associates, and Ethyl Corporation. *Office of Enforcement,* 9 DOE ¶ 82,569 (1982) (hereinafter cited as *Panhandle*). Under the terms of the consent orders, each firm placed money into a DOE escrow account to be distributed, together with interest, in accordance with the directives of the OHA pursuant to special refund proceedings in order to compensate for alleged violations of the DOE price regulations. While the common legal and factual issues in these cases made it appropriate to consolidate them for the purpose of instituting special refund procedures, the consent order funds have remained separate, and the refund proceedings in each case will be handled separately. The present Decision concerns only the PVM consent order fund.

The May 20 Decision established a two-stage process for the distribution of the PVM consent order fund. In the first stage, applications for refund were invited from claimants who purchased No. 2 fuel oil which was marketed by PVM during the period January 1, 1974 through July 31, 1975. The deadline for the submission of refund applications was August 24, 1982. The May 20 Decision also suggested that any funds remaining after qualified claimants had been paid would be distributed to entities which would pass through the benefits of any refunds to the group of persons who were likely injured as a result of the allegedly improper pricing practices.

The deadline for the submission of claims has now passed, and we have not received any refund applications. Under these circumstances, no funds have as yet been distributed directly to purchasers of fuel oil marketed by PVM. This Decision will therefore address the procedures to be instituted for distribution of consent order funds in the second stage of the refund process. Based on our analysis of the investigatory records leading up to the enforcement action against PVM, which is further explained below, the following parties incurred injury as a result of PVM's alleged violations and should share in the escrow fund: the Missouri Pacific Railroad; the General Electric Lamp Division in Cleveland, Ohio; and consumers of No. 2 fuel oil in the New York City metropolitan area.

Background

PVM is a "reseller" of petroleum products as that term was defined in 10 CFR 212.31, and is engaged in operations in the New York City metropolitan area. During the relevant time period, PVM was subject to the Mandatory Petroleum Price Regulations set forth in 10 CFR Part 212, Subpart F, which governed the maximum prices that could lawfully be charged by resellers in the sale of fuel oil, motor gasoline, and other covered products.

On June 29, 1979, the United States Attorney for the Eastern District of New York filed a civil action under Section 209 of the Economic Stabilization Act of 1970, 12 U.S.C. 1904 note, against PVM Oil Associates, Inc., Pasquale V. Mazzarulli, its President, and Joseph V. DiMauro, a PVM employee. *United States v. PVM Oil Associates, Inc.,* Civil Action No. 79C 1697 (E.D.N.Y., filed June 29, 1979). The complaint alleged that during the period January 1, 1974 through July 31, 1975, the defendants were involved in a scheme to violate the DOE Mandatory Petroleum Price Regulations by charging prices exceeding

maximum lawful levels in sales of No. 2 fuel oil. The defendants had allegedly participated in "daisy-chains" consisting of essentially fictional paper transactions in which fuel oil was "resold" several times between a number of firms with the aim of artificially inflating prices, in violation of the applicable DOE regulations. The lawsuit was resolved by a consent decree, entered into on June 29, 1979, by which the defendants agreed to remit $215,000 to the DOE in settlement of all claims raised in the complaint. The DOE Office of Enforcement was unable to identify any persons or firms that purchased heating oil from PVM during the audit period, and consequently filed a Petition for Implementation of Special Refund Procedures with the Office of Hearings and Appeals.

Second Stage Refund Procedures

As we have stated in a number of previous Decisions, the primary purpose of Subpart V special refund procedures is to provide restitution to persons injured by alleged regulatory violations. *See generally, Office of Enforcement,* 8 DOE ¶ 82,597 (1981) (hereinafter cited as *Vickers).* The Subpart V refund process offers a means of compensating individuals who, because they lack resources or do not have a sufficient financial stake in the outcome to institute private lawsuits under Section 210 of the Economic Stabilization Act, have suffered injuries which would otherwise go unredressed. To accomplish these objectives, we have generally utilized a two-stage refund process. In the first stage, payment is made to claimants who file applications for refund and demonstrate that they were injured in some way by the alleged overcharges. Any funds remaining after valid claims are paid are distributed through second stage procedures which permit the fashioning of distribution programs consistent with the restitutionary objectives of the Subpart V regulations and the underlying statutes. In the present case, no injured purchasers have filed claims for refunds in the first stage, and thus the entire $215,000 consent decree fund remains available for distribution through second stage refund procedures.

We must therefore address, at this time, the best means to channel the consent decree fund to persons injured as a result of PVM's alleged violations. Since the issuance of the *Panhandle* decision, we have obtained additional information which has enabled us to identify some of the persons who were injured by the alleged PVM overcharges. While there was insufficient information in the consent decree or the civil complaint for us to make any determinations regarding the nature of the alleged violations or their probable effects, we have recently examined the investigatory files prepared by the DOE Office of Special Investigations (OSI) which led up to the civil complaint against PVM and the other defendants. Before turning to that information, it is important to note that the consent decree is the result of a negotiated settlement which compromises the allegations therein and is in no way an admission of liability by PVM or its officers. Thus, the DOE investigatory files represent preliminary determinations made by the agency, and do not reflect actual overcharges. Nonetheless, we believe that these files, which formed the basis of the government's complaint and which underlie the settlement, do provide an appropriate basis on which to fashion an equitable plan for restitution of the available funds in this case. *See Armstrong and Associates/City of San Antonio,* 10 DOE ¶ 85,505 (1983).

The OSI files document a number of highly complex "daisy chain" transactions. In some of these transactions, PVM actually took title to the fuel oil at one point in the chain, and in others PVM acted as a broker, arranging sales between other parties. In these instances, the parties who were ultimately injured were end-users at the end of each daisy chain who were not in a position to pass on the increased costs. (*1*) Our analysis of the transactions documented in the DOE investigatory files indicates that in two of these daisy-chains, fuel oil was ultimately sold to a large firm which was an end-user of the product. These entities are the General Electric Lamp Division in Cleveland, Ohio, and the Missouri Pacific Railroad. Even though neither of these firms filed a first stage refund application, equitable considerations which are discussed below dictate that they should receive refunds at this time. These firms were unaware of the true origin of some of the fuel oil they purchased. Although in *Panhandle* we stated that the product covered by the PVM settlement was sold to consumers in Westchester County, New York, we now know that the effects of PVM's alleged violations were not localized in Westchester County. 9 DOE at 82,569, n.2. Under these circumstances, there was no reasonable way for either General Electric or the Missouri Pacific to have known that they were eligible to file a first stage refund claim for any of the fuel oil involved in the PVM settlement.

Missouri Pacific is a common carrier whose rates are regulated by a government agency. In numerous previous decisions we have approved the use of rate-regulated transportation companies and utilities as an efficient, cost-effective and equitable means of distributing refunds to overcharged customers in first-stage proceedings. *See Office of Enforcement* (Northeast Petroleum Industries, Inc.), 10 DOE ¶ 85,021 (1982); *Panhandle; Office of Special Counsel* (Pennzoil), 9 DOE ¶ 82,545 (1982); *Office of Enforcement* (Tenneco), 9 DOE ¶ 82,538 (1982). Our determination was based on representations by the Transportation Group, an organization comprised of regulated transportation companies including the Association of American Railroads, that any refunds received by these companies would be passed on to their customers by the regulatory bodies. Moreover, we noted that the DOE's Office of Special Counsel has reviewed the operation of the agencies that regulate transportation companies and has determined that refunds to these firms are indeed factored into their rate-making systems. *See, e.g., Pennzoil,* 9 DOE at 82,244. We therefore stated in each of those cases that we would approve refunds to regulated firms if they provided us with an explanation of the manner in which the refunds would be passed on to their customers in the form of lower prices or better services. In addition, receipt of refund money was conditioned on notice to the relevant regulatory body. We believe that the same conditions are appropriate in the instant proceeding, and therefore will issue a refund to Missouri Pacific upon receipt of a statement from the firm which indicates that it has notified its governing agency, and which explains how the refund will be passed on to its customers.

With regard to General Electric, it is impossible for us to ascertain the impact of any increase in fuel oil prices on the firm's operations, and an inquiry into the pricing practices of an end-user engaged in the manufacture of non-petroleum products would be beyond the scope of the present special refund proceeding. Accordingly, we have determined that Missouri Pacific and General Electric should receive a portion of the PVM escrow fund equal to the percentage of fuel oil purchased by each company relative to the total volume of fuel oil which was the subject of documented daisy chain transactions. General Electric should receive 11.35 percent of the consent decree fund and Missouri Pacific should receive 57.04 percent of the fund. Each of these companies should also receive an appropriate share of the interest accrued on the PVM consent decree funds.

In each of the remaining four daisy chain transactions documented by the DOE, the final purchasers of the fuel oil were small residential and commercial customers located in the New York City metropolitan area. Consequently, we have determined that the remaining 31.61 percent of the escrow fund (plus accured interest) which corresponds to these transactions should be distributed to these consumers. As further discussed below, we believe that the government of the State of New York is the most appropriate body to formulate a distribution plan which will benefit consumers of No. 2 fuel oil in the New York City metropolitan area. This portion of the escrow fund will be disbursed to New York State upon approval of a restitutionary distribution plan. In the remainder of this Decision we will first consider the comments we have received concerning the second stage refund procedures in this case. We will then discuss our determination that these funds should be distributed to consumers of fuel oil in the New York City metropolitan area through a plan devised by New York State. Finally, we will provide guidance to New York to assist it in formulating a distribution plan that may be approved by the DOE.

Comments on Second Stage Refund Procedures

During the course of this proceeding we suggested several alternatives for distributing funds in the second stage. We stated that "[s]ince restitution is the primary concern of Subpart V proceedings, we believe that the remaining funds should, if administratively and economically feasible, be distributed to groups of ultimate consumers who were likely to have borne a portion of the higher prices charged by PVM. . . ." *Office of Enforcement,* No. BEF–0041 (November 4, 1981) (proposed decision) at 11. We therefore

suggested the following possible distribution mechanisms: (1) First purchasers, who are in the best position to channel refunds to downstream purchasers, would be invited to formulate plans for distribution; (2) refunds might be made in the form of lowered energy or energy-related costs in PVM's market area, through special programs formulated by state governments; and (3) in the event that other distribution mechanisms proved infeasible or inappropriate, deposit the remaining funds into the United States Treasury. Finally, we solicited comments from interested parties for alternative distribution mechanisms.

The comments we received concerning the second stage refund procedures can be divided into two groups: comments filed by the Transportation Group, an *ad hoc* organization of four trade associations whose members are regulated transportation companies, and comments filed by state governments.(2) In its comments the Transportation Group essentially argues that in special refund proceedings the OHA is obligated to refund money to purchasers of product during the consent order period, and that this obligation limits OHA's authority to fashion second stage refund procedures. The Transportation Group therefore maintains that a distribution of funds to rate-regulated utilities or states upon an agreement to benefit the class of consumers who was injured is inconsistent with DOE statutes and regulations which require that refunds be made only to injured persons.

As an initial matter, we find no legal support for the position that we are *obligated* to refund settlement money only to direct purchasers of product covered by the consent decree. Nevertheless we believe that the Transportation Group's concerns have been adequately met by the refund procedures established in this proceeding. In addition to efforts made by the DOE Office of Enforcement during the investigative stage, any injured party was permitted to file an application for a portion of the consent decree fund during the first stage of this proceeding. The second stage refund procedures set forth in this Decision represent a further effort to provide restitution to injured parties. In fact, the major portion of the consent decree fund will be distributed to documented purchasers of product which was marketed or brokered by PVM. As discussed below, our analysis of the investigatory record leading up to the civil action against PVM revealed that in the remaining four transactions, which correspond to less than one-third of the consent decree fund, the adverse effects of the alleged overcharges were borne by consumers of No. 2 fuel oil in the New York City metropolitan area. Distribution of the escrow funds for the benefit of these consumers furthers the restitutionary goals of the statutes and regulations under whose authority special refund proceedings are undertaken. *See generally* 10 CFR Part 205, Subpart V; *Sauder v. DOE*, 648 F. 2d 1341 (Temp. Emer. Ct. App. 1981); *Vickers* at 55,396.

Comments were also filed in the *Panhandle* proceeding by state agencies and offices of Idaho, Oregon, Michigan, Connecticut, Maine and Iowa. These States all favor the distribution of second stage refund money through plans formulated by state governments to benefit injured consumers within the state concerned.(3) In addition, in comments filed August 23, 1982, the New York State Energy Office stated that it supports the distribution of remaining funds through the New York State government. Since these comments generally support the action taken, they need not be discussed further in this decision.(4)

Distribution of Remaining Consent Decree Funds Through a New York State-Formulated Plan

For the reasons explained below, we believe that distribution of the remaining portion of the consent decree fund to the government of the State of New York, in accordance with the guidelines set forth below, is most consistent with the restitutionary goals of Subpart V and the underlying statutes. Our examination of the DOE investigatory records leading up to the civil complaint against PVM revealed that the effects of four of six transactions would have been localized among purchasers of No. 2 fuel oil in the New York City metropolitan area. New York State is familiar with the energy needs of its populace, and with the existing and potential mechanisms for distributing these funds through energy-related programs in a cost effective manner. A state-formulated plan will therefore provide effective and efficient restitution to fuel oil consumers in the New York metropolitan area.

Accordingly, we will direct the disbursement of the remaining 31.61 percent of the consent decree fund, or $67,961, plus interest, to the State of New York upon the approval of a plan for spending this money submitted by the State. This plan should meet the general restitutionary objective of benefiting the class of persons who were injured by the alleged violations—users of No. 2 fuel oil in the New York City metropolitan area. The plan will be scrutinized to ensure that administrative costs will be minimized. The refunds must not be used as a substitute for state funds to implement projects or programs which would be funded regardless of this distribution. In other words, the money distributed to New York should be used to supplement, not supplant, any state or federal funds which are already budgeted for those purposes. Each program must be implemented within a reasonable period following receipt of the funds. Upon implementation of the plan, New York State should certify that the funds were spent in accordance with the approved plan.

Following the broad guidelines discussed above, the plan that New York submits should include the following information: (1) A description of the programs to be funded; (2) the time frame for implementation of the programs; (3) a statement explaining whether each program is an enlargement of an existing program or a new project; (4) an explanation of the manner in which consumers of No. 2 fuel oil in the New York City metropolitan area will benefit from the programs; (5) a statement certifying that the submitting agency or office has authority under state law to submit the plan; and (6) a statement committing the agency or office responsible for administering the plan to filing with the OHA a post-plan report, which will include a certification that the funds were spent in accordance with the DOE-approved plan.

Finally, to assist the State of New York in formulating a suitable distribution plan, we can suggest the following types of programs which would provide restitutionary benefits to consumers of No. 2 fuel oil:

(1) Residential or commercial building energy audits;

(2) Grant or loan programs for weatherization or other energy conservation equipment installation;

(3) Energy assistance programs for low-income persons to subsidize heating fuel costs or make emergency repairs;

(4) Energy conservation or energy research programs related to fuel oil consumption in the New York City metropolitan area.

To the extent that benefits will be derived by the class of persons who are users of No. 2 fuel oil in the New York City metropolitan area, the funds may be used to augment various federal energy-related programs already implemented for these purposes. The above list is by no means exhaustive, and the State is free to select any appropriate energy-related project or program, so long as the funds will be spent in a manner which satisfies the restitutionary objectives of this special refund proceeding.

The following procedures will govern the processing of New York's share of the second stage refund money in this proceeding. The State of New York should submit a plan to spend the PVM funds. If approved, we will direct disbursement of this portion of the PVM escrow fund. New York will be required to submit a post-plan report when the project(s) is completed. A copy of the plan and the post-plan report will be available for public inspection in the Public Docket Room of the Office of Hearings and Appeals, Room 1111, 12th Street and Pennsylvania Avenue, NW., Washington, D.C.

It is Therefore Ordered That:

(1) The Director of the Office of Finance and Accounting, Washington Financial Services Division, of the DOE Office of the Controller shall take appropriate action to disburse $24,402 plus 11.35% of the accrued interest from the deposit fund escrow account established at the Department of the Treasury for this purpose to General Electric Lamp Division at the following address: Mr. Ralph D. Ketchem, Senior Vice President and Group Executive, Lighting Business Group, General Electric, Nela Park, Cleveland, Ohio 44112.

(2) A portion of the PVM escrow fund equal to $122,636, plus 57.04% of the accrued interest, will be distributed to Missouri Pacific Railroad upon receipt of a statement submitted by the firm which conforms with the requirements set forth in the foregoing Decision.

(3) The remaining 31.61 percent of the PVM escrow fund, or $67,961 plus accrued interest, shall be distributed to New York State, upon approval by the Office of Hearings and Appeals of a plan submitted by the state which conforms with the guidelines set forth in the foregoing Decision.

(4) This is a final order of the Department of Energy.

Dated: March 4, 1983.

George B. Breznay,

Director, Office of Hearings and Appeals.

Notes

(1) In none of these transactions was PVM the final purchaser, and thus PVM's customers would not have been injured as a result of its alleged regulatory violations.

(2) Comments were filed by the following agencies and offices within the respective state governments: the State of Idaho Department of Water Resources, the Oregon Department of Justice, the Attorney General of the State of Michigan, the Connecticut Office of Policy and Management (Energy Division), the State of Maine Office of Energy Resources, and the Iowa Department of Justice.

(3) A number of states have voiced specific objections to one or more of the alternative suggested distribution plans set forth in the Proposed Decision.

(4) In accordance with our determination in *Attorneys General of the States of Delaware, Iowa, Louisiana, North Dakota and Rhode Island*, 10 DOE ¶ 82,536 (1982), we have considered the Petition for Special Redress filed by the aforementioned states with the Office of Hearings and Appeals on October 5, 1982 as an Application for Refund in this proceeding. By their petition, these states requested that all funds remaining in any Subpart V proceeding after identifiable claimants have been paid be distributed to consumers of petroleum products through their agents, the state governments. The Petitioners claim that restitution can best be achieved by distributing the remaining escrow funds to the states on the basis of their proportionate consumption of the covered products sold by the firms that entered into the consent orders.

BILLING CODE 6450-01-M

ENVIRONMENTAL PROTECTION AGENCY

[OPTS-140029A; TSH-FRL 2318-5]

Toxic and Hazardous Substances Control; VIAR and Company; Change in Transfer of Data to Subcontractor

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: As announced in the Federal Register of October 7, 1982 (47 FR 44426), VIAR and Company has been granted access to confidential business information submitted to EPA under sections 5 and 8(a), (b), and (d) of the Toxic Substances Control Act (TSCA). However, VIAR and Company is now working under subcontract to Computer Sciences Corporation and no longer under subcontract to Systems Development Corporation.

DATE: March 11, 1983.

FOR FURTHER INFORMATION CONTACT: J. P. McCarthy, Director, Industry Assistance Office (TS-799), Office of Toxic Substances, Environmental Protection Agency, Rm. E-511, 401 M St., SW., Washington, D.C. 20460, Toll free: (800-424-9065), In Washington, D.C.: (554-1404), Outside the USA: (Operator—202-554-1404).

SUPPLEMENTARY INFORMATION: As announced in the Federal Register of October 7, 1982 (47 FR 44426), VIAR and Company of Alexandria, Virginia, has been granted access on EPA premises to information, including confidential business information, submitted by manufacturers, processors, and importers of chemical substances under sections 5 and 8(a), (b) and (d) of TSCA. As stated in that notice, VIAR and Company is maintaining conversion and optimization software and implementing ADP systems to process this information.

VIAR and Company is now performing this work under subcontract (dated January 24, 1983) to Computer Sciences Corporation of Falls Church, Virginia, and no longer under subcontract to Systems Development Corporation. Transfer of data to Computer Sciences Corporation under contract No. 68-01-6639 was announced in the Federal Register of February 3, 1983 (48 FR 4908).

As under the previous subcontract, VIAR and Company is required to safeguard TSCA Confidential Business Information from any unauthorized disclosure and must comply with the provisions of the EPA security manual "Contractor Requirements for the Control and Security of TSCA Confidential Business Information."

Dated: February 25, 1983.

Linda A. Travers,

Acting Director, Office of Toxic Substances.

[OPTS-51457; BH-FRL-2318-8]

Toxic and Hazardous Substances Contol; Certain Chemicals; Premanufacture Notices

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Section 5(a)(1) of the Toxic Substances Control Act (TSCA) requires any person who intends to manufacture or import a new chemical substance to submit a premanufacture notice (PMN) to EPA at least 90 days before manufacture or import commences. Statutory requirements for section 5(a)(1) premanufacture notices are discussed in EPA statements of interim policy published in the Federal Register of May 15, 1979 (44 FR 28558) and November 7, 1980 (45 FR 74378). This notice announces receipt of twenty-five PMNs and provides a summary of each.

DATES: Close of Review Period:

PMN 83-508, 83-509, 83-510, 83-511, 83-512, 83-513, 83-514, 83-515, 83-516 and 83-517; May 25, 1983.

PMN 83-518 and 83-519; May 28, 1983.

PMN 83-520, 83-521, 83-522, 83-523, 83-524, 83-525 and 83-526; May 29, 1983.

PMN 83-527, 83-528, 83-529, 83-530, 83-531 and 83-532; May 30, 1983.

Written comments by:

PMN 83-508, 83-509, 83-510, 83-511, 83-512, 83-513, 83-514, 83-515, 83-516 and 83-517; April 25, 1983.

PMN 83-518 and 83-519; April 28, 1983.

PMN 83-520, 83-521, 83-522, 83-523, 83-524, 83-525 and 83-526; April 29, 1983

PMN 83-527, 83-528, 83-529, 83-530, 83-531 and 83-532; April 30, 1983.

ADDRESS: Written comments, identified by the document control number "[OPTS-51457]" and the specific PMN number should be sent to: Document Control Officer (TS-793), office of Pesticides and Toxic Substances, Environmental Protection Agency, Rm. E-409, 401 M St., SW., Washington, DC 20460, (202-382-3532).

FOR FURTHER INFORMATION CONTACT: Theodore Jones, Acting Chief, Notice Review/Branch, Chemical Control Division (TS-794), Office of Toxic Substances, Environmental Protection Agency, Rm. E-216, 401 M St., SW., Washington, DC 20460, (202-382-3729).

SUPPLEMENTARY INFORMATION: The following notice contains information extracted from the non-confidential version of the submission provided by the manufacturer on the PMNs received by EPA. The complete non-confidential document is available in the Public Reading Room E-107.

PMN 83-508

Manufacturer. Confidential.

Chemical. (G) Substituted benezenesulfonic acid salt.

Use/Production. (G) A minor constituent in an article for commercial and consumer use. Prod. range: 2,500-5,000 kg/yr.

Toxicity Data. Acute oral: 3,000 mg/kg; Acute dermal: <1,000 mg/kg; Irritation: Skin—Slight, Eye—Slight; Secondary waste treatment compatibility study: 5,000 mg/L did not inhibit glucose metabolism 50%; LC_{50}: <100 mg/l; Plant growth effects: No

significant effects at 100 mg/L; Repeated skin application: Slight.

Exposure. Manufacture and processing: dermal and inhalation, a total of 60 workers, up to 2 hrs/da, up to 90 da/yr.

Environmental Release/Disposal. Minimal release to water. Disposal by publicly owned treatment works (POTW), biological treatment system and incineration.

PMN 83-509

Manufacturer. Confidential.

Chemical. (G) Disubstituted benzotriazole.

Use/Production. (G) A minor constituent in an article for commercial and consumer use. Prod. range: 50–200 kg/yr.

Toxicity Data. Acute oral: >1,300 mg/kg; Acute dermal: >1,000 mg/kg; Irritation: Skin—Slight, Eye—Moderate; Secondary waste treatment compatibility: 63 mg/L caused a 50% decrease in glucose metabolism; Acute effects on seven aquatic species, LC_{50}: >100 mg/L for one species; 10–100 mg/L for five species; and 1–10 mg/L for one species; Skin sensitizaton: Low; Repeated skin application: Moderate.

Exposure. Manufacture and processing: dermal and inhalation, minimal.

Environmental Release/Disposal. Minimal release to water. Disposal by POTW, biological treatment system and incineration.

PMN 83-510

Manufacturer. Confidential.

Chemical. (G) Reaction product of an aromatic dianhydride with a substituted C_{8-14} alcohol and epichlorohydrin.

Use/Production. (G) Dispersive use. Prod. range: 25,000–100,000 kg/yr.

Toxicity Data. Acute oral: >5.0 gm/kg; Irritation: Skin—Not an irritant, Eye—Not an irritant.

Exposure. Manufacture: dermal, a total of 14 workers, up to 4,500 man/hrs/yr.

Environmental Release/Disposal. Minimal release to water.

PMN 83-511

Manufacturer. Confidential.

Chemical. (G) Polyester.

Use/Production. (G) Destructive use. Prod. range: Confidential.

Toxicity Data. No data submitted.

Exposure. Manufacture, processing and use: dermal and eye, a total of 6 workers, up to 24 hrs/da, up to 300 da/yr.

Environmental Release/Disposal. 10–1,000 kg/yr released to land. Disposal by approved landfill.

PMN 83-512

Importer. Confidential.

Chemical. (G) Polymer of amino-alkyl-carbomonocycle, Hexamethylene diisocyanate, propylene oxide, alkane triol, alkanone, and disubstituted alkane diol.

Use/Import. (S) Crosslinker for industrial coatings. Import range: Confidential.

Toxicity Data. Acute oral: >5 ml/kg; Irritation: Skin—Strong, Eye—Strong.

Exposure. Processing and use: dermal and inhalation, a total of 9 workers, up to 4 hrs/da, up to 50 da/yr.

Environmental Release/Disposal. Less than 10 kg/yr released to air, water and land. Disposal by incineration.

PMN 83-513

Importer. Confidential.

Chemical. (G) Polymer of isophorone diisocyanate, alkanoic acid, mixed alkane diols, alkane triol, oxo-heteropolycycle, and neopentyl glycol.

Use/Import. (S) Croslinker for industrial coatings. Import range: Confidential.

Toxicity Data. No data submitted.

Exposure. Processing, use and disposal: dermal and inhalation, a total of 7 workers, up to 4 hrs/da, up to 50 da/yr.

Environmental Release/Disposal. Less than 10 kg/yr released to air, water and land. Disposal by incineration.

PMN 83-514

Importer. Confidential.

Chemical. (G) Substituted indolium, salt.

Use/Import. (S) Colorant for textiles and paper. Import range: Confidential.

Toxicity Data. Acute oral: 1.18 ml/kg; Irritation: Skin—Moderate, Eye—Severe; Bacterial Inhibition: LC_{50}, 10 mg/L; Fish Toxicity, 48 hrs.: 10 mg/L.

Exposure. No data submitted.

Environmental Release/Disposal. No data submitted.

PMN 83-515

Manufacturer. S. C. Johnson & Son, Inc.

Chemical. (G) Styrene co-polymer.

Use/Production. (G) Dispersive use. Prod. range: Confidential.

Toxicity Data. No data submitted.

Exposure. Confidential.

Environmental Release/Disposal. Confidential. Disposal by landfill and in-house water treatment facility.

PMN 83-516

Manufacturer. Confidential.

Chemical. (G) Aromatic polyester with substituted alkanes.

Use/Production. (S) Site limited chemical intermediate. Prod. range: Confidential.

Toxicity Data. No data submitted.

Exposure. Manufacture: dermal, a total of 1 worker, up to ½ hr/da, up to 225 da/yr.

Environmental Release/Disposal. Less than 10 kg/yr released to air and land. Disposal by approved landfill.

PMN 83-517

Manufacturer. Confidential.

Chemical. (G) Polyurethane polymer, with an aromatic polyester.

Use/Production. (S) Site limited coating. Prod. range: Confidential.

Toxicity Data. No data submitted.

Exposure. Manufacture and use: dermal, a total of 7 workers, up to 4 hrs/da, up to 208 da/yr.

Environmental Release/Disposal. Less than 10 kg/yr released to air with 1,000–10,000 kg/yr to land. Disposal by approved landfill.

PMN 83-518

Manufacturer. The Dow Chemical Company.

Chemical. (S) 1,1'[isopropylidenebis(6-hydroxy-m-phenylene)] bis(tetrahydrothiophenium hydroxide) bis (inner salt) tetrahydrate.

Use/Production. (S) Production of polymeric cross-linked article. Prod. range: Confidential.

Toxicity Data. Acute oral: >5 g/kg; Acute dermal: 2 g/kg; Irritation: Skin—Non-irritant, Eye—Moderate; Eye Absorption study: No effect.

Exposure. Manufacture and use: dermal and eye, a total of 27 workers, up to 2 hrs/da, up to 52 da/yr.

Environmental Release/Disposal. No release. Disposal by incineration.

PMN 83-519

Manufacturer. Confidential.

Chemical. (G) Functionalized acrylic polymer.

Use/Production. (S) Industrial general purpose trade sales dispersant. Prod. range: Confidential.

Toxicity Data. Acute oral: >5.0 g/kg; Acute dermal: >5.0 g/kg; Irritation: Skin—Non-irritant, Eye—Inconsequentially irritating.

Exposure. Manufacture and processing: dermal and eye, a total of 9 workers, up to 8 hrs/da.

Environmental Release/Disposal. 100–10,000 kg/yr released to land. Disposal by POTW and approved landfill.

PMN 83-520

Manufacturer. Confidential.

Chemical. (G) Polyester polycarboxylate salt.

Use/Production. (S) Glass fiber binder resin. Prod. range: Confidential.

Toxicity Data. No data submitted.

Exposure. Manufacture, use and disposal: dermal, a total of 15 workers, up to 24 hrs/da, up to 50 da/yr.

Environmental Release/Disposal. Less than 10 kg/yr released to air. Disposal by incineration.

PMN 83–521

Manufacturer. Confidential.

Chemical. (G) Carbomonocyclic ester.

Use/Production. (G) Open use. Prod. range: 3,000–9,000 kg/yr.

Toxicity Data. No data submitted.

Exposure. Manufacture and processing: dermal and eye, a total of 54 workers, up to 6 hrs/da, up to 5 da/yr.

Environmental Release/Disposal. Less than 10 kg/yr released to air and water with 10–100 kg/yr to land. Disposal by incineration.

PMN 83–522

Manufacturer. The Dow Chemical Company.

Chemical. (S) Reaction product of succinic anhydride and 1,2-ethanediamine, N-[3-(trimethoxy-silyl)propyl].

Use/Production. (S) Primer coatings formulations for crosslinked polymer. Prod. range: Confidential.

Toxicity Data. Acute oral: >5,000 mg/kg; Acute dermal: >2,000 mg/kg; Irritation: Skin—Non-irritant, Eye—Moderate.

Exposure. Manufacture: dermal, a total of 3 workers, up to 1 hr/da, less than 4 da/yr.

Environmental Release/Disposal. No release. Disposal by biological treatment system and approved landfill.

PMN 83–523

Manufacturer. The Dow Chemical Company.

Chemical. (S) 1,1'[isopropylidenebis(6-hydroxy-m-phenylene)] bis(tetrahydrothiophenium hydroxide) mixed salts.

Use/Production. (S) Site-limited intermediate. Prod. range: Confidential.

Toxicity Data. Acute oral: >2 g/kg.

Exposure. Manufacture: dermal and eye, a total of 3 workers, up to 1 hr/da, up to 12 da/yr.

Environmental Release/Disposal. No release. Disposal by approved landfill.

PMN 83–524

Importer. Confidential.

Chemical. (G) Polymer of trisubstituted methane, alkyl phenol and substituted bis benzene derivative.

Use/Import. (S) Injection-molded parts and extruded parts. Import range: Confidential.

Toxicity Data. No data submitted.

Exposure. Processing and disposal: dermal, a total of 10 workers, occasional exposure.

Environmental Release/Disposal. Less than 10 kg/yr released to air and water with 10–1,000 kg/yr to land. Disposal by approved landfill.

PMN 83–525

Importer. Confidential.

Chemical. (G) Substituted benzindolium, salt.

Use/Import. (S) Colorant for textiles and paper. Import range: Confidential.

Toxicity Data. Acute oral: 7,572 g/kg; Irritation: Skin—Irritant, Eye—Irritant; Fish toxicity, 48 hrs.: Not toxic @ 1 mg/L.

Exposure. Use: Negligible.

Environmental Release/Disposal. No release. Disposal by POTW.

PMN 83–526

Manufacturer. Confidential.

Chemical. (G) Isocyanate derived polyamide.

Use/Production. (G) Products for industrial components. Prod. range: Confidential.

Toxicity Data. No data submitted.

Exposure. Confidential.

Environmental Release/Disposal. Less than 10 kg/yr released to water with 100–1,000 kg/yr to land. Disposal by certified waste disposal service.

PMN 83–527

Importer. Confidential.

Chemical. (G) Sulfonaphtholazonaphthol, chromium complex.

Use/Import. (S) Commercial colorant for leather. Import range: Confidential.

Toxicity Data. Acute oral: >10 g/kg; Irritation: Skin—Irritant, Eye—Highly irritating.

Exposure: Manufacture: dermal, a total of 2 workers, up to 2 hrs/da, up to 100 da/yr.

Environmental Release/Disposal. Less than 10 kg/yr released to air and water. Disposal by POTW and captive waste treatment plant.

PMN 83–528

Manufacturer. Wilmington Chemical Corporation.

Chemical. (G) Dimer-trimer triglycidyl ester.

Use/Production. Confidential. Prod. range: Confidential.

Toxicity Data. No data submitted.

Exposure. Manufacture, processing and disposal: air, dermal and inhalation, a total of 10 workers, up to 24 hrs/da, up to 15 da/yr.

Environmental Release/Disposal. Less than 10 kg/yr released to air with 10–100 kg/yr to water.

PMN 83–529

Importer. Sandoz Colors and Chemicals.

Chemical. (G) Dicarboxylic acid, polyamine polymer.

Use/Import. (S) Quencher for fluorescent whitening agents in paper making. Import range: Confidential.

Toxicity Data. Acute oral: >5,000 mg/kg; Irritation: Skin—Non-irritant, Eye—Non-irritant.

Exposure. Use: dermal, a total of 1 worker, up to 1 hr/da per shift, per site.

Environmental Release/Disposal. 10–100 kg/yr released to water. Disposal by biological treatment system.

PMN 83–530

Manufacturer. Confidential.

Chemical. (G) Disubstituted carbomonocyclic ester.

Use/Production. (S) Open use. Prod. range: 4,600–11,500 kg/yr.

Toxicity Data. Irritation: Skin—Not a primary skin irritant by FHSA definition, but reactions on human skin would be anticipated.

Exposure. Manufacture, processing and use: dermal and eye, a total of 35 workers, up to 8 hrs/da, up to 250 da/yr.

Environmental Release/Disposal. Less than 10 kg/yr released to air and water with 10–100 kg/yr released to land. Disposal by incineration.

PMN 83–531

Manufacturer. Confidential.

Chemical. (G) Polyoxo arylene triazino epoxy derivative.

Use/Production. (G) A thermosetting resin intended for industrial use. Prod. range: 100–300,000 kg/yr.

Toxicity Data. No data submitted.

Exposure. Manufacture and use: dermal, a total of 35 workers, occasional.

Environmental Release/Disposal. Less than 10 kg/yr released to air and water with less than 10–100 kg/yr released to land. Disposal by approved landfill.

PMN 83–532

Manufacturer. Celanese Chemical Company, Inc.

Chemical. (G) Glyceryl propoxy diacrylate.

Use/Production. (G) Diluent for coatings and adhesives. Prod. range: Confidential.

Toxicity Data. Irritation: Skin—Moderate, Eye—Severe.

Exposure. Confidential.
Environmental Release/Disposal. No release. Disposal by biological treatment system and incinceration.

Dated: March 2, 1983.

Woodson W. Barcaw,
Acting Director, Management Support Division.

FEDERAL MARITIME COMMISSION

[Agreement No. 10051-8]

Availability of Finding of No Significant Impact

Upon completion of an environmental assessment, the Federal Maritime Commission's Office of Energy and Environmental Impact has determined that the Commission's decision on Agreement No. 10051-8 will not constitute a major Federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act of 1969, 42 U.S.C. 4321 *et seq.*, and that preparation of an environmental impact statement is not required.

The Signatories to this Agreement include Spanish Line, Costa Line, Farrell Lines, Inc., Ibero Line, Sea-Land Service and Prudential Lines. The amendment extends the scope of the Force Majeure agreement to include as well the trades between Mediterranean ports and Gulf ports of the United States.

This Finding of No Significant Impact (FONSI) will become final within 20 days of publication of this notice in the **Federal Register** unless a petition for review is filed pursuant to 46 CFR 547.6(b).

The FONSI and related environmental assessment are available for inspection on request from the Office of the Secretary, Room 11101, Federal Maritime Commission, Washington, D.C. 20573, telephone (202) 523-5725.

Francis C. Hurney,
Secretary.

FEDERAL RESERVE SYSTEM

United Jersey Banks; Application; Correction

This notice corrects a previous **Federal Register** document (FR Doc. 83-4987), printed at page 8347 of the issue for Monday, February 28, 1983. The proposed activities would be performed at an office of Richard Blackmum & Co., Inc. located in Paramus, New Jersey, and at some or all of the existing offices of Applicant's subsidiary banks located throughout the State of New Jersey, and the geographic areas to be served are the State of New Jersey, contiguous counties of the States of Pennsylvania and New York, and the New York City metropolitan area.

Board of Governors of the Federal Reserve System, March 7, 1983.

James McAfee,
Associate Secretary of the Board.

[FR Doc. 83-6283 Filed 3-10-83; 8:45 am]
BILLING CODE 6210-01-M

FEDERAL TRADE COMMISSION

Advertising Substantiation Program; Request for Comments

AGENCY: Federal Trade Commission.

ACTION: The Federal Trade Commission is requesting comments from the public regarding the implementation of its advertising substantiation requirement.

SUMMARY: The Federal Trade Commission is undertaking a review of the implementation of its advertising substantiation requirement. Under a legal doctrine announced in 1972, advertisers are expected to have a "reasonable basis" for the objective

claims they make in advertising. The amount of support an advertiser is expected to have, *i.e.*, what constitute a "reasonable basis" for a particular claims, is flexible and depends on factors such as: (1) The type and specificity of the claim made; (2) the type of product; (3) the possible consequences of a false claim; (4) the degree of reliance by consumers on the claim; and (5) the type and accessibility of evidence adequate to form a reasonable basis for making the particular claim. The Commission is seeking comments on various aspects of how it applies the ad substantiation requirement.

FOR FURTHER INFORMATION CONTACT: Collot Guerard, Federal Trade Commission, Bureau of Consumer Protection, 724–1499, Washington, D.C. 20580.

Comments: Comments should be filed in Room 136, Federal Trade Commission, 6th and Pennsylvania Avenue NW., Washington, D.C. 20500, no later than July 15, 1983.

SUPPLEMENTARY INFORMATION: Under Commission law and policy, advertisers are expected to have a reasonable basis for objective claims in advertising before an ad is disseminated. The Commission remains committed to this principle, which has been an important element of the Commission's program for deterring unfair and deceptive claims and preserving public confidence in the reliability of advertising. By undertaking this public inquiry, the Commission does not intend to depart from this basic requirement. Any perception that the Commission is relaxing the requirement that advertisers possess a reasonable basis when they make objective claims would be wrong. Some aspects of the implementation and application of the ad substantiation requirement have been controversial and unclear, however. The Commission seeks information about the administration of the doctrine in order to improve it.

There are several reasons why advertisers should possess a reasonable basis for their objective claims. First, consumer dissatisfaction over deceptive claims creates an incentive for firms to possess a reasonable basis that a claim is true before making it to consumers. Otherwise, firms risk damaging their reputations, one of the most valuable assets for companies that advertise. Second, as part of the self-regulatory process, which includes possible consideration by the National Advertising Review Board and pre-clearance by the major television networks, advertisers are required to possess a reasonable basis. Finally, as explained above, the Commission requires that advertisers possess a reasonable basis when they make certain claims. In these circumstances, consumers are likely to expect that claims made by advertisers are supported by a reasonable basis.

The Commission has implemented the substantiation requirement in two ways. First, it has ordered firms within certain selected industries to submit substantiation for specific ad claims, pursuant to its authority under section 6(b) of the FTC Act. Between 1971 and 1981, the Commission conducted 29 of these industry-wide rounds. Second, the Commission has implemented the program on a case-by-case basis, in which the staff asks an individual advertiser to provide substantiation for claims made in its advertising. Both processes have led to a number of law enforcement actions. As of January 1, 1983, the Commission has issued 21 litigated orders and 126 consent orders. Firms under these orders are subject to civil penalties if they fail to possess a reasonable basis for future ad claims.

The Commission is absolutely committed to fulfilling its mandate to police the marketplace to prevent unfair or deceptive advertising. As part of that effort, the Commission had relied on its prior substantiation doctrine, a requirement whose general concept has received very wide support, including support from all members of the current Commission. Chairman Miller and others, however, have identified several questions concerning how the Commission applies the requirement. For example, do advertisers realize which claims require substantiation, or is the line between objective performance claims requiring substantiation and subjective claims that do not need substantiation unclear? Moreover, and closely related, how should the doctrine be applied to implied claims that are not reasonably apparent on the face of the ad and whose very existence is in dispute? Further, has the amount of evidence required as a "reasonable basis" sometimes been excessive, thereby deterring truthful advertising that would be useful to consumers? Finally, should the Commission evaluate substantiation that is not developed or produced until after a claim has been made and if so, how and when?

The Commission's staff has been engaged in an ongoing study of specific aspects of the administration of the advertising substantiation program, to address these and other questions. To facilitate systematic evaluation, the Commission is soliciting data and comments bearing on the implementation of the requirement. Although it is also interested in receiving comments on other issues relating to ad substantiation that seem important to the commentor, the Commission is particularly interested in the general issues outlined below, and the specific questions raised under each. We are seeking comment from interested individuals and groups on these issues, including advertisers, ad agencies, consumer research houses, academics, consumers and consumer groups, advertising media, advertising self-regulatory groups, and trade associations. The Commission is particularly interested in specific comments and any available support evidence. Empirical evidence such as surveys would be mor useful if accompanied, to the extent possible, by relevant underlying data and details concerning methodology.

A. Procedures for Implementing the AD Substantiation Program

1. As noted above, the FTC has sought substantiation either by industry-wide rounds (Section 6(b) orders) or on an individual basis. In both cases, the substantiation is treated confidentially, but law enforcement initiatives against individual companies may result. What has been the impact of each process? Comments from companies who have received both a 6(b) order and an individual request for information would be particularly useful.

2. Should the Commission employ one process instead of another, and if so, under what circumstances?

3. Could either process be improved, and if so how?

4. When should the ad substantiation program be used as a broad investigatory tool to develop possible cases *e.g.*, by requesting substantiation from all firms in an industry, and when should it be used as a more narrowly focused tool to explore alleged problems?

B. Standards for Reviewing Substantiation or Standards Included in Reasonable Basis Orders

1. Are general standards (*e.g.*, possess and rely on a reasonable basis) for advertisers/ad agencies under order preferable to specific standards (*e.g.*, two well controlled clinical studies)? Why?

2. Would advertisers and ad agencies affected by the Commission's program prefer to have specific standards issued, such as (depending on the product and the claim made for it):

— Two well-controlled double-blind clinical studies;
— Written results of dynamometer testing according to test cycles established by an agency or department of the United States government;
— A written certification from the manufacturer, proprietor or licensee of the brand name, or qualified testing laboratory that there is a reasonable basis;
— Valid and reliable scientific evidence;
— Competent and reliable objective materials available in written form;
— Competent and reliable opinions of engineering or other experts.

Please explain why.

3. Could specific standards for the reasonable basis requirement be clearer? If so, how? How do advertisers and agencies under order interpret such phrases as "two well-controlled clinical tests" in terms of parameters of the tests such as sample size, confidence levels, etc.?

4. Would a reasonable basis order that included both a general and a specific standard, either of which the advertiser/ad agency under order could follow at their option, be preferable?

5. In determining the amount of substantiation to require of an advertiser/ad agency under order, how should the Commission balance the risk of suppressing truthful information against the risk of allowing dissemination of deceptive information?

6. Under current law, advertisers are required to have a reasonable basis for factual claims before the ad is disseminated. Should subsequent substantiating evidence (developed after a claim is made) be evaluated in FTC enforcement proceedings and, if so, how and when? Specifically, should any such evaluation consider:

—When the post-claim evidence was actually developed (*i.e.*, before or after an investigation is initiated)?
—Whether the advertiser reasonable believed that the ad did not make the claim for which substantiation is sought?

7. What tests, protocols, or other procedures do advertisers and ad agencies conduct to ascertain which claims their advertisements convey to consumers? Please provide specific examples.

C. Expectations of Consumers

1. The Commission believes that consumers expect that advertisers have support for certain claims they make in advertising. Please provide any consumer research or other evidence to support or refute this point, including as much specific information as possible.

2. If an ad states explicitly that it is based on clinical tests, or some other particular kind of evidence, consumers are likely to expect the advertiser to possess the evidence identified. For claims that are less explicit, however, the amount of substantiation that consumers expect is less clear. Even when an advertisement identifies a particular basis, issues arise concerning the quantum or quality of substantiation that consumers expect. For example, when an ad claims that it is based on tests, how sophisticated or extensive do consumers expect the tests to be? If an ad claims that it is based on medical opinion, what kind and amount of opinion do consumers expect? Please provide any consumer research or other evidence regarding the amount of substantiation that consumers expect in such instances including as much specific information as possible.

3. The Commission also believes that consumers' expectations about the amount of substantiation depend on a variety of factors, including: the product, the type and specificity of the claim, the possible consequences of a false claim, the degree of reliance by consumers on the claim, and the type and accessibility of evidence adequate to form a reasonable basis. For instance, consumers may expect a higher quantum and better quality of substantiation for health and safety claims, or claims that contain specific details, or claims that use the words "proves" or "guarantees." Please provide any consumer research or other evidenc addressing how expectations differ depending on these factors, including as much specific information as possible. The Commission is also interested in any evidence addressing the quantum or quality of substantiation consumers expect for:

—Objective performance claims making no reference to specific evidence;
—Claims in which a competitor is named or implied;
—Claims for frequently-purchased, inexpensive products that are easily evaluated by the consumer at a low cost;
—Claims concerning subjective product attributes, such as taste, appearance, or smell.

D. Relationship of FTC A Substantiation Program To Self-Regulatory Bodies

1. What effect, if any, did the establishment of the FTC substantiation requirement have on the advertising standards set by companies for internal use, by self-regulatory bodies, or by others?

2. How, when, and why did the self-regulatory units, including the network continuity clearance departments, develop? Is there a regulatory unit similar to continuity clearance for national print ads?

3. What substantiation, if any, did advertisers and agencies develop before the FTC established the reasonable basis requirement? If substantiation was developed, why? What kind of documentation was developed?

—If documentation was developed, did the FTC's requirement change the type or amount of documentation? If yes, how did the requirement affect the documentation?

4. What documentation do advertisers and ad agencies develop for other purposes, such as network copy clearance, National Advertising Division (NAD) review, or otherwise? Is the same documentation developed for these purposes as is developed in response to the FTC's ad substantiation requirement?

5. Substantiation developed by advertisers and ad agencies can be reviewed by a variety of regulatory bodies including the networks the NAD, and the FTC. Do the standards differ among the networks, the NAD, and the FTC? How? Is one entity more stringent than another with respect to particular areas of advertising? How?

6. Do the types of claims pursued by the FTC and self-regulation units differ? If so, please explain.

7. To what extent are the decisions by the network clearance departments or by the self-regulation units based on FTC decisions and orders, policy statements, or guides?

8. What effect does the FTC's ad substantiation program have on self-regulation today?

9. How have the decisions by the networks or the self-regulatory units differed from those of the FTC?

10. What has been the effect on advertisers/ad agencies of decisions by the NAD, or courts under the Lanham Act?

11. Do self-regulatory bodies require advertisers/ad agencies to provide substantiation to support the implied—as well as the express—claims they make in advertising? If so, what sorts of documentation do they require advertisers/ad agencies to provide to support implied claims? How do they ascertain what implied claims exist?

E. Role of Government Agencies Other Than the FTC

1. Do government agencies other than the FTC, including state and local government, have an effect on how advertising claims are made? Please

explain what the agencies are and their effect.

2. What effect, if any, has the FTC's prior substantiation requirement had on advertising regulation by state and local governments?

3. Is there inconsistency between standards and requirements followed by other government agencies and by self-regulatory units?

F. Complaints

1. Under what circumstances does an advertiser complain to the NAD? To the networks? To the FTC? Commence a private law suit under Section 43 of the Lanham Act?

2. How often, and under what circumstances, do consumers complain to advertisers or to other institutions about advertising?

3. How often does one advertiser complain privately to another about that company's advertising?

4. How much does it cost an advertiser or consumer to pursue to final resolution a complaint before the networks? Before the FTC? Before the NAD? In court under the Lanham Act?

G. Benefits of the FTC's AD Substantiation Program

For the following questions addressing benefits and costs of the substantiation program, we are particularly interested in academic research. For example, such research might include studies of changes in advertising for an industry or a specific product as a result of specific Commission action. Studies comparing advertising before and after the substantiation requirement was announced would also be useful.

1. What are the benefits of the ad substantiation program? Please submit any available data documenting such benefits.

2. What changes have occurred in the content of advertising since the inception of the ad substantiation program in 1972? Have there been more or less of some types of claims since the ad substantiation program came into existence? Have ads become more or less factual? To what extent are these changes attributable to ad substantiation?

3. Has advertising become more accurate and believable since 1972? What data or other information support or refute this proposition? What factors explain this proposition, if it is true? If it is true, to what extent has it lessened the overall cost of advertising?

4. Has the ad substantiation program deterred dissemination of false ads or ads that omit material information and, if so, how? Is the current deterrent effect sufficient?

5. Have there been other benefits of the ad substantiation program? Please explain.

H. Cost of the AD Substantiation Program

1. What are the costs of the ad substantiation program? Please submit any available data documenting such costs.

2. There may be claims that an advertiser believed were adequately substantiated but decided not to make because of concerns about substantiation. For example, have advertisers avoided claims concerning scientific controversies in the belief that the Commission would require a higher degree of substantiation than the advertiser possessed? Have there been claims that an advertiser believed were adequately substantiated, but for which self-regulatory bodies requested additional support? Have advertisers in such circumstances revised or abandoned claims rather than develop additional evidence? What was the specific reasons that the claim was not made? Please provide specific examples if possible.

3. What has been the additional cost, if any, of developing documentation to meet the general ad substantiation requirement beyond the cost of documentation that would have been developed in any event? What has been the cost of responding to FTC requests for substantiation for individual requests? For Section 6(b) industry-wide requests?

4. Have advertisers developed materials because of the ad substantiation requirement that they would not have developed for the networks, or other purposes? What has been the cost of developing those materials?

5. What has been the cost of complying with an FTC ad substantiation order for a company under order in terms of developing additional documentation? Has the effect of the ad substantiation doctrine been different on those companies under order from those only required to meet the general ad substantiation concept? If so, please explain how.

6. Has the ad substantiation program had any effect on advertising budgets or on advertising/sales ratios? Please explain.

7. What effect, if any, does the ad substantiation program have on the decision whether to prepare advertising in-house or use an ad agency? What cost, if any, has this effect imposed?

8. Has the ad substantiation program had different effects on large and small advertisers or agencies? What has been the significance of these effects? Please be as specific as possible

9. Are there any other costs associated with the ad substantiation program? Please explain.

10. On balance, how do the benefits of the program compare to its costs? Please explain.

I. Effects of AD Substantiation Orders

1. What has been the effect of an ad substantiation order against an advertiser on that advertiser? On other manufacturers of the same product? For example, have such companies instituted new review procedures, either for products subject to the order or for other products? Have companies developed additional supporting evidence? Please describe these changes, and provide any specific data.

2. What has been the effect of an ad substantiation order against a specific ad agency on that agency? On ad agencies that handle accounts for competing products? For example, do agencies under order find it more difficult to obtain new accounts for products covered by the order? Have such agencies instituted new review procedures, either for products subject to the order or for other products? Have agencies developed or requested additional supporting evidence? Please describe these changes, and provide any specific data.

J. Recommendations

1. What changes in the implementation of the ad substantiation requirement, if any, would improve the program?

By direction of the Commission.

Dated: March 3, 1983.

Benjamin I. Berman,

Acting Secretary.

BILLING CODE 6750-01-M

GENERAL SERVICES ADMINISTRATION

[Wildlife Order 150; 10-I-OR-651]

J-1 Lateral, Lost River Area, Klamath County, Oregon; Conveyance of Property

Pursuant to section 2 of Pub. L. 537, 80th Congress, approved May 19, 1948 (16 U.S.C. 667c), notice is hereby given that:

1. By deed from the General Services Administration dated February 14, 1983,

the property, consisting of 3.5 acres of unimproved land, known as J–1 Lateral, Lost River Area, Klamath County, Oregon (10–I–OR–651), has been conveyed to the State of Oregon, Department of Fish and Wildlife.

2. The above described property was conveyed for wildlife conservation in accordance with the provisions of section 1 of said Pub. L. 80–537 (16 U.S.C. 667b), as amended by Pub. L. 92–432.

Dated: February 18, 1983.

Carroll Jones,

Commissioner.

BILLING CODE 4320-06-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

Advisory Committees; Meetings

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: This notice announces forthcoming meetings of public advisory committees of the Food and Drug Administration (FDA). This notice also sets forth a summary of the procedures governing committee meetings and methods by which interested persons may participate in open public hearings conducted by the committees and is issued under section 10(a) (1) and (2) of the Federal Advisory Committee Act (Pub. L. 92–463, 86 Stat. 770–776 (5 U.S.C. App. I)), and FDA regulations (21 CFR Part 14) relating to advisory committees. The following advisory committee meetings are announced:

Vaccines and Related Biological Products Advisory Committee

Date, time, and place. April 14 and 15, 9 a.m., Rm. 121, Bldg. 29, 8800 Rockville Pike, Bethesda, MD.

Type of meeting and contact person. Open public hearing, April 14, 9 a.m. to 10 a.m.; open committee discussion, 10 a.m. to 5 p.m.; open committee discussion, April 15, 8:30 a.m. to 4 p.m.; Jack Gertzog, National Center for Drugs and Biologics (HFN–6), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–5455.

General function of the committee. The committee reviews and evaluates data on the safety and effectiveness of vaccines and related biological products intended for use in the diagnosis, prevention, or treatment of human diseases.

Agenda—Open public hearing. Any interested persons may present data, information, or views, orally or in writing, on issues pending before the committee.

Open committee discussion. The committee will begin review of the Office of Biologics research program.

General Hospital and Personal Use Device Section of the General Medical Devices Panel

Date, time, and place. April 18, 9 a.m., Rm. 503–529A, 200 Independence Ave. SW., Washington, D.C.

Type of meeting and panel section leader. Open public hearing, 9 a.m. to 10 a.m.; open committee discussion, 10 a.m. to 5 p.m.; Robert R. Gatling, National Center for Devices and Radiological Health (HFK–420), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301–427–7750.

General function of the committee. The committee reviews and evaluates available data on the safety and effectiveness of devices and makes recommendations for their regulation.

Agenda—Open public hearing. Interested persons may present data, information, or views, orally or in writing, on issues pending before the committee. Those desiring to make formal presentations should notify the panel section leader before April 4, and submit a brief statement of the general nature of the evidence or arguments they wish to present, the names and addresses of proposed participants, and an indication of the approximate time required to make their comments.

Open committee discussion. The committee will discuss and make classification recommendations on the following devices: Antimicrobial Treated Hospital Products; Apgar Timer; Chemical Disinfection System; Implanted Percutaneous Intravascular Delivery Catheter; Implanted Subcutaneous Intravascular Delivery Catheter; Implanted Subcutaneous Intraventricular Delivery Catheter; Implanted Subcutaneous Lumbar Delivery Catheter; Infusion Fluids Microwave Warmer; Infusion Fluids Thermal Warmer; Miniature Ion Selective Electrodes; and Multiple Needle Injector.

FDA public advisory committee meetings may have as many as four separable portions: (1) An open public hearing, (2) an open committee discussion, (3) a closed presentation of data, and (4) a closed committee deliberation. Every advisory committee meeting shall have an open public hearing portion. Whether or not it also includes any of the other three portions will depend upon the specific meeting involved. There are no closed portions for the meetings announced in this notice. The dates and times reserved for the open portions of each committee meeting are listed above.

The open public hearing portion of each meeting shall be at least 1 hour long unless public participation does not last that long. It is emphasized, however, that the 1 hour time limit for an open public hearing represents a minimum rather than a maximum time for public participation, and an open public hearing may last for whatever longer period the committee chairman determines will facilitate the committee's work.

Meetings of advisory committees shall be conducted, insofar as is practical, in accordance with the agenda published in this **Federal Register** notice. Changes in the agenda will be announced at the beginning of the open portion of a meeting.

Any interested person who wishes to be assured of the right to make an oral presentation at the open public hearing portion of a meeting shall inform the contact person listed above, either orally or in writing, prior to the meeting. Any person attending the hearing who does not in advance of the meeting request an opportunity to speak will be allowed to make an oral presentation at the hearing's conclusion, if time permits, at the chairman's discretion.

Persons interested in specific agenda items to be discussed in open session may ascertain from the contact person the approximate time of discussion.

A list of committee members and summary minutes of meetings may be requested from the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857, between 9 a.m. and 4 p.m., Monday through Friday. The FDA regulations relating to public advisory committees may be found in 21 CFR Part 14.

Dated: March 4, 1983.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

BILLING CODE 4160-01-M

Consumer Participation; Open Meeting

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing the following consumer exchange meeting: Orlando District Office, chaired by Adam J. Trujillo, District Director.

DATE: Thursday, March 31, 1983, 9:30 a.m. to 12 m.

ADDRESS: Dade County Department of Housing and Urban Development Conference Room, 1407 NW. 7th St., Miami, FL 33125.

FOR FURTHER INFORMATION CONTACT: Lynne C. Isaacs, Consumer Affairs Officer, Food and Drug Administration, P.O. Box 118, Orlando, FL 32802, 305–855–0900.

SUPPLEMENTARY INFORMATION: The purpose of this meeting is to encourage dialogue between consumers and FDA officials, to identify and set priorities for current and future health concerns, to enhance relationships between local consumers and FDA's District Offices, and to contribute to the agency's policymaking decisions on vital issues. The topics to be discussed are tamper-resistant packaging, patient education, quackery, and diet products.

Dated: March 3, 1983.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

[Docket No. 83F-0050]

Ciba-Geigy Corp.; Filing of Food Additive Petition

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing that Ciba-Geigy Corp. has filed a petition proposing that the food additive regulations be amended to provide for the safe use of octadecyl 3,5-di-*tert*-butyl-4-hydroxyhydrocinnamate as an antioxidant/stabilizer.

FOR FURTHER INFORMATION CONTACT: John L. Herrman, Bureau of Foods (HFF–334), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202–472–5690.

SUPPLEMENTARY INFORMATION: Under the Federal Food, Drug, and Cosmetic Act (sec. 409(b)(5), 72 Stat. 1786 (21 U.S.C. 348(b)(5)), notice is given that a petition (FAP 3B3697) has been filed by Ciba-Geigy Corp., Three Skyline Drive, Hawthorne, NY 10532, proposing to amend the food additive regulations to provide for the safe use of octadecyl 3,5-di-*tert*-butyl-4-hydroxyhydrocinnamate as an antioxidant/stabilizer.

The potential environmental impact of this action is being reviewed. If the agency finds that an environmental impact statement is not required and this petition results in a regulation, the notice of availability of the agency's finding of no significant impact and the evidence supporting that finding will be published with the regulation in the **Federal Register** in accordance with 21 CFR 25.40(c) (proposed December 11, 1979; 44 FR 71742).

Dated: March 3, 1983.

Consumer Participation; Open Meeting

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing the following national consumer exchange meeting, chaired by Arthur Hull Hayes, Jr., M.D., Commissioner of Food and Drugs.

DATE: Monday, March 28, 1983, 10 a.m. to 12 m.

ADDRESS: Health and Human Services (HHS) North Bldg. Auditorium, 330 Independence Ave. SW., Washington, D.C. 20201.

FOR FURTHER INFORMATION CONTACT: Alexander Grant, Associate Commissioner for Consumer Affairs (HFE–1), Food and Drug Administration, 5600 Fishers Lane, Rm. 16–85, Rockville, MD 20857, 301–443–5006 (TTY (telephone for the deaf): 301–443–1818).

SUPPLEMENTARY INFORMATION: The purpose of this meeting is for top FDA officials and consumers to exchange views and to relay information on vital health and policy issues. Proposed discussion at this meeting will focus on direct-to-consumer advertising of prescription drugs, an emerging issue on which the agency seeks public opinion.

Dated: March 7, 1983.

[Docket No. 83M-0055]

Teletronics Proprietary, Ltd.; Premarket Approval of Autima™ Model 2251 Pulse Generator and Model 2600 Programmer

AGENCY: Food and Drug Administration.

ACTION: Notice

SUMMARY: The Food and Drug Administration (FDA) is announcing its approval of the application for premarket approval under the Medical Device Amendments of 1976 of the Autima™ Model 2251 Pulse Generator and Model 2600 Programmer sponsored by Teletronics, Inc., Suffield, CT. After reviewing the recommendation of the Circulatory System Devices Panel, FDA notified the sponsor that the device had been shown to be safe and effective for use as recommended in the submitted labeling.

DATE: Petitions for administrative review by April 11, 1983.

ADDRESS: Requests for copies of the summary of safety and effectiveness data and petitions for administrative review may be sent to the Dockets

Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Charles H. Kyper, National Center for Devices and Radiological Health (HFK–402), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301–427–7445.

SUPPLEMENTARY INFORMATION: On June 8, 1982, Telectronics, Inc., Suffield, CT, submitted to FDA an application for premarket approval of the Autima™ Model 2251 Pulse Generator and Model 2600 Programmer. The application was reviewed by the Circulatory System Devices Panel, an FDA advisory committee, which recommended approval of the application for use of this device as a cardiac pacing system. On February 10, 1983, FDA approved the application by a letter to the sponsor from the Associate Director for Device Evaluation of the Office of Medical Devices.

A summary of the safety and effectiveness data on which FDA's approval is based is on file in the Dockets Management Branch (address above) and is available upon request from that office. A copy of all approved final labeling is available for public inspection at the Office of Medical Devices—contact Charles Kyper (HFK–402), address above. Requests should be identified with the name of the device and the docket number found in brackets in the heading of this document.

Opportunity for Administrative Review

Section 515(d)(3) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360e(d)(3)) authorizes any interested person to petition under section 515(g) of the act (21 U.S.C. 360e(g)) for administrative review of FDA's decision to approve this appliction. A petitioner may request either a formal hearing under Part 12 (21 CFR Part 12) of FDA's administrative practices and procedures regulations or a review of the application and of FDA's action by an independent advisory committee of experts. A petition is to be in the form of a petition for reconsideration of FDA action under § 10.33(b) (21 CFR 10.33(b)). A petitioner shall identify the form of review requested (hearing or independent advisory committee) and shall submit with the petition supporting data and information showing that there is a genuine and substantial issue of material fact for resolution through administrative review. After reviewing the petition, FDA will decide whether to grant or deny the petition and will publish a notice of its decision in the **Federal Register.** If FDA grants the petition, the notice will state the issue to be reviewed, the form of review to be used, the persons who may participate in the review, the time and place where the review will occur, and other details.

Petitioners may, at any time on or before April 11, 1983, file with the Dockets Management Branch (address above) two copies of copies of each petition and supporting data and information, identified with the name of the device and the docket number found in brackets in the heading of this document. Received petitions may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

Dated: March 1, 1983.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

Office of the Secretary

Agency Forms Submitted to the Office of Management and Budget for Clearance

Each Friday the Department of Health and Human Services (HHS) publishes a list of information collection packages it has submitted to the Office of Management and Budget (OMB) for clearance in compliance with the Paperwork Reduction Act (44 U.S.C. Chapter 35). The following are those packages submitted to OMB since the last list was last published on March 4.

Social Security Administration

Subject: Application for Widow's or Widower's Insurance Benefits (SSA–10–BK/SSA–1050–U5 (1–83))—Revised.

Respondents: Individuals or households.

OMB Desk Officer: Milo Sunderhauf.

Office of Human Development Services

Subject: Standard Setting Requirements for Medical and Nonmedical Facilities where SSI Recipients Reside—New.

Respondents: State agencies that license medical or nonmedical facilities.

OMB Desk Officer: Milo Sunderhauf.

Health Care Financing Administration

Subject: Medicare Home Office Cost Statement (HCFA 287)—Revised.

Respondents: Home offices of health care provider chain organizations participating in the Medicare program.

OMB Desk Officer: Fay S. Iudicello.

Copies of the above information collection clearance packages can be obtained by calling the HHS Reports Clearance Officer on 202–245–6511.

Written comments and recommendations for the proposed information collections should be sent directly to both the HHS Reports Clearance Officer and the appropriate OMB Desk Officer designated above at the following addresses:

J. J. Strand, HHS Reports Clearance Officer, Hubert H. Humphrey Building, Room 524–F, Washington, D.C. 20201.

OMB Reports Management Branch New Executive Office Building, Room 3208 Washington, D.C. 20503. Attn: (name of OMB Desk Officer).

Dated: March 4, 1983.

Dale W. Sopper,

Assistant Secretary for Management and Budget.

BILLING CODE 4160–04–M

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

Irrigation Operation and Maintenance Charges; Fort Hall Irrigation Project

This notice of operation and maintenance rates and related information is published under the authority delegated by the Secretary of the Interior to the Assistant Secretary—Indian Affairs in 230 DM 1 and redelegated by the Assistant Secretary—Indian Affairs to the Area Directors in 10BIAM 3. The authority to issue regulations is vested in the Secretary of the Interior by 5 U.S.C. 301 and Section 463 and 465 of the Revised Statutes (25 U.S.C. 2 and 9), and also under 25 CFR 191.1(e).

On January 28, 1983, in 48 FR 4053, there was published a notice of proposed assessment rates and related provisions on the Fort Hall Irrigation Project for Calendar Year 1983 and subsequent years until further notice. These assessment rates were proposed pursuant to the authority contained in the Acts of March 1, 1907, (34 Stat. 1024), and August 31, 1954 (68 Stat. 1026).

Interested persons were given 30 days in which to submit written comments, views or arguments regarding the proposed rates and related provisions. During this period no comments, suggestions, or objections were submitted. Therefore, the assessment rates and related provisions as set forth below are adopted effective 30 days after date of publication in the **Federal Register.**

Fort Hall Irrigation Project

Regulations and Charges

Administration

The Fort Hall Irrigation Project, which consists of the Fort Hall Unit including ceded area south of the Fort Hall Indian Reservation, the Michaud Unit and the Minor Units on the Fort Hall Indian Reservation, Idaho, is administered by the Bureau of Indian Affairs. The Superintendent of the Fort Hall Agency is the Officer-in-Charge and is fully authorized to carry out and enforce the regulations, either directly or through employees designated by him. The general regulations are contained in Part 191, Operation and Maintenance, Title 25—Indians, Code of Federal Regulations.

Irrigation Season

Water will be available for irrigation purposes from April 15 to September 30 of each year. These dates may be varied by 15 days depending on weather conditions and the necessity for doing maintenance work.

Methods of Irrigation

Where soil, topography, and other physical conditions are unfavorable for surface irrigation, and the project facilities are designed to deliver water to farm units for sprinkler irrigation, the Officer-in-Charge may limit deliveries to this type of irrigation.

Distribution and Apportionment of Water

(a) *Delivery:* Water for irrigation purposes will be delivered throughout the irrigation season by either the continuous flow or rotation method at the discretion of the Officer-in-Charge. If during a time when delivery is by the rotation method, a water user desires to loan his turn to another eligible water user, he shall notify either the watermaster or the ditch rider who may permit such exchange, if feasible.

(b) *Preparation and Submission of a Water Schedule:* If the decision of the Officer-in-Charge is to deliver water by the rotation method, the watermaster will assist the water users on each lateral in preparing a rotation schedule should they choose to get together and prepare the schedule. In cases where the water users fail to exercise this right before March 1, the watermaster will prepare the schedule which shall be final for the season. Owners of 120 acres or more in one farm unit may elect between the continuous flow and rotation method of delivery, provided such choice does not interfere with delivery to other lands served by the lateral.

(c) *Application for Deliveries of Irrigation Water:* Requests for water changes will be made at least 24 hours in advance. Not more than one change will be made per day. Changes will be made only during the ditch rider's regular tour. Pump shut-down, regardless of duration, without the required notice will result in the delivery being closed and locked. Repeated violations of this rule will result in strict enforcement of rotation schedules. Water users will change their sprinkler lines without shutting off more than one-half of their lines at one time. Sudden and unexpected changes in ditch flow results in operating difficulties and waste of water.

Duty of Water

Dependent upon available supplies of water for each unit of the Project, the duty of water is based on the delivery to the farm unit of 3.5-acre-feet of water per acre per irrigation season. This duty of water may be varied at the discretion of the Officer-in-Charge depending on supplies available, but each irrigable acre shall be entitled to its pro-rata share of the total water supply.

Charges

A bill covering irrigation charges will be issued to the owner of record taken from the Bannock, Bingham or Power County records as of December 31, preceding the due date. In the case of Indian-owned land leased to a non-Indian, when an approved lease contract is on file with the Superintendent of the Fort Hall Agency, operation and maintenance charges will be billed to the lessee of record.

Basic and Other Water Charges

(a) The annual basic water charges for the operation and maintenance of the Fort Hall Irrigation Project lands in non-Indian ownership, and assessable Indian-owned lands leased to a non-Indian or a non-member of the Shoshone-Bannock Tribes of the Fort Hall Indian Reservation, Idaho, are fixed for the Calendar Year 1983 and subsequent years until further notice as follows:

(1) Fort Hall Unit basic rate.....$17.00 per acre
(2) Michaud Unit basic rate.....$21.00 per acre
Additional rate for sprinkler when pressure is supplied by project...$8.50 per acre
(3) Minor Units basic rate.....$14.00 per acre

(b) In addition to the foregoing charges there shall be collected a minimum charge of $5 for the first acre, or fraction thereof, on each tract of land for which operation and maintenance bills are prepared. The minimum bill issued for any area will, therefore, be the basic rate per acre plus $5.

Payments

The water charges become due on April 1 of each year and are payable on or before that date. To all assessments on lands in non-Indian ownership, and lands in Indian ownership which do not qualify for free water, remaining unpaid on or after July 1 following the due date, there shall be added a penalty of one and one-half percent per month, or fraction thereof, from the due date until paid. No water shall be delivered to any farm unit until all irrigation charges have been paid.

Assessments on Indian Owned Land

When land owned by members of the Shoeshone-Bannock Tribes of the Fort Hall Indian Reservation is first leased to non-Indians or non-members of the tribe, and an approved lease is on file at the Fort Hall Agency, the leased land is not subject to operation and maintenance assessments for three years. The three years the land is not subject to assessment need not run consecutively. When land has been leased for a total of three years, the land, when under lease to non-Indians or non-members of the tribe, is subject to operation and maintenance assessments the same as lands on non-Indian ownership and lands owned by non-members of the tribe within the project. (See Solicitor's Opinion M 28701, approved September 24, 1936, and the instructions of September 19, 1938, approved September 24, 1938, and instructions of December 1, 1938, approved December 17, 1938).

Stanley Speaks,

Area Director.

BILLING CODE 4310-02-M

Bureau of Land Management

[INT Draft MFP Amendment/EIS 83-12]

Las Cruces/Lordsburg Resource Area; Draft Management Framework Plan Amendment; Environmental Impact Statement

AGENCY: Bureau of Land Management (BLM), Las Cruces District, Interior.

ACTION: Notice of availability, public meetings and public hearings.

SUMMARY: Pursuant to Section 102(2)(c) of the National Environmental Policy Act of 1969, the BLM has prepared a Draft Management Framework Plan Amendment/Environmental Impact

Statement (MFPA/EIS) to reconsider constraints on energy minerals leasing imposed by existing decisions for the Las Cruces/Lordsburg Resource Area (Dona Ana, Luna, Hidalgo, and Grant Counties) and to implement a rangeland management program for the 3-county area (Luna, Hidalgo, and Grant Counties) of the Las Cruces District in southwest New Mexico. The energy minerals issue involves the identification and analysis of areas where potential resource conflicts would be significant enough to either preclude or restrict oil and gas or geothermal leasing and associated operations. The rangeland management issue involves the amount of vegetation allocated to grazing and other uses, the methods of grazing management, support facilities, monitoring and evaluation, and maintenance of rangeland developments. For each issue, a general implementation schedule has been outlined; standard operating procedures and interrelationships with other agencies in the Resource Area are discussed.

DATE: Written comments on the MFPA/EIS must be received in the Las Cruces District Office no later than 90 days from this notice.

ADDRESS: Comments should be sent to the Las Cruces District Office, Attn: Mary Austin, MFPA/EIS Team Leader, P.O. Box 1420, Las Cruces, New Mexico 88004.

FOR FURTHER INFORMATION CONTACT: Mary Austin, MFPA/EIS Team Leader, at the above address. Telephone: (505) 524–8551 or FTS 571–8312.

SUPPLEMENTARY INFORMATION: Copies of the Draft MFPA/EIS have been distributed to a mailing list of identified interested parties. A limited number of additional copies are available at the Las Cruces District Office, 317 North Main, P.O. Box 1420, Las Cruces, New Mexico 88004. Public reading copies are available for review at the BLM State Office, Office of Public Affairs, Joseph M. Montoya Federal Building and U.S. Post Office, Santa Fe, New Mexico and public and university libraries in Las Cruces, Deming, Silver City, Lordsburg, Albuquerque, New Mexico, and El Paso, Texas. Reviewers should retain the Draft MFPA/EIS for future reference, as the final MFPA/EIS may not reprint the full text of the Draft MFPA/EIS. (The Draft MFPA/EIS will be incorporated by reference in the final statement.)

Public meetings and hearings will be held at 10 a.m. and 1:30 p.m. on April 12, 13 and 14, 1983 to receive oral or written comments on the merits of the proposal and alternatives and the adequacy of the Draft MFPA/EIS.

PUBLIC MEETINGS AND HEARINGS: Public meetings and hearings will be held on the dates and at the locations listed below to receive oral or written comments on the merits of the proposal and alternatives and the adequacy of the Draft MFPA/EIS.

Tuesday, April 12, 1983

Deming, New Mexico
Location: Council Chambers of the Deming City Hall, 309 S. Gold Avenue
Public Meeting: 10 a.m. Public Hearing: 1:30 p.m.

Wednesday, Arpil 13, 1983

Las Cruces, New Mexico
Location: Branigan Memorial Library, Room B, 200 E. Picacho
Public Meeting: 10 a.m. Public Hearing: 1:30 p.m.

Thursday, April 14, 1983

Lordsburg, New Mexico
Location: Lordsburg Civic Center, 313 East 4th Street
Public Meeting: 10 a.m. Public Hearing: 1:30 p.m.

During the public meetings, representatives of the BLM will be available for discussion and to answer questions. During the public hearings, oral comments will be limited to 10 minutes and should be accompanied with a written text. Anyone wanting to register for the public hearings to present oral comments should contact Rena Gutierrez at the Las Cruces District Office, phone (505) 524–8551, prior to April 5, 1983.

Dated: February 24, 1983.

Monte G. Jordan,

Associate State Director, New Mexico.

BILLING CODE 4310-84-M

Environmental Statement; San Juan Resource Area, Utah

AGENCY: Bureau of Land Management, Moab District, Utah, Interior.

ACTION: San Juan Resource Area, Utah; Resource Management Plan and Environmental Impact Statement (RMP/EIS).

SUMMARY: A Resource Management Plan (RMP) and an Environmental Impact Statement are being prepared for the San Juan Resource Area, based on the requirements of section 202(f) of the Federal Land Policy and Management Act and section 102(c) of the National Environmental Policy Act.

The San Juan Resource Area contains approximately 2 million acres of public land located in San Juan County of southeastern Utah.

General issues to be addressed in the San Juan Resource Area RMP/EIS include livestock requirements, wildlife habitat requirements, critical watersheds, off-road vehicle (ORV) use and management, lands disposal or lease, minerals, recreation, and fire management.

The RMP/EIS will be prepared by an interdisciplinary team consisting of a planning coordinator, a soil conservationist, a hydrologist, a wildlife management biologist, an outdoor recreation planner, a lands specialist, two range conservationists, a geologist and an economist.

Public participation is being sought as part of the issues identification process. Public workshops will be held on April 5, 1983 at 7:00 p.m. at the San Juan County Library in Monticello and on April 6, 1983 at 7:00 p.m. at the San Juan County Library in Blanding.

FOR FURTHER INFORMATION CONTACT: Edward R. Scherick, Area Manager, San Juan Resource Area, P.O. Box 7, Monticello, Utah 84535, or call (801) 587–2201.

Dated: March 4, 1983.

Vernon M. Wright,

Acting District Manager.

BILLING CODE 4310-84-M

[Modified Competitive Sale I–16802]

Idaho Falls District Realty Action; Public Land in Caribou County, Idaho

The following described land has been examined and identified as suitable for disposal by sale under Section 203 of the Federal Land Policy and Management Act of 1976 (90 Stat. 2750; 43 U.S.C. 1713) at not less than the fair market value of $8,400.

Boise Meridian, Idaho

T. 6 S. R. 42 E.,
Sec. 11: SW¼SE¼—40 acres.

The land will be sold at public auction by modified competitive bidding. Monsanto Company, Soda Springs, Idaho 83276 will be the designated bidder to have a preference right to purchase the land by meeting the highest bid. Such preference right is being offered because they are the adjoining landowners and have a pending phosphate use permit application (I–3800) on the subject tract.

The above described lands will be offered for sale on Tuesday, May 17, 1983 at 1:30 p.m. The subject public sale will be held at the Soda Springs BLM office.

The lands are being offered for sale in order to facilitate land-use planning in the area and enhance land-use

compatibility with adjoining private lands. The lands do not complement BLM programs and the location and physical characteristics of the tract, along with the private ownership of adjoining lands, make it difficult and uneconomical to manage as public land. This is consistent with the Bureau's planning for the lands involved and has been discussed with the Caribou County Planning and Zoning Commission. Disposal would not have any significant effect on resource values and would best serve the public interest.

The terms and conditions applicable to the sale are:

1. The sale of this land will be subject to all Caribou County regulations.

2. The sale of this land will be subject to all existing rights.

3. Preference right will be given to Monsanto Company. No bids will be accepted for less than the appraised price and bids for a parcel must include all the land in the parcel. Federal law requires that bidders be U.S. citizens or, in the case of a corporation, subject to the laws of any State or the United States. Proof of citizenship shall accompany the bid.

4. Upon disqualification of the apparent high bidder, the next high bid will be honored.

5. All minerals will be reserved to the United States as required by Section 209(a) of the Federal Land Policy and Management Act of 1976 U.S.C. 1719.

6. A right-of-way is reserved for ditches and canals constructed by the authority of the United States Act of August 30, 1890 (26 Stat. 391; 43 U.S.C. 945).

Bid Standards: No bid will be accepted for less than the appraised fair market value of $8,400. Bids must be for all the land in the specified tract.

Method of Bidding: Bids may be made either by mail or personally at the sale. Bids sent by mail will only be considered if received by the Bureau of Land Management, Soda Springs Resource Area Office, 490 East 2nd South, Soda Springs, Idaho 83276, prior to 1:30 p.m. on May 17, 1983. Bids sent in by mail must be in sealed envelopes accompanied by a certified check, postal money order, bank draft, or cashier's check made payable to the Bureau of Land Management, for not less than one-fifth of the amount of the bid. The sealed bid envelopes must be marked in the lower left hand corner, "Sealed Bid, Public Land Sale I–18802, sale to be May 17, 1983." If two or more valid sealed bids in the same amount are received and they are the high bid, the determination of which bid is to be considered the highest bid shall be by a drawing. The drawing, if required, shall be held immediately following the opening of the bids. The highest qualifying sealed bid shall then be announced.

Oral bids will be received immediately after all sealed bids have been opened and the highest sealed bid is announced. The highest sealed bid will be the base for oral bids. All oral bids must be made in increments of not less than $50. Sealed bidders present at the sale may also make oral bids. The highest bid price, either sealed or oral, will establish the sale price. If the highest bid is an oral bid, the successful bidder will be required to pay immediately one-fifth of the high bid price by cash, personal check, money order, bank draft, or any combination of these.

Modified Bidding: For a period of 30 days following the date of the sale, Monsanto Company will have a preference right to purchase the land by meeting the highest bid. If they meet the highest bid, the land will be sold to them, and the other bid will be returned. Refusal or failure by the designated bidder to meet the highest bid shall constitute a waiver of such bidding provision.

Final Details: The successful high bidder, whether it is by sealed or oral bid will be required to submit full payment for the balance of the bid within 30 days from the date of the sale. Failure to submit such payment within the 30 day period shall result in cancellation of the sale and the bid deposit shall be forfeited. All unsuccessful sealed bids will be returned within 30 days from the sale date. If no bids for the land, either sealed or oral, are received on the sale date, the sale will be adjourned until the next Tuesday at the same hour and place and continued on each succeeding Tuesday, until the lands are sold as specified in this notice or the sale is otherwise terminated.

Further Information/Inquiries: Detailed information concerning this sale, including the planning documents and Environmental Assessment, is available for review in the Soda Springs Resource Area Office at the address indicated above. For a period of 45 days from the date of this notice, interested parties may submit comments to the Bureau of Land Management, Idaho Falls District Manager, 940 Lincoln Road, Idaho Falls, Idaho 83401.

Any adverse comments will be evaluated by the Idaho State Director, Bureau of Land Management, who may vacate or modify this realty action and issue a final determination. In the absence of any action by the State Director this realty action will become the final determination of the Department of the Interior.

Dated: March 4, 1983.

James Gabettas,

Acting District Manager.

[FR Doc. 83-6272 Filed 3-10-83; 8:45 am]
BILLING CODE 4310-84-M

Las Vegas District, Nevada; Stateline-Esmeralda Resource Area

AGENCY: Bureau of Land Management, Interior.

ACTION: Preparation of Esmeralda Resource Management Plan.

SUMMARY: The Las Vegas District Office of the Bureau of Land Management is initiating land use planning for that portion of the Stateline-Esmeralda Resource Area exclusive of Clark County. The Esmeralda Planning Area covers all of Esmeralda County and that part of Nye County south and west of Nellis Air Force Base Bombing and Gunnery Range. The planning area is 3,105,160 acres in size and includes the communities of Beatty, Goldfield, Silverpeak, Dyer, Lida, Goldpoint, Coaldale, Lathrop Wells, Pahrump, Ash Meadows, and the Amargosa Farm Area. The planning area is a part of the Basin and Range Physiographic

Province, characterized by north-south trending mountain ranges. From north to south, these are: Monte Cristo, Lone Mountain, Cedar Mountain, Weepah Hills, Silver Peak Range, Palmetto Mountains, Montezuma Range, Magruder Mountain, Mount Jackson Ridge, Slate Ridge, Gold Mountain, Goldfield Hills, Grapevine Mountains, Bullfrog Hills, and Bare Mountains. The area includes Boundary Peak in the northwest corner which, at 13,145 feet elevation, is the highest point in Nevada.

The Resource Management Plan is a land use plan which focuses on specific issues, identifies goals for resource condition and use levels, program constraints, and outlines needs for more detailed management plans.

The BLM, at this time, anticipates the issues to be management of wilderness study areas, vegetative uses, and in southern Nye County, community expansion, and endangered species.

An interdisciplinary team representing range management, wildlife habitat management, lands and realty, minerals, and wilderness will be assigned to this planning task.

The plan will be prepared according to BLM planning regulations (43 CFR 1600).

Public comment and involvement is necessary throughout the planning process and in developing the inclusive Environmental Impact Statement. From now through September 1983, public participation will be needed to identify issues and help develop planning criteria.

DATES: The times, dates and locations of public meetings and hearings, and other public participation opportunities to obtain the aforementioned information have yet to be determined. News releases will be issued identifying specific meeting places and times as per 43 CFR 1601.3.

FOR FURTHER INFORMATION CONTACT: William T. Civish, Area Manager, Stateline-Esmeralda Resource Area, 301 E. Stewart Ave., P.O. Box 7384, Las Vegas, Nevada 89125, (702) 385-6627.

SUPPLEMENTARY INFORMATION: Planning documents and other pertinent materials may be examined at the Stateline-Esmeralda Resource Area Office located at 301 E. Stewart Ave., Las Vegas, Nevada, between 7:30 a.m. and 4:15 p.m., Monday through Friday.

Roger J. McCormack,

Associate State Director.

BILLING CODE 4310-84-M

Motorized Vehicles on Public Lands; Utah

March 4, 1983.

AGENCY: Bureau of Land Mangement, Utah, Interior.

ACTION: Notice of restriction of use of motorized vehicles on public lands.

Notice is hereby given that use of motorized vehicles on certain public lands in the Goblin Valley area is temporarily restricted, in accordance with the provisions of 43 CFR, Subpart 8362. These restrictions do not apply to emergency, law enforcement, and Federal or other government vehicles while being used for official or emergency purposes, or vehicles authorized by permit, contract or statute.

The area affected by this restriction is located approximately 13 miles north of Hanksville, Utah. The area is accessible from the entrance road to Goblin Valley State Reserve and lies adjacent to the State Reserve at its entrance. The area comprises 60 acres of the eastern slope of Wild Horse Butte and the flats to the east connecting with the entrance road to Goblin Valley State Reserve and the Wild Horse Butte road to the north.

The purpose of this emergency closure is to prevent excessive erosion, unnecessary destruction of plant life, public health and safety and the natural environment. The area has been excessively used by off-road vehicles (ORVs) resulting in conditions which necessitate this closure. This action has resulted from consultation with the Utah Division of Parks and Recreation and complaints received from visitors to Goblin Valley State Reserve.

The entire area will be signed at common points of ORV access.

Maps showing the area are available at the Moab District Office in Moab, Utah and the Price Area Office, in Price, Utah.

This notice is effective upon publication and will be in effect until June 1, 1983.

Dated: March 4, 1983.

Vernon M. Wright,

Acting District Manager.

BILLING CODE 4310-84-M

Winnemucca District Advisory Council Meeting

Notice is given in accordance with Pub. L. 92-463, that a meeting of the Winnemucca District Advisory Council will be held on April 15, 1983. The meeting will be from 10:00 a.m. to 5:00 p.m. in the Conference Room of the Winnemucca District Office, 705 East Fourth Street, Winnemucca, Nevada 89445.

The agenda for the meeting will include: (1) Orientation, (2) Land Use Plan, (3) Election of Officers and (4) History of Public Lands in the United States.

The meeting is open to the public. Interested persons may make oral statements to the Council at 1:30 p.m., or file written statements for the Council's consideration. Anyone wishing to make an oral statement must notify the District Manager, 705 East Fourth Street, Winnemucca, Nevada 89445, by April 5, 1983. Depending on the number of persons wishing to make oral statements, a per person time limit may be established by the District Manager.

Summary minutes of the Council meeting will be maintained in the District Office and available for public inspection (during regular business hours) within 30 days following the meeting.

Dated: March 3, 1983.

Frank G. Shields,

District Manager for State Director, Nevada.

BILLING CODE 4310-84-M

[Int DES 83-8]

Availability of Draft Environmental Impact Statement for Homestake Mining Company's McLaughlin Project

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969 (NEPA) and 43 CFR 3809, the Bureau of Land Management has had a draft environmental impact statement prepared for Homestake Mining Company's McLaughlin Project, near Knoxville, California. This statement was prepared by Engineering-Science of Berkeley, California, and also satisfies the requirements of the California Environmental Quality Act (CEQA) as an Environmental Impact Report. Napa County is the Lead Agency for CEQA; Lake and Yolo counties are Responsible Agencies. Alternatives discussed in detail include the proposed plan of operation, no action, an alternative water supply reservoir, and alternative mill sites.

DATES: Comments on the draft environmental impact statement are being solicited from public agencies and interested individuals and organizations.

Written comments should be submitted by April 25, 1983, to the District Manager, Ukiah District Office, P.O. Box 940, 555 Leslie Street, Ukiah, California 95482.

Public hearings will be held by Napa County on March 16 and April 25; by Lake County on April 7; and by Yolo County on April 4 and April 20. Contact the county planning departments for further information or changes in schedules.

ADDRESSES: A limited number of copies of the statement are available at the Ukiah District Office, or by contacting James Goodfellow, Project Coordinator, 1195 Third Street, Room 210, Napa, California 94558. Telephone (707) 253–4416. Copies are avilable for review at public libraries in Lake, Napa, and Yolo counties.

FOR FURTHER INFORMATION CONTACT: Timothy P. Julius, Planning and Environmental Coordinator, Ukiah District Office, P.O. Box 940, 555 Leslie Street, Ukiah, California 95482, Telephone (707) 462–3873.

Dated: March 1, 1983.

Van W. Manning,

District Manager.

BILLING CODE 4310-84-M

[N-34756]

Nevada; Realty Action; Noncompetitive Sale of Public Lands in White Pine County

March 1, 1983.

The following described land has been examined and identified for disposal by sale under Section 203 of the Federal Land Policy and Management Act of 1976 (90 Stat. 2750; 43 U.S.C. 1713):

Mount Diablo Meridian

T. 13 N., R. 66 E.,
Sec. 5, lots 17, 19, 20, 22 and 23.

The above described land, comprising 17.04 acres, is being offered by direct sale to Joseph Miller at fair market value.

The lands are being offered as a direct, noncompetitive sale to Mr. Miller, the owner of the adjoining tract and improvements on the sale tract. Mr. Miller has filed mining claims and made improvements on the sale parcel. He is willing to relinquish the mining claims prior to title transfer. Disposal by direct sale to Mr. Miller will legalize his occupancy of the land, protect his equity investment in the improvements on the land, and resolve a complicated trespass situation.

The land has not been used and is not required for any federal purpose. Disposal would best serve the public interest. The sale is consistent with the Bureau's planning system. The land will not be offered for sale for at least 60 days after the date of this notice.

Patent, when issued, will contain the following reservations to the United States:

1. A right-of-way thereon for ditches and canals constructed by the authority of the United States. Act of August 30, 1890, 26 Stat. 391; 43 U.S.C. 945.

2. All mineral deposits in the lands so patented, and to it, or persons authorized by it, the right to prospect, mine, and remove such deposits from the same under applicable law and such regulations as the Secretary of the Interior may prescribe.

And will be subject to:

1. Those rights for highway purposes which have been granted to the State of Nevada, Department of Highways, its successors or assigns, by Permit No. Nev–014144, under the Act of November 9, 1921, 42 Stat. 212.

2. Those rights for powerline purposes which have been granted to Mt. Wheeler Power, Inc., its successors or assigns, by Permit No. Nev–062177, under the Act of December 21, 1928, 45 Stat. 1057, 43 U.S.C. 617d.

3. Those rights for communication line purposes which have been granted to Nevada Bell, its successors or assigns, by Permit No. Nev–065208, under the Act of March 4, 1911, 36 Stat. 1253, 43 U.S.C. 961.

4. Pursuant to the authority contained in sec. 3(d) of Executive Order 11988 of May 25, 1977 (42 FR 26955), this patent is subject to a restriction which constitutes a covenant running with the land, that the portion of the land lying within the 100 year flood plain, in Lots 17, 19, 22 and 23, may be used only for agricultural purposes or for park and nonintensive open space recreation purposes, but not for dwellings or buildings.

Detailed information concerning the sale is available for review at the Nevada State Office, Bureau of Land Management, 300 Booth Street, Reno, Nevada.

For a period of 45 days, interested parties may submit comments to the State Director (N–943), P.O. Box 12000, Reno, Nevada 89520.

Richard G. Morrison,

Acting Deputy State Director, Operations.

BILLING CODE 4310-84-M

Bureau of Reclamation

[INT-DES 83-13]

Galesville Project, Douglas County, Oregon; Availability of Draft Environmental Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, as amended, the Department of the Interior has prepared a draft environmental statement on the proposed Galesville Project in Douglas County, Oregon.

Under provisions of the Small Reclamation Projects Act (Pub. L. 84–984, as amended), Douglas County has applied for a Federal loan to develop a dam and reservoir at the Galesville site on Cow Creek which would provide for irrigation, municipal and industrial water supply, stream enhancement, flood control, hydropower generation, and outdoor recreation opportunities.

Written comments on the draft environmental statement may be submitted to the Regional Director, Pacific Northwest Region, Bureau of Reclamation, by May 7, 1983.

Copies are available for inspection at the following locations:

Department of the Interior, Office of Communications, Washington, D.C. 20240; telephone (202) 343–9247;

Department of the Interior, Bureau of Reclamation, Office of Environmental Affairs, Washington, D.C. 20240; telephone (202) 343–4991;

Engineering and Research Center, Divisions of Engineering Support, Technical Service and Publications Branch, Denver Federal Center, Denver, Colorado 80225; telephone (303) 234–3006;
Office of the Regional Director, Bureau of Reclamation, Pacific Northwest Region, Box 043, 550 West Fort Street, Boise, Idaho 83724; telephone (208) 334–1207; or
Douglas County, Department of Water Resources Survey, Justice Building, Room 104, Roseburg, Oregon 97470; telephone (503) 440–4255.

Single copies of the statement may be obtained upon request to the Commissioner of Reclamation or the Regional Director. Copies will also be available for inspection in libraries in the project vicinity.

Dated: March 8, 1983.

R. N. Broadbent,

Commissioner of Reclamation.

BILLING CODE 4310-09-M

Fish and Wildlife Service

Endangered Species Permit; Receipt of Applications

Notice is hereby given that an Applicant has applied in due form for an amendment to permit PRT 2–9740 to take sea otters as authorized by the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361–1407), and the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR Part 18).

1. Applicant: Bolt Beranek and Newman, Inc., 10 Moulton Street, Cambridge, Massachusetts.
2. Type of Permit: Amendment; Take (harassment).
3. Name and Number of Animals: Sea otter (*Enhydra lutris*) unknown.
4. Type of Activity: Use of an air gun array by seismic exploration ship to provide acoustic response data for this type of source.
5. Location of Activity: Coastal waters south of Monterey, California.
6. Period of Activity: 18 April–7 May 1983.

The purpose of this application is for the applicant to obtain an amendment to his permit to authorize the taking (harassment) of sea otters that may be close to areas where the applicant plans to conduct research, using an air gun array, on the impacts of noise by oil and gas development to gray whales.

Concurrent with the publication of this notice in the **Federal Register** the Federal Wildlife Permit Office is forwarding copies of this application to the Marine Mammal Commission and the Committee of Scientific Advisors.

The appliction has been assigned file number PRT 2–9740. Written data or views, or requests for copies of the complete application or for a public hearing on this application should be submitted to the Director, U.S. Fish and Wildlife Service (WPO), Washington, D.C. 20240, within 30 days of the publication of this notice. Those individuals requesting a hearing should set forth the specific reasons why a hearing on this particulat application would be appropriate. The holding of such hearing is at the discretion of the Director.

All statements and opinions contained in this application are summaries of those of the Applicant and do not necessarily reflect the views of the United States Fish and Wildlife Service.

Documents submitted in connection with the above application are available for review during normal business hours in Room 534, 1717 H Street, NW., Washington, D.C.

Dated: March 8, 1983.

R. K. Robinson,

Chief, Permit Branch, Federal Wildlife Permit Office.

BILLING CODE 7035–01–M

Motor Carriers; Permanent Authority Decisions; Decision-Notice

Motor Common and Contract Carriers of Property (fitness-only;) Motor Common Carriers of Passengers (fitness-only); Motor Contract Carriers of Passengers; Property Brokers (other than household goods). The following applications for motor common or contract carriage of property and for a broker of property (other than household goods) are governed by Subpart A of Part 1160 of the Commission's General Rules of Practice. See 49 CFR Part 1160, Subpart A, published in the **Federal Register** on November 1, 1982, at 47 FR 49583, which redesignated the regulations at 49 CFR 1100.251, published in the **Federal Register** on December 31, 1980. For compliance procedures, see 49 CFR 1160.19. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart B.

The following applications for motor common or contract carriage of passengers filed on or after November 19, 1982, are governed by Subpart D of the Commission's Rules of Practice. See 49 CFR Part 1160, Subpart D, published in the **Federal Register** on November 24, 1982, at 47 FR 53271. For compliance procedures, see 49 CFR 1160.88. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart E.

These applications may be protested *only* on the grounds that applicant is not fit, willing, and able to provide the transportation service or to comply with the appropriate statutes and Commission regulations.

Applicant's representative is required to mail a copy of an application, including all supporting evidence, within three days of a request and upon payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations. This presumption shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publicaiton, (or, if the application later becomes unopposed) appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Agatha L. Mergenovich,

Secretary.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce, over irregular routes unless noted otherwise. Applications for motor contract carrier authority are those where service in for a named shipper "under contract."

Please direct status inquiries to Team Three at (303) 275–5223.

charter and special operations between points in the U.S.

Note.—Applicant seeks to provide privately-funded charter and special transportation.

[FR Doc. 83-6882 Filed 3-10-83; 8:45 am]

BILLING CODE 7035-01-M

Motor Carriers; Permanent Authority Decisions, Decision-Notice

Motor Common and Contract Carriers of Property (except fitness-only); Motor Common Carriers of Passengers (public interest); Freight Forwarders; Water Carriers; Household Goods Brokers. The following applications for motor common or contract carriers of property, water carriage, freight forwarders, and household goods brokers are governed by Subpart A of Part 1160 of the Commission's General Rules of Practice. See 49 CFR Part 1160, Subpart A, published in the **Federal Register** on November 1, 1982, at 47 FR 49583, which redesignated the regulations at 49 CFR 1100.251, published in the **Federal Register** December 31, 1980. For compliance procedures, see 49 CFR 1160.19. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart B.

The following applications for motor common carriage of passengers, filed on or after November 19, 1982, are governed by Subpart D of 49 CFR Part 1160, published in the **Federal Register** on November 24, 1982 at 47 FR 53271. For compliance procedures, see 49 CFR 1160.86. Carriers operating pursuant to an intrastate certificate also must comply with 49 U.S.C. 10922(c)(2)(E). Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart E. In addition to fitness grounds, these applications may be opposed on the grounds that the transportation to be authorized is not consistent with the public interest.

Applicant's representative is required to mail a copy of an application, including all supporting evidence, within three days of a request and upon payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, water carrier dual operations, or jurisdictional questions) we find, preliminary, that each applicant has demonstrated that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations.

We make an additional preliminary finding with respect to each of the following types of applications as indicated: common carrier of property—that the service proposed will serve a useful public purpose, responsive to a public demand or need; water common carrier—that the transportation to be provided under the certificate is or will be required by the public convenience and necessity; water contract carrier, motor contract carrier of property, freight forwarder, and household goods broker—that the transportation will be consistent with the public interest and the transportation policy of section 10101 of chapter 101 of Title 49 of the United States Code.

These presumptions shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication, (or, if the application later becomes unopposed) appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Agatha L. Mergenovich,

Secretary.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce over irregular routes, unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract." Applications filed under 49 U.S.C. 10922(c)(2)(B) to operate in intrastate commerce over regular routes as a motor common carrier of passengers are duly noted.

Motor Carriers; Permanent Authority Decisions; Restriction Removals, Decision-Notice

Decided: March 2, 1983.

The following restriction removal applications, are governed by 49 CFR 1165. Part 1165 was published in the **Federal Register** of December 31, 1980, at 45 FR 86747 and redesignated at 47 FR 49500, November 1, 1982.

Persons wishing to file a comment to an application must follow the rules under 49 CFR 1165.12. A copy of any application can be obtained from any applicant upon request and payment to applicant of $10.00.

Amendments to the restriction removal applications are not allowed.

Some of the applications may have been modified prior to publication to conform to the special provisions applicable to restriction removal.

Findings

We find, preliminarily, that each applicant has demonstrated that its requested removal of restrictions or broadening of unduly narrow authority is consistent with the criteria set forth in 49 U.S.C. 10922(h).

In the absence of comments filed within 25 days of publication of this decision-notice, appropriate reformed authority will be issued to each applicant. Prior to beginning operations under the newly issued authority, compliance must be made with the normal statutory and regulatory requirements for common and contract carriers.

By the Commission, Review Board No. 2, Members Carleton, Williams, and Ewing.

Agatha L. Mergenovich,
Secretary.

Please direct status inquiries to Team 3, at (202) 275–5223.

MC 139754 (Sub-6)X, filed February 23, 1983. Applicant: SOFT DRINK CARRIERS, INC., 1882 East Highland Road, Twinsburg, OH 44087. Representative: David M. O'Boyle, 1610 Two Chatham Center, Pittsburgh, PA 15219, (412) 765–1600. Sub 3 and 4F Permits: broaden commodity description from soft drinks (except in bulk) and materials, equipment and supplies to "beverages and related products" (Sub 3), broaden containers, container closures, packaging products, container components, and scrap materials and equipment, materials and supplies used in the manufacture, and/or distribution of containers to "containers and related products and metal products" (Sub 4F); and broaden the territorial description to between points in the U.S. (except AK and HI), under contract(s) with named shippers (Sub 3 and 4F).

Motor Carriers; Decision Notice; Finance Applications

Decided: March 4, 1983.

As indicated by the findings below, the Commission has approved the following applications filed under 49 U.S.C. 10924, 10928, 10931 and 10932.

We find:

Each transaction is exempt from section 11343 of the Interstate Commerce Act, and complies with the appropriate transfer rules.

This decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

Petitions seeking reconsideration must be filed within 20 days from the date of this publication. Replies must be filed within 20 days after the final date for filing petitions for reconsideration; any interested person may file and serve a reply upon the parties to the proceeding. Petitions which do not comply with the relevant transfer rules at 49 CFR 1181.4 may be rejected.

If petitions for reconsideration are not timely filed, and applicants satisfy the conditions, if any, which have been imposed, the application is granted and they will receive an effective notice. The notice will recite the compliance requirements which must be met before the transferee may commence operations.

Applicants must comply with any conditions set forth in the following decision-notices within 20 days after publication, or within any approved extension period. Otherwise, the decision-notice shall have no further effect.

It is ordered:

The following applications are approved, subject to the conditions stated in the publication, and further subject to the administrative requirements stated in the effective notice to be issued hereafter.

By the Commission, Review Board Number 3, Members Krock, Joyce, and Dowell.

Agatha L. Mergenovich,
Secretary.

Please direct status inquiries to Team 3, (202) 275–5223.

MC–FC–81108. By decision of March 4, 1983, issued under 49 U.S.C. 10926 and the transfer rules at 49 CFR 1132, Review Board Number 3 approved the transfer to T. G. & D. S. FREIGHT SERVICE, INC. d.b.a. G & S FREIGHT SERVICE of Certificate No. MC–4024 issued December 5, 1983 to HORN TRUCKING CO. authorizing the transportation of *general commodities* (usual exceptions), over regular routes between Marine, IL and St. Louis, MO, serving all intermediate and off-route points within five miles of Marine, IL, (a) from Marine over unnumbered hwy to St. Jacob, IL, then over U.S. Hwy 40 to St. Louis, and return over the same route, and (b) from Marine over unnumbered hwy to junction IL Hwy 43, then over IL Hwy 43 to junction U.S.

Hwy 40, then over U.S. Hwy 40 to St. Louis, and return over the same route.

Notes.—(1) Transferee is a non-carrier. (2) An application for temporary authority has been filed.

BILLING CODE 7035-01-M

[No. MC-F-15126]

Rock Haulers, Inc.—Purchase Exemption—D.D.H., Inc.

Decided: March 7, 1983.

Pursuant to 49 U.S.C. 11343(e) and the Commission's regulations in Ex Parte No. 400 (Sub-No. 1), *Procedures—Handling exemptions Filed by Motor Carriers*, 367 I.C.C. 113 (1982), Rock Haulers, Inc. (Rock Haulers), a noncarrier, and D.D.H., Inc. (D.D.H), a motor carrier holding authority in Certificate No. MC-149353 seek an exemption from the requirement of prior, regulatory approval under 49 U.S.C. 11343 for the acquisition by Rock Haulers of D.D.H.'s operating authority. The parties have failed to establish that the proposed transaction would otherwise be subject to our regulation under section 11343 and, accordingly, the petition for exemption will be dismissed.

The parties state that D.D.H. seeks to transfer its operating authority to Rock Haulers without compensation. In addition, they note that the stockholders, officers, and directors of D.D.H. and Rock Haulers are identical. Revenues of D.D.H. do not exceed $2 million.

The transaction proposed here is one involving the transfer of operating rights, a "split-up" of its authority, and therefore subject to 49 U.S.C. 10926. Compare *County of Marin* v. *United States*, 356 U.S. 412 (1958), and *See* No. MC-FC-71649, *Zimmerman Moving & Storage Co., Transferee and T. M. Zimmerman Company, Transferor* (not printed), decided May 25, 1970, which extended *County of Marin* to situations involving transfers of authority between horizontal corporate affiliates.

Even in the absence of *County of Marin* and *Zimmerman*, the transaction would still be a section 10926 transfer, since Rock Haulers is a noncarrier. Approval under 49 U.S.C. 11343 of its control in a common interest with D.D.H. is not required because D.D.H's revenues are below the $2 million jurisdictional threshold of section 11343(d)(1).

We may use the section 11343(e) procedures to exempt only transactions which would otherwise be subject to regulation under section 11343. Here the transfer of D.D.H's authority to Rock Haulers is not subject to regulation under that section, and, accordingly, the petition for exemption must be dismissed. The parties should refile using Form OP-FC-1 in accordance with the Commission's regulations set forth at 49 CFR Part 1181.

It is ordered:

The petition for exemption, filed pursuant to 49 U.S.C. 11343(e), is dismissed.

By the Commission, Heber P. Hardy, Director, Office of Proceedings.

Agatha L. Mergenovich,

Secretary.

BILLING CODE 7035-01-M

Society of the Plastics Industry; Section 10706(a)(5)(A) Application No. 7

AGENCY: Interstate Commerce Commission.

ACTION: Notice of filing of agreement and request for comment.

SUMMARY: Under the provisions of 49 U.S.C. 10706(a)(5)(A), shippers wishing to enter into an agreement among themselves to discuss the amount of compensation to be charged rail carriers for the use of privately owned cars must apply to the Commission for approval of the agreement. The Commission will approve the agreement only upon finding that it furthers the rail transportation policy set forth in 49 U.S.C. 10101a; if necessary, the commission can impose conditions to further that policy. If the agreement is approved, the antitrust laws do not apply to parties and other persons with respect to the making and carrying out of the agreement.

An application for approval of an agreement under 49 U.S.C. 10706(a)(5)(A) has been filed by The Society of the Plastics Industry on behalf of members who own or lease rail cars. the application may be inspected at the Office of the Secretary, Interstate Commerce Commission, in Washington, DC.

Comments are invited on the proposed agreement, with special attention to the following subjects:

(1) How will this agreement further the transportation policy set forth in 49 U.S.C. 10101a? (Is the requested antitrust immunity necessary?)

(2) Are there any anti-competitive effects that may result because of the agreement?

(3) What, if any, safeguards are necessary to ensure that the proposed agreement will not have an undesirable anti-competitive effect or suppress competition among members of the society?

(4) What other matters should the Commission consider in determining whether the agreement should be approved?

While it does not appear that this action will have a significant effect on the quality of the human environment or conservation of energy resources, comments on these issues are also invited.

DATES: An original and 10 copies of comments by interested parties should be filed by March 31, 1983.

ADDRESS: Comments should be addressed to: Rail Section, Room 5344, Interstate Commerce Commission, Washington, D.C. 20423.

FOR FURTHER INFORMATION CONTACT: Louise E. Gitomer, (202) 275–7245.

(49 U.S.C. 10706(a)(5))

Dated: March 7, 1983.

By the Commission, Heber P. Hardy, Director, Office of Proceedings.

BILLING CODE 7035-01-M

[Ex Parte No. 387]

Exemptions for Contract Tariffs

AGENCY: Interstate Commerce Commission.

ACTION: Notices of provisional exemptions.

SUMMARY: Provisional exemptions are granted under 49 U.S.C. 10505 from the notice requirements of 49 U.S.C. 10713(3), and the below-listed contract tariffs may become effective on one day's notice. These exemptions may be revoked if protests are filed.

DATES: Protests are due within 15 days of publication in the **Federal Register.**

ADDRESS: An original and 6 copies should be mailed to: Office of the Secretary, Interstate Commerce Commission, Washington, D.C. 20423.

FOR FURTHER INFORMATION CONTACT: Douglas Galloway, (202) 275–7278, or Tom Smerdon, (202) 275–7277.

SUPPLEMENTARY INFORMATION: The 30-day notice requirement is not necessary in these instances to carry out the transportation policy of 49 U.S.C. 10101a or to protect shippers from abuse of market power; moreover, the transaction is of limited scope. Therefore, we find that the exemption requests meet the requirements of 49 U.S.C. 10505(a) and are granted subject to the following conditions:

These grants neither shall be construed to mean that the Commission has approved the contracts for purposes of 49 U.S.C. 10713(e) not that the Commission is deprived of jurisdiction to institute a proceeding on its own initiative or on complaint, to review these contracts and to determine their lawfulness.

BILLING CODE 7035-01-M

Commission Issuance; Absentee Voting

AGENCY: Interstate Commerce Commission.

ACTION: Commission issuance.

SUMMARY: This notice adds a new procedure to the issuance that governs the Commission's internal operations. The procedure explains absentee voting by members of the Commission, and the circumstances under which such voting is permitted.

EFFECTIVE DATE: March 9, 1983.

FOR FURTHER INFORMATION CONTACT: Kathleen M. King, 202-275-0956.

SUPPLEMENTARY INFORMATION: The Commission issuances are amended by adding the following provisions:

14. *Absentee Voting* (a) *General.* No Commissioner may delegate the authority to determine his or her vote in any matter requiring Commission action. A Commissioner may, however, vote when absent if the Chairman determines that one of the special cicumstances delineated below is met. The absent Commissioner's vote shall be based on his or her reasoned judgment after consideration of the details of the matter as explained to him or her by a member of the Commissioner's staff. The absent Commissioner must vote by a telephone call to the Chairman's office. The absent Commissioner must confirm the vote by telegram, mailgram or other written communication addressed to the Chairman and delivered no later than the close of business of the second succeeding working day.

(b) *Special Circumstances.* Absentee voting may be permitted if: (1) A majority is needed on a particular matter, and the Chairman determines that action is in the public interest; (2) a Commissioner notifies the Chairman's office at any time prior to the close of the voting period that he or she wishes to vote on a particular matter that will be voted upon while he or she is away; or, (3) a Commissioner notifies the Chairman that he or she is physically unable to be present because of illness, injury, or other incapacity.

By the Commission, Chairman Taylor, Vice Chairman Sterrett, Commissioners Andre and Gradison.

INTERNATIONAL DEVELOPMENT COOPERATION AGENCY

Agency for International Development

Board for International Food and Agricultural Development; Meeting

Pursuant to the provisions of the Federal Advisor Committee Act, notice is hereby given of the fifty-fifth meeting of the Board for International Food and Agricultural Development (BIFAD) on March 31, 1983.

The purpose of the meeting is to consider the AID-university Memorandum of Understanding process, progress and prospects; discuss the AID strategy papers in agriculture and nutrition and their relation to regional strategies; receive a status report on a proposed program for orientation and preparation of Title XII university personnel for AID overseas technical assistance contracts; hear a report on the activities of the Joint Committee on Agricultural Research and Development (JCARD); and meet with the BIFAD Support Staff to discuss staff actions and operational procedures.

The meeting will begin at 9:30 a.m. and adjourn at 12:15 p.m., and will be held in Room 1107, New State Department Building, 22nd and C Streets, NW., Washington, D.C. The meeting with the BIFAD Support Staff will begin at 8:00 a.m. and adjourn at 9:15 a.m. This meeting will be held in Room 1408, New State Department Building, 22nd and C Streets, NW., Washington, D.C. The meetings are open to the public. Any interested person may attend, may file written statements with the Board before or after the meetings, or may present oral statements in accordance with procedures established by the Board, and to the extent the time available for the meetings permit. An escort from the "C" Street Information Desk (Diplomatic Entrance) will conduct you to the meeting.

Dr. Erven J. Long, Coordinator, Research and University Relations, Bureau for Science and Technology, Agency for International Development, is designated as AID Advisory Committee Representative at this meeting. It is suggested that those desiring further information write to him in care of the Agency for International Development, International Development Cooperation Agency, Washington, D.C. 20523, or telephone him at (703) 235-8929.

Dated: March 8, 1983.

Erven J. Long,

AID Advisory Committee Representative, Board for International Food and Agricultural Development.

BILLING CODE 6116-01-M

DEPARTMENT OF LABOR

Employment and Training Administration

Advisory Committee on the Implementation of the Job Training Partnership Act; Establishment

In accordance with the provisions of the Federal Advisory Committee Act and Office of Management and Budget Circular A-63 of March 1974, and after consultation with GSA, the Secretary of Labor has determined that the establishment of the Advisory Committee on the Implementation of the Job Training Partnership Act (JTPA) is in the public interest in connection with the performance of duties imposed on the Department by the Job Training Partnership Act, Pub. L. 97-300, October 13, 1982.

The Committee will advise the Assistant Secretary on the transition issues from the Comprehensive Employment and Training Act (CETA) into programs authorized by JTPA. The Committee's objective and the scope of its activity wil be to:

1. Identify and assess options relating to the transition into the Job Training Partnership Act and out of CETA;

2. Encourage timely and accurate communication among all parts of the training and employment system;

3. Identify potential impediments to the development and implementation of training and employment programs, and

4. Engender a spirit of partnership throughout the implementation of the Job Training Partnership Act.

The Committee will consist of approximately 30 members including representatives of: (a) Private employers; (b) State governments, including both the executive and legislative branches; (c) local governments, including both cities and counties; (d) labor organizations; (e) community organizations; and (f) other related perspectives, including academe.

The Committee will function solely as an advisory body and in compliance with the provisions of the Federal Advisory Committee Act. Its charter will

be filed under the Act 15 days from the date of this publication.

Interested persons are invited to submit comments regarding the establishment of the Advisory Committee on the Implementation of the Job Training Partnership Act. Such comments should be addressed to: Mr. Patrick J. O'Keefe, Director, Transition Task Force, Office of the Assistant Secretary, Employment and Training Administration, 601 D Street, NW., Room 8400, Patrick Henry Building, Washington, D.C. 20213; telephone (202) 376–6444.

Signed at Washington, D.C., this 8th day of March 1983.

Albert Angrisani,

Assistant Secretary of Labor for Employment and Training.

[FR Doc. 83-6679 Filed 3-10-83; 8:45 am]

BILLING CODE 4510-30-M

Federal-State Unemployment Compensation Program; Extended Benefits; New Extended Benefit Periods in the States of Iowa and Rhode Island

This notice announces the beginning of new Extended Benefit Periods in the States of Iowa and Rhode Island, effective on February 20, 1983.

Background

The Federal-State Extended Unemployment Compensation Act of 1970 (26 U.S.C. 3304 note) established the Extended Benefit Program as a part of the Federal-State Unemployment Compensation Program. The Extended Benefit Program takes effect during periods of high unemployment in a State, to furnish up to 13 weeks of extended unemployment benefits to eligible individuals who have exhausted their rights to regular unemployment benefits under permanent State and Federal unemployment compensation laws. The Act is implemented by State unemployment compensation laws and by Part 615 of Title 20 of the Code of Federal Regulations (20 CFR Part 615).

In accordance with section 203(d) of the Act, each State unemployment compensation law provides that there is a State "on" indicator in the State for a week if the head of the State employment security agency determines that, for the period consisting of that week and the immediately preceding 12 weeks, the rate of insured employment under the State unemployment compensation law equalled or exceeded the State trigger rate. The Extended Benefit Period actually begins with the third week following the week for which there is an "on" indicator. A benefit period will be in effect for a minimum of 13 consecutive weeks, and will end the third week after there is an "off" indicator.

Determination of "on" Indicator

The head of the employment security agency of each State named above has determined that the rate of insured unemployment in the State, for the period consisting of the week ending on February 5, 1983, and the immediately preceding 12 weeks, rose to a point that equals or exceeds the State trigger rate, so that for that week there was an "on" indicator in the State.

Therefore, new Extended Benefit Periods commenced in those States with the week beginning on February 20, 1983.

Information for Claimants

The duration of extended benefits payable in the new Extended Benefit Period, and the terms and conditions on which they are payable, are governed by the Act and the State unemployment compensation law. The State employment security agency of each State will furnish a written notice of potential entitlement to extended benefits to each individual who has established a benefit year in the State that will expire after the new Extended Benefit Period begins, and who has exhausted all rights under the State unemployment compensation law to regular benefits before the beginning of the new Extended Benefit Period. 20 CFR 615.13(d)(1). The State employment security agency of each State also will provide such notice promptly to each individual who exhausts all rights under the State unemployment compensation law to regular benefits during the Extended Benefit Period, including exhaustion by reason of the expiration of the individual's benefit year. 20 CFR 615.13(d)(2).

Persons who believe they may be entitled to extended benefits in a State named above, or who wish to inquire about their rights under the Extended Benefit Program, should contact the nearest State employment office or unemployment compensation claims office in their locality.

Signed at Washington, D.C., on February 28, 1983.

Albert Angrisani,

Assistant Secretary of Labor.

[FR Doc. 83-6677 Filed 3-10-83; 8:45 am]

BILLING CODE 4510-30-M

Job Training Partnership Act (Pub. L. 97–300); Proposed Allotment Methodology for Distribution of Funds to the Territories Under Title II, Part A, Section 201(a); Training Services for the Disadvantaged; Adult and Youth Programs

AGENCY: Employment and Training Administration, Labor.

ACTION: Notice.

SUMMARY: This notice proposes an approach to the distribution of funds to Guam, the Virgin Islands, American Samoa, the Trust Territory of the Pacific Islands, and the Northern Mariana Islands for programs under Title II–A, Section 201(a) of the Job Training Partnership Act (JTPA). There is no statutory formula for distributing funds among the territories.

FOR FURTHER INFORMATION CONTACT: Robert Colombo, Acting Director, Office of Employment and Training Programs, 601 D Street NW., Room 6402, Washington, D.C. 20213, telephone number (202) 376–6093.

SUPPLEMENTARY INFORMATION: Section 201(a) of the Job Training Partnership Act (JTPA) requires that not more than $5,000,000 be allotted among Guam, the Virgin Islands, American Samoa, the Trust Territory of the Pacific Islands, and the Northern Mariana Islands. There is not statutory formula for distributing the $5,000,000 among the territories.

In the past (under CETA) the territories' allotments were tied to the appropriation and went up or down as the appropriation went up or down.

In an atttempt to be consistent with the statutory formula for allotment among the States, the following formula is proposed:

1. 100 percent of the $5,000,000 be allotted on the basis of the relative population (as published by the U.S. Bureau of the Census) residing in each territory as compared to the total population residing in all territories.

2. No territory shall be allotted less than 90 percent of its allotment percentage for the fiscal year preceding the fiscal year for which the determination is made. For the purpose of this allotment process, the allotment percentage for each territory for the Fiscal Year 1982 is the percent that each territory received in 1982, pursuant to the total of such allocations for all territories made under CETA in Fiscal Year 1982. For each succeeding fiscal year the allotment percentage of a territory shall be the percentage which the territory received of allotments pursuant to this allotment formula.

The population data will be updated annually, No unemployment data are available for the territories.

DATE: Comments must be submitted on or before April 11, 1983.

ADDRESS: Comments should be addressed to Robert Colombo, Acting Director, Office of Employment and Training Programs, 601D Street, NW., Room 6402, Washington, D.C. 20213.

Signed this 7th day of March 1983.

Joyce Kaiser,

Associate Assistant Secretary for Employment and Training.

BILLING CODE 4510-30-M

Mine Safety and Health Administration

[Docket No. M-83-11-C]

Peabody Coal Co.; Petition for Modification of Application of Mandatory Safety Standard

Peabody Coal Company, 301 North Memorial Drive, St. Louis, MO 63102 has filed a petition to modify the application of 30 CFR 77.1605(k) (berms and guards) to its Black Mesa Surface Mine (I.D. No. 02-00533) located in Navajo County, Arizona. The petition is filed under Section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. The petition concerns the requirement that berms or guards be provided on the outer bank of elevated roadways.

2. The surface mining operation is multiple seam method that requires equipment within the pits to travel upon the coal seam or parting.

3. Petitioner states that installation of berms on the coal seam and parting within the working area of the pits would result in a diminution of safety for the miners affected because:

a. Equipment must be used extremely close to the edge in order to place the berms;

b. The berms obscure vision, especially at night and during inclement weather.

4. As an alternate method, petitioner proposes to:

a. Mark the boundary of coal seams by use of eight-foot tall warning tubes placed at suitable intervals;

b. Make frequent inspection of the boundary tubes to determine their adequate placement and repair;

c. Continue a regular program of safety instruction on the specific hazards involved with equipment near the edge.

5. Petitioner states that the proposed alternate method will provide the same degree of safety for the miners affected as that afforded by the standard.

Request for Comments

Persons interested in this petition may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. All comments must be postmarked or received in that office on or before April 11, 1983. Copies of the petition are available for inspection at that address.

Dated: March 7, 1983.

Patricia W. Silvey,

Acting Director, Office of Standards, Regulations and Variances.

[FR Doc. 83-6379 Filed 3-10-83; 8:45 am]

BILLING CODE 4510-43-M

Office of Pension and Welfare Benefit Program

Employee Benefit Plans; Prohibited Transaction Exemptions

AGENCY: Pension and Welfare Benefit Programs Office, Labor.

ACTION: Notice of proposed exemptions.

SUMMARY: This document contains notices of pendency before the Department of Labor (the Department) of proposed exemptions from certain of the prohibited transaction restrictions of the Employee Retirement Income Security Act of 1974 (the Act) and/or the Internal Revenue Code of 1954 (the Code).

Written Comments and Hearing Requests

All interested persons are invited to submit written comments or requests for a hearing on the pending exemption, unless otherwise stated in the Notice of Pendency, within 45 days from the date of publication of this **Federal Register** Notice. Comments and requests for a hearing should state the reasons for the writer's interest in the pending exemption.

ADDRESS: All written comments and requests for a hearing (at least three copies) should be sent to the Office of Fiduciary Standards, Pension and Welfare Benefit Programs, Room C-4526, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, D.C. 20216. Attention: Application No. stated in each Notice of Pendency. The applications for exemption and the comments received will be available for public inspection in the Public Documents Room of Pension and Welfare Benefit Programs, U.S. Department of Labor, Room N-4677, 200 Constitution Avenue, NW., Washington, D.C. 20216.

Notice to Interested Persons

Notice of the proposed exemptions will be provided to all interested persons in the manner agreed upon by the applicant and the Department within 15 days of the date of publication in the **Federal Register**. Such notice shall include a copy of the notice of pendency of the exemption as published in the **Federal Register** and shall inform interested persons of their right to comment and to request a hearing (where appropriate).

SUPPLEMENTARY INFORMATION: The proposed exemptions were requested in applications filed pursuant to section 408(a) of the Act and/or section 4975(c)(2) of the Code, and in accordance with procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975). Effective December 31, 1978, section 102 of Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978) transferred the authority of the Secretary of the Treasury to issue exemptions of the type requested to the Secretary of Labor. Therefore, these notices of pendency are issued solely by the Department.

The applications contain representations with regard to the proposed exemptions which are summarized below. Interested persons are referred to the applications on file with the Department for a complete statement of the facts and representations.

A. G. Edwards Directed Investment Retirement Plan for Self-Employed Individuals (Keogh), Retirement Accounts, Inc. (the Plan), Located in El Paso, Texas

[Application No. D-3493]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975). If the exemption is granted the restrictions of section 406(a) and 406 (b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code shall not apply to the cash sale of certain partnership

interests by the Plan to Cliff Electrodiagnostic, Inc. (Cliff), a party in interest with respect to the Plan, for the total amount of $10,500, provided that the terms of the sale are not less favorable to the Plan than those obtainable in an arm's length transaction with an unrelated party on the date of sale.

Summary of Facts and Representations

1. The Plan is a self-directed Keogh plan with two participants. The Plan trustee is A. G. Edwards (the Trustee), a national stock brokerage firm. The Plan was adopted in 1977 by the medical practice of Martin Heitzman, M.D. (Dr. Heitzman) for its employees. The two participants in the Plan are Dr. Heitzman and Phyllis Geary, a common law employee of the medical practice. Contributions to the Plan ceased in 1981 when Dr. Heitzman incorporated his practice. As of December 10, 1982, Dr. Heitzman's account in the Plan had total assets of $29,428.

2. In August of 1981, Dr. Heitzman directed the Trustee to acquire five units of ownership (the Partnership Interests) in El Paso Medical Laboratory, Ltd. (the Partnership) for his individual account at a cost of $10,000.

3. Dr. Heitzman requests an exemption to permit him to sell the Partnership Interests to Cliff, a Texas corporation in which he owns a 50 percent interest. Dr. Heitzman wishes to sell the Partnership Interests because they will not generate significant earnings for some time, and he now believes that the Partnership Interests are a poor investment for his account in the Plan.

4. Dr. Heitzman proposes to sell the Partnership Interests to Cliff for $2,100 per unit. This would be a total sales price of $10,500 for the Partnership Interests payable in cash. Dr. Heitzman represents that this price represents fair market value because on May 18, 1982 an unrelated third party acquired two units of the Partnership at $2,100 per unit.

5. In summary, the applicant represents that the proposed transaction meets the statutory criteria of section 408(a) of the Act because:

(1) The transaction will be a one-time, cash transaction;

(2) The Plan will be able to divest itself of a low income producing investment which has proven difficult to sell to an unrelated party;

(3) The Plan will receive fair market value for the Partnership Interests; and

(4) The only Plan participant to be affected by the proposed transaction will be Dr. Heitzman and he requests that the transaction be consummated.

Notification of Interested Persons: Because Dr. Heitzman is the only person affected by the transaction, there is no need to distribute notice to interested persons. Comments and hearing requests are due 30 days after publication in the Federal Register.

For Further Information Contact: Linda M. Hamilton of the Department, telephone (202) 523-8881. (This is not a toll-free number.)

Emjay Corporation Master Profit Sharing Trust and Plan (the Trust) as Adopted by the Warner S. Bump Medical Group, S.C. Profit Sharing Plan and Trust (the Plan), Located in Rhinelander, Wisconsin

[Application No. D-3763]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975). If the exemption is granted the restrictions of section 406(a) and 406 (b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code shall not apply to the proposed loan of funds by the Plan to Warner S. Bump Medical Group, S.C. (the Employer), the sponsor of the Plan, and the Warner S. Bump Medical Building (the Partnership), parties interest with respect to the Plan, provided that the terms and conditions of the loans are not less favorable to the Plan than those obtainable in similar transactions with an unrelated third party.

Summary of Facts and Representations

1. The Plan is a profit sharing plan with 78 participants. As of March 31, 1982, the Plan had net assets of $1,764,618. The Plan adopted the Trust on April 2, 1979. Three principals of the Employer, Drs. George F. Pratt, John F. Brown and Leo G. Norden constitute an administrative committee which directs the trustee of the Trust, Mr. Louis A. Maier III, as to Plan investments.

2. The Employer is a medical clinic located in Rhinelander, Wisconsin. As of November, 1982, the Employer employed 16 physicians of which 14 are equal shareholders of the Employer. As of January 1, 1983, the Partnership consisted of 13 partners, many of whom are shareholders of the Employer. The Partnership was formed for the purpose of owning, operating and leasing real estate to be used in the practice of medicine.

3. The applicant is requesting an exemption to allow the Plan to loan $114,800 to the Partnership (Partnership Loan) and $64,000 to the Employer (Employer Loan). The proceeds from the Partnership Loan will be used by the Partnership to refinance indebtedness incurred with respect to the acquisition of two parcels of real property located adjacent to the Employer's main facility, and the renovation and construction of portions of the second floor of the Employer's main facility. The total purchase price of the two parcels of real property was $51,500, and the total cost of the renovation will be approximately $115,000. The proceeds from the Employer Loan will be used to refinance indebtedness incurred with respect to the purchase by the Employer of data processing equipment (the Equipment) on March 30, 1982. The total cost of such equipment, excluding sales tax, was $60,942. The Equipment was purchased from SSI/MSI, located in Milwaukee, Wisconsin.

4. The terms of each loan will provide for the payment of interest on its unpaid principal balance at a rate the greater of 1¼% above the prime rate as quoted by the First National Bank of Minneapolis, or 8%. The interest rate will be adjusted monthly. The Partnership Loan will be repaid in 120 equal monthly installments, and the Employer Loan will be repaid in 48 equal monthly installments.

5. The loans will be secured by a perfected first security interest in the Equipment and any and all additions made to the Equipment, and in all accounts receivable owned and to be owned in the future by the Employer. As of September, 1982, the accounts receivable had a face value of $903,622. The average balance in the outstanding accounts is $74.45, and in 1982 a reserve for bad debts of 4.5% was established. As of September, 1982, receivables having a value of $365,170 were outstanding for greater than 120 days. In addition to the previously mentioned collateral, the Partnership Loan will also be secured by a duly recorded first mortgage on the two parcels of real property recently acquired by the Partnership. The Employer will insure all of the collateral for the loans against fire or other loss and the Plan will be the named insured of such insurance policies.

6. The partners of the Partnership will jointly and severally guarantee the repayment of the loans. The partners have a net worth, as of May, 1982, in excess of $2.7 million.

7. The Richfield Bank & Trust Co. (the Bank), located in Richfield, Minnesota,

will serve as the fiduciary for the Plan with regard to the assets of the Plan to be involved in the loan transactions. The Bank does not maintain any commercial and/or business relationships with the Employer. The Bank has broad experience in pension and profit sharing plan administration, and has general investment and management expertise. The Bank has reviewed the terms of the loans and has initially detemined that the loans are appropriate investments of the Plan, and will be in the best interests of the Plan and its participants and beneficiaries. The Bank has determined that the interest rates of the loans are appropriate interest rates. The Bank has reviewed the value of the properties, computer equipment, and accounts receivable which will act as security for the proposed loans and believes that such collateral is adequate to secure the loans.

8. The Bank will have final administrative authority and control over the loans, and will monitor and enforce the performance of the Employer's and the Partnership's obligations under the loans. Additionally, the Bank's duties will include, but not be limited to, the monthly adjustment of the loans' interest rates, the determination of any need for the provision of additional collateral to ensure that the total value of the collateral securing the loans remains in excess of 150% of the outstanding balance of the loans, determining whether adequate insurance on all collateral is maintained to protect against a loss by fire or other damage, and the execution and filing of a valid security agreement, financing statement and first mortgage in favor of the Plan.

9. In summary, the applicant represents that the proposed loans will satisfy the statutory criteria of section 408(a) of the Act because: (a) The loans will be secured by a perfected first security interest and a duly recorded first mortgage in insured collateral which has a value greatly in excess of the outstanding balance of the loans; (b) the Bank, an independent qualified party will serve as the fiduciary of the Plan with regard to the loans and has determined that the loans are appropriate and in the best interests of the Plan; and (c) the Bank will completely monitor the loans and enforce the performance of the Employer's and the Partnership's obligations under the loans.

For Further Information Contact: Mr. David Stander of the Department, telephone (202) 523-8881. (This is not a toll-free number.)

The Tarboro Clinic, P.A. Restated Money Purchase Pension Plan (the Money Purchase Plan) and the Tarboro Clinic, P.A. Restated Profit Sharing Plan (the Profit Sharing Plan; collectively, the Plans), Located in Tarboro, North Carolina

[Application Nos. D-3780 and D-3781]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975). If the exemption is granted the restrictions of section 408(a), 406(b)(1) and 406(b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code shall not apply to the past purchases totalling 240 shares of the common stock of the Edgecombe Bank and Trust Company (Edgecombe) from Dr. Victor Herring III (Herring), by the individual accounts of Herring in the Plans provided that the price paid for such stock was not greater than the fair market value of the stock at the time of the transactions. Herring is a director of the Tarboro Clinic, P.A., the sponsor of the Plans and at the time of such purchases was a director of Edgecombe.

1. The Plans are administered under a single trust by the Branch Banking and Trust Company (the Bank) located in Tarboro, North Carolina, which is the trustee of the Plans. Pursuant to the Plans' documents, participants of the Plans may direct the investments of their individual accounts.

2. At his own direction, on April 13, 1977, Herring sold to his individual accounts 100 shares of common stock of Edgecombe, a bank which was formerly the trustee of the Plans and which subsequently merged with the Bank. The price of the Edgecombe common stock per share in such transaction was $26.50. The price of $26.50 was established by the Bank on the basis of an estate tax valuation which had been performed by the Bank. The Bank represents that such estate tax valuation was used because at the time of the transaction the lack of a trading market in the edgecombe common stock prevented obtaining a market price quotation. This purchase involved 12.66% of Herring's individual account balances at the time of this transaction. The Pension Plan received 24.08 shares, having contributed $638.12 of the purchase price, and the Profit Sharing Plan received 75.92 shares, having contributed $2,011.88 of the purchase price. The applicant represents that this allocation of shares received by each Plan was mandated by the terms of the trust instrument of the Plans. At his own direction, on February 5, 1979, Herring sold to his individual accounts 100 shares of common stock of Edgecombe. The price of the stock per share in such transaction was $25.875, which was the prevailing bid price obtained by the Bank from Merrill, Lynch, Pierce, Fenner, and Smith, Inc. (Merrill Lynch) and Wheat First Securities, Inc., both of which are New York Stock Exchange member brokers that maintained market positions in the Edgecombe common stock at the time of this transaction. This purchase involved 9.24% of Herring's individual account balances at the time of this transaction. The Pension Plan received 24.06 shares, having contributed $623.07 of the purchase price, and the Profit Sharing Plan received 75.92 shares, having contributed $1,964.43 of the purchase price. This allocation between the Plans was mandated by the terms of the trust instrument of the Plans. At his own direction, on July 13, 1979, Herring sold to his individual accounts 40 shares of the common stock of Edgecombe. The price of the Stock per share in such transaction was $26.625, which was the prevailing bid price obtained by the Bank from Merrill Lynch and Wheat First Securities, Inc. Both of which maintained market positions in the Edgecombe stock at the time of the transaction. This purchase involved 3.35% of Herring's individual account balances at the time of this transaction. The Pension Plan received 9.63 shares, having contributed $256.45 of the purchase price, and the Profit Sharing Plan received 30.37 shares, having contributed $808.55 of the purchase price. This allocation between the Plans was mandated by the terms of the trust instrument of the Plans.

3. The total cumulative investment of Herring's individual accounts in purchases of the Edgecombe common stock from Herring amounted to 19.84% of Herring's individual account balances following the final purchase. The shares of the Edgecombe common stock purchased from Herring have at all times been held in Herring's individual accounts and have not been commingled with other assets of the Plans. The purchases of Edgecombe common stock from Herring did not involve any brokerage commissions or other expenses. Herring's individual accounts in the plans are 100% vested.

4. At the time of each transaction, Herring was a director of Edgecombe. The applicant represents that the directorship provided only nominal economic benefit to Herring involving only the receipt of meeting attendance fees. The applicant represents that the Edgecombe common stock was purchased by the Plans because it was a desirable investment for his individual accounts. In addition, the Bank represents that such purchases were in the best interests of the individual accounts for which the Edgecombe common stock was purchased. The Bank has also certified that the prices of the Edgecombe common stock purchased for Herring's individual accounts represented the fair market value of the Edgecombe common stock at the time of each purchase.

5. In summary, the applicant represents that the transactions satisfied the statutory criteria of section 406(a) of the Act because: (1) The trustee of the Plans has certified that the transactions were in the best interests of the individual accounts for which the purchases were made; (2) the Edgecombe common stock was sold to Herring's individual accounts at the prevailing fair market price as certified by the Bank; and (3) the only assets of the Plans affected by the transactions are those in Herring's individual accounts and he directed the purchases in accordance with the provisions of the trust instrument of the Plans.

Gerber & Linton Self-Employed Retirement Plan—H.R. 10 Plan (the Plan), Located in Reading, Pennsylvania

[Application No. D-3918]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 4975(c)(2) of the Code and in accordance with the procedures set forth in Rev. Proc. 75-26, 1975-1 C.B. 722. If the exemption is granted, the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code shall not apply to the loans (the Loans) made by the Plan on October 19, 1982 to Mr. Jack A. Linton and Mr. Bernard R. Gerber, respectively, both of whom are owner-employees with regard to the Plan as defined in section 401(c)(3) of the Code. The Loans involve only the individual Plan accounts of Messrs. Linton and Gerber. Section 408(d)(1) of Title I of the Act provides that the Department lacks authority to grant an exemption under section 408(a) of the Act for loans by a Plan to an owner-employee. Therefore, the Department cannot grant an exemption under Title I for the Loans. However, there is jurisdiction under Title II of the Act, pursuant to section 4975 of the Code. The applicant recognizes that the exemptive relief proposed herein would not apply to prohibited transactions described in Title I of the Act.

Effective Date: The effective date of the proposed exemption, if granted, will be October 19, 1982.

Summary of Facts and Representations

1. The Plan is a defined contribution plan with five participants and net assets of $116,590.09 as of October 19, 1982. The Plan trustee (the Trustee) is American Bank and Trust Company. While the Trustee has fiduciary authority and responsibility with regard to Plan assets, Messrs. Linton and Gerber directed the Trustee to make the Loans from their respective nonforfeitable accrued individual Plan accounts.

2. On October 19, 1982, the Plan made Loans of $22,500 to Mr. Linton and $10,500 to Mr. Gerber. Each Loan bears an annual interest rate of 16½% and a term of five years with payments of interest only until the end of the Loan term. The security for each Loan is the nonforfeitable accrued benefit of the borrower, which was $55,417.16 for Mr. Linton and $57,949.28 for Mr. Gerber at the time the Loans were made. The net worth of Messrs. Linton and Gerber is substantially in excess of the amounts of their respective Loans. The terms of the Loans were arrived at in consultation with the Trustee. The interest rate reflects the rate charged by the Trustee bank to its customers for similar loans at the time the Loans were made.

3. In summary, the applicants represent that the Loans satisfy the statutory criteria of section 406(a) of the Act due to the following:

(a) The Loans involve only the respective individual accounts of Messrs. Linton and Gerber;

(b) The terms of the Loans were arrived at in consultation with the Trustee;

(c) The interest rate payable under the Loans was determined by comparison with rates charged by the Trustee bank for similar loans; and

(d) The security for each Loan greatly exceeds the amount of the Loan.

For Further Information Contact: Mr. Robert Sandler of the Department, telephone (202) 523-8195. (This is not a toll-free number.)

The Group Health Cooperative of Puget Sound Staff Pension Plan (the Plan), Located in Seattle, Washington

[Application No. D-3950]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 406(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975). If the exemption is granted, the restrictions of sections 406(a), 406 (b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code shall not apply to certain transactions involving the contribution, sale and purchase of "no-load" mutual fund shares (the "No-Load" Mutual Fund Shares) between the Plan and professional and administrative employees (the Participants) of the Group Health Cooperative of Puget Sound (the Employer), provided all purchases and sales of the "No-Load" Mutual Fund Shares are conducted at fair market value and all Participant contributions of "No-Load" Mutual Fund Shares are valued at their fair market value on the date contributed.

Summary of Facts and Representations

1. The Employer is a health maintenance organization serving the Seattle, Olympia and Tacoma, Washington metropolitan areas. The Employer serves over 240,000 subscribers and employs more than 3,500 individuals.

2. The Plan is an integrated, defined contribution plan providing benefits to approximately 300 participants who are employed in professional and administrative positions. The Plan does not cover individuals employed by the Employer on a temporary or contractual basis nor does it include those persons employed in a residency program. As of December 31, 1981, the Plan had total assets of $19,041,252. The trustee of the Plan (the Trustee) is the Rainier National Bank, a national banking concern having its principal office in Seattle, Washington.

3. The Plan contains three types of Participant accounts whereby individual Participants direct their investments. The first type of account is the Employer Contribution Account which reflects contributions made by the Employer to the Plan. The second type of account is the Participant Contribution Account which includes both voluntary contributions by Participants and pre-

1971 mandatory contributions. The third kind of account is the Rollover Account to which rollover amounts are transferred pursuant to applicable Code provisions.

4. Participants in the Plan are afforded a broad range of options as to the investment of their account balances. A Participant may direct any portion of his/her accounts be held in one of four Commingled Investment Funds: a General Fund, a Fixed Income Fund, an Equity Fund and a Short Term Money Market Fund. In addition, a Participant may request that any portion of his/her accounts be held in one or more Individually Directed Portfolios (the Portfolios): the Mutual Fund Portfolio, consisting of "load"-type mutual funds (the "Load" Mutual Fund Shares) which are selected by the Participant and held in the name of the Trustee for the benefit of the Participant; the Treasury Issue Portfolio which holds U.S. Treasury bills, notes and bonds; the Insurance Portfolio which consists of life insurance and annuity contracts selected by the Participant and held by the Trustee; and the Broker Portfolio which consists of assets purchased through a stock brokerage firm chosen by the Participant.

5. On July 20, 1982, at 47 FR 31459, the Department granted Prohibited Transaction Exemption (PTE) 82–118 which permitted the contribution, sale or purchase of "Load" Mutual Fund Shares, U.S. Treasury shares and other securities. Participants are allowed to engage in these transactions with the Portfolios maintained by the Plan. Pursuant to PTE 82–118, a Participant is permitted to contribute, sell or purchase "Load" Mutual Funds Shares held in the Mutual Fund Portfolio; individual life insurance contracts and annuities held in the Insurance Portfolio subject to the limitations of PTEs 77–7 and 77–8,[1] and other securities held in the Broker Portfolio and which appear on an approved list of securities issued by brokerage firms approved by the Employer.[2] The transactions are permitted to the extent they do not contravene the Plan's articles. However, certain investments are expressly prohibited, e.g., commodity contracts, tax exempt municipal bonds, securities issued by the Employer or other participating employers and securities purchased on margin or acquired subject to margin restrictions.

[1] The Department did not propose an exemption for the purchase or sale of insurance contracts beyond that provided in PTEs 77–7 and 77–8.

[2] Ten brokerage firms which are members of the New York Stock Exchange have been approved by the Employer.

6. PTE 82–118 also imposes additional restrictions on the transactions. For example, all securities are to be traded on a national or regional securities exchange or with the brokerage firm acting as principal. No private sales or placements are permitted. In addition, the values of the securities, "Load" Mutual Fund Shares and Treasury issues involved in the transactions are to equal their fair market valuations as of the end of the day of actual transfer. Such values are to be based on listings appearing in *The Wall Street Journal.* Where separate bid and asked for quotes are given, the value taken is the average of two quotes.

7. Participants who wish to engage in the transactions described in PTE 82–118 are not permitted to deal directly with the financial institutions, brokerage houses or mutual fund companies involved. All such transactions, which are subject to annual audit by an independent accounting firm, are to be conducted by the Employer at the Participant's request and in accordance with detailed procedures. Essentially, the Employer is to inform the Trustee to transfer securities from the Participant's personal account to the Participant's account under the Plan (or vice versa) and then cause funds to be remitted to the Participant or collected from the Participant.

8. An exemption is requested to expand the terms of PTE 82–118 by allowing Participants to contribute, sell and purchase "No-Load" Mutual Fund Shares. Specifically, the proposed exemption will give Participants the opportunity to: (a) Take "No-Load" Mutual Fund Shares held as personal assets outside the Plan and contribute those shares to the Participant's individually-directed Mutual Fund Portfolio held by the Plan; (b) take "No-Load" Mutual Fund Shares held as personal assets outside the Plan and sell those shares to the Participant's individually-directed Mutual Fund Portfolio held by the Plan; and (c) direct the Trustee to allow the Participant to purchase "No-Load" Mutual Fund Shares from the Participant's individually directed Mutual Fund Portfolio held by the Plan. The proposed transactions will be conducted in accordance with the procedures and limitations prescribed in PTE 82–118. It is represented that the proposed exemption will result in increased flexibility for individual Participants, and it is likely to encourage voluntary contributions by Participants to the Plan.

9. In summary, it is represented that the proposed transactions will satisfy the statutory criteria of section 408(a) of the Act because: (a) The market value of "No-Load" Mutual Fund Shares is readily determinable and all transactions will be comparable to open market transactions; (b) the transactions will result in increased flexibility for the Participants; and (c) all transactions will be conducted on the specific instructions of the Participant, and only such Participant's accounts will be affected by the transaction.

For Further Information Contact: Ms. Jan D. Broady of the Department, telephone (202) 523–8971. (This is not a toll-free number.)

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption under section 408(a) of the Act and/or section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest or disqualified person from certain other provisions of the Act and/or the Code, including any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of the Act, which among other things require a fiduciary to discharge his duties respecting the plan solely in the interest of the partcipants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(B) of the Act; nor does it affect the requirement of section 401(a) of the Code that the plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries;

(2) Before an exemption may be granted under section 408(a) of the Act and/or section 4975(c)(2) of the Code, the Department must find that the exemption is administratively feasible, in the interests of the plan and of its participants and beneficiaries and protective of the rights of participants and beneficiaries of the plan; and

(3) The proposed exemptions, if granted, will be supplemental to, and not in derogation of, any other provisions of the Act and/or the Code, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction.

(4) The proposed exemptions, if granted, will be subject to the express condition that the material facts and representations contained in each application are true and complete, and

that each application accurately describes all material terms of the transaction which is the subject of the exemption.

Signed at Washington, D.C., this 8th day of March 1983.

Alan D. Lebowitz,

Assistant Administrator for Fiduciary Standards, Pension and Welfare Benefit Programs, Labor-Management Services Administration, Department of Labor.

BILLING CODE 4510-29-M

Office of the Secretary

Agency Forms Under Review by the Office of Management and Budget (OMB)

Background

The Department of Labor, in carrying out its responsibility under the Paperwork Reduction Act (44 U.S.C. Chapter 35), considers comments on the proposed forms and recordkeeping requirements that will affect the public.

List of Forms Under Review

On each Tuesday and/or Friday, as necessary, the Department of Labor will publish a list of the Agency forms under review by the Office of Management and Budget (OMB) since the last list was published. The list will have all entries grouped into new forms, revisions, extensions (burden change), extensions (no change), or reinstatements. The Departmental Clearance Officer will, upon request, be able to advise members of the public of the nature of any particular revision they are interested in.

Each entry will contain the following information:

The Agency of the department issuing this form.

The title of the form.

The Agency form number, if applicable.

How often the form must be filled out.

Who will be required to or asked to report.

Whether small business or organizations are affected.

The standard industrial classification (SIC) codes, referring to specific respondent groups that are affected.

An estimate of the number of responses.

An estimate of the total number of hours needed to fill out the form.

The number of forms in the request for approval.

An abstract describing the need for and uses of the information collection.

Comments and Questions

Copies of the proposed forms and supporting documents may be obtained by calling the Departmental Clearance Officer, Paul E. Larson, telephone 202-523-6331. Comments and questions about the items on this list should be directed to Mr. Larson, Office of Information Management, U.S. Department of Labor, 200 Constitution Avenue, NW., room S-5526, Washington, D.C. 20210. Comments should also be sent to the OMB reviewer, Arnold Strasser, Telephone 202-395-6880, Office of Information and Regulatory Affairs,Office of Management and Budget, Room 3208, NEOB, Washington, D.C. 20503.

Any member of the public who wants to comment on a form which has been submitted to OMB should advise Mr. Larson of this intent at the earliest possible date.

Reinstatement

Mine Safety Health Administration

- Noise Data Report Form

MSHA 214

Semiannually and annually

Businesses or other institutions; small business or organization

SIC: 111 and 121

175,000 responses; 12,430 hours

Requires coal mine operators to report to MSHA the environmental noise levels to which each miner is exposed. The purpose of these reports is to monitor the noise levels miners are exposed to so as to prevent a noise induced hearing loss.

Escape and Evacuation Plan

MSHA 400

Other: As configuration of mine changes

Businesses or other institutions; small business or organization

SIC: Multiple

900 responses; 21,600 hours

Requires development of a specific escape and evacuation plan for each underground metal and nonmetallic mine. It additionally requires revisions as mining progresses, availability to the inspector, conspicuous posting for the benefit of affected miners.

Signed at Washington, D.C. this 8th day of March 1983.

Paul E. Larson,

Departmental Clearance Officer.

BILLING CODE 4510-43-M

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

Humanities Panel Meeting

AGENCY: National Endowment for the Humanities.

ACTION: Notice of meeting.

SUMMARY: Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92-463, as amended), notice is hereby given that the following meeting of the National Panel will be held at 806 15th Street, NW., Washington, D.C. 20506.

DATE: April 1, 1983.

Time: 9:00 a.m. to 5:30 p.m.

Room: 1134.

Program: This meeting will review applications submitted for Research Materials: Computer Panel, Division of Research Programs, for projects beginning after July 1, 1983.

The proposed meeting is for the purpose of Panel review, discussion, evaluation and recommendation on applications for financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended including discussion of information given in confidence to the agency by grant applicants. Because the proposed meeting will consider information that is likely to disclose: (1) Trade secrets and commercial of financial information obtained from a person and privileged of confidential; (2) information of a personal nature the disclosure of which would constitute a clearly unwarranted invasion of personal privacy; and (3) information the disclosure of which would significantly frustrate implementation of proposed agency action; pursuant to authority granted me by the Chairman's Delegation of Authority to Close Authority to Close Advisory Committee Meetings, dated January 15, 1978, I have determined that this meeting will be closed to the public pursuant to subsections (c)(4), (6) and (9)(B) of section 552b of Title 5, United States Code.

Further information about this meeting can be obtained from Mr. Stephen J. McCleary, Advisory Committee Management Officer, National Endowment for the Humanities, Washington, D.C. 20506, or call (202) 724-0367.

Stephen J. McCleary,

Advisory Committee Management Officer.

BILLING CODE 7536-01-M

Institute of Museum Services; Museum Assessment Program

AGENCY: Institutes of Museum Services, NFAH.

ACTION: Grant application announcement for fiscal year 1983.

SUMMARY: *This grant application announcement applies only to the Museum Assessment Program (MAP).* Following the date of publication of this announcement the Institute of Museum Services (IMS) will be receiving applications for grants under the Museum Assessment Program (MAP) under 34 CFR 64.20 through 64.26 for Fiscal Year 1983.

Nature of Program: The Director of IMS makes grants under the Museum Assessment Program to assist museums in carrying out institutional assessments (34 CFR 64.20). The program is designed to help museums—particularly those with small budgets—to provide better services and broaden their bases of private and other non-Federal financial support through an independent professional assessment of their programs and operations. A museum as defined in 34 CFR 64.3 may apply for a MAP grant (34 CFR 64.21(a)). A museum which receives a MAP grant for a fiscal year may not receive another MAP grant in the same or any subsequent fiscal year (34 CFR 64.21(b)). Accordingly, a museum which received a grant under the MAP program in Fiscal Year 1981 (the only prior fiscal year in which grants were made) is ineligible for such assistance in Fiscal Year 1983 or any subsequent fiscal year. A museum which applies for a MAP grant for Fiscal Year 1983 is not barred from applying for or receiving a General Operating Support or Special Project grant for Fiscal Year 1983.

A museum must use the grant for assessment assistance to pay for: expenses of institutional assessment such as registration fees; surveyor honoraria; travel and other expenses of a surveyor; and technical assistance materials (34 CFR 64.22). The amount of a MAP grant to a museum may not exceed $800 (34 CFR 64.23(b)).

Grant Application Procedures: Under 34 CFR 64.24, the Director considers an application (*on a form supplied by IMS*) by a museum for a grant for assessment assistance only if: (1) The museum first applies for assessment to an appropriate professional organization as defined in the regulations and (2) that professional organization notifies IMS that the application (to the professional organization) for assessment is *complete* and that the museum applying for assessment is *eligible* to participate as a museum as defined in 34 CFR 64.3 of the regulations. The American Association of Museums (AAM) is an organization which has been designated under 34 CFR 64.24 as an appropriate professional organization. To participate in the assessment program, a museum must apply to AAM and complete the self-study questionnaire provided by AAM.

In order to avoid needless paperwork by museums, IMS supplies an application form and instructions to a museum *only after* the professional organization had notified IMS that the museum qualifies under the above-described procedures. Applications are supplied by IMS to such museums until available funds are exhausted or until May 6, 1983, whichever first occurs. Accordingly, a museum interested in the program should first apply to the professional organization (AAM). Interested museums should contact AAM for further information: The American Association of Museums, 1055 Thomas Jefferson Street, N.W., Washington, D.C. 20007. Telephone (202) 338–5300.

The Director approves applications meeting the MAP grant requirements on a first-come, first-served basis, (i.e., in the order in which an application is received and has been determined to have met such requirements) (34 CFR 64.25). Applications are approved for awards, subject to the availability of funds, until a given date in the fiscal year established by publication in the Federal Register. For Fiscal Year 1983, IMS establishes such date as June 6, 1983. There are *no* selection criteria (34 CFR 64.25(b)). Matching requirements do *not* apply (34 CFR 64.24(c)), H.R. Rept. No. 97–978, 97th Cong. 2d Sess. 42 (1982).

Applicable Regulations: Applicable regulations are found in 34 CFR 64.20 through 64.26, also published in 46 FR 33247 (June 29, 1981) and other related provisions in 34 CFR Part 64. (These regulations and the procedures set forth therein were the regulations and procedures used in conducting the program in Fiscal Year 1981.)

IMS has recently published proposed regulations for its General Operating Support and Special Project support grants, (47 FR 57871 (Dec. 21, 1982)). Because IMS funds only recently became available for MAP for Fiscal Year 1983 and because IMS desires to make this assistance available to museums as soon as possible in the fiscal year, IMS is not able to develop new proposed regulations for the MAP program for Fiscal Year 1983. IMS believes that the current regulations already in effect (34 CFR 64.20 through 64.26 and related provisions) are adequate and reflect simple procedures which will not be overly burdensome to museums. When the proposed GOS/SP regulations published on December 21, 1982 are published in final form, IMS anticipates that it will also republish current MAP regulations (in Subchapter E of Title 45 CFR) so that all IMS regulations are found in one place in the Code of Federal Regulations under the heading of the National Foundation on the Arts and the Humanities.

In applying the current regulations for Fiscal Year 1983, IMS will observe the following as a result of legislation enacted since the regulations were promulgated:

(1) The Interior Department and Related Agencies Appropriation Act, 1983, provides that IMS shall hereafter be an entity within the National Foundation on the Arts and the Humanities rather than the Department of Education. Accordingly, references in the regulations to the Secretary of Education should be deemed to be references to the Director of IMS.

(2) Although the regulations provide that the aggregate amounts of the grants under the MAP program may not exceed $24,000 for a fiscal year (34 CFR 64.23(c)), the legislative history of the Interior Department and Related Agencies Appropriation Act, 1983, indicates that up to $120,000 may be spent for the Museum Assessment Program in Fiscal Year 1983. (Cong. Rec. S. 14302 (Daily Ed., Dec. 9, 1982)). Accordingly, the aggregate amount of the grants for assessment assistance under MAP will not exceed $120,000 for Fiscal Year 1983.

(3) In view of the the transfer of IMS out of the Education Department effected by the Interior Department and Related Agencies Appropriations Acts for Fiscal Years 1982 and 1983, Pub. L. 97–210 and 97–394 and consistent with consideration by the National Museum Services Board, of general regulations for the Institute, IMS will not apply provisions of the Education Department General Administrative Regulations (EDGAR) to Fiscal Year 1983 MAP grants.

Further Information: For further information contact Mary Kahn, Grants Director, Institute of Museum Services, Mary Switzer Building, Room 4006, 330 C Street, S.W., Washington, D.C. 20202. Telephone (202) 426–6577.

BILLING CODE 4000-03-M

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50-250 and 50-251]

Florida Power and Light Co.; Issuance of Amendment To Facility Operating Licenses

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 92 to Facility Operating License No. DPR-31, and Amendment No. 86 to Facility Operating License No. DPR-41 issued to Florida Power and Light Company (the licensee), which revised Technical Specifications for operation of Turkey Point Plant, Unit Nos. 3 and 4 (the facilities) located in Dade County, Florida. The amendments are effective as of the date of issuance.

The amendments change the Technical Specifications to be consistent with the Regulations 10 CFR 50.54(t) and 10 CFR 73.40(d) which require Emergency Plans and Security Plans be independently audited at least every 12 months.

The application for the amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendments. Prior public notice of these amendments are not required since the amendments do not involve a significant hazards consideration.

The Commission has determined that the issuance of these amendments will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of these amendments.

For further details with respect to this action, see: (1) The application for amendments dated February 1, 1983; (2) Amendment Nos. 92 and 86 to License Nos. DPR-31 and DPR-41; and (3) the Commission's related letter dated March 1, 1983. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. and at the Environmental and Urban Affairs Library, Florida International University, Miami, Florida 33199. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 1st day of March 1983.

For the Nuclear Regulatory Commission.

Steven A. Varga,

Chief, Operating Reactors Branch No. 1, Division of Licensing.

BILLING CODE 7590-01-M

[Docket Nos. 50-498 and 50-499]

Houston Lighting and Power Co., South Texas Project, Units 1 and 2; Issuance of Director's Decision

Notice is hereby given that the Director, Office of Nuclear Reactor Regulation, has denied the petition filed by Mr. Lanny Sinkin on August 4, 1982 on behalf of the Concerned Citizens About Nuclear Power, Inc. The petition has been treated pursuant to 10 CFR 2.206 of the Commission's regulations.

The petition addressed numerous allegations dealing with deficiencies in design and construction and non-compliance with Commission regulations and criteria. The allegations were based on findings contained in a report prepared by the Quadrex Corporation for the Applicant, Houston Lighting and Power Company. The petitioner requested that the Commission suspend construction of the Applicant's South Texas Project, direct an immediate third party review of the project's design, and establish an Atomic Safety and Licensing Board to hold hearings on the alleged design deficiencies identified in the Quadrex Report.

The Staff has concluded that the findings in the Quadrex Report were addressed in an adequate and timely fashion by the Applicant and that no violation of Commission regulations occurred in the handling and disposition of the report. Therefore, the petitioner's request has been denied.

The reasons for the above conclusions are put forth in a "Director's Decision Under 10 CFR 2.206" which is available in the Commission's Public Document Room located at 1717 H Street, NW., Washington, D.C. 20555; at the Bay City Library, 1900 Fifth Street, Bay City, Texas 77414; and at the Austin Public Library, 810 Guadalupe Street, Austin, Texas 78768.

A copy of the decision is being filed with the Secretary for the Commission's review in accordance with 10 CFR 2.206(c).

Dated at Bethesda, Maryland this 3rd day of March 1983.

For the Nuclear Regulatory Commission.

Edson G. Case,

Acting Director, Office of Nuclear Reactor Regulation.

BILLING CODE 7590-01-M

[Docket Nos. 50-352A and 353A]

Philadelphia Electric Co.; Receipt of Antitrust Information

The Philadelphia Electric Company has submitted antitrust information accompanying its application for operating licenses for two boiling water nuclear reactors (known as Limerick Generating Station, Units 1 and 2) near Pottstown, in Limerick Township, Montgomery County, Pennsylvania. The data submitted contains antitrust information for review pursuant to NRC Regulatory Guide 9.3 necessary to determine whether there have been any significant changes since the completion of the antitrust review at the construction permit stage.

On completion of the staff's antitrust review, the Director of Nuclear Reactor Regulation will issue an intitial finding as to whether there have been "significant changes" under Section 105c(2) of the Atomic Energy Act. A copy of this finding will be published in the **Federal Register** and will be sent to the Washington, D.C. and local public document rooms and to those persons providing comments or information in response to this notice. If the initial finding concludes that there have not been any significant changes, requests for reevaluation may be submitted for a period of 30 days after the date of the **Federal Register** notice. The results of any reevaluation that is requested will also be published in the **Federal Register** and copies sent to the Washington, D.C. and local public document rooms.

A copy of the general information portion of the application for operating licenses and the antitrust information submitted is available for public examination and coping for a fee at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. 20555, and at the local public document room at the Pottstown Public Library, 500 High Street, Pottstown, Pennsylvania 19464.

Any person who desires additional information regarding the matter covered by this notice or who wishes to have his views considered with respect

to significant changes related to antitrust matters which have occurred in the applicant's activities since the construction permit antitrust review should submit such requests for information or views to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Chief, Antitrust and Economic Analysis Branch, Office of Nuclear Reactor Regulation, on or before April 14, 1983.

Dated at Bethesda, Maryland, this 2nd day of March 1983.

For the Nuclear Regulatory Commission.

A. Schwencer,

Chief, Licensing Branch No. 2, Division of Licensing.

BILLING CODE 7590-01-M

[Docket No. 50-537]

United States Department of Energy, Project Management Corp., Tennessee Valley Authority (Clinch River Breeder Reactor Plant) Reconstitution of Atomic Safety and Licensing Appeal Board

Notice is hereby given that, in accordance with the authority conferred by 10 CFR 2.787(a), the Chairman of the Atomic Safety and Licensing Appeal Panel has reconstituted the Atomic Safety and Licensing Appeal Board for this construction permit proceeding. As reconstituted, the Appeal Board for this proceeding will consist of the following members:

Gary J. Edles, Chairman
Dr. W. Reed Johnson
Howard A. Wilber

Dated: March 7, 1983.

Barbara A. Tompkins,

Secretary to the Appeal Board.

BILLING CODE 7590-01-M

OFFICE OF PERSONNEL MANAGEMENT

Federal Prevailing Rate Advisory Committee; Open Committee Meetings

Pursuant to the provisions of section 10 of the Federal Advisory Committee Act (Pub. L. 92-463), notice is hereby given that meetings of the Federal Prevailing Rate Advisory Committee will be held on: Thursday, April 7, 1983; Thursday, April 14, 1983; Thursday, April 21, 1983; Thursday, April 28, 1983.

These meetings will convene at 10 a.m. and will be held in Room 5A06A, Office of Personnel Management Building, 1900 E Street, NW, Washington, D.C.

The Federal Prevailing Rate Advisory Committee is composed of a Chairman, representatives of five labor unions holding exclusive bargaining rights for Federal blue-collar employees, and representatives of five Federal agencies. Entitlement to membership of the Committee is provided for in 5 U.S.C. 5347.

The Committee's primary responsibility is to review the prevailing rate system and other matters pertinent to the establishment of prevailing rates under subchapter IV, chapter 53, 5 U.S.C., as amended, and from time to time advise the Office of Personnel Management thereon.

These scheduled meetings will convene in open session with both labor and management representatives attending. During the meeting either the labor members or the management members may caucus separately with the Chairman to devise strategy and formulate positions. Premature disclosure of the matters discussed in these caucuses would impair to an unacceptable degree the ability of the Committee to reach a consensus on the matters being considered and disrupt substantially the disposition of its business. Therefore, these caucuses will be closed to the public on the basis of a determination made by the Director of the Office of Personnel Management under the provisions of Section 10(d) of the Federal Advisory Committee Act (Pub. L. 92-463) and 5 U.S.C. 552b(c)(9)(B). These caucuses may, depending on the issues involved, constitute a substantial portion of the meeting.

Annually, the Committee publishes for the Office of Personnel Management, the President, and Congress a comprehensive report of pay issues discussed, concluded recommendations thereon, and related activities. These reports are also available to the public, upon written request to the Committee Secretary.

Members of the public are invited to submit material in writing to the Chairman concerning Federal Wage System pay matters felt to be deserving of the Committee's attention. Additional information concerning these meetings may be obtained by contacting the Committee Secretary, Federal Prevailing Rate Advisory Committee, Room 1340, 1900 E Street, NW, Washington, D.C. 20415 (202-632-9710).

Dated: March 2, 1983.

William B. Davidson, Jr.,

Chairman, Federal Prevailing Rate Advisory Committee.

BILLING CODE 6325-01-M

SECURITIES AND EXCHANGE COMMISSION

[Release No. 13074; 812-5385]

IMI Commercial Paper, Inc.; Application

March 4, 1983.

In the matter of IMI Commercial Paper, Inc., 21 Dupont Circle, NW., Washington, D.C. 20036 (812-5385) application for order prusuant to Section 6(c) of the Act exempting applicant from all provisions of the Act.

Notice is hereby given that IMI Commercial Paper, Inc. ("Applicant") filed an application on November 24, 1982, and an amendment thereto on January 5, 1983, requesting an order of the Commission, pursuant to Section 6(c) of the Investment Company Act of 1940 (the "Act"), exempting Applicant from all provisions of the Act. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

Applicant, a Delaware corporation, is a wholly-owned subsidiary of IMI International Holding S.A., a Luxembourg corporation ("Holding") which, in turn, is a wholly-owned subsidiary of Istituto Mobiliare Italiano ("IMI"), a government-controlled, statutory entity. Applicant proposes to issue and sell its commercial paper notes (the "Notes") in the United States commercial paper market and utilize the net proceeds of sale thereof to make advances (the "Advances") to two wholly-owned subsidiaries of Holding, Industrial Mulitinational Investments Limited, a Jersey, Channel Islands corporation ("IMIL") and The Euram Corporation, a Delaware corporation ("Euram") (together with IMIL, the "Designated Subsidiaries"), for use by the Designated Subsidiaries in making loans and extending credit in the ordinary course of their businesses. Applicant states further that payment of amounts owed by Applicant in respect of the Notes will be supported by an irrevocable letter of credit (the "Letter of Credit") to be issued by Bankers Trust Company ("Bankers") pursuant to a Credit Agreement (the "Credit Agreement") among Applicant, the Designated Subsidiaries, Bankers,

certain other banks (together with Bankers, the Banks), and Bankers, as agent for the Banks. Applicant states that is obligations to the Banks will be irrevocably and unconditionally guaranteed by IMI. Substantially all of the Applicant's assets will consist of its right to receive repayment from the Designated Subsidiaries of the Advances made by the Applicant to the Designated Subsidiaries.

Applicant states that IMI was established under Italian law in 1931 by Royal Decree Law No. 1398 as an Ente di Diritto Publico (Public Law Institute), a government-controlled, statutory entity with corporate status. The application states that IMI is managed by a twenty-member board of directors whose composition is established by Italian law and IMI's by-laws. Applicant states that nine members of IMI's board of directors are appointed by the Italian government and act as its representatives thereto. Applicant states further that the eleven remaining directors are elected by the holders of IMI's equity capital. According to the application, IMI's purpose is to contribute to the development and strengthening of the Italian economy by carrying out credit and financial transactions, principally through the extension of medium and long-term credit to public and private sector entities. IMI also provides export credit financing to finance the export of goods and products manufactured in Italy. The application further states that, through wholly-owned or majority-owned direct and indirect subsidiaries incorporated in Italy and elsewhere, IMI engages in a variety of activities incidental to its principal business. Those activities include finance company lending, financial consulting services, real estate investment, management of an investment company operating outside of the United States and rendering investment advisory services to an investment company operating outside of the United States.

Applicant states that the principal factors in IMI's determination to provide financing are the economic viability of the financing transaction and the extent to which the particular project would contribute to the development and strengthening of the Italian economy. Applicant states that among the Italian industries to which IMI has extended credit and financing are: iron and steel, petrochemicals, textile and clothing, agriculture, public utilities, telecommunications, air and land transport, building, and shipping. Applicant submits that approximately 43% of IMI's current loan portfolio consists of loans extended to Italian industrial entities, approximately 53% consists of loans to Italian public utilities and service entities and approximately 4% consists of loans to Italian shipping concerns. Applicant states that IMI does not, as a general rule, extend financing by making equity investments.

Applicant states that, as of March 31, 1982, IMI had total assets of 18,805.1 billion lire (U.S. $14,224,735,250). Applicant states further that, as of March 31, 1982, 15,252.8 billion lire (U.S. $11,537,690,200) (after provision for loan losses), or approximately 82%, of IMI's total assets, consisted of loans. Applicant represents that no other category of assets constituted more than approximately 4.9% of IMI's total assets as of March 31, 1982. Applicant maintains that securities holdings of IMI representing investments of its excess cash constituted approximately 4.2% of IMI's total assets as of that date. Applicant asserts that, for the fiscal year ended March 31, 1982, IMI had net revenues from lending operations (after provision for loan losses) of 221.3 billion lire (U.S. $167,397,882), net revenues of 73.3 billion (U.S. $55,446,293) from other sources and net income (after provision for income taxes) of 72.1 billion lire (U.S. $54,538,578). Applicant states that, as of March 31, 1982, IMI's investments in subsidiaries performing activities incidental to its principal business was 232.0 billion lire (U.S. $175,491,679), or approximately 1.2% of IMI's total assets.

Applicant states that, as of March 31, 1982, IMI's paid in equity capital was 500 billion lire (U.S. $378,214,826). Applicant represents that approximately 85% of IMI's equity capital is owned and controlled by the Italian government directly or indirectly through other Italian government-controlled, statutory entities or Italian public sector entities. Applicant states that IMI's principal additional source of funds is the issuance and sale of its bonds in Italy. Applicant states that, as of March 31, 1982, IMI had 10,925.6 billion lire (U.S. $8,264,447,806) principal amount of bonds outstanding, an amount equal to approximately 58% of its total liabilities and stockholders' equity.

Applicant represents that the banking operations, books and records of IMI are subject to supervision by Banca d'Italia. Applicant represents that, in addition, as a medium-term and long-term credit institution established as a public statutory body, IMI's general activities and business are subject to supervision by a number of Italian governmental entities, including the Interministerial Committee on Credit and Savings, the Ministry of the Treasury, Banca d'Italia, and the Governor of the Banca d'Italia.

The application states that Holding, pursuant to IMI's direction, acts as a holding company for corporations owned by IMI that are engaged in business and incorporated outside of Italy. Applicant states that Holding owns the entire capital stock of ten subsidiary corporations and owns minority interests in two other corporations. Applicant states further that the wholly-owned subsidiaries of Holding include the Designated Subsidiaries, which, as of December 31, 1981, together represent approximately 41.8% of Holding's consolidated total assets of $444,849,436. Applicant states that Holding's remaining wholly-owned subsidiaries are engaged in real estate activities, management and administrative services, export credit financing, the management of an investment company operating outside of the United States, investment advisory services and other financing activities. Applicant states that, as of December 31, 1981, $351,129,283, or approximately 78.9% of Holding's consolidated assets, consisted of loans and advances made by its subsidiaries. Applicant states further that Holding had aggregate net income (prior to consolidation adjustments) of $9,670,493 on consolidated revenues of $82,164,752.

Applicant represents that IMIL is a finance corporation engaged primarily in making medium-term loans to Italian public and private sector borrowers and to non-Italian borrowers. Applicant represents that approximately 42.5% of IMIL's currently outstanding loans are to Italian entities, about 64.7% of which consist of loans to Italian public sector entities, and the remaining 57.5% of IMIL's loans are to non-Italian entities. Applicant submits that such loans to non-Italian entities are often made for the purpose of facilitating development of the Italian economy, including the foreign purchase of Italian goods and services. Applicant represents that, as of December 31, 1981, IMIL's total assets were $169,106,642, of which $166,692,149, or 98.6%, consisted of loans. Applicant states that for its fiscal year ended December 31, 1981, IMIL had net income from its loan portfolio of $24,051,572, or approximately 97.9% of IMIL's gross income for that period.

Applicant states that Euram is a Delaware corporation engaged primarily in financing activities. Applicant states further that, as of December 31, 1981, promissory notes evidencing loans made by Euram amounted to $10,218,756, or approximately 60%, of Euram's total assets of $17,028,967 at such date.

Applicant states further that, as of that date, Euram's principal assets other than its loans consisted of two office buildings located in Washington, D.C. Applicant asserts that, as of December 31, 1981, the book value of such office buildings and associated land was $4,725,401, or approximately 23% of Euram's assets on that date. Applicant states that the remainder of Euram's assets consisted of a participation in a real estate venture and temporary investments in marketable securities. Applicant states that Euram also provides administrative and consulting services to Holding and other companies. Applicant represents that, of its approximately $10.2 million of loans, as of December 31, 1981, approximately 55% in principal amount consisted of loans to a number of Italian public sector entities. Applicant submits that the remaining 45% in principal amount consisted of loans made to three non-Italian borrowers. Income from Euram's loan portfolio for its fiscal year ended December 31, 1981 amounted to $1,437,081, or approximately 50.8% of Euram's revenues. Rental income from its real estate amounted to $1,158,060, or approximately 40.9% of Euram's revenues for that period.

Applicant states that one or both of the Designated Subsidiaries may from time to time, pursuant to the Credit Agreement, request Applicant to make an Advance to it. Applicant states that to obtain funds to make the Advances, Applicant proposes to issue and sell the Notes, which will be short-term negotiable promissory notes of the type exempt from the registration requirements of the Securities Act of 1933 (the "1933 Act") by virtue of paragraph 3(a)(2) or 3(a)(3) thereof and generally referred to as commercial paper. The Notes will be sold in minimum denominations of $100,000, will have a maturity not exceeding 270 days, and will neither be payable on demand prior to maturity nor be eligible for any extention, renewal, or automatic "rollover" at the option of either the holder or Applicant.

Applicant undertakes not to market any Notes prior to receiving an opinion of counsel to the effect that the proposed offering of the Notes is exempt from the registration requirement of the 1933 Act by virtue of paragraph 3(a)(2) or 3(a)(3) thereof. Applicant does not request Commission review or approval of counsel's opinion regarding the availability of an exemption for the Notes under paragraph 3(a)(2) or 3(a)(3) of the 1933 Act. Applicant represents that the Notes will be offered publicly, through one or more major dealers, only to the types of sophisticated and largely institutional investors that ordinarily participate in the commercial paper market.

Applicant undertakes to insure that each dealer in the Notes will furnish to each offeree memoranda describing the businesses of IMI, the Designated Subsidiaries, Bankers and the Applicant and providing the most recent annual financial information for IMI, the Designated Subsidiaries and Bankers. Applicant states that IMI's financial information will include its most recent fiscal year-end balance sheet and statement of income for the entire fiscal year accompanied by the description prepared by the independent public accountants of IMI of the accounting principles applied in the preparation of such financial statements. The application states that the memoranda will be updated as promptly as practicable to reflect material adverse changes in the financial status of Applicant, IMI, the Designated Subsidiaries of Bankers and will be at least as comprehensive as memoranda customarily used in offering commercial paper. Applicant consents to the inclusion, in any order granting the application, of an express condition that it comply with the undertakings in this paragraph.

Applicant maintains that it will select a major commercial bank, expected to be Bankers, to act as issuing and paying agent for the Notes (the "Depositary"). Applicant further maintains that Bankers will issue the Letter of Credit in favor of the Depositary, in trust for the benefit of the holders of the Notes. Applicant represents that, in order to obtain funds to pay each maturing Note, the Depositary will make a drawing under the Letter of Credit and apply the funds received to the payment of the maturing Note. Applicant represents that, prior to their issuance, the Notes will have received one of the three highest investment grade ratings from at least one nationally recognized statistical rating organization. Applicant represents that there has been, and undertakes that in the future there will be, no public offering of Applicant's common stock or of any other equity security of the Applicant.

Applicant states that it could be deemed to be an investment company subject to the Act's registration requirements because Applicant's rights in respect of the Advances, which would constitute virtually all of Applicant's assets, could be deemed to be investment securities. Section 6(c) of the Act provides, in part, that the Commission upon application may by order conditionally or unconditionally exempt any person from the provisions of the Act if the exemption would be necessary or appropriate in the public interest, consistent with the protection of investors, and consistent with the purposes fairly intended by the policy and provisions of the Act.

Applicant asserts that approval of the application is necessary or appropriate in the public interest because, among other reasons, approval of the application would further the policy of opening the United States capital markets to foreign entities, thus encouraging the free flow of capital among nations. Applicant further asserts that approval of the application would be consistent with the protection of investors because Applicant is an indirect wholly-owned subsidiary of IMI whose capital structure and operations are regulated by Italian law and supervised by departments and officials of the Italian government. Applicant states that the holders of the Notes will not require the protections accorded investors under the Act because holders of the Notes will be adequately protected by the Letter of Credit of Bankers. Applicant further maintains that approval of the application would be consistent with the purposes of the Act because Applicant is not the type of entity to which the Act was intended to apply.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than March 29, 1983, at 5:30 p.m., do so by submitting a written request setting forth the nature of his interest, the reasons for his request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of the request should be served personally or by mail upon Applicant at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. Persons who request a hearing will receive any notices and orders issued in this matter. After said date an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

SMALL BUSINESS ADMINISTRATION

Reporting and Recordkeeping Requirements for OMB Review

AGENCY: Small Business Administration.

ACTION: Notice of reporting requirements submitted for OMB review.

SUMMARY: Under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35), agencies are required to submit proposed reporting and recordkeeping requirements to OMB for review and approval, and to publish a notice in the **Federal Register** notifying the public that the agency has made such a submission.

DATE: Comments must be received on or before March 31, 1983. If you anticipate commenting on a submission but find that time to prepare will prevent you from submitting comments promptly, you should advise the OMB reviewer and the agency clearance officer of your intent as early as possible.

Copies: Copies of the proposed forms, the requests for clearance (S.F. 83), supporting statements, instructions, transmittal letters, and other documents submitted to OMB for review may be obtained from the Agency Clearance Officer. Comments on the items listed should be submitted to the Agency Clearance Officer and the OMB Reviewer.

FOR FURTHER INFORMATION CONTACT:

Agency Clearance Officer: Elizabeth M. Zaic, Small Business Administration, 1441 L St., NW., Room 200, Washington, D.C. 10416. Telephone (202) 653–8538;

OMB Reviewer: J. Timothy Sprehe, Office of Information and Regulatory Affairs, Office of Management and Budget, Room 3235, New Executive Office Building, Washington, D.C. 20503. Telephone (202) 395–4814.

SUPPLEMENTARY INFORMATION:

BILLING CODE 4810-25-M

Bureau of Alcohol, Tobacco and Firearms

Firearms; Granting of Relief

AGENCY: Bureau of Alcohol, Tobacco and Firearms (ATF), Treasury.

ACTION: Notice of granting of relief from disabilities incurred by conviction.

SUMMARY: The persons named in this notice have been granted relief by the Director, Bureau of Alcohol, Tobacco and Firearms, from their disabilities imposed by Federal laws. As a result, these persons may lawfully acquire, transfer, receive, ship, and possess firearms if they are in compliance with applicable laws of the jurisdiction in which they live.

FOR FURTHER INFORMATION CONTACT: Special Agent in Charge Noel A. Haera, Firearms Enforcement Branch, Investigations Division, Bureau of Alcohol, Tobacco and Firearms, Washington, DC 20026, (202–566–7258).

SUPPLEMENTARY INFORMATION: In accordance with 18 U.S.C. 925(c), the persons named in this notice have been granted relief from disabilities imposed by Federal laws with respect to the acquisition, transfer, receipt, shipment, or possession of firearms incurred by reason of their convictions of crimes punishable by imprisonment for a term exceeding one year.

It has been established to the Director's satisfaction that the circumstances regarding the convictions and each applicant's record and reputation are such that the applicants will not be likely to act in a manner dangerous to public safety, and that the granting of the relief will not be contrary to the public interest.

The following persons have been granted relief:

Ackerman, Patrick H., 41408 Sunset Way, Stayton, Oregon, convicted on May 5, 1980, in the United States District Court, Judicial District of Oregon.

Adams, Craig Henry, 1002 South Camino, DeLas Palmas, Tucson, Arizona, convicted on September 11, 1969, in the Superior Court of Pima County, Arizona.

Zellner, Ronald Allen, 2214 Hillshire Cove, Memphis, Tennessee, convicted on February 28, 1972, in the Criminal Court of Shelby County, Tennessee.

Compliance With Executive Order 12291

It has been determined that this notice is not a "major rule" within the meaning of Executive Order 12291, 46FR13193 (1981), because it will not have an annual effect on the economy of $100 million or more; it will not result in a major increase in cost or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; and it will not have significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of the United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Signed: March 7, 1983.

Stephen E. Higgins,

Acting Director.

Internal Revenue Service

Tax Forms Coordinating Committee; Public Hearings and Request for Forms Suggestions

As part of its annual forms review process, the Internal Revenue Service will hold public hearings to receive comments and suggestions concerning its tax return forms, instructions, and related schedules. While the comments may apply to any tax form issued by IRS, the Service would particularly appreciate specific suggestions on ways to reduce paperwork on the tax forms. The hearings will be held in 3 separate

cities on Thursday, May 5, 1983. The hearings will be held in Port Washington, NY, Indianapolis, and Houston beginning at 10 a.m. local time.

A person wishing to speak at one of these hearings should write or call the Internal Revenue Service at the address or phone number given below for the city of the particular hearings he or she plans to attend. If IRS is contacted by letter, the letter should be marked "Public Hearings on Forms" and should give both the return address and telephone number of the person desiring to speak.

The addresses and phone numbers to contact IRS regarding the hearings, as well as the hearing locations, are listed below:

Port Washington
Internal Revenue Service, Attn: Public Affairs, GPO Box 606, Brooklyn, NY 11202; Phone (212) 330–7257
Hearing Location: Port Washington Public Library, 245 Main Street, Port Washington, NY 11050

Houston
Internal Revenue Service, Attn: Public Affairs, 3223 Briarpark Houston, TX 77042, Mail Stop 6030BP; Phone (713) 953–6434
Hearing Location: Internal Revenue Service, 3223 Briarpark, Third Floor, Houston, TX 77042

Indianapolis
Internal Revenue Service, Attn: Public Affairs, P.O. Box 44211, Indianapolis, IN 46244, Attn: Stop 60; Phone (317) 269–6034
Hearing Location: Indiana Central University, Good Hall, 1400 East Hanna Avenue, Indianapolis, IN 46227

Although not required, it would be helpful to receive a copy of any written comments and suggestions a speaker may prepare. These should be sent to the appropriate mailing address listed above or may be left with the hearing panel on the day of the hearing.

In order to afford as many speakers as possible a chance to participate, each speaker's remarks will be limited to 10 minutes. Persons who have advised IRS that they wish to speak at the hearings will be notified in advance concerning the approximate time for their scheduled appearance. The last date for submitting requests to speak is April 27. However, if there is time remaining after scheduled speakers have been heard, the remaining time will be offered to persons in attendance not previously scheduled who wish to speak.

The panel for each hearing will be made up of representatives from the District Director's Office concerned and the National Office in Washington, D.C.

Request for Written Forms Suggestions

In addition to receiving comments at the public hearings, the Service also desires to receive written comments and suggestions for improving its tax return forms, instructions, and related schedules from those persons unable to attend the hearings. Again, it should be emphasized that the comments may apply to any tax form issued by IRS. The written submissions should be self-explanatory and in sufficient detail to communicate clearly what is being suggested. Careful consideration will be given to all comments and suggestions received. However, individual responses to the submissions will not be made becase of the volume of correspondence involved.

In order to meet our work schedule and early printing deadlines, we request that written submissions be made on or before June 1, 1983.

Comments and suggestions should be sent to the Chairman, Tax Forms Coordinating Committee, Room 5577, Internal Revenue Service, 1111 Constitution Avenue, NW., Washington, D.C. 20224. Further information concerning this notice may be obtained by calling (202) 566–6254.

Dated: March 8, 1983.

Robert Brauer,

Director, Tax Forms and Publications Division.

SECURITIES AND EXCHANGE COMMISSION

Notice is hereby given, pursuant to the provisions of the Government in the Sunshine Act, Pub. L. 94–409, that the Securities and Exchange Commission will hold the following meetings during the week of March 14, 1983, at 450 5th Street, N.W., Washington, D.C.

A closed meeting will be held on Tuesday, March 15, 1983, at 10:00 a.m. Open meetings will be held on Wednesday, March 16, 1983, at 3:00 p.m. and on Thursday, March 17, 1983, at 10:00 a.m. and 3:00 p.m. in Room 1C30.

The Commissioners, their legal assistants, the Secretary of the Commission, and recording secretaries will attend the closed meeting. Certain staff members who are responsible for the calendared matters may be present.

The General Counsel of the Commission, or his designee, has certified that, in his opinion, the items to be considered at the closed meeting may be considered pursuant to one or more of the exemptions set forth in 5 U.S.C. 552(c)(4), (8), (9)(A) and (10) and 17 CFR 200.402(a)(4), (8), (9)(i) and (10).

Chairman Shad and Commissioners Evans, Longstreth and Treadway voted to consider the items listed for the closed meeting in closed session.

The subject matter of the closed meeting scheduled for Tuesday, March 15, 1983, at 10:00 a.m., will be:

Formal orders of investigation.
Amend formal order of investigation.
Access to investigative files by Federal, State, or Self-Regulatory authorities.
Settlement of administrative procedings of an enforcement nature.
Litigation matters.
Institution of injunctive actions.

The subject matter of the open meeting scheduled for Wednesday, March 16, 1983, at 3:00 p.m., will be:

The Commission will meet with representatives of the Securities Investor Protection Corporation ("SIPC") to discuss matters of mutual concern relating to the operations of SIPC. For further information, please contact Edward Kwalwasser at (202) 272–2790.

The subject matter of the open meeting scheduled for Thursday, March 17, 1983, at 10:00 a.m., will be:

1. Consideration of whether to permit William P. Crum, Jr. to become associated with FSC Securities Corporation in a supervisory and proprietary capacity. For further information, please contact Mary Binno at (202) 272–2318.
2. Consideration of whether to grant the application by the Pacific Stock Exchange for unlisted trading privileges in the common stock of Xonics, Inc., a non-reported security presently trading over-the-counter. For further information, please contact Michael Cavalier at (202) 272–2910.
3. Consideration of whether to authorize the publication of a release describing rule and form changes that would (1) consolidate two existing forms for the registration of American Depositary Receipts ("ADRs") into a single form; (2) permit depositary banks to specify the date and time of effectiveness of certain registration statements for ADRs; and (3) various other technical changes to up-date and simplify the registration of ADRs. For further information, please contact Ronald Adee (202) 272–3250.

The subject matter of the open meeting scheduled for Thursday, March 17, 1983, at 3:00 p.m., will be:

The Commission will be meeting with representative of North American Securities Administrators Association, Inc. to discuss issues of mutual concern relating to regulation of financial institutions, new offerings and tender offers. For further information, please contact Ardith Eymann at (202) 272-2844.

At times changes in Commission priorities require alterations in the scheduling of meeting items. For further information and to ascertain what, if any, matters have been added, deleted or postponed, please contact: Jerry Marlatt at (202) 272-2092.

March 9, 1983.

Office of Personnel Management

Notice of Positions Which Were Career Reserved During 1982

OFFICE OF PERSONNEL MANAGEMENT

Positions Which Were Career Reserved During 1982

AGENCY: Office of Personnel Management.

ACTION: Notice.

SUMMARY: As required by the Civil Service Reform Act of 1978, this gives notice of all positions in the Senior Executive Service (SES) that were career reserved during 1982.

FOR FURTHER INFORMATION CONTACT: Neal Harwood, Office of Executive Personnel, (202) 632–4625.

SUPPLEMENTARY INFORMATION: Below is a list of titles of SES positions that were career reserved any time in calendar year 1982, whether or not they were still career reserved on December 31, 1982. Section 3132(b)(4) of Title 5 U.S.C. requires that the head of each agency publish the list by March 1 of the following year. OPM is publishing the list for all agencies.

U.S. Office of Personnel Management.

Part III

Department of Labor

Employment Standards Administration, Wage and Hour Division

Minimum Wages for Federal and Federally Assisted Construction; General Wage Determination Decisions

DEPARTMENT OF LABOR

Employment Standards Administration, Wage and Hour Division

Minimum Wages for Federal and Federally Assisted Construction; General Wage Determination Decisions

General wage determination decisions of the Secretary of Labor specify, in accordance with applicable law and on the basis of information available to the Department of Labor from its study of local wage conditions and from other sources, the basic hourly wage rates and fringe benefit payments which are determined to be prevailing for the described classes of laborers and mechanics employed on construction projects of the character and in the localities specified therein.

The determinations in these decisions of such prevailing rates and fringe benefits have been made by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR 1.1 (including the statutes listed at 36 FR 306 following Secretary of Labor's Order No. 24–70) containing provisions for the payment of wages which are dependent upon determination by the Secretary of Labor under the Davis-Bacon Act; and pursuant to the provisions of part 1 of subtitle A of title 29 of Code of Federal Regulations, Procedure for Predetermination of Wage Rates (37 FR 21138) and of Secretary of Labor's Orders 12–71 and 15–71 (36 FR 8755, 8756). The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged on contract work of the character and in the localities described therein.

Good cause is hereby found for not utilizing notice and public procedure thereon prior to the issuance of these determinations as prescribed in 5 U.S.C. 553 and not providing for delay in effective date as prescribed in that section, because the necessity to issue construction industry wage determination frequently and in large volume causes procedures to be impractical and contrary to the public interest.

General wage determination decisions are effective from their date of publication in the **Federal Register** without limitation as to time and are to be used in accordance with the provisions of 29 CFR Parts 1 and 5. Accordingly, the applicable decision together with any modifications issued subsequent to its publication date shall be made a part of every contract for performance of the described work within the geographic area indicated as required by an applicable Federal prevailing wage law and 29 CFR, Part 5. The wage rates contained therein shall be the minimum paid under such contract by contractors and subcontractors on the work.

Modifications and Supersedeas Decisions to General Wage Determination Decisions

Modifications and supersedeas decisions to general wage determination decisions are based upon information obtained concerning changes in prevailing hourly wage rates and fringe benefit payments since the decisions were issued.

The determinations of prevailing rates and fringe benefits made in the modifications and supersedeas decisions have been made by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR 1.1 (including the statutes listed at 36 FR 306 following Secretary of Labor's Order No. 24–70) containing provisions for the payment of wages which are dependent upon determination by the Secretary of Labor under the Davis-Bacon Act; and pursuant to the provisions of part 1 of subtitle A of title 29 of Code of Federal Regulations, Procedure for Predetermination of Wage Rates (37 FR 21138) and of Secretary of Labor's orders 13–71 and 15–71 (36 FR 8755, 8756). The prevailing rates and fringe benefits determined in foregoing general wage determination decisions, as hereby modified, and/or superseded shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged in contract work of the character and in the localities described therein.

Modifications and supersedeas decisions are effective from their date of publication in the **Federal Register** without limitation as to time and are to be used in accordance with the provisions of 29 CFR Parts 1 and 5.

Any person, organization, or governmental agency having an interest in the wages determined as prevailing is encouraged to submit wage rate information for consideration by the Department. Further information and self-explanatory forms for the purpose of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Wage and Hour Division, Office of Government Contract Wage Standards, Division of Government Contract Wage Determinations, Washington, D.C. 20210. The cause for not utilizing the rulemaking procedures prescribed in 5 U.S.C. 553 has been set forth in the original General Determination Decision.

Modifications to General Wage Determination Decisions

The numbers of the decisions being modified and their dates of publication in the **Federal Register** are listed with each State.

AREA IB: St. Joseph County

GROUP I - Building & Construction Laborers; Scaffold Builders (other than for Masons or Plasterers); Ironworker Tenders; Mechanic Tenders; Window Washers Cleaners; Waterboys & Toolhousemen; Roofer's Tenders; Railroad Workers; Masonry Wall Washers (interior & exterior); Cement Finisher Tenders; Carpenter Tenders; Mason Tenders for Area I, IA, IB, and Counties of Adams, Allen, DeKalb, Steuben, Huntington, Noble, Wabash, Wells, & Whitley; All Portable Water Pumps With Discharge Up to 3 Inches

GROUP II - Waterproofing; Handling of Creosote Lumber or Like Treated Material (excluding railroad material); Asphalt Rakers & Luteman; Kettlemen; Air Tool Operators; Vibrators, Chipping Hammer Operators and All Pneumatic Tool Operators; Earth Compactors; Jackmen & Sheetmen Working Ditches Deeper than 6 ft. in Depth; Laborers Working Ditches 6 ft. in Depth or Deeper; Assembly of Unicrete Pump; Chain Saw Operators; Tile Layers (sewer or field) & Sewer Pipe Layers (metallic or non-metallic); Motor Driven Wheelbarrows & Concrete Buggies; Hyster Operators; Pump Crete Assemblers; Conveyor Assemblers; Core Drill Operators; Cement, Lime or Silica Clay Handlers (bulk or bag); Handling of Toxic Materials Damaging to Clothing; Pneumatic Spikers; Deck Engine & Winch Operators; Water Main & Cable Ducking (metallic & non-metallic)

GROUP III - Plasterers' Tenders; Mason Tenders, except for Areas I, IA, IB, and Counties of Adams, Allen, DeKalb, Steuben, Huntington, Noble, Wabash, Wells, & Whitley; Mortar Mixers; Welders (acetylene or electric); Cutting Torch or Burner; Cement Nozzle Laborers; Cement Gun Operators; Scaffold Builders when Working for Plasterers; Scaffold Builders when Working for Masons (except in Areas I, IA, IB, and Counties of Adams, Allen, DeKalb, Steuben, Huntington, Noble, Wabash, Wells, & Whitley)

GROUP IV - Dynamite Men

GROUP V:
A. Boiler Setter Laborers (Fire Brick Tear Out with Air Tools)
B. Boiler Setter Laborers (Fire Brick)
C. Boiler Setters Laborers (Mortar Mixers)
D. Expeditor; Bottom Man & Bell Man

DECISION NO. IN83-2016

POWER EQUIPMENT OPERATORS:

CLASS I - Mechanic; Asphalt Plant; Asphalt Spreader; Autograde; Batch Plant; Benoto (requires two Engineers); Boiler and Throttle Valve; Boring Machine (Road); Caisson Rigs; Central Redi-Mix Plant; Concrete Conveyor Systems; Concrete Power over 27 cu. ft. and under; Concrete Placer; Concrete Pumps (truck mounted) ; Concrete Tower; Cranes, All Cranes, Hammerhead; Crater Cranes ; Derricks, All; Forklift capable of hoisting and mechanically moving forks horizontally; Grader, Elevating; Highlift Shovels or Front End Loader; Hoists, Two or more Drums; Locomotives, All; Motor Patrol; Pile Drivers and skid Rig; Pre-stress Machine; Rock Drill (self-propelled); Rock Drill (truck mounted); Scoops - Tractor Drawn; Slip Form Paver; Tournapull; Tractor with Boom, and side boom; Trenching Machines 12 or more inches in width

CLASS II - Combination Backhoe Front end Loader Machine with Backhoe bucket or with attachments

CLASS III - Air Compressor 600 cu. ft. and over; Bobcat (over ¼ cu. yd.) Boilers; Broom, All Power Propelled; Bulldozers; Compressors and Throttle Valve; Concrete Breaker (truck mounted) Concrete Mixer or more than 21 cu. ft. capacity; Forklift with a fixed or tilt mast; Greaser Egineer; Hoists, one drum; Hydraulic Boom Trucks; Post Hole Digger (vehicle mounted) Pump Cretes; Squeeze Cretes Screw Type Pumps; Gypsum Bulker and Pump; Rollers, All Steam Generators; Stone Crusbers; Straddle Buggies; Tractors; Winch Trucks with "A" Frame

CLASS IV - Buck Hoist; Combination - Small Equipment Operator; Conveyor, Portable Grouting Machines; Hoist Elevators Mat'l. & Personnel; Hydraulic Power Units Grouting and Pile Driving; Stud Welder; Trenching Machines less than 12 inches in width; Wlders Machines through 15

CLASS V - Bobcat (up to and including 3/4 cu. yd.) Compressor over 210 cu. ft. and less than 600 cu. ft.; Generators - over 50kw, Heaters, Mechanical; Hoists, All elevators (perm. installation); Hoist, Automatic; Hoist, Tugger Single Drum Oilers; Pumps, Well Points and Electric Submersibles Small Rubber Tired End Loaders ¾ cu. yd. and under; Tractors, Farm type Welding Machines (2 through 6)

SUPERSEDEAS DECISION

STATE: Indiana — COUNTIES: Montgomery and Tippecanoe

DECISION NO.: IN83-2019 — DATE: Date of Publication

Supersedes Decision No.: IN79-2084, dated November 2, 1979 in 44 FR 63442

DESCRIPTION OF WORK: Residential Construction Projects Consisting of single family homes and apartments up to and including 4 stories

	Basic Hourly Rates	Fringe Benefits Payments: H & W	Pension	Vacation	Education and/or Appr. Tr.
AIR CONDITIONING MECHANICS	$ 7.75				
BRICKLAYERS	9.12				
CARPENTERS	7.16

DECISION NO. IA83-4022 ZONE DEFINITIONS Page 2

ZONE 1 - City of Council Bluffs

ZONE 2 - Black Hawk, Linn & Polk Cos.; Cities of Ames, Dubuque & Iowa City

ZONE 3 - Cities of Burlington (including Burlington Ordnance Plant) & Clinton

ZONE 4 - Pottawattamie Co. (area west of the eastern boundaries of Minden, York, Washington & Silver Creek Townships); Benton, Boone, Buchanan, Cedar, Clinton, Dallas, Delaware, Dubuque, Jackson, Jasper, Johnson, Jones, Madison, Marion, Marshall, Story, Warren Cos.; the Cities of Fort Madison, Keokuk, Muscatine & their abutting municipalities (excluding the Cities of Ames, Clinton, Council Bluffs, Dubuque & Iowa City & their abutting municipalities)

ZONE 5 - Des Moines, Louisa & Muscatine (excluding Cities of Burlington (incl. Burlington Ordnance Plant), Muscatine & abutting municipalities)

ZONE 6 - Allamakee, Appanoose, Bremer, Butler, Chickasaw, Clayton, Davis, Fayette, Floyd, Franklin, Grundy, Hamilton, Hancock, Hardin, Henry, Howard, Iowa, Jefferson, Keokuk, Lee, Mahaska, Mitchell, Monroe, Poweshiek, Tama, Van Buren, Wapello, Washington, Winnebago, Winneshiek, Worth & Wright Cos. (excluding Cities of Keokuk, Fort Madison & abutting municipalities)

ZONE 7 - Adair, Adams, Audubon, Calhoun, Carroll, Cass, Clarke, Crawford, Decatur, Fremont, Greene, Guthrie, Harrison, Ida, Lucas, Mills, Monona, Montgomery, Page, Ringgold, Sac, Shelby, Taylor, Union, Wayne & Woodbury Cos. & Pottawattamie Co. (east of Minden, York, Washington & Silver Creek Townships)

ZONE 8 - Buena Vista, Cherokee, Clay, Dickinson, Emmet, Humboldt, Kossuth, Lyon, O'Brien, Osceola, Palo Alto, Plymouth, Pocahontas & Sioux Cos.

CLASSIFICATION DEFINITIONS

LABORERS - ZONE 1

Group 1 - Common Laborer

Group 2 - Towboat & dredge deckhands

Group 3 - Form setter tender

Group 4 - Pipelayer; concrete saw operator

Group 5 - Chain saw op.; raker and screedman on asphalt; mortar mixer

Group 6 - Tunnelers, free air

Group 7 - Form setter & precast manhole setter; inlet builders & manhole setter

LABORERS - ZONES 2 thru 8

Group 1 - Sandblasters; Powderman & blaster; Powderman tender; Pipelayer, sewer, water, telephone conduits, etc.; Sewer utility topman & laser op.; Gunnite nozzleman; Diamond & core drills, powered by air; All work performed by Laborers working from a bos'n chair, swinging stage, tag line or block & tackle, Drill ops. of air tracs, wagon drills & similar drillings; Tree climber Form setters; Rakers, Automatic asphalt & concrete power curbing machines; Potmen, not mechanical; Timbermen; Underpinning & shoring; Caissons over 12' depth; Grade checker & cutting torches on demolition work; Trencher; Self-propelled vibrating compactors; Safety boat ops.

CLASSIFICATION DEFINITIONS - (Cont'd)

LABORERS - ZONES 2 thru 8 (Cont'd)
Group 2 - Power buggyman;Concrete & paving sawmen;Form Line,Expansion joint assembler;Bottom man;Caulker,jointer & painter;Timber & chair-sawman;Mechanical grouters;Stresser or stretcherman on post tension or prestressed concrete on or off the job;Form tamper;Air,Gas,Electric tool ops.;Vibrator,barco hammer,paving breakers,spaders,tampers, electric drills,hammer & jack hammers;Tree Groundman;Chain Tender; Tool room man & checkers;Sandblaster tender;Concrete processing material & monitors;Cement finisher tenders;Stringman or paving work & power broom op. (not self-propelled)
Group 3 - Fence erectors;Handling & placing of metal mesh,dowel bars, reinforcing bars & chairs; Dumpman & spotters;Carrying Reinforcing rods;Corrugated culvert pipe;Stake Chaser,seeding & mulching & planting of trees, shrubs & flowers;Mechanic tenders;Group Greaser tender;Water pumps·Compressors;Common Labor;Carpenter tender & hot asphalt labor

POWER EQUIPMENT OPERATORS - ZONES 1,2 & 3
Group 1 - Power Shovel,Crane,Backhoe & Dragline;Central Mix Plant;Dredge Engineer;Dredge Leverman;Paver or Spreader;Hoisting Engineer (steel erection);Motor Patrol;Piledriver Machine;Concrete Mixer;Tow or Push Boat;Master mechanic;CMI paver;CMI subgrader(or equivalent);Asphalt Plant;Front Endloader;Scraper;Bulldozer;Push Cat;Tractor Pulling Scraper;Sideboom Tractor;Churn or Rotary Drill;Trenching Machine (Cleveland 80 or similar capacity);Asphalt Laydown;Asphalt Screed; Asphalt Heater-Planer Unit;Asphalt Roller;Self-propelled Elevating Grader or similar machine;Spreader (concrete);Horizontal Boring Machine;Mechanics-Welders;Group Equip. Greaser;Concrete Pump;Self-propelled Curb Machine
Group 2- Concrete Curb Breaking Machine;Concrete Widening Machine;Paving Breaker;Barber Greene,Haiss Loader or similar machine;Tractor-pulling ripper,disc, sheepsfoot or flat roller;Self-propelled Sheepsfoot Roller; Self-propelled Roller(other than asphalt);Distributor;Screening & Washing Plant;Self-propelled Vibrating Compactor;Trenching Machine (other than above);Steel Placing Machine;Conveyor;Finishing Machine (on concrete);Flexplane;Bullfloat;Form Grader;Water Wagon on Compaction
Group 3 - Boiler;Mechanical Broom;Oiler;Farm-type Tractor(pulling disc, harrow or Roller);Welding Machine;Pump(other than dredge);Boom & Winch Truck;Compressor;Tank Car Heater(combination boiler & booster); Pumps on Well Points & Deep Wells for dewatering;Truck Crane Combination Driver-Oiler;Concrete Curbing Machine;Safety Boat;Batch Plant,dry; Light Plants;Compressors;Mechanical Heaters;Pumps;Welding Machines; Conveyors

POWER EQUIPMENT OPERATORS - ZONES 4,5,6,7 & 8
Group 1 - Power Shovel;Crane;Backhoe(3/4 cu. yd. or larger);Dragline; Dredge Engineer & Leverman;Hoisting Engineer(steel erection);Motor Patrol (finish); Piledriver;Master Mechanic;Sideboom Tractor;Horizontal Boring Machine
Group 2 - Central Mix Plant;Paver or Self-propelled Spreader;Tow or Push Boat; CMI Paver,Subgrader or equivalent;Asphalt Plant;Scraper(over 12 cu. yd.);Bulldozer(finish);Push Cat;Mechanics-Welders;Churn or Rotary Drill;Trenching Machine(Cleveland 80 or similar capacity)·Asphalt Laydown;Asphalt Screed;Asphalt Heater-Planer;Concrete Pump;Self-propelled Curb Machine

CLASSIFICATION DEFINITIONS - (Cont'd)

POWER EQUIPMENT OPERATORS - ZONES 4,5,6,7 & 8 (Cont'd)
Group 3 - Motor Patrol(rough);Front End Loader (3 cu. yd. or over); Scraper (12 cu. yd. & under);Bulldozer(rough);Backhoe(under 3/4 cu. yd.);Asphalt Roller;Group Equip, Greaser;Concrete Curb Breaking Machine;Concrete Widening Machine;Paving Breaker;Barber Greene, Haiss Loader or similar machine;Crawler Tractor(pulling disc, sheepsfoot,ripper or flat roller);Self-propelled Sheepsfoot Roller; Self-propelled Roller;Distributor;Screening & Washing Plant;Self-propelled Vibrating Compactor;Trenching Machine(other than above); Steel Placing Machine;Conveyor;Finishing Machine(on concrete);Flex Plane;Bullfloat;Form Grader
Group 4 - Boiler;Mechanical;Boom;Oiler;Farm-type Tractor(pulling disc, harrow or roller);Welding Machine;Pump(other than dredge);Boom & Winch Trucks;Compressor;Tank Car Heater(combination boiler & booster); Pumps on Well Points & Deep Wells for dewatering;Truck Crane Combination Driver-Oiler;Concrete Curbing Machine;Safety Boat;Batch Plant, dry;Spreader attachments;Utility Tractor with attachments

CLASSIFICATIONS DEFINITIONS:

	Basic Hourly Rates	Fringe Benefits
POWER EQUIPMENT OPERATORS:		
Lenawee County:		
Class A - Crane with boom & jib or leads 220' or longer	$16.34	3.35+13%
Class B - Crane with boom & jib or leads 140' or longer	16.12	3.35+13%
Class C - Crane with boom & jib or leads 120' or longer	15.56	3.35+13%
Class D - Regular crane operator	15.08	3.35+13%
Class E - Regular engineer	14.71	3.35+13%
Class F - Engineer when operating compressor or welding machine	12.46	3.35+13%
Class G - Fireman or oiler	11.64	3.35+13%
Remainder of Counties:		
Class A - Crane with main boom & jib 220' or longer	16.80	3.35
Class B - Crane with main boom & jib 140' or longer, tower cranes, gantry cranes, whirley derrick	15.95	3.35
Class C - Regular equipment operator, cranes, stiff leg derrick, scraper, dozer, grader, front end loader, hoist, job mechanic	15.45	3.35
Class D - Air tugger (single drum), material hoist, boiler operators, sweeping machine, winch truck, bobcat & similar type equipment fork truck (over 20' lift)	13.85	3.35
Class E - Pump 6" or over, well points, freeze systems, boom truck (non swinging), fork truck (under 20' lift)	13.55	3.35
Class F - Air compressor, welder, generators, pumps under 6", grease men, conveyors	12.15	3.35
Class G - Oiler, fireman & heater operators	11.30	3.35

	Basic Hourly Rates	Fringe Benefits
POWER EQUIPMENT OPERATORS: STEEL ERECTION - Clinton, Ingham, Jackson, & Lenawee Counties:		
Class A - Engineer when operating combination of boom & jib 220' or longer	$18.52	3.35+13%
Class B - Engineer when operating combination of boom & jib 140' or longer	18.24	3.35+13%
Class C - Crane operator, job mechanic	17.25	3.35+13%
Class D - Hoisting engineer	17.02	3.35+13%
Class E - Compressor or welder operator	13.95	3.35+13%
Class F - Oiler or fireman	12.65	3.35+13%
Remainder of Counties:		
Class A - Crane operator with main boom & jib 120' or longer	16.55	3.35+13%
Class B - Crane operator with main boom & jib 140' or longer, tower crane, gantry crane, whirley derrick	16.30	3.35+13%
Class C - Regular equipment operator, crane, dozer, loader, hoist, straddle wagon, job mechanic	15.80	3.35+13%
Class D - Air tugger (single drum), material hoist, pump 6" & over	14.20	3.35+13%
Class E - Air compressor, welder, generator, conveyor	12.85	3.35+13%
Class F - Oiler or fireman	11.50	3.35+13%
POWER EQUIPMENT OPERATORS: UNDERGROUND CONSTRUCTION - Branch, Calhoun, Clinton, Eaton, Hillsdale, Ingham, Jackson, & Lenawee Counties:		
Class A	14.80	3.35+13%
Class B	14.42	3.35+13%
Class C	13.77	3.35+13%
Class D	12.29	3.35+13%
Remainder of Counties:		
Class A	13.28	3.35+13%
Class B	12.76	3.35+13%
Class C	12.32	3.35+13%
Class D	12.07	3.35+13%

CLASSIFICATIONS DEVIATIONS:

LABORERS: OPEN CUT CONSTRUCTION:

Class 1 - Construction laborers
Class 2 - Mortar & material mixer, concrete form man, signal man, well point man, manhole, headwall & catch basin builder, guardrail builder, & fence erector
Class 3 - Air/gas/electric tool operators, vibrator operator, driller, pump man, tar kettle operator, bracer, rodder, reinforced steel or mesh man (e.g. wire mesh, steel mats, dowel bars), cement finisher's laborer, pipe jacking & boring man, wagon drill & air track operator, concrete saw operator (under 40 HP.), windlass & tugger man
Class 4 - Trench or excavating grade man
Class 5 - Pipe layer (including crook, metal pipe, multi-plate or other conduits).

LABORERS: TUNNEL, SHAFT, & CAISSON CONSTRUCTION:

Class 1 - Tunnel, shaft, & caisson laborer, dump man, shanty man, hog house tender, testing man on gas
Class 2 - Manhole, headwall, catch basin builder, bricklayer tender, mortar man, material mixer, fence erector, & guard rail builder
Class 3 - Air tool operator (jackhammer, bush hammer, & grinding), first bottom man, second bottom man, cage tender, car pusher, carrier man, concrete man, concrete form man, concrete repair man, cement invert laborer, cement finisher laborer, concrete shoveler, conveyor man, floor man, gas & electric tool operator, gunnite man, grout operator, pump man, outside lock tender, scaffold man, top signal man, switch man, track man, tugger man, utility man, vibrator man, winch operator, pipe jacking, boring man, wagon drill/air track operator/concrete saw operator (under 40 HP.)
Class 4 - Tunnel, shaft, & caisson mucker, bracer man, liner plate man, long haul dinky driver, & well point man
Class 5 - Tunnel, shaft, & caisson miner, drill runner, power knife operator, reinforced steel or mesh man (e.g. wire mesh, steel mats, dowel bars)
Class 6 - Dynamite man & powder man.

POWER EQUIPMENT OPERATORS: UNDERGROUND CONSTRUCTION:

Class A - Backfiller tamper, backhoe, batch plant operator (concrete), clamshell, concrete paver (2-drum or larger), conveyor loader (Euclid type), crane (crawler, truck type or pile driving), dozer (9' blade & over), dragline, elevating grader, end loader (over 1½ cu. yds. capacity), gradall, mechanic, power shovel, roller (asphalt), scraper (self-propelled or tractor drawn), side boom tractor (D-4 type), slip form paver, slope paver, trencher (over 8' digging capacity), well drilling rig;
Class B - Boom truck (power swing type boom), crusher, dozer (less than 9' blade), end loader (1½ cu. yds & smaller), hoist, pump (1 or more - 6" discharge or larger - gas or diesel powered or powered by generator of 300 amps. or more - inclusive of generator), side boom tractor (smaller than D-4 type), sweeper (Wayne type), tractor (snow-tired, other than backhoe or front end loader), trencher (8' digging capacity);
Class C - Air compressor (600 CFM or larger), air compressor (2 or more - less than 600 CFM), boom truck (non-swinging, non-powered type boom), concrete breaker (self-propelled or truck mounted - includes compressor), concrete paver (1-drum, 1½ yd. or larger), elevator (other than passenger), maintenance man, mechanic tender, pump (2 or more, 4" to 6" discharge, gas or diesel powered, excluding submersible pumps), pumporete machine, wagon drill (multiple), welding machine or generator (2 or more, 300 amps or larger, gas or diesel powered);
Class D - Boiler, concrete saw (40 HP. or over), curing machine (self-propelled), farm tractor with attachment, finishing machine (concrete), fireman, hydraulic pipe pushing machine, mulching equipment, oiler, pumps (2 or more up to 4" discharge, gas or diesel powered, excluding submersible pumps), roller (other than asphalt), stump remover, trencher (service), vibrating compaction equipment (self-propelled, 6' wide or over).

Unlisted classifications needed for work not included within the scope of the classifications listed may be added after award only as provided in the labor standards contract clauses (29 CFR, 5.5 (a) (1) (ii)).

SUPERSEDEAS DECISION

STATE: MICHIGAN
COUNTIES: ALCONA, ALPENA, ANTRIM, ARENAC, BENZIE, CHARLEVOIX, CHEBOYGAN, CLARE, CRAWFORD, EMMET, GLADWIN, GRAND TRAVERSE, KALKASKA, LAKE, LEELANAU, MANISTEE, MASON, MECOSTA, MIDLAND, MISSAUKEE, MONTCALM, MUSKEGON, NEWAYGO, OCEANA, OGEMAW, OSCEOLA, OSCODA, OTSEGO, PRESQUE ISLE, ROSCOMMON, & WEXFORD.
DECISION NUMBER: MI83-2018 DATE: DATE OF PUBLICATION
Supersedes Decision Number MI82-2013, dated March 5, 1982, in 47 FR 9675.
DESCRIPTION OF WORK: BUILDING CONSTRUCTION PROJECTS (does not include single family homes and apartments up to and including 4 stories) and HEAVY CONSTRUCTION PROJECTS (excluding Bridge, Airport, & Sewer Projects).

DECISION NO. MI81-2018 PAGE 6

CLASSIFICATIONS DEFINITIONS:

LABORERS: OPEN CUT CONSTRUCTION:

Class 1 - Construction laborers
Class 2 - Mortar & material mixer, concrete form man, signal man, well point man, manhole, headwall & catch basin builder, guardrail builder, & fence erector
Class 3 - Air/gas/electric tool operators, vibrator operator, driller, pump man, tar kettle operator, bracer, rodder, reinforced steel or mesh man (e.g. wire mesh, steel mats, dowel bars), cement finisher's laborer, pipe jacking & boring man, wagon drill & air track operator, concrete saw operator (under 40 HP.), windlass & tugger man
Class 4 - Trench or excavating grade man
Class 5 - Pipe layer (including crock, metal pipe, multi-plate or other conduits).

LABORERS: TUNNEL, SHAFT, & CAISSON CONSTRUCTION:

Class 1 - Tunnel, shaft, & caisson laborer, dump man, shanty man, hog house tender, testing man on gas
Class 2 - Manhole, headwall, catch basin builder, bricklayer tender, mortar man, material mixer, fence erector, & guard rail builder
Class 3 - Air tool operator (jackhammer, bush hammer, & grinding), first bottom man, second bottom man, cage tender, car pusher, carrier man, concrete man, concrete form man, concrete repair man, cement invert laborer, cement finisher laborer, concrete shoveler, conveyor man, floor man, gas & electric tool operator, gunnite man, grout operator, pump man, outside lock tender, scaffold man, top signal man, switch man, track man, tugger man, utility man, vibrator man, winch operator, pipe jacking, boring man, wagon drill/air track operator/concrete saw operator (under 40 HP.)
Class 4 - Tunnel, shaft, & caisson mucker, bracer man, liner plate man, long haul dinky driver, & well point man
Class 5 - Tunnel, shaft, & caisson miner, drill runner, power knife operator, reinforced steel or mesh man (e.g. wire mesh, steel mats, dowel bars)
Class 6 - Dynamite man & powder man.

POWER EQUIPMENT OPERATORS: HEAVY & ROAD CONSTRUCTION:

Class A - Backfiller tamper, backhoe, batch plant operator (concrete), clamshell, concrete paver (2-drum or larger), conveyor loader (Euclid type), crane (crawler, truck type or pile driving), dozer (9' blade & over), dragline, elevating grader, end loader (over 1½ cu. yds. capacity), gradall, mechanic, power shovel, roller (asphalt), scraper (self-propelled or tractor drawn), side boom tractor (D-4 type), slip form paver, slope paver, trencher (over 8' digging capacity), well drilling rig;
Class B - Boom truck (power swing type boom), crusher, dozer (less than 9' blade), end loader (1½ cu. yds & smaller), hoist, pump (1 or more - 6" discharge or larger - gas or diesel powered or powered by generator of 300 amps. or more - inclusive of generator), side boom tractor (smaller than D-4 type), sweeper (Wayne type), tractor (pneu-tired, other than backhoe or front end loader), trencher (8' digging capacity);
Class C - Air compressor (600 CFM or larger), air compressor (2 or more - less than 600 CFM), boom truck (non-swinging, non-powered type boom), concrete breaker (self-propelled or truck mounted - includes compressor), concrete paver (1-drum, 1½ yd. or larger), elevator (other than passenger), maintenance man, mechanic tender, pump (2 or more, 4" to 6" discharge, gas or diesel powered, excluding submersible pumps), pumpcrete machine, wagon drill (multiple), welding machine or generator (2 or more, 300 amps or larger, gas or diesel powered);
Class D - Boiler, concrete saw (40 HP. or over), curing machine (self-propelled), farm tractor with attachment, finishing machine (concrete), fireman, hydraulic pipe pushing machine, mulching equipment, oiler, pumps (2 or more up to 4" discharge, gas or diesel powered, excluding submersible pumps), roller (other than asphalt), stump remover, trencher (service), vibrating compaction equipment (self-propelled, 6' wide or over).

Unlisted classifications needed for work not included within the scope of the classifications listed may be added after award only as provided in the labor standards contract clauses (29 CFR, 5.5 (a) (1) (ii)).

CLASSIFICATION DEFINITION FOR POWER EQUIPMENT OPERATORS ON
HEAVY AND HIGHWAY CONSTRUCTION

GROUP 1 - Cranes, derricks, tower cranes, all shovels, drag lines, clamshells, backhoes, cableways, derricks (2 drums or more), dredge, sideboom tractors and similar equipment having a reach from the top of the boom to the ground of 150 feet, or a capacity of 3 cubic yards and/or a lift capacity of 50 tons. Endloaders and concrete mixing plants of 4 cubic yards capacity or over. Hoist with 18,000 pound line pull or over, tug, tow or work boat above 25 horsepower engine. Transloader. (Capacities to be based on manufacturer's specifications). Master Mechanic.
GROUP 2 - Crane, derrick boat, drag-line, grade-all, hoist (two drums or more), mechanic (heavy), mixer plant (two or more mixers including batch control), paver (dual drums), pile driver, shovel, coredrill operator, trencher, (20" or over), truck crane, backhoe, hi-lift (1-1/2 cubic yards or over), dozer with ripper (when dozer is D-8 class or larger), double hitched equipment, bulldozer with roller, standard guage locomotive, concrete pump, controlled fine grade machine, slip form paver operator, dozer with sloper, log loader, bulldozer operator, motor grader, rubbertired scraper, tractor pan, and bulldozers 100 flywheel horsepower and over

DECISION NO. WV83-1000

CLASSIFICATION DEFINITION ACF POWER EQUIPMENT OPERATORS ON HEAVY AND HIGHWAY CONSTRUCTION (CONT'D)

GROUP 3 - Bulldozers under 180 flywheel horsepower, fork lift, self-propelled concrete spreader, concrete finishing machine, derrick (single drum), hi-lift (under 1-1/2 cubic yards), hoist (single drum), single drum paver, trencher (under 20"), air tugger, Ross Carrier, "A" Frame, multiple concrete saw, asphalt paver, hydraulic post driver, base paver, rotary drill, lead greaser on grease truck or service island, snake or push tractor, horizontal road boring machine, conductor of locomotive, tie distributor, track lining machine, ballast tamper, anchor application machine, ribbon rail puller, ballast regulator, auto sled, turn table.
GROUP 4 - Concrete mixer (single drum) one cubic yard or over, fireman, asphalt batch plant, concrete batch plant, crushing plant, screening and washing plant, form subgrader, power form handling equipment, burlap and curing machine, form grader, bull float, portable concrete saw, roller and compactor, bar and joint installing machine, and power broom.
GROUP 5 - Air compressor, concrete mixer (under one cubic yard), conveyor-belt or bucket, light plant, narrow gauge locomotive, welding machine, fireman, mechanic's helper, oiler, deckhand, screed man, spreader box man, farm tractor, joint sealer and pump,steam jenny and brakeman of locomotive.
GROUP 6 - Class V operators may operate up to five (5) pieces of utility equipment, but when operating one (1) or more 600 CFM compressors or one(1) or more pumps 4" or larger,or more than one (1) air compressor, conveyor-belt or bucket, light plan, welding machine, and pumps, the Class V operator shall receive class six (6) rate

CLASSIFICATION DEFINITIONS FOR TRUCK DRIVERS ON HIGHWAY & HEAVY CONSTRUCTION

GROUP 1 - Warehouse, yardmen, truck helper, pick-ups, station wagons, panel trucks, team 2-up
GROUP 2 - Single axle trucks used as dump, supply, fiel, water, van, flatbody, monorail, distributor, (Other than Bituminous distributors) and including towed single units - material checkers, material receivers, team 4-up, greasers, firemen and mechanic helpers (trucks).
GROUP 3 - Tandem axle trucks used as dump, supply, fuel, water, van, flatbody, monorail and including towed single units, truck tractors used in combination with dump, van, tank, flatbed, low platform, or pole trailers, bituminous distributors, agitator or mixer trucks (up to and including 5 c.y.).
GROUP 4 - Agitator or mixer trucks over 5 c.y. and less than 12 c.y., rubber-tired tractors (towing or pushing), drag drivers, and tag alongs.
GROUP 5 - Tri-axle trucks used as dump, supply, fuel, water, van, flatbed, monorail and including towed single units, agitator or mixer trucks (over 12 c.y. to 20 c.y.)
GROUP 6 - Mobile metered mixer, agitator or mixer trucks (over 20 c.y.), off highway rear dump trucks to 75 tons.

[FR Doc. 83-6088 Filed 3-10-83; 8:45 am]
BILLING CODE 4510-27-C

DECISION NO. WV83-1000

CLASSIFICATION DEFINITIONS FOR TRUCK DRIVERS ON HIGHWAY & HEAVY CONSTRUCTION CONT'D

GROUP 7 - "A" frame operator
GROUP 8 - Off highway rear dump - over 75 tons.

FOOTNOTES:

a. Holiday: Christmas Day

b. Employer contributes $158.17 per month per employee

c. Employer contributes $121.33 per month per employee

Unlisted classifications needed for work not included within the scope of the classifications listed may be added after award only as provided in the labor standards contract clauses (29 CFR 5.5(a)(1)(ii)).

DEPARTMENT OF LABOR

Mine Safety and Health Administration

30 CFR Parts 55, 56, and 57

Safety Standards for Ground Control

AGENCY: Mine Safety and Health Administration, Labor.

ACTION: Notice of availability of preproposal draft.

SUMMARY: The Mine Safety and Health Administration (MSHA) has developed a preproposal draft of revisions to current ground control standards for the metal and nonmetal mining industry. MSHA seeks comment from all interested parties on the preproposal draft. Copies of the draft may be obtained by contacting the Agency.

DATES: Comments must be received on or before May 11, 1983.

ADDRESSES: Send comments to the Office of Standards, Regulations and Variances, MSHA, Room 631, Ballston Towers, #3, 4015 Wilson Boulevard, Arlington, Virginia 22203.

FOR FURTHER INFORMATION CONTACT: Patricia W. Silvey, Acting Director, Office of Standards, Regulations and Variances, MSHA (703) 235–1910.

SUPPLEMENTARY INFORMATION: On March 25, 1980, MSHA published an Advance Notice of Proposed Rulemaking (ANPRM) in the **Federal Register** (45 FR 19267) announcing its comprehensive review of existing metal and nonmetal mine safety and health standards in 30 CFR Parts 55, 56, and 57. The Agency is reviewing the standards to eliminate duplicative and unnecessary standards, provide alternative methods of compliance, reduce recordkeeping requirements, and upgrade provisions consistent with advances in mining technology. MSHA believes that this review will result in more effective regulations for assuring the safety and health of miners. The review is consistent with the specific goals of Executive Order 12291, the Regulatory Flexibility Act, and the Paperwork Reduction Act.

On November 20, 1981, MSHA published a subsequent ANPRM in the **Federal Register** (45 FR 57243) listing eight sections the Agency had selected for priority review. Standards related to ground control were included in the priority group.

On March 9, 1982, MSHA published a notice in the **Federal Register** announcing public conferences to discuss issues related to the standards under priority review. The Section 3 conferences were concluded in May 1982. During the conferences many commenters requested that the Agency make available a preproposal draft of the standards under review before issuing a proposed rule.

MSHA has now completed development of the preproposal draft for Section 3. In addition to revising the substance of the existing standards, the Agency has reorganized Parts 55, 56, and 57 into a single Part 58. This reorganization would eliminate the current repetition of identical standards in the Code of Federal Regulations. The revised standards are designated general surface and underground, surface, and underground so that they would apply only to the appropriate mining application.

The Agency requests comment on the substance of the preproposal standards, as well as on the reorganization of the standards. In addition, the Agency is interested in any economic data or other regulatory impact information commenters may wish to submit.

A copy of the preproposal draft has been mailed to persons and organizations who have expressed an interest in this rulemaking. All other interested persons and organizations may obtain a copy of the draft by submitting a request to the address provided above. The document contains the Agency's intended revisions, a comparison with existing provisions, and a summary explanation of the proposed changes.

Dated: March 8, 1983.

Ford B. Ford,

Assistant Secretary for Mine Safety and Health.

Part V

Department of Commerce

International Trade Administration

Export Trade Certificates of Review; Interim Rule

DEPARTMENT OF COMMERCE

International Trade Administration

15 CFR Part 325

[Docket No. 21215-252]

Export Trade Certificates of Review

AGENCY: International Trade Administration, Commerce.

ACTION: Interim rule with request for comments.

SUMMARY: This interim rule implements Title III of the Export Trading Company Act, Pub. L. 97-290. These regulations establish the procedures by which businesses may apply for and by which the Secretary of Commerce will issue export trade certificates of review. The holder of a certificate and its members will have specific protections from liability under Federal and State antitrust laws. These protections extend to the certificate holder's export trade, export trade activities, and methods of operation that are covered by the certificate and conducted while the certificate is in effect.

DATES: Effective March 11, 1983.

Comments due: May 10, 1983.

ADDRESS: Interested persons are invited to submit written comments, with five copies, to: Office of the Assistant General Counsel for Export Trading Companies, Department of Commerce, Room 5870, Washington, D.C. 20230.

Comments should refer to this rule by its title, "Export Trade Certificates of Review."

FOR FURTHER INFORMATION CONTACT: Eleanor Roberts Lewis, Assistant General Counsel for Export Trading Companies, Department of Commerce, Washington, D.C. 20230, (202) 377-0937 or (202) 377-4772.

These are not toll free numbers.

SUPPLEMENTARY INFORMATION: On October 1, 1982, Congress passed the Export Trading Company Act (Pub. L. No. 97-290, 96 Stat. 1233) which the President signed into law on October 8, 1982. In order to increase United States exports of products and services, Title III of the Act (15 U.S.C. 4011-4021) authorizes the Secretary of Commerce to issue export trade certificates of review. A certificate of review protects its holder from civil and criminal liability under Federal and State antitrust laws for the export trade, export trade activities and methods of operation specified in the certificate, except that private parties may bring actions for injunctive relief or actual damages for a violation of the eligibility standards found in section 303 of the Act.

Section 310 of the Act gives the Secretary the authority to issue, with the concurrence of the Attorney General, rules and regulations to carry out the purposes of Title III. On December 21, 1982, the Secretary issued proposed regulations which were published in the Federal Register (47 FR 56972 and corrected by 48 FR 31). The proposed regulations explained how to apply for a certificate of review and the kinds of information that the application should contain so that the Secretary and Attorney General can determine whether they should issue the certificate. The regulations also explained how the Secretary and Attorney General will review applications and how a certificate can be amended, modified or revoked. Finally, the regulations discussed how the Secretary proposed to implement section 305 of the Export Trading Company Act which governs the judicial review of the Secretary's decisions to grant, deny, amend, modify, or revoke a certificate. A more detailed discussion of these provisions can be found in the preamble of the proposed rule.

The Department provided 30 days for public comment on the proposed rule. The Department received and considered 32 comments. The commenters include manufacturers, export management and trading companies, representative trade associations, attorneys, banks, port authorities and a local chamber of commerce. Twenty-six commented on the information requirements found in § 325.3(b), more than any other section, and seventeen on the procedures and standards for issuing certificates in § 325.4. The Department has adopted many of the commenters' suggestions in preparing these interim regulations. The Department's goal in making these changes is to simplify the export trade certificate of review process. The interim rule also includes many editorial changes to make the regulations easier to read and understand. A discussion of the public comments follows.

Issuing Interim Regulations

The proposed regulations provided thirty days for public comment. A number of commenters expressed the opinion that the comment period was inadequate. The Department was constrained to limit the comment period because, by virtue of section 312 of the Act, it will not have the legal authority to accept applications or to issue certificates of review until 90 days after regulations become effective. Given the need to promote exports, the Department believes that thirty days gave the public a reasonable opportunity to comment. However, in order to have a fuller discussion of these regulations which are important to the many businesses interested in exporting, the Department has decided to issue interim regulations which will allow another 60 days for public comment. This interim rule is effective immediately so that the application process can begin 90 days from now. In preparing the final regulations, the Department will consider all of the comments it receives before the comment period closes. The Department will also consider those comments on the proposed rule which were received too late to be considered here.

Protection for Officers, Directors, Employees, and Agents

The Department received comment that the regulations should extend the certificate's antitrust protection of the certificate holder and its members to their officers, directors, employees and agents. The Commerce and Justice Departments agree that the Act's protection extends to officers, directors, employees and agents of the certificate holder or members who carry out the activities specified in the certificate. The certificate will not have to identify each officer or director by name, and would not have to be amended whenever the identity of an officer or director is changed. Thus, when a certificate is issued, the officers, directors, employees and agents of the certificate holder and of members identified in the certificate will also receive the protection of section 306 of the Act.

Definitions

1. The Department has decided not to adopt the suggestion that "control" (§ 325.2(g)) should be defined as ownership of "over 50 percent" of a company's voting stock instead of "50 percent or more." Even in closely-held corporations, where ownership is more likely to be concentrated, the 50-percent owner has at least veto power or negative control in connection with the corporate decisions of the company.

2. The interim rule, in § 325.2(o), adds the definition of "services" found in section 311(2) of the Act.

3. Some commenters expressed uncertainty as to whether the definitions of "applicant" (§ 325.2(a)), "person" (§ 325.2(m)) and "member" (§ 325.2(k)) permit foreign firms to apply for a certificate of review. The proposed regulations contemplated that a foreign company would be eligible to apply for a certificate either: (1) Through its U.S.

subsidiary or (2) as a "member" of a trading entity created under U.S. law. This rule continues that position, which is supported by the objective of Title III ("to promote and encourage export trade") and by the legislative history. It is also consistent with the scope of eligibility for membership in a Webb-Pomerene association.

Applying for a Certificate

In response to public comments, and in order to make it easier to apply for a certificate of review, the Department is making the following changes in the application procedure.

1. The Department has revised § 325.3(a) to allow applicants to deliver their applications by first class mail. However, the Department recommends that the applicant, for its own records and protection, use registered mail or some other method of delivery that provides evidence of receipt.

Section 325.3(a) specifies that applications are to be delivered to the International Trade Administration's Office of Export Trading Company Affairs. Only applications that are properly delivered to this office will be accepted for review.

2. Section 325.3(d) of the proposed regulations gave the Secretary five working days after receiving an application to determine whether the application is complete and can be deemed submitted. The interim regulations add a sentence which makes clear that the application will be deemed properly submitted if the Secretary does not act within the time allowed.

3. The interim regulations require the Secretary to ask for supplemental information from the applicant in writing. In addition, § 325.3(f) requires the Secretary and Attorney General to decide promptly whether the supplemental information that the applicant provides is complete, and to notify the applicant of the determination. This assures the applicant that the request for supplemental information will not unduly delay the application.

Contents of the Application

The Department received more comments on § 325.3(b) than on any other. Twenty-six commenters made 56 comments on the information requirements in § 325.3(b). Many questioned the need for one or more of the items that § 325.3(b) requires to be included in the application. Others questioned the need to require the information in all cases, suggesting, for example, that requirements for information relating to shareholders of the applicant be applied only to those who own a specified percentage of the applicant's stock.

The Department recognizes the legitimate business concerns behind these comments. The applicant will have to spend some time and effort to provide even the simplest information. Some might fear that they risk disclosing information to their competitive disadvantage. In order to encourage businesses to apply for a certificate of review, the Department's policy in drafting these regulations is to require only the information that it will normally need to determine whether the applicant's proposed export conduct satisfies the four eligibility standards specified in section 303 of the Act and can therefore be certified. The regulations attempt to balance the need of the Commerce and Justice Departments for the information in order to be able to evaluate an application properly and the burden on the applicant to provide the information requested with its application.

In addition, the applicant does not have to provide any item of the information requested if it is unable to do so, or if it believes that the information would be burdensome to obtain and not needed for a determination on the application. Section 325.3(b) allows the applicant to omit the information requested or provide the information in less detail, if he gives an explanation. The applicant can, for example, provide the 4-digit instead of the 7-digit SIC number that § 325.3(b)(8)(ii) asks for if he believes that it would be burdensome and unnecessary to provide the 7-digit number. However, for purposes of accepting the application for review, the Secretary and Attorney General will not be bound by the applicant's decision not to submit the information requested. The Secretary and Attorney General may later make a supplemental request under § 325.3(f) for the information omitted.

In order to minimize further the burden on applicants, the Department is making the following changes and clarifications:

1. Two state port authorities commented on § 325.3(b). The commenters agree that although, as government entities, they are eligible to apply for certificates of review, § 325.3(b) requires information which is only appropriately asked of private commercial enterprises. Other commenters argue that the regulations put new companies at a disadvantage because they cannot provide the information that § 325.3(b) requires.

The Department notes that it intends to be flexible in applying the regulations; it will not insist that the applicant provide information which does not exist. For this reason, § 325.3(b) is qualified to require the applicant to provide information only if the item requested is applicable to the applicant's circumstances. For example, a new company can answer that paragraph (9) is not applicable to its circumstances because it has no prior sales. This answer, if it is appropriate, will not adversely affect the applicant's ability to get a certificate of review.

2. Section 325.3(b)(3) requires the applicant to submit a copy of any legal instrument under which the applicant is organized or will operate. A commenter objected to the requirement that the applicant include copies of contracts under which it " . . . conducts or proposes to conduct its export trade activity." The Department intended to require only contracts in the nature of a corporate charter, bylaws, or partnership, joint venture, membership and similar agreements under which the applicant is organized, and not contracts for the applicant's specific business transactions. However, the Department has deleted the language quoted in order to avoid any confusion.

3. The Department has rewritten paragraph (4) to emphasize that it is interested only in the information requested, and not the precise form that the information takes. As revised, paragraph (4) allows the applicant to submit either a narrative description or an organizational chart of its export-related operations.

Paragraphs (5) and (6) have also been revised and are made consistent. Paragraphs (5) and (6) no longer require the applicant, a member or a controlling entity to describe its methods of operation. The applicant should describe its methods of operation under paragraph (11) to the extent the applicant wants them to be certified.

4. The interim regulations make clear that § 325.3(b)(8) requires a description only of those goods and services for whose export that the applicant wants certification in order to minimize the burden on applicants and to limit the information requirements to what ordinarily would be needed to evaluate the application. This limitation will also apply to § 325.3(b) (9) and (10).

5. Section 325.3(b)(8)(ii) asks the applicant to identify the goods and services to be certified for export by their Standard Industrial Classification numbers. The regulations ask that goods be identified at the 7-digit level and services be identified at the highest SIC level available. The Department wants to note that the applicant has to supply

the SIC numbers only if they are reasonably available to the applicant. Furthermore, information of this detail is being requested for purposes of analysis only. This is not intended to imply that the certificate necessarily will identify the products or services which the applicant or its members will export with this degree of specificity.

6. Section 325.3(b)(9)(ii) asks for the dollar value of the applicant's and each member's total domestic and export sales for the two preceding years of each good or service that the applicant exports or proposes to export. The Secretary and the Attorney General, in the preamble of the proposed rule, noted that in certain circumstances the exchange of such information might raise antitrust concerns and solicited comment on how applicants can best compile this information for the application without raising those concerns. In response, one commenter suggested that the protection from antitrust liability be extended to any activity needed to prepare the application, including exchanges of information. The Commerce and Justice Departments do not believe they have this authority under the Act. For administrative reasons, the Department is also not capable of accepting separate submissions from each member. One alternative is to have an independent agent, such as an attorney or accountant, compile this information for submission to the Department. The Department leaves this decision to the applicant, which may wish to seek the advice of legal counsel on whether any safeguards of this or any other sort would be advisable in the applicant's particular circumstances. The Department has decided to note this issue in the application form.

In raising this issue, the Commerce and Justice Departments did not intend to suggest that the sharing of the information required by § 325.3(b)(9)(ii) among the applicant and its members would pose antitrust problems in most instances. On the contrary, it is unlikely to be of concern when the firms involved have, among them, a small share of the market for the particular product or service. The sharing of this information will not necessarily pose problems where larger market shares are involved, either, but applicants may wish to give more consideration to the issue in those circumstances.

7. At the suggestion of a commenter, § 325.3(b)(11)(iv) now indicates that the applicant should specify any restrictions on membership that it wants certified in addition to restrictions on membership that it wants certified in addition to restrictions on withdrawal from membership.

8. Section 325.3(b)(12) of the proposed regulations required the applicant to submit "[a] statement of whether the export trade, export trade activities or methods of operation for which certification is sought will involve, directly or indirectly, any agreement or any exchange of information with respect to domestic prices, production or sales, or will involve any exchange of other business confidential information." A number of commenters indicated that because "directly or indirectly" is vague, they are uncertain of which agreements they are required to disclose. In response to these comments, this clause has been deleted. The deletion, however, is intended to clarify and not to narrow the requirement. The applicant should identify any agreements or exchanges of this nature that are contemplated in connection with the proposed export trade activities or methods of operation.

The Department emphasizes that, contrary to the fears expressed by some commenters, an exchange of information will not disqualify the applicant from receiving a certificate of review. In fact, exchanges of information on prices, production, sales, or other confidential business information may be certifiable under the Act.

9. Section 325.3(b)(13) of this interim rule requires the applicant to state whether it "intends or reasonably expects that any exported goods or services covered by the proposed certificate will re-enter the United States, either in their original or modified form." If the applicant answers "yes," the Secretary may still certify the proposed export conduct in certain circumstances.

10. Section 325.3(b) no longer requires the applicant to give the number of its employees and the number of each member's employees.

Standards for Issuing a Certificate

1. Many of the commenters asked for an explanation of § 325.4(b) which repeats the four standards for issuing a certificate that are specified in section 303(a) of the Act. The Secretary and the Attorney General plan to promulgate guidelines for issuing certificates of review. These guidelines will explain the standards and analytical approach that the Secretary and Attorney General will take in determining whether to certify an applicant's proposed export trade, export trade activities and methods of operation. The Secretary and the Attorney General hope to publish the guidelines in the **Federal Register** in time to help applicants prepare their applications.

2. Three commenters thought that § 325.4(a) as it was proposed might give the Attorney General the right to take up to an additional 30 days to consider an application, even if the applicant does not approve. The Department has revised this paragraph to make clear that the applicant must approve any extension regardless of whether it is the Secretary or the Attorney General who seeks the additional time.

3. A number of commenters suggested that, before he issues a certificate that is different from the draft that the applicant submitted, the Secretary should notify the applicant and allow the applicant to suggest alternatives or to withdraw its application. Section 325.4(d) incorporates this suggestion.

4. In response to the objections of six commenters, the Department has not included in the interim regulations § 325.4(e) of the proposed rule which provided that an applicant is not entitled to resubmit an application that the Secretary has denied within twelve months of the date of the denial.

Publications in the Federal Register

1. The interim rule revises § 325.5(a) to require the Secretary to submit to the **Federal Register** for publication a notice that an application has been submitted within 10 days after the application is deemed submitted. The interim rule also adds a provision that the Secretary will notify the applicant if he plans to publish a summary of the application that is different from the summary submitted by the applicant.

2. Section 325.5(c) of the proposed regulations would have required the Secretary to publish in the **Federal Register** a copy of each certificate he issues. The Department has received many comments urging the Department to keep the specific terms of a certificate confidential. The commenters argue that the publication of the certificate will discourage potential applicants who do not want to disclose their business plans to their competitors. Applicants might also not describe their proposed export activity in detail and so limit the certainty of the certificate's protection.

Having considered these comments, the Commerce and Justice Departments have concluded that it is not necessary to publish the certificate in the **Federal Register**. Therefore, the Department is revising § 325.5(c) to provide that the Secretary will publish a summary of the certificate he issues. However, it is the present intent of the Commerce and Justice Departments to make the certificate available for public

inspection in the International Trade Administration Freedom of Information Records Inspection Facility. The Departments request comments from the public on whether confidential information may or should be deleted from the publicly available certificate. The comments should address the interest in giving potentially aggrieved parties sufficient notice of the conduct covered by the certificate to exercise rights of judicial review.

Modifying or Revoking a Certificate

Section 325.9 controls how the Secretary and Attorney General can modify or revoke a certificate. Under § 325.9(b) the Secretary can ask the certificate holder for any information necessary to determine whether the certificate holder's export trade, export trade activities and methods of operation still meet the standards for certification. The interim revises rule § 325.9 by clarifying that the certificate holder's failure to provide the information requested by the Secretary is grounds for modifying or revoking the certificate. This makes the regulation consistent with section 304 of the Export Trading Company Act.

Confidential Information

1. Section 325.14(b) limits the government's disclosure of commercial or financial information if the information is privileged or confidential and if disclosing the information would harm the person who submitted it. One commenter expressed concern that the regulation conditions confidentiality of the Department's finding that disclosure would be harmful. Another commenter suggested that information be kept confidential if disclosure would be "disadvantageous" to the person who submitted the information.

Section 325.14(b) incorporated into the regulations section 309(b) of the Export Trading Company Act. The Department cannot change the statute by regulation. However, in order to encourage the submission of information relevant to an application or certificate, the Department has revised § 325.14(b) to allow the person submitting information to designate the documents or information which it considers privileged or confidential and the disclosure of which would cause it harm. This input, although not controlling, will help determine whether information may be disclosed.

2. Section 309(b)(2)(B) of the Act authorizes officers and employees of the United States to disclose privileged or confidential information "in a judicial or administrative proceeding, subject to appropriate protective orders." Section 325.14(b)(2)(ii) incorporates this provision into the regulations.

Section 325.10(c) of the proposed regulations further provided that, in actions under section 305(a) of the Act, "the parties shall seek an appropriate protective order prior to the disclosure of any confidential or privileged documents or information." Section 309(b)(2)(B), however, applies to all judicial or administrative proceedings instead of just actions for judicial review of the Secretary's decision to issue, deny, amend, modify, or revoke a certificate. The Department does not intend to distinguish actions under section 305 of the Act from other judicial or administrative proceedings as the proposed regulations may have implied. For this reason, the Department has omitted § 325.10(c) from these interim regulations and has added a new § 325.14(c) which will apply to all judicial or administrative proceedings. Under § 325.14(c), the Secretary or the Attorney General will try to notify the party who submitted confidential or privileged information whenever disclosure of this information is sought from the Secretary or Attorney General in a judicial or administrative proceeding. The Secretary or Attorney General also may seek or support an appropriate protective order on behalf of the party who submitted the information.

The Department is providing a period of 60 days for public comments on this rule. In developing the final regulations, the Department will consider all of the comments it receives before the close of the comment period. If possible, the Department will consider comments it receives after the end of the comment period, but their consideration cannot be assured. The Department will not consider public comments that are accompanied by a request that part or all of the material be treated confidentially because of its business proprietary nature or for any other reason. These comments and materials will be returned and will not be considered in the development of the final regulations.

All public comments on these regulations will be a matter of public record and will be available to the public to inspect and copy. In the interest of accuracy and completeness, comments in written form are preferred. If commenters make oral comments, they must follow them with written memoranda, which will also be a matter of public record and will be available for the public to inspect and copy. Communications from agencies of the United States government or foreign governments will not be made available for public inspection.

The public record concerning these regulations will be maintained in the International Trade Administration Freedom of Information Records Inspection Facility, Room 4001–B, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, D.C. 20230. The public may inspect and copy records in this facility, including written public comments and memoranda summarizing the substance of oral communications, according to the regulations published in Part 4 of Title 15 of the Code of Federal Regulations. Information about inspecting and copying records at the facility may be obtained from Patricia L. Mann, the International Trade Administration Freedom of Information Officer, at the above address or by calling (202) 377–3031.

This rule does not constitute a "major rule" as that term is defined in section 1(b) of the Executive Order on Federal Regulations issued by the President on February 17, 1981. The regulations are procedural in nature and will not have an annual effect on the economy of $100 million or more. Analysis of the regulations also indicates that they will not cause a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions, or have a significant adverse effect on competition, employment, investment, productivity, innovation, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets. Accordingly, a Regulatory Impact Analysis of this rule is not required.

The only potential costs of the proposed regulations are the costs to businesses of applying for certification and the costs to the government for processing applications. The recordkeeping, administrative burdens, and direct financial costs to a business to prepare an application under the regulations are expected to be minimal. Furthermore, the certification process is voluntary. A firm that wants to conduct an export venture is not required to get a certificate of review. The costs to the Federal government for reviewing applications for export trade certificates are not expected to be significant.

The interim rule is not a major Federal action significantly affecting the quality of the human environment within the meaning of Section 102(2)(C) of the National Environmental Policy Act of 1969. Accordingly, no assessment of

environmental impact statement has been or will be prepared.

The interim rule is exempt from the Regulatory Flexibility Analysis requirements of Section 603 of the Regulatory Flexibility Act since the Department is not required by Section 553 of Title V, United States Code, or any other law, to publish general notice of proposed rulemaking for interpretative rules, general statements of policy, and rules of procedure or practice. However, even if the proposed rule were not exempt, preparation of an initial Regulatory Flexibility Analysis would not be required because the record keeping, administrative burdens and other costs on any individual entity applying for a certificate of review under the regulations would be minimal and those costs would not have a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act.

The Department has requested approval of the information collection requirements contained in these regulations by the Office of Management and Budget under the provisions of the Paperwork Reduction Act of 1980 (Pub. L. 96–511).

List of Subjects in 15 CFR Part 325

Exports, Antitrust, Administrative practice and procedure, Reporting requirements, and Freedom of information.

For the reasons set out in the preamble, 15 CFR Chapter III, Subchapter A, is amended by adding a new Part 325 to read as follows:

PART 325—EXPORT TRADE CERTIFICATES OF REVIEW

Sec.
325.1 Scope.
325.2 Definitions.
325.3 Applying for a certificate of review.
325.4 Issuing the certificate.
325.5 Publishing notices in the Federal Register.
325.6 Amending a certificate.
325.7 Expediting the certification process.
325.8 Reconsidering an application that has been denied.
325.9 Modifying or revoking a certificate.
325.10 Judicial review.
325.11 Returning the applicant's documents.
325.12 Nonadmissibility in evidence.
325.13 Submitting reports.
325.14 Protecting confidential information.

Authority: Title III of the Export Trading Company Act, Pub. L. 97–290 (96 Stat. 1240–1245, 15 U.S.C. 4011–4021).

§ 325.1 Scope.

This part contains regulations for issuing Export Trade Certificates of Review under Title III of the Export Trading Company Act, Pub. L. No. 97–290. Certificate holders and their members who are identified in these certificates have specific protections from liability under the antitrust laws for certified export trade, export trade activities, and methods of operation that they engage in while the certificates are in effect.

§ 325.2 Definitions.

As used in this part:

(a) "Act" means Title III of Pub. L. 97–290, Export Trade Certificates of Review.

(b) "Antitrust laws" means the antitrust laws, as the term is defined in the first section of the Clayton Act (15 U.S.C. 12), section 5 of the Federal Trade Commission Act (15 U.S.C. 45) (to the extent that section 5 prohibits unfair methods of competition), and any State antitrust or unfair competition law.

(c) "Applicant" means the person or persons who submit an application for a certificate.

(d) "Application" means an application for a certificate to be issued under this Act.

(e) "Attorney General" means the Attorney General of the United States or his designee.

(f) "Certificate" means a certificate of review issued pursuant to this Act.

(g) "Control" means either: (1) Holding 50 percent or more of the outstanding voting securities of an issuer; or (2) having the contractual power presently to designate a majority of the directors of a corporation, or in the case of an unincorporated entity, a majority of the individuals who exercise similar functions.

(h) "Controlling entity" means an entity which directly or indirectly controls a member or applicant, and is not controlled by any other entity.

(i) "Export trade" means trade or commerce in goods, wares, merchandise, or services that are exported, or are in the course of being exported, from the United States or any territory of the United States to any foreign nation.

(j) "Export trade activities" means activities or agreements in the course of export trade.

(k) "Member" means, with respect to an applicant, a partner, shareholder or participant who is seeking protection under the certificate. This applies to partners in partnerships or joint ventures; shareholders of corporations; or participants in associations, cooperatives, or other forms of profit or nonprofit organizations or combinations, by contract or other arrangement.

(l) "Method of operation" means any method by which a person conducts or proposes to conduct export trade.

(m) "Person" means an individual who is a resident of the United States; a partnership that is created under and exists pursuant to the laws of any State or of the United States; a State or local government entity; a corporation, whether it is organized as a profit or nonprofit corporation, that is created under and exists pursuant to the laws of any State or of the United States; or any association or combination, by contract or other arrangement, between or among such persons.

(n) "Secretary" means the Secretary of the Department of Commerce or his designee.

(o) "Services" means intangible economic output, including, but not limited to—

(i) Business, repair, and amusement services,

(ii) Management, legal, engineering, architectural, and other professional services, and

(iii) "Financial, insurance, transportation, informational and any other data-based services, and communication services.

(p) "United States" means the fifty States of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, American Samoa, Guam, the Commonwealth of the Northern Mariana Islands, and the Trust Territory of the Pacific Islands.

§ 325.3 Applying for a certificate of review.

(a) *Place of filing.* An original and two copies of an application for certification shall be submitted for filing by personal delivery during normal business hours or by first class mail to the Office of Export Trading Company Affairs, International Trade Administration, Department of Commerce, Washington, D.C. 20230. Although not required, the applicant should consider using registered mail or some other delivery method that provides evidence of receipt.

(b) *Contents of application.* Any person may submit an application for certification. The application shall contain, where applicable, the information listed below. Some information, in particular the identification of goods or services that the applicant exports or proposes to export, is requested in a cetain form (Standard Industrial Classification [SIC] numbers) if reasonably available. Where information does not exist in this form, an applicant is not required to create it, and may satisfy the request for

information by providing it in some other convenient form. If an applicant is unable to provide any of the information requested or if the applicant believes that any of the information requested would be burdensome to obtain and unnecessary for a determination on the application, the applicant should state that the information is not being provided or is being provided in lesser detail, and explain why.

(1) Name and principal address of the applicant and of its controlling entity, if any. Include the name, title, address, telephone number and relationship to the applicant of the individual or individuals to whom the Secretary should address correspondence.

(2) The name and principal address of each member, and of each member's controlling entity, if any.

(3) A copy of any legal instrument under which the applicant is organized or will operate. Include copies, as applicable, of its corporate charter, bylaws, partnership, joint venture, membership or other agreements or contracts under which the applicant is organized.

(4) A brief description, preferably in the form of a chart or table, of the organization of the export-related operations of the applicant.

(5) A copy of the applicant's most recent annual report, if any, and that of its controlling entity, if any. To the extent the information is not included in the annual report, or other documents submitted in connection with this application, a brief description of the applicant's operations, including the nature of its business, the types of products or services with which it deals, and the places where it does business.

(6) A copy of each member's most recent annual report, if any, and that of its controlling entity, if any. To the extent the information is not included in the annual report, or other documents submitted in connection with this application, a brief description of each member's operations, including the nature of its business, the types of products or services with which it deals, and the places where it does business.

(7) The names, titles, and responsibilities of the applicant's directors, officers, partners and managing officials, and their business affiliations with other members or other businesses that produce or sell any of the types of goods or services described in paragraph (b)(8) of this section.

(8)(i) A description of the goods or services which the applicant exports or proposes to export under the certificate of review. This description should reflect the industry's customary definitions of products and services.

(ii) If it is reasonably available, an identification of the goods or services according to the Standard Industrial Classification (SIC) number. Goods should normally be identified according to the 7-digit level. Services should normally be identified at the most detailed SIC level available.

(9) For each class of the goods, wares, merchandise or services described in paragraph (b)(8) of this section:

(i) The principal geographic area or areas in the United States in which the applicant and each member sell their goods and services.

(ii) For the previous two calendar years, the dollar value of the applicant's and each member's (A) total domestic sales, if any; and (B) total export sales, if any. Include the value of the sales of any controlling entities and all entities under their control.

(10) For each class of the goods, wares, merchandise or services described in paragraph (b)(8) of this section, the best information or estimate accessible to the applicant of the total value of sales in the United States by all companies for the last two years. Identify the source of the information or the basis of the estimate.

(11) A description of the specific export trade activities and methods of operation which the applicant seeks to have certified. Only the specific activities and methods described in the application will be eligible for certification. Examples of the types of activities that the applicant may want to have certified, and of the degree of specificity that the applicant should provide, include, where applicable:

(i) The types of services which the applicant will provide to or secure for persons engaged in export trade and the manner in which those services will be provided;

(ii) The manner in which prices and quantities of products and services to be exported will be established;

(iii) Any agreements to sell exclusively to or through the applicant or other person, any agreements with foreign persons who may act as joint or exclusive agents, any agreements for pooling tangible or intangible property or resources, and any territorial or price maintenance restrictions that will be imposed or agreed to;

(iv) The nature of any restrictions on membership or membership withdrawal.

(12) If the export trade, export trade activities, or methods of operation for which certification is sought will involve any agreement or any exchange of information with respect to domestic prices, production, sales, or other confidential business information, specify the nature of the agreement or exchange of information.

(13) A statement of whether the applicant intends or reasonably expects that any exported goods or services covered by the proposed certificate will re-enter the United States, either in their original or modified form. If so, identify the goods or services and the manner in which they may re-enter the U.S.

(14) A statement of whether the applicant proposes to export goods or services that are supplied by persons who are not covered by the certificate.

(15) A proposed non-confidential summary of the conduct for which certification is sought for publication in the Federal Register under § 325.5(a) of this part.

(16) A draft proposed certificate for the export conduct which the applicant seeks to have certified.

(17) Any other information that the applicant believes will be necessary or helpful to a determination of whether to issue a certificate under the standards of the Act.

(c) *Conformity with regulations.* No application shall be deemed submitted unless such document is in compliance with these regulations. Applicants are encouraged to seek guidance and assistance from the Department of Commerce in preparing and documenting their applications.

(d) *Review and acceptance.* On the day that an application is received in the Office of Export Trading Company Affairs, the Secretary will stamp the application. From that date, the Secretary will have five working days to determine whether the application is complete, has been properly prepared and can be deemed submitted under this Act. On the date on which the application is deemed submitted, the Secretary will stamp it with that date, and notify the applicant that the application has been accepted for review. If the application is not accepted for review, the Secretary shall advise the applicant that it may refile the application after correcting the deficiencies that the Secretary has specified. If the Secretary does not take action on the application within the five day period, the application shall be deemed submitted as of the sixth day.

(e) *Withdrawal of application.* An applicant may withdraw an application by written request at any time before the Secretary has made his determination under § 325.4 of this part. An applicant who withdraws an application may submit a new application at any time, in accordance with these regulations.

(f) *Supplemental information.* If, after an application has been accepted for review, the Secretary or Attorney General finds that additional information is necessary to make a determination on the application, the Secretary will request in writing such supplemental information from the applicant. If the applicant consents to supply the additional information, the time period for determination on the application will be suspended from the date on which the request is sent until the supplemental information is received and is considered complete. The Secretary shall promptly determine whether the supplemental information is complete, and shall notify the applicant of his determination. If the information is being sought by the Attorney General, the Attorney General must concur in the determination that the supplemental information is complete. If the applicant does not agree to provide the additional information, and the Secretary or Attorney General considers the information in their possession insufficient to make a determination on the application, the applicant may withdraw the application, or the Secretary shall deny it.

§ 325.4 Issuing the certificate.

(a) *Time period.* The Secretary shall issue or decline to issue a certificate to an applicant within 90 days after an application is deemed submitted under this Act pursuant to § 325.3(d) (excluding any time period which has been suspended pursuant to § 325.3(f)). If the Secretary or Attorney General considers it necessary, and the applicant agrees, the Secretary may take up to an additional 30 days before issuing or declining to issue a certificate.

(b) *Determination.* The Secretary shall issue a certificate to the applicant if he determines, and the Attorney General concurs, that the proposed export trade, export trade activities and methods of operation will—

(1) result in neither a substantial lessening of competition or restraint of trade within the United States nor a substantial restraint of the export trade of any competitor of the applicant;

(2) not unreasonably enhance, stabilize, or depress prices within the United States of the class of the goods, wares, merchandise or services exported by the applicant;

(3) not constitute unfair methods of competition against competitors who are engaged in the export of goods, wares, merchandise or services of the class exported by the applicant; and

(4) not include any act that may reasonably be expected to result in the sale for consumption or resale within the United States of the goods, wares, merchandise, or services exported by the applicant.

(c) *Concurrence of the Attorney General.* (1) Within seven days after an application is deemed submitted under this Act pursuant to § 325.3(d), the Secretary shall forward to the Attorney General a copy of the application, any information submitted in connection with the application, and any other relevant information in his possession. The Secretary and the Attorney General shall make available to each other copies of other relevant information that was obtained in connection with the certification review process, unless otherwise prohibited by law.

(2) Immediately upon completion of an initial draft of a certificate, but in no event later than twenty days prior to the expiration of the time period for a determination on the application, the Secretary shall make it available to the Attorney General for discussion and comment. If the Attorney General disagrees with the proposed certificate, he shall, no later than ten days prior to the running of the time period for a determination on the application, so advise the Secretary and state the reasons for the disagreement. The Secretary, with the concurrence of the Attorney General, may modify or revise the proposed certificate to resolve the objections and problems raised by the Attorney General, or deny the application for a certificate.

(3) If, after having received the draft certificate by the date specified in paragraph (c)(2) of this section, the Attorney General does not render advice within the time period specified in the preceding paragraph, he shall be deemed to concur in the proposed certificate.

(d) *Content of certificate.* The certificate shall specify the export trade, export trade activities, methods of operation, and all persons which are protected from liability under the antitrust laws. The Secretary may certify in whole or in part the proposed export trade, export trade activities, and methods of operation contained in the applicant's draft certificate with such changes, modifications, terms or conditions as appropriate. If the Secretary intends to issue a certificate different from the draft certificate submitted by the applicant, the Secretary shall first consult with the applicant.

(e) *Certificate procured by fraud.* A certificate shall be void ab initio with respect to any export trade, export trade activities, or methods of operation for which a certificate was procured by fraud.

(f) *Minimum thirty day period.* The Secretary may not issue a certificate of review earlier than thirty days from the date the notice is published in the **Federal Register** according to § 325.5

§ 325.5 Publishing notices in the Federal Register.

(a) Within ten days after an application is deemed submitted for filing under § 325.3(d), the Secretary shall submit to the **Federal Register** for publication a notice that the application has been submitted. The notice shall include the names of the applicant and each member and a summary of the conduct for which certification is sought. If the Secretary does not intend to publish the summary as proposed by the applicant, he shall notify the applicant.

(b) Within twenty days from the date of publication in the **Federal Register**, interested parties may submit in writing to the Secretary information relevant to his determination of whether to issue a certificate.

(c) If a certificate is issued to an applicant, the Secretary shall publish a summary of the certificate in the **Federal Register**. If an application for a certificate is denied, the Secretary shall publish a notice of denial of the application.

§ 325.6 Amending the certificate.

An application for an amendment shall be treated in the same manner as an original application under these regulations. The application for an amendment to a certificate shall set forth the proposed amendment(s) and the reasons for them. It shall contain any information specified in § 325.3(b) that is relevant to the determination of the application for an amendment. The effective date of an amendment, if it is granted, will be the date on which the application for the amendment is deemed submitted for filing under § 325.3(d).

§ 325.7 Expediting the certification process.

(a) *Request for expedited action.* (1) An applicant may request expedited action on its application if circumstances indicate that the applicant has a special need for a quick decision on his application. The applicant should set forth the facts and circumstances that warrant expedited processing of its application.

(2) The Secretary shall, with the concurrence of the Attorney General, advise the applicant within 10 days after an application is deemed submitted under § 325.3(d) whether it will receive expedited action. The Secretary may grant the request in part and process the

remainder of the application through the normal procedures.

(b) *Time period.* With regard to any application for which the Secretary has granted a request for expedited action, and subject to the minimum time period in § 325.4(f) of this part, the Secretary shall issue or decline to issue a certificate within forty five days after an application is deemed submitted under § 325.3(d) (excluding any time period which has been suspended pursuant to § 325.3(f)) of this part.

(c) *Concurrence of the Attorney General.* (1) Immediately upon completion of an initial draft of a certificate, but in no event later than ten working days prior to the expiration of the time period for a determination on the application, the Secretary shall make it available to the Attorney General for discussion and comment. If the Attorney General disagrees with the proposed certificate, he shall, no later than five working days prior to the running of the time period for a determination on the application, so advise the Secretary and state the reasons for the disagreement. The Secretary, with the concurrence of the Attorney General, may modify or revise the proposed certificate to resolve the objections and problems raised by the Attorney General, or deny the application for a certificate.

(2) If, after having received the draft certificate by the date specified in paragraph (c)(1) of this section, the Attorney General does not render advice within the time period specified, he shall be deemed to concur in the proposed certificate.

§ 325.8 Reconsidering an application that has been denied.

(a) If the Secretary determines to deny a certificate to an applicant, in whole or in part, he shall notify the applicant in writing of his decision and the reasons for his determination.

(b) Within 30 days after receiving a notice of denial the applicant may request the Secretary to reconsider his determination.

(1) The request for reconsideration should include a written statement setting forth the reasons why the applicant believes the decision should be reconsidered, and any additional information that the applicant considers pertinent.

(2) Upon the request of the applicant, the Secretary and the Attorney General will meet informally with the applicant and/or his representative to discuss the applicant's reasons why the determination on the application should be changed.

(c) The Secretary shall consult with the Attorney General with regard to reconsidering an application. The Secretary may modify his original determination only if the Attorney General concurs.

(d) The Secretary shall notify the applicant, in writing, of his final determination after reconsideration and of his reasons for this determination within thirty days after the request for reconsideration has been received.

§ 325.9 Modifying or revoking a certificate.

(a) *Action subject to modification or revocation.* A person holding a certificate whose export trade, export trade activities or methods of operation no longer comply with the requirements set forth in § 325.4(b) of this part, or who fails to comply with a request for information under paragraph (b) of this section, may be subject to any of the following actions:

(1) Revocation of certificate. A certificate may be revoked, in whole or in part.

(2) Modification of certificate. A certificate may be modified by the Secretary in such a manner and upon such terms and conditions as necessary.

(b) *Request for information.* If the Secretary or the Attorney General has reason to believe that the export trade, export trade activities, or methods of operation of a person holding a certificate no longer comply with the requirements set forth in § 325.4(b), the Secretary shall request any information that he or the Attorney General consider to be necessary to resolve the matter.

(c) *Proceedings for the revocation or modification of a certificate.*

(1) *Notification letter.* If, after reviewing any relevant information in their possession, the Secretary or the Attorney General believe that the export trade, export trade activities, or methods of operation of a person holding a certificate no longer comply with the requirements set forth in § 325.4(b) of this part, or that the failure to comply with the request for information under paragraph (b) of this section should result in the revocation or modification of the certificate, the Secretary shall notify the holder of a certificate in writing of his intent to revoke or modify the certificate. The notification shall be sent by registered or certified mail to the address specified in the certificate. The notification shall include a detailed statement setting forth the facts, conduct or circumstances which may warrant the revocation or modification of the certificate.

(2) *Answer.* The certificate holder shall respond to the notification letter within 30 days after receiving it, unless the Secretary, in his discretion, grants an additional 30 days extension for good cause shown. The certificate holder shall respond specifically to the statement included with the notification letter and state in detail why the facts, conduct or circumstances described in the notification letter are not true, or if they are true, why they do not warrant the revoking or modifying of the certificate. If the certificate holder does not respond within the specified period, it will be considered an admission of the allegations contained in the notification letter.

(3) *Resolution of factual disputes.* Where material facts are in dispute, the Secretary and the Attorney General shall, upon request, meet informally with the certificate holder. The Secretary or Attorney General may require the certificate holder to provide any documents or information that are necessary to support its contentions. After reviewing the statements of the certificate holder and the documents or information that the certificate holder has submitted, and upon considering other relevant documents or information in his possession, the Secretary shall make a proposed determination of the factual matters in dispute. The Attorney General is not bound by the proposed determination.

(4) *Final determination.* The Secretary and Attorney General shall review the notification letter and the certificate holder's answer to it, the proposed factual determination made under paragraph (c)(3) of this section, and any other relevant documents or information in their possession. If, after his review, the Secretary or Attorney General determines that the export trade, export trade activities, or methods of operation no longer comply with the standards set forth in § 325.4(b) of this part, the Secretary shall revoke or modify the certificate as appropriate. If the Secretary or Attorney General determines that the certificate holder has failed to comply with the request for information under paragraph (b) of this section, and that the failure to comply should result in revocation or modification, the Secretary shall revoke or modify the certificate as appropriate. The decision will be final and will be issued to the certificate holder in writing. The decision shall include a statement of the circumstances underlying, and the reasons in support of the determination. It the Secretary determines to revoke or modify the certificate, the decision shall specify the effective date for the revocation or modification; this date must be at least thirty days but not more than ninety

days after the Secretary gives notice of his determination. The Secretary shall publish notice of his final action in the Federal Register.

(d) *Investigative information.* In proceedings under this section, the Attorney General shall make available to the Secretary any information that has been obtained in response to Civil Investigative Demands issued under section 304(b)(3) of this Act. The Attorney General and the Secretary shall also make available to each other any other information which each is relying upon under these proceedings, unless such disclosure is prohibited by law.

§ 325.10 Judicial review.

(a) *Review of certain determinations.* (1) Any person aggrieved by final orders of the Secretary under §§ 325.4, 325.6, 325.8, and 325.9 of these regulations may, within thirty days of the determination, bring an action in an appropriate district court of the United States to set aside the determination on the grounds that it is erroneous.

(2) (i) For purposes of this section, an order is final under §§ 325.4 and 325.6 of this part, when notice is published in the Federal Register of the final determination, (A) to grant, in whole or in part, the application or request for amendment; or (B) to deny, in whole or in part, the application or request for amendment, unless the applicant requests reconsideration of the determination within 30 days under § 325.8 of this part. I if the applicant requests reconsideration, the final determination after reconsideration is final when notice is published in the Federal Register.

(ii) For purposes of this section, an order is final under §325.9 of this part, when notice is published in the Federal Register of a final determination under §325. 9(c)(4) of this part.

(b) *Record for judicial review.* For purposes of this section, the record, unless otherwise stipulated by the parties, shall consist of:

(1) With regard to the determination to grant or deny an application for a certificate, a copy of all information presented to or obtained by the Secretay which had a bearing on the determination;

(2) With regard to revoking or modifying a certificate, all information relating to the preparation of the notification letter and all information which had a bearing on the final determination;

(3) A copy of the determination and the supporting statement.

(c) *Limitation on judicial review.* Except as provided in paragraph (a) of this section, no agency action taken under this Act shall be subject to judicial review.

§ 325.11 Returning the applicant's documents.

(a) Upon the denial or withdrawal of an application for a certificate in its entirety, the applicant may request the return of all documents and all copies of the documents available to the Department of Commerce or the Department of Justice. The applicant shall submit this request to both the Secretary and the Attorney General.

(b) The Secretary and the Attorney General shall return the documents to the applicant within thirty days after they receive the applicant's request.

§ 325.12 Nonadmissibility in evidence.

The denial of an application for a certificate, in whole or in part, or for an amendment to a certificate, and the revocation or modification of a certificate, and any statement of reasons in support thereof shall not be admissible in evidence in any administrative or judicial proceeding in support of any claim under the antitrust laws.

§ 325.13 Submitting reports.

On the anniversary date of each year after a certificate is issued, a certificate holder shall submit a report to the Secretary. This report shall contain any changes relevant to the matters specified in the certificate, an update of the information contained in the application, and any other information the Secretary considers appropriate, after consultation with the Attorney General.

§ 325.14 Protecting confidentiality of information.

(a) Any information that is submitted by any person under this Act is exempt from disclosure under the Freedom of Information Act, (5 U.S.C. 552).

(b)(1) Except as authorized under paragraph (b)(3) of this section, no officer or employee of the United States shall disclose commercial or financial information submitted under this Act if the information is privileged or confidential, and if disclosing the information would cause harm to the person who submitted it.

(2) A person submitting information shall designate the documents or information which it considers privileged or confidential and the disclosure of which would cause harm to the person submitting it. The Secretary shall endeavor to notify these persons of any requests or demands before disclosing any of this information.

(3) An officer or employee of the United States may disclose information covered under paragraph (b)(1) of this section, only under the following circumstances—

(i) Upon a request made by either House of Congress or a Committee of the Congress,

(ii) In a judicial or administrative proceeding subject to issuance of an appropriate protective order,

(iii) With the written consent of the person who submitted the information,

(iv) When the Secretary considers disclosure of the information to be necessary for determining whether or not to issue, amend, or revoke a certificate, if—

(A) The Secretary determines that a non-confidential summary of the information is inadequate; and

(B) The person who submitted the information is informed of the intent to disclose the information, and has an opportunity to advise the Secretary of the potential harm which disclosure may cause,

(v) In accordance with any requirement imposed by a statute of the United States.

(C) In any judicial or administrative proceeding in which disclosure is sought from the Secretary or Attorney General of any confidential or privileged documents or information submitted under this Act, the Secretary or Attorney General shall attempt to notify the party who submitted the information of the request or demand for disclosure. In appropriate circumstances the Secretary or Attorney General may seek or support an appropriate protective order on behalf of the party who submitted the documents or information.

[The Department has requested approval of the information collection requirements contained in these regulations by the Office of Management and Budget under the provisions of the Paperwork Reduction Act of 1980 (Pub. L. 96–511).]

Dated: March 8, 1983.

Malcolm Baldridge,

Secretary of Commerce.

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The following agencies have agreed to publish all documents on two assigned days of the week (Monday/Thursday or Tuesday/Friday). This is a voluntary program. (See OFR NOTICE 41 FR 32914, August 6, 1976.) Documents normally scheduled for publication on a day that will be a Federal holiday will be published the next work day following the holiday.

Monday	Tuesday	Wednesday	Thursday	Friday
DOT/SECRETARY	USDA/ASCS		DOT/SECRETARY	USDA/ASCS
DOT/COAST GUARD	USDA/FNS		DOT/COAST GUARD	USDA/FNS
DOT/FAA	USDA/REA		DOT/FAA	USDA/REA
DOT/FHWA	USDA/SCS		DOT/FHWA	USDA/SCS
DOT/FRA	MSPB/OPM		DOT/FRA	MSPB/OPM
DOT/MA	LABOR		DOT/MA	LABOR
DOT/NHTSA	HHS/FDA		DOT/NHTSA	HHS/FDA
DOT/RSPA			DOT/RSPA	
DOT/SLSDC			DOT/SLSDC	
DOT/UMTA			DOT/UMTA	

List of Public Laws

Last Listing February 22, 1983.

This is a continuing list of public bills from the current session of Congress which have become Federal laws. The text of laws is not published in the **Federal Register** but may be ordered in individual pamphlet form (referred to as "slip laws") from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402 (telephone 202–275–3030).

S.J. Res. 37 / Pub. L. 98–3. Providing that the week containing March 8, 1983, shall be designated as "Women's History Week". (Mar. 8, 1983; 97 Stat. 6) Price: $1.75

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers, free of postage, for $300.00 per year, or $150.00 for six months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

Title 3—

The President

Proclamation 5030 of March 10, 1983

Exclusive Economic Zone of the United States of America

By the President of the United States of America

A Proclamation

WHEREAS the Government of the United States of America desires to facilitate the wise development and use of the oceans consistent with international law;

WHEREAS international law recognizes that, in a zone beyond its territory and adjacent to its territorial sea, known as the Exclusive Economic Zone, a coastal State may assert certain sovereign rights over natural resources and related jurisdiction; and

WHEREAS the establishment of an Exclusive Economic Zone by the United States will advance the development of ocean resources and promote the protection of the marine environment, while not affecting other lawful uses of the zone, including the freedoms of navigation and overflight, by other States;

NOW, THEREFORE, I, RONALD REAGAN, by the authority vested in me as President by the Constitution and laws of the United States of America, do hereby proclaim the sovereign rights and jurisdiction of the United States of America and confirm also the rights and freedoms of all States within an Exclusive Economic Zone, as described herein.

The Exclusive Economic Zone of the United States is a zone contiguous to the territorial sea, including zones contiguous to the territorial sea of the United States, the Commonwealth of Puerto Rico, the Commonwealth of the Northern Mariana Islands (to the extent consistent with the Covenant and the United Nations Trusteeship Agreement), and United States overseas territories and possessions. The Exclusive Economic Zone extends to a distance 200 nautical miles from the baseline from which the breadth of the territorial sea is measured. In cases where the maritime boundary with a neighboring State remains to be determined, the boundary of the Exclusive Economic Zone shall be determined by the United States and other State concerned in accordance with equitable principles.

Within the Exclusive Economic Zone, the United States has, to the extent permitted by international law, (a) sovereign rights for the purpose of exploring, exploiting, conserving and managing natural resources, both living and non-living, of the seabed and subsoil and the superjacent waters and with regard to other activities for the economic exploitation and exploration of the zone, such as the production of energy from the water, currents and winds; and (b) jurisdiction with regard to the establishment and use of artificial islands, and installations and structures having economic purposes, and the protection and preservation of the marine environment.

This Proclamation does not change existing United States policies concerning the continental shelf, marine mammals and fisheries, including highly migratory species of tuna which are not subject to United States jurisdiction and require international agreements for effective management.

The United States will exercise these sovereign rights and jurisdiction in accordance with the rules of international law.

Without prejudice to the sovereign rights and jurisdiction of the United States, the Exclusive Economic Zone remains an area beyond the territory and territorial sea of the United States in which all States enjoy the high seas freedoms of navigation, overflight, the laying of submarine cables and pipelines, and other internationally lawful uses of the sea.

IN WITNESS WHEREOF, I have hereunto set my hand this tenth day of March, in the year of our Lord nineteen hundred and eighty-three, and of the Independence of the United States of America the two hundred and seventh.

Ronald Reagan

Rules and Regulations

Federal Register
Vol. 48, No. 50
Monday, March 14, 1983

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 58

Grading and Inspection, General Specifications for Approved Plants and Standards for Grades of Dairy Products

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This document revises the United States Standards for Grades of Dry Whole Milk. The revision removes the premium grade category and updates the quality criteria so that the standards accurately define the levels of quality of dry whole milk manufactured. This revision has been developed in cooperation with the American Dry Milk Institute.

EFFECTIVE DATE: May 13, 1983.

FOR FURTHER INFORMATION CONTACT: Richard W. Webber, Head, Standardization Section, Dairy Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, DC 20250, (202) 447-7473.

SUPPLEMENTARY INFORMATION: This final rule has been reviewed under USDA guidelines implementing Executive Order 12291 and Secretary's Memorandum 1512-1 and has been classified a "non-major" rule under criteria contained therein.

William T. Manley, Deputy Administrator, Agricultural Marketing Service, has certified that the revision will not have a significant economic impact on a substantial number of small entities as defined in the Regulatory Flexibility Act, Pub. L. 96-354 (5 U.S.C. 601-612), because it is a voluntary grade standard and the revision will not increase the cost to those utilizing the standard.

In accordance with the United States Department of Agriculture policies for regulatory review, the Dairy Division's Standardization Section initiated a review of the U.S. Standards for Grades of Dry Whole Milk. A prior review had been started but had to be abandoned due to other program requirements. This current review commenced on October 24, 1980.

The review was organized to obtain both current and historical information to support the criteria of the standard as written, or to support any changes necessary for modernization of the standard that might become apparent from the review. It was the intent of the review to obtain as much information as possible from as many varied sources and interested parties as possible.

The review consisted of several phases. First, a computer search of the National Agricultural Library (NAL) resources pertaining to dry whole milk was conducted. From this search, a number of articles and texts were selected having a direct bearing on the standard review. Next, the dry milk industry was contacted for input via the American Dry Milk Institute. Also contacted were other interested parties who may use the product and, therefore, would have an interest in its quality criteria.

Dry Whole Milk (DWM) production for 1981 was 92.1 million pounds, approximately 7.0 percent of the production of nonfat dry milk (NDM) for the same period. However, unlike nonfat dry milk, the production and commercial sales of DWM are well balanced. For 1981 the commercial sales for DWM were 93.1 million pounds. This represents an 11 percent increase in production and a 29 percent increase in sales over year earlier figures. It is apparent that the DWM segment of the industry is viable and growing.

Traditionally, DWM has not been utilized as a beverage product in the United States. Many experiments and research projects have been conducted toward this objective, but the ready availability of fresh fluid milk and the excellent quality of NDM have not resulted in any consumer demand for DWM in this use. The primary use of DWM is as an ingredient in a variety of other foods such as ice cream, soups, candies and bakery products. A limited quantity of DWM is produced for export as a beverage commodity.

The United States Standards for Dry Whole Milk currently in effect were established in December 1970. During the ensuing years, a number of technological advances have been accomplished within the dairy industry, new market trends and preferences have emerged, and improved milk quality has gained increased significance.

The DWM industry through its trade association, the American Dry Milk Institute, has worked closely with USDA on the preparation of this revision and supports the changes. This revision includes the following changes.

(a) The premium grade criteria and designation are eliminated. Premium grade was originally established as a quality level for DWM used as a beverage. DWM used as a beverage is not a normal item of commerce for the dairy industry.

(b) The Explanation of Terms section is expanded to provide clear definitions of the terminology used in the document and to be consistent with the format of other U.S. grade standards for dairy products.

(c) The reporting method for moisture content is changed to be consistent with the Food and Drug Administration (FDA) standard of identity for dry whole milk. This is not a substantive change in the allowable amount of moisture permitted by the standard.

(d) The solubility index criteria are increased for each grade level to be consistent with commercially produced DWM. This was requested by the American Dry Milk Institute.

(e) The oxygen content is eliminated as a grade criterion and its determination had been made optional. Determination of oxygen content is particularly important when DWM is used as a beverage. However, with the elimination of the premium grade criteria and designation, oxygen content as a grade criterion for the remaining grade designations is no longer appropriate.

USDA grade standards are voluntary standards that are developed to assist the orderly marketing process. Dairy plants are free to choose whether or not to use the grade standards. USDA grade standards for dairy products have been developed to identify the degrees of quality in the various products. Quality in general refers to the usefulness,

desirability, and value of a product—its marketability—but the precise definition of quality depends on the individual commodity. When dry whole milk is graded, the regulations governing the grading services of manufactured or processed dairy products, which require all graded dairy products to be produced in a USDA approved plant, would be in effect. These regulations also require a charge for grading services provided by USDA.

Public Comments

On November 16, 1982, the Department published a proposed rule to revise the United States Standards for Grades of Dry Whole Milk (47 FR 51581–51583).

The public comment period closed on January 17, 1983, with three parties submitting comments. The specific comments are as follows:

1. One respondent made four editorial change suggestions to improve consistency, to correct typographical errors and to improve readability for the users of the standards. All four suggested changes were accepted.

2. Two respondents requested the proposed revision be written to include dry whole milk produced from goat's milk. The Food and Drug Administration Standards of Identity for Dry Whole Milk (21 CFR 131.147) and Milk (21 CFR 131.110) do not include goat's milk. The Department, therefore, maintains that inclusion of goat's milk in the revision is not appropriate because the voluntary grade standard is based on a legally defined product.

3. One respondent requested the maximum butterfat criterion be removed to permit the higher butterfat found in goat's milk. Since the inclusion of goat's milk in the standards has been determined to be inappropriate, alteration of the butterfat criterion would also be inappropriate.

List of Subjects in 7 CFR Part 58

Food grades and standards, Dairy products.

PART 58—[AMENDED]

In consideration of the foregoing, 7 CFR Part 58 is amended by revising §§ 58.2701 through 58.2708 and the heading for Subpart S and by adding new §§ 58.2709 and 58.2710 to read as follows:

Subpart S—United States Standards for Grades of Dry Whole Milk

Definitions

Sec.
58.2701 Dry whole milk.
58.2702 Milk.

U.S. Grades

Sec.
58.2703 Nomenclature of U.S. grades.
58.2704 Basis for determination of U.S. grades.
58.2705 Specifications for U.S. grades.
58.2706 Basis for oxygen content determination.
58.2707 Optional tests.
58.2708 U.S. grade not assignable.
58.2709 Test methods.

Explanation of Terms

58.2710 Explanation of Terms.

Subpart S—United States Standards for Grades of Dry Whole Milk [1]

Definitions

§ 58.2701 Dry whole milk.

"Dry whole milk" made by the Spray process or Roller process is the product obtained by removal of water only from pasteurized milk which may have been homogenized. Alternatively, dry whole milk may be obtained by blending fluid, condensed, or dried nonfat milk with liquid or dried cream or with fluid, condensed, or dried milk, as appropriate, provided the resulting dry whole milk is equivalent in composition to that obtained by drying. It contains the lactose, milk proteins, milkfat, and milk minerals in the same relative proportions as the milk from which it was made. It may be optionally fortified with either Vitamins A or D or both.

§ 58.2702 Milk.

The term "Milk", when used in this part, means milk produced by healthy cows and pasteurized at a temperature of 161° F. for 15 seconds or its equivalent in bacterial destruction before or during the manufacture of dry whole milk.

U.S. Grades

§ 58.2703 Nomenclature of U.S. grades.

The nomenclature of U.S. grades is as follows:

(a) U.S. Extra grade.
(b) U.S. Standard grade.

§ 58.2704 Basis for determination of U.S. grades.

The U.S. grades of dry whole milk are determined on the basis of flavor, physical appearance, bacterial estimate, coliform estimate, direct microscopic count, milkfat content, moisture content, scorched particle content, and solubility index.

§ 58.2705 Specifications for U.S. grades.

(a) *U.S. Extra grade.* U.S. Extra grade dry whole milk shall conform to the following requirements (See tables I, II, and III):

(1) *Flavor.* (applies to the reconstituted product). Shall be sweet, pleasing and desirable. It may possess a slight feed flavor; and a definite cooked flavor. It shall be free from undesirable flavors.

(2) *Physical appearance.* Shall be white or light cream color, free from lumps that do not break up under slight pressure, and practically free from visible dark particles. The reconstituted product shall be free from graininess.

(3) *Bacterial estimate.* Not more than 50,000 per gram standard plate count.

(4) *Coliform estimate.* Not more than 10 per gram.

(5) *Milkfat content.* Not less than 26.0%, but less than 40.0%.

(6) *Moisture content.* Not more than 4.5% (as determined by weight of moisture on a milk solids not fat basis).

(7) *Scorched particle content.* Not more than 15.0 mg. for spray process, and 22.5 mg. for roller process.

(8) *Solubility index.* Not more than 1.0 ml. for spray process , and 15.0 ml. for roller process.

(b) *U.S. Standard grade.* U.S. Standard grade dry whole milk shall conform to the following requirements (See tables I, II, and III):

(1) *Flavor.* (applies to the reconstituted product) Shall be sweet and should have a pleasing flavor. It may possess the following flavors to a slight degree: bitter, oxidized, scorched, stale, and storage; and to a definite degree: feed and cooked. It shall be free from undesirable flavors.

(2) *Physical appearance.* Should be white or light cream color, but may possess a slight unnatural color; and shall be free from lumps that do not break up under moderate pressure; and reasonably free from visible dark particles. The reconstituted product shall be reasonably free from graininess.

(3) *Bacterial estimate.* Not more than 100,000 per gram standard plate count.

(4) *Coliform estimate.* Not more than 10 per gram.

(5) *Milkfat content.* Not less than 26.0%, but less than 40.0%.

(6) *Moisture content.* Not more than 5.0% (as determined by weight of moisture on a milk solids not fat basis).

(7) *Scorched particle content.* Not more than 22.5 mg. for spray process and 32.5 mg. for roller process.

(8) *Solubility index.* Not more than 1.5 ml. spray process, and 15.0 ml. for roller process.

§ 58.2706 Basis for oxygen content determination.

Oxygen content (if gas packed) is not a U.S. grade requirement. Percentage of oxygen content will be made available

[1] Compliance with these standards does not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act.

only on a U.S. graded product and the results will be shown on the grading certificate as follows:

Oxygen Content

Not more than 2% Oxygen or,
Not more than 3% Oxygen or,
Oxygen content ——%

TABLE I.—CLASSIFICATION OF FLAVOR

Identification of flavor characteristics	U.S. extra grade	U.S. standard grade
Cooked	Definite	Definite.
Feed	Slight	Definite.
Bitter		Slight.
Oxidized		Slight.
Scorched		Slight.
Stale		Slight.
Storage		Slight.

TABLE II.—CLASSIFICATION OF PHYSICAL APPEARANCE

Identification of physical appearance characteristics	U.S. extra grade	U.S. standard grade
Dry product:		
Unnatural color	None	Slight.
Lumps	Slight pressure	Moderate pressure.
Visible dark particles.	Practically free	Reasonably free.
Reconstituted product:		
Grainy	Free	Reasonably free.

TABLE III.—CLASSIFICATION ACCORDING TO LABORATORY ANALYSIS

Laboratory tests	U.S. extra grade	U.S. standard grade
Bacterial estimate, SPC/gram.	50,000	100,000.
Coliform estimate/gram.	10	10.
Milkfat content, percent.	Not less than 26.0, but less than 40.0.	Not less than 26.0, but less than 40.0.
Moisture content, percent [1].	4.5	5.0
Scorched particle content, mg:		
Spray proc.	15.0	22.5.
Roller proc.	22.5	22.5.
Solubility index, ml:		
Spray proc.	1.0	1.5.
Roller proc.	15.0	15.0.

[1] Milk solids not fat basis.

§ 58.2707 Optional tests.

There are certain optional test requirements in addition to those specified in section 58.2705. Testing for these requirements may be done occasionally at the option of the Department and will be done whenever they are requested by an interested party.

These optional requirements are as follows:

(a) *Copper content.* Not more than 1.5 p.p.m.

(b) *Iron content.* Not more than 10 p.p.m.

(c) *Titratable acidity.* Not more than 0–15 percent.

(d) *Vitamin addition.* When either or both Vitamin A or D is added, they shall be present in such quantity that, when prepared according to label directions, each quart of the reconstituted product shall contain:

Vitamin A. Not less than 2,000 I.U.
Vitamin D. 400 I.U.

§ 58.2708 U.S. grades not assignable.

Dry whole milk shall not be assigned a U.S. grade for one or more of the following reasons:

(a) Fails to meet the requirements for U.S. Standard grade.

(b) Has a direct microscopic clump count exceeding 100 million per gram.

(c) Fails to meet the requirements for any optional tests as specified in section 58.2707, when such tests have been performed.

(d) Produced in a plant found on inspection to be using unsatisfactory manufacturing practices, equipment, or facilities, or to be operating under unsanitary plant conditions.

(e) Produced in a plant which is not USDA approved.

§ 58.2709 Test methods.

All required tests, and optional tests when specified, shall be performed in accordance with "Methods of Laboratory Analysis", DA Instruction No. 918–103 (dry milk products series), Dairy Grading Branch, AMS, U.S. Department of Agriculture, Washington, DC 20250; and "Official Methods of Analysis of the Association of Official Analytical Chemists", 13th Ed. or latest revision.

Explanation of Terms

§ 58.2710 Explanation of terms.

(a) *With respect to flavor:*

(1) *Slight.* An attribute which is barely identifiable and present only to a small degree.

(2) *Definite.* An attribute which is readily indentifiable and present to a substantial degree.

(3) *Undesirable.* Those flavors in excess of the intensity permitted or those not otherwise listed.

(4) *Bitter.* Similar to taste of quinine and produces a puckery sensation.

(5) *Cooked.* Similar to a custard flavor and imparts a smooth aftertaste.

(6) *Feed.* Feed flavors (such as alfalfa, sweet-clover, silage, or similar feed) in milk carried through into the dry whole milk.

(7) *Oxidized.* A flavor resembling cardboard and sometimes referred to as "cappy" or "tallowy".

(8) *Scorched.* A more intensified flavor than "cooked" and imparts a burnt aftertaste.

(9) *Stale, Storage.* Lacking in freshness and imparting a "rough" or "harsh" aftertaste.

(10) *Sweet.* The lack of detectable acidity.

(b) *With respect to physical appearance:*

(1) *Practically free.* Is barely identifiable upon examination and present to a very small degree.

(2) *Reasonably free.* Is easily identifiable upon examination and present to a small degree.

(3) *Slight pressure.* Lumps fall apart with only light touch.

(4) *Moderate pressure.* Only sufficient pressure to disintegrate the lumps readily.

(5) *Grainy.* Minute particles of undissolved powder appearing in a thin film on the surface of a glass or tumbler.

(6) *Unnatural color.* A color that is more intense than light cream and/or is brownish, dull or grey-like.

(7) *Lumps.* Loss of powdery consistency but not caked into hard chunks.

(8) *Visible dark particles.* The presence of scorched or discolored specks readily visible to the eye.

(Agricultural Marketing Act of 1946, Sec. 203, 205, 60 Stat. 1087, as amended, 1090, as amended; 7 U.S.C. 1622, 1624)

Effective Date: May 13, 1983.

Done at Washington, D.C. on March 8, 1983.

Eddie F. Kimbrell,

Deputy Administrator, Commodity Services.

BILLING CODE 3410-02-M

---

7 CFR Part 907

[Navel Orange Reg. 560, Amdt. 1]

Navel Oranges Grown in Arizona and Designated Part of California; Minimum Size Regulation

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This regulation continues through July 28, 1983, the current minimum diameter requirement of 2.32 inches for fresh shipments of navel oranges produced in Arizona and designated part of California. Such action is necessary to promote orderly marketing of suitable sizes of fresh

navel oranges in the interest of producers and consumers.

EFFECTIVE DATE: March 25, 1983.

FOR FURTHER INFORMATION CONTACT: William J. Doyle, Chief, Fruit Branch, F&V, AMS, USDA, Washington, D.C. 20250, telephone 202-447-5975.

SUPPLEMENTARY INFORMATION: This rule has been reviewed under USDA procedures and Executive Order 12291 and has been designated a "non major" rule. William T. Manley, Deputy Administrator, Agricultural Marketing Service, has certified that this action will not have a significant economic impact on a substantial number of small entities. This action is designed to promote orderly marketing of the California-Arizona navel orange crop for the benefit of producers and will not substantially affect costs for the directly regulated handlers.

An interim rule was published in the **Federal Register** (48 FR 2728) on January 21, 1983, which specified the minimum size requirement applicable to fresh domestic shipments of California-Arizona navel oranges. That rule provided an opportunity to submit comments through February 22, 1983. No comments were received.This final rule contains the same requirements as specified in the interim rule. The rule is effective for the period March 25, 1983 through July 28, 1983.

This regulation is issued under the marketing agreement and Order No. 907 (7 CFR Part 907), regulating the handling of navel oranges grown in Arizona and designated part of California. The agreement and order are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674). The action is based upon a recommendation and information submitted by the Navel Orange Administrative Committee and upon other available information. It is hereby found that this action will tend to effectuate the declared policy of the Act.

The 1982-83 season crop of navels is currently estimated at 81,900 carlots, compared to 55,800 carlots during the past season. The committee reports that demand in regulated fresh channels is expected to require about 56 percent of this volume. The remaining 44 percent would be available for utilization in export and processing outlets. The committee indicates that volume and size composition of the crop of navels are such that more than ample supplies of the more desirable larger sizes will be available to satisfy the demand in regulated channels. The committee also reports that when more than ample supplies of larger sizes are available for shipment, disposition of the sizes which would be eliminated by this regulation can be accomplished only at a substantial price discount and this tends to depress the market for all sizes. Navel oranges failing to meet such requirements could be shipped to fresh export markets, left on trees to attain further growth, or utilized in processing. In those circumstances, elimination of sizes smaller than those specified is appropriate in the interest of producers and consumers.

It is further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking, and postpone the effective date until 30 days after publication in the **Federal Register** (5 U.S.C. 553), and good cause exists for making these regulatory provisions effective as specified in that (1) an interim rule was published in the **Federal Register** (48 FR 2728) and no comments were received during the period provided; (2) the requirements of this final rule are the same as those currently in effect; (3) navel orange handlers have been apprised of these requirements and the effective date; (4) and these requirements will not require any additional preparation by handlers which cannot be completed by the effective date hereof.

List of Subjects in 7 CFR Part 907

Marketing agreements and orders, California, Arizona, Oranges (Navel).

PART 907—[AMENDED]

Therefore, § 907.860 (Navel Orange Regulation 560, 48 FR 2728) is amended to read as follows (as so amended, § 907.860 expires July 28, 1983, and will not be published in the annual Code of Federal Regulations):

§ 907.860 Navel Orange Regulation 560.

(a) During the period March 25, 1983, through July 28, 1983, no handler shall handle any navel oranges grown in the production area which are of a size smaller than 2.32 inches in diameter: *Provided,* That not to exceed 5 percent, by count, of the oranges in any container may measure smaller than 2.32 inches in diameter.

(b) As used in this section, "handler", "handle" and "production area" mean the same as defined in the marketing order. Diameter shall mean the largest measurement at a right angle to a straight line running from the stem to the blossom end of the fruit.

(Secs. 1-19, 48 Stat. 31, as amended; 7 U.S.C. 601-674)

Dated: March 9, 1983.

7 CFR Part 1065

[Milk Order No. 65]

Milk in the Nebraska-Western Iowa Marketing Area; Order Suspending Certain Provisions of the Order

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Suspension of rules.

SUMMARY: This action suspends for the months of March through August 1983 certain provisions affecting the regulatory status of milk plants under the Nebraska-Western Iowa milk order. The action was requested by a cooperative association that operates supply plants under the order and which is the principal supplier of milk to other handlers in the market. The action makes inoperative the provisions that a cooperative must deliver at least 51 percent of its member producer milk to pool distributing plants each month to qualify its supply plants as pool plants under the order. The action is needed to avoid inefficient handling and transportation of the milk and to assure that dairy farmers who have regularly been associated with the market will continue to share in the market's fluid milk sales.

EFFECTIVE DATE: March 14, 1983.

FOR FURTHER INFORMATION CONTACT: Richard A. Glandt, Marketing Specialist, Dairy Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250, (202) 447-4829.

SUPPLEMENTARY INFORMATION: Prior document in this proceeding:

Notice of Proposed Suspension: Issued February 16, 1983; published February 22, 1983 (48 FR 7463).

It has been determined that this suspension is not a major action under the criteria set forth in Executive Order 12291.

It also has been determined that the need for suspending certain provisions of the order on an emergency basis precludes following certain review procedures set forth in Executive Order 12291. Such procedures would require that this document be submitted for review to the Office of Management and Budget at least 10 days prior to its publication in the **Federal Register.** However, this would not permit the

completion of the required suspension procedures in time to include March 1983 in the suspension period. The initial request for this action was received February 1, 1983. A notice of proposed suspension was issued on February 16, 1983, inviting interested parties to comment on the proposed action by March 1, 1983.

William T. Manley, Deputy Administrator, Agricultural Marketing Service, has certified that this action will not have a significant economic impact on a substantial number of small entities. Such action lessens the regulatory impact of the order on certain milk handlers and tends to ensure that dairy farmers will continume to have their milk priced under the order and thereby receive the benefits that accrue from such pricing.

This order of suspension is issued pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 *et seq.*), and of the order regulating the handling of milk in the Nebraska-Western Iowa marketing area.

Notice of proposed rulemaking was published in the **Federal Register** (48 FR 7463) concerning a proposed suspension of certain provisions of the order. Interested persons were afforded an opportunity to file written data, views, and arguments thereon. None were filed in opposition.

After consideration of all relevant material, including the proposal in the notice, the comments received, and other available information, it is hereby found and determined that for the months of March through August 1983 the following provisions of the order do not tend to effectuate the declared policy of the Act:

In § 1065.7(c), the words "51 percent or more of the".

Statement of Consideration

This action makes inoperative for March through August 1983 the provisions that a cooperative must deliver at least 51 percent of its member producer milk to pool distributing plants each month to qualify its supply plants as pool plants under the order. The suspension was requested by Mid-America Dairymen, Inc. (Mid-Am), a cooperative association that operates supply plants under the order and which is the principal supplier of milk to other handlers in the market.

Mid-Am experienced considerable difficulty in meeting the 51 percent delivery requirement during 1982. The requirement was suspended for July and August of last year in recognition of the cooperative's problem. In certain other months during 1982, the cooperative did not pool the milk of certain dairy farmers or shifted some producers to other markets in order to maintain pool status for its supply plants.

Mid-Am's deliveries to handlers under the order during December 1982 were about 6 percent below its deliveries in the same month a year earlier. Moreover, the normal seasonal increase in milk production most likely will begin earlier this year because of the mild winter. Thus, it is expected that the cooperative's supply-demand situation will not improve significantly until schools reopen in the fall. Accordingly, the delivery requirement should be suspended for March through August 1983.

Unless the suspension is granted, pool status for all of the producer milk regularly associated with Mid-Am's supply plants could be maintained during March through August of this year only by shifting the milk of some producers to other markets or by not pooling the milk of certain dairy farmers. Either of these actions by the cooperative would be disruptive to producers who have been regularly associated with the cooperative's supply plants and the fluid needs of the market.

This suspension action will avoid the development of such uneconomic and disorderly marketing conditions. It will facilitate the handling of milk supplies that are excess to the market's fluid milk needs and will result in considerable savings in plant handling and hauling costs.

It is hereby found and determined that thirty days' notice of the effective date hereof is impractical, unecessary and contrary to the public interest in that:

(a) This suspension is necessary to reflect current marketing conditions and to assure the orderly marketing of milk in the marketing area. Without this action the milk of dairy farmers currently associated with the cooperative's supply plants would not continue to have all of their milk priced under the order and thereby receive the benefits that accrue from such pricing.

(b) This suspension does not require of persons affected substantial or extensive preparation prior to the effective date; and

(c) Notice of proposed rulemaking was given interested parties and they were afforded an opportunity to file written data, views or arguments concerning this suspension. No views opposing this suspension were received.

Therefore, good cause exists for making this order effective upon publication in the **Federal Register**.

List of Subjects in 7 CFR Part 1065

Milk marketing orders, Milk, Dairy products.

It is therefore ordered, That the aforesaid provisions in § 1065.7(c) of the order are hereby suspended for March through August 1983.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Effective date: March 14, 1983.

Signed at Washington, D.C., on March 8, 1983.

C. W. McMillan,

Assistant Secretary, Marketing and Inspection Services.

BILLING CODE 3410-02-M

DEPARTMENT OF JUSTICE

Immigration and Naturalization Service

8 CFR Part 238

Contracts With Transportation Lines; Northeastern International Airways, Inc.

AGENCY: Immigration and Naturalization Service, Justice.

ACTION: Final rule.

SUMMARY: This rule adds Northeastern International Airways, Inc. to the listing of carriers which have entered into agreements with the Service for the preinspection of their passengers and crews at locations outside the United States.

EFFECTIVE DATE: March 1, 1983.

FOR FURTHER INFORMATION CONTACT: Stanley J. Kieszkiel, Acting Instructions Officer, Immigration and Naturalization Service, 425 Eye Street NW., Washington, D.C. 20536, Telephone: (202) 633–3048

SUPPLEMENTARY INFORMATION: The Commissioner of the Immigration and Naturalization Service has entered into an agreement with Northeastern International Airways, Inc. to provide for the preinspection of its passengers and crews as provided by section 238(b) of the Immigration and Nationality Act, as amended (8 U.S.C. 1228(b)). Preinspection outside the United States facilitates processing passengers and crews upon arrival at a U.S. port of entry and is a convenience to the traveling public.

Compliance with 5 U.S.C. 553 as to notice of proposed rulemaking and delayed effective date is unnecessary because the amendment merely adds an

air carrier to the present listing and is editorial in nature.

In accordance with 5 U.S.C. 605(b), the Commissioner of Immigration and Naturalization certifies that the rule will not have a significant economic impact on a substantial number of small entities.

This order constitutes a notice to the public under 5 U.S.C. 552 and is not a rule within the definition of section 1(a) of E.O. 12291.

List of Subjects in 8 CFR Part 238

Air carriers, Airlines, Aliens, Government contracts, Inspections.

Accordingly, 8 CFR Part 238 is amended as follows:

PART 238—CONTRACTS WITH TRANSPORTATION LINES

§ 238.4 [Amended]

Section 238.4 is amended as follows:

1. Add in alphabetical order, "Northeastern International Airways, Inc.", under "At Bermuda".

FEDERAL HOME LOAN BANK BOARD

12 CFR Parts 543 and 552

[No. 83-127]

Organization and Chartering of de Novo Federal Stock Associations and Related Regulatory Amendments

March 3, 1983.

AGENCY: Federal Home Loan Bank Board.

ACTION: Final rule; Request for comments.

SUMMARY: In order to implement statutory revisions contained in the Garn-St Germain Depository Institutions Act of 1982, the Federal Home Loan Bank Board is amending its regulations to provide procedural rules for the organization and chartering of *de novo* Federal stock savings and loan associations and Federal stock savings banks ("Federal stock associations"), interim Federal stock associations, and Federal stock associations proposed by the Federal Savings and Loan Insurance Corporation.

DATES: Effective March 3, 1983. Comments must be received by May 5, 1983.

ADDRESS: Send comments to Director, Information Services Section, Office of the Secretariat, Federal Home Loan Bank Board, 1700 G Street, NW., Washington, D.C. 20552. Comments will be available for public inspection at the above address.

FOR FURTHER INFORMATION, PLEASE CONTACT: Donna K. Ralston, Attorney, Office of General Counsel, (202-377-6427), David A. Permut, Attorney, Office of General Counsel, (202-377-6962), or K. Diane Boyle, Director, Program Analysis Development Division, Office of District Banks (202-377-6720).

SUPPLEMENTARY INFORMATION:

Background

A. Federal Stock Associations

Title III of the Garn-St Germain Depository Institutions Act of 1982, Pub. L. 97-320, 96 Stat. 1469 (October 15, 1982) ("DIA"), amends sections 5(a) and 5(b) of the Home Owners' Loan Act of 1933 ("HOLA"), to be codified as 12 U.S.C. 1464(a) and 1464(b), to authorize the Federal Home Loan Bank Board ("Board") to organize and charter *de novo* Federal stock associations.

Previously, the Board was permitted only to organize and charter *de novo* Federal mutual savings and loan associations. These statutory revisions are significant because they give Federal thrift institutions greater flexibility in choosing their form of organization and in raising capital.

In order to implement this statutory authority, the Board is adopting certain amendments to its regulations to provide procedural rules for the organization and chartering of *de novo* Federal stock associations and interim Federal stock associations. The rules for Federal stock associations and interim Federal stock associations are substantially similar to those contained in Part 543 for the organization and chartering of *de novo* Federal mutual associations and interim Federal mutual associations, with the addition of certain requirements regarding the sale of the association's capital stock.

By another Resolution of this date, published elsewhere in this Federal Register, the Board proposed regulations to govern the offer and sale of securities by institutions the accounts of which are insured by the Federal Savings and Loan Insurance Corporation ("FSLIC"). The proposed securities offerings regulations must be complied with by Federal stock associations in organization after the effective date of these regulations (March 3, 1983). Federal stock associations in organization upon the date that final securities offerings regulations, if any, become effective must comply with those requirements rather than the requirements of the proposed securities offerings regulations.

B. Interim Federal Stock Associations

On December 8, 1982, the Board indicated its intention to issue, where appropriate, *de novo* stock charters for interim Federal stock associations for the purposes of facilitating the reorganization of a stock association into holding company form or the acquisition of an FSLIC-insured institution by a savings and loan holding company. *See* Bd. Res. No. 82-788, 48 F.R. 173, published January 3, 1983. By its action today, the Board is adopting regulations to provide procedures for the organization of interim Federal stock associations.

C. Federal Stock Associations Proposed by the FSLIC

Title I of the DIA, which amends section 5 of the HOLA by adding paragraph (p), to be codified as 12 U.S.C. 1464(p), increases and reaffirms the FSLIC's authority to charter institutions to facilitate the resolution of failing institutions in supervisory cases by authorizing the FSLIC to charter a Federal stock association to acquire the assets of or merge with an FSLIC-insured mutual savings and loan association or FSLIC-insured Federal mutual savings bank. Such action must be taken by the FSLIC to assist an institution in receivership, to improve the financial condition of an institution whose stability is threatened by severe financial conditions, or to aid an institution with which the FSLIC has contracted to provide financial assistance. This statutory provision increases the options available to the FSLIC to deal with failing institutions and, therefore, will serve the public interest while, at the same time, minimizing the cost of assistance in such cases to the FSLIC. Accordingly, the Board is adopting regulations to provide that the general rules applicable to the organization and chartering of *de novo* Federal stock associations and interim Federal stock associations will not apply to Federal stock associations proposed by the FSLIC in supervisory cases under section 5(p) of the HOLA, as well as those Federal stock associations proposed under section 406 of the National Housing Act, as amended ("NHA").

Procedure

A. Federal Stock Associations

The procedure for organization of Federal stock associations is set forth in new § 552.2–1. Applicants must file an application for permission to organize with the Supervisory Agent of the approporiate Federal Home Loan Bank. (A copy of the form of application is published with this Resolution for the public's convenience.) Applications are subject to the provisions of 12 CFR 543.2(a) through 543.2(f) and the fulfillment of any requirements or conditions imposed by the Board. Upon Board approval of an application, the association, if a Federal stock savings and loan association, will be issued a Charter S, and, if a Federal stock savings bank, will be issued a Charter T. However, in order to be issued a Charter S or Charter T, the association's organization must be completed within six months after the Board approves the application, or within such additional time period as the Board may grant. Upon issuance of the Charter S or Charter T, the association must proceed promptly to offer and sell its capital stock pursuant to the requirements of 12 CFR Part 563g, proposed for adoption by the Board today. In addition, the association must promptly qualify as a member of the appropriate Federal Home Loan Bank and meet all requirements necessary to obtain insurance of its accounts by the FSLIC.

Subject to Board approval, the applicants will be the associations' interim board of directors, and those persons identified in the application will be the association's interim officers. After completion of the sale of its capital stock, the association must promptly provide notice pursuant to its charter and bylaws of a meeting of stockholders to elect directors. A subsequent meeting of directors must be held to elect officers and to undertake any other action necessary under the charter or bylaws to complete corporate organization.

The organization of a Federal stock association will be deemed complete when the association has received FHLB membership and insurance of its accounts from the FSLIC; has completed the sale of and received full payment for its capital stock; has complied with all filing requirements of proposed 12 CFR Part 563g; has held its organizational meeting for the election of directors and all directors have been elected; has elected and bonded its officers; and has met any other requirement that may have been imposed by the Board.

B. Interim Federal Stock Associations

Procedural rules for the organization and chartering of interim Federal stock associations are contained in new § 552.2–2. The procedures prescribed in 12 CFR 543.2(d) through 543.2(f) regarding the filing of an application for permission to organize and 12 CFR 552.2–1(b) regarding approval of applications need not be followed. However, decisions on all applications must be made by the Board, and the requirements of 12 CFR Parts 546, 563, or 584 must be fulfilled.

Preliminary approval of an application will be conditioned upon board approval of an application to merge the interim Federal stock association and an existing insured stock institution or upon Board approval of any other transaction. Final approval may be granted in conjunction with Board approval of an application filed pursuant to 12 CFR 584.4 or acquiescence in a filing under 12 CFR 584.4–1 after organization of the interim Federal stock association has been completed. If a merger or other transaction facilitated by the existence of the interim federal stock association has not been approved within six months after the Board approves the application or within such additional time period as the Board may grant, the charter shall be void and all subscriptions for capital stock shall be returned.

C. Federal Stock Associations Proposed by the FSLIC

New § 552.2–3 provides that the incorporation and organization of Federal stock associations proposed by the FSLIC in supervisory cases under section 5(p) of the HOLA and section 406 of the NHA are complete when the Board so determines. The procedures for organization of Federal stock associations and interim Federal stock associations contained in new sections 552.2–1 and 542.2–2 do not apply to these Federal stock associations.

Miscellaneous

A. Corporate Title

Pursuant to the requirements of new section 552.2–1(a), applicants seeking permission to organize a Federal stock association must seek the approval of the Board for the association's corporate title, to be included as Section One of the association's charter. In addition, new § 552.2 makes applicable to Federal stock associations the provisions of 12 CFR 543.1, including those in paragraph (b) relating to a change of corporate title.

B. Issuance of Charter

The Board is amending 12 CFR 522.3 to provide for the issuance of a Charter S or Charter T to a Federal stock association that has been organized pursuant to new §§ 552.2–1, 552.2–2, or 552.2–3.

Final Regulatory Flexibility Analysis

Although the regulations promulgated herein have not been proposed for public notice and comment, the Board is providing the following regulatory flexibility analysis:

1. *Reasons, objective and legal basis underlining the final rule.* These elements are incorporated above in the supplementary information section regarding the regulation.

2. *Small entities to which the final rule would apply.* The final rule would apply equally to all institutions chartered by the Board.

3. *Overlapping or conflicting federal rules.* There are no known federal rules that may duplicate, overlap, of conflict with the final regulation.

4. *Alternatives to the final rule.* The final regulations will benefit any organizing group seeking to apply for a Federal stock charter by providing the necessary procedures. Increased flexibility for all applicants will result from this regulation since they will have the opportunity to apply for a Federal stock charter as well as a Federal mutual charter. The regulations will not have a disproportionate impact on small institutions, and there is no alternative action that would change the impact of increased chartering authority on small institutions.

List of Subjects in 12 CFR Parts 543 and 552

De novo Federal stock charters, Savings and loan associations, Savings banks.

The Board finds that the public notice and comment procedures of 5 U.S.C. 503(b) and 12 CFR 508.13 are unnecessary for the following reason: Immediate regulatory action is in the public interest in that Congress expressly intended, in enacting the Garn-St Germain Depository Institutions Act of 1982, that Federal associations be granted increased organizational flexibility.

Since this is a new procedure, however, the Board is soliciting comment from the public for a period of 60 days on all aspects of this regulation.

Accordingly, the Board hereby amends Parts 543 and 552 of Subchapter C, Chapter V of Title 12, Code of Federal Regulations, as set forth below.

Subchapter C—Federal Savings and Loan System

1. Revise the heading of Part 543 to read as follows:

PART 543—INCORPORATION, ORGANIZATION, AND CONVERSION OF FEDERAL MUTUAL ASSOCIATIONS

2. Revise the heading of Part 552 to read as follows:

PART 552—INCORPORATION, ORGANIZATION, AND CONVERSION OF FEDERAL STOCK ASSOCIATIONS

3. Amend § 552.1 by revising paragraph (c) thereof and adding a new paragraph (d) thereto, as follows:

§ 552.1 Definitions.

* * * * *

(c) *Capital.* The term "capital" means the aggregate of the consideration received upon the issuance of capital stock.

(d) *Federal stock association.* A savings and loan association or savings bank chartered by the Board under section 5 of the Home Owners' Loan Act of 1933, as amended, which has its charter in the form of a Charter S or Charter T, respectively, and, except as the Board may otherwise provide, any building and loan, savings and loan, building, or homestead association, organized or incorporated under the laws of the District of Columbia so chartered. An interim Federal stock association is defined in § 541.8–1 of this Subchapter.

* * * * *

4. Redesignate §§ 552.2 and 552.2–1 as §§ 552.2–5 and 552.2–6, respectively, and add new §§ 552.2, 552.2–1, 552.2–2, 552.2–3 and 552.2–4, as follows:

§ 552.2 Corporate title.

The provisions of § 543.1 of this Subchapter shall be applicable to Federal stock associations.

§ 552.2–1 Procedure for organization of Federal stock association.

(a) *Application for permission to organize.* Applications for permission to organize a Federal stock association shall be subject to the provisions of paragraphs (a) through (f) of § 543.2 of this Subchapter.

(b) *Conditions of approval.* Decisions on all applications for permission to organize a Federal stock association will be made by the Board. Approvals of applications will be conditioned on the following: (1) The sale of a minimum amount of fully-paid capital stock of the association; (2) the submission of a statement that (i) the applicants have incurred no expense in organization which is chargeable to the association, and that no such expense will be incurred, and (ii) no funds will be accepted for deposit by the association until organization has been completed; (3) compliance with all applicable laws, rules, and regulations; and (4) the satisfaction of any other requirement or condition the Board may impose.

(c) *Issuance of charter.* Upon approval of an application, the Board shall issue to the association a Charter S or Charter T, as requested by the applicants, and bylaws of a Charter S or Charter T institution, which charter and bylaws shall be in the form provided in this Part. Issuance of the charter shall be subject to the condition subsequent that the organization of the association is completed pursuant to this section.

(d) *Interim board of directors and officers.* Upon approval of the application and the issuance of the charter, the applicants shall constitute the interim board of directors of the association until the board of directors of the association are elected by its stockholders at the organizational meeting required by paragraph (g) of this section, and the interim officers of the association shall be those persons set forth in the application for permission to organize.

(e) *Sale of capital stock.* Upon the issuance of the charter, the association shall proceed to offer and sell its capital stock pursuant to the requirements of Part 563g of this Chapter.

(f) *Bank membership and insurance of accounts.* Promptly upon the issuance of the charter, a Federal stock association must qualify as a member of the appropriate Federal Home Loan Bank and meet all requirements necessary to obtain insurance of accounts by the Federal Savings and Loan Insurance Corporation.

(g) *Organizational meeting.* Promptly upon the completion of the sale of its capital stock, the association shall provide notice, pursuant to its charter and bylaws, of a meeting of its stockholders to elect a board of directors. Immediately following such election, the directors shall meet to elect the officers of the association and to undertake any other action necessary under the charter or bylaws to complete corporate organization.

(h) *Completion of organization.* Organization of a Federal stock association shall be deemed complete for the purposes of this Part when: (1) the association has obtained Federal Home Loan Bank membership and insurance of its accounts from the Federal Savings and Loan Insurance Corporation; (2) it has completed the sale of and received full payment for its capital stock; (3) it has complied with all filing requirements of Part 563g of this Chapter; (4) it has held its organizational meeting for the election of directors and all directors have been elected; (5) its officers have been elected and bonded; and (6) it has met any other requirement or condition that may have been imposed by the Board.

(i) *Failure of completion.* If organization of a Federal stock association is not completed within six months after the Board approves the application, or within such additional period as the Board may, in its discretion, for good cause grant, the charter shall become void and all subscriptions to capital stock shall be returned.

§ 552.2–2 Procedures for organization of interim Federal stock association.

(a) The procedures prescribed in paragraphs (d) through (f) of § 543.2 of this Subchapter and § 552.2–1(b) of this Part shall not be required with respect to applications for permission to organize an interim Federal stock association, except that decisions on all such applications will be made by the Board and except as may be required by Parts 546, 563, or 584 of this Chapter.

(b) Preliminary approval of an application for permission to organize an interim Federal stock association shall be conditioned upon Board approval of an application to merge the interim Federal stock association and an existing insured stock institution, or upon Board approval of any other transaction. After organization has been completed pursuant to §§ 552.2–1(h) and 552.2–1(i) of this Part, final approval may be granted in conjunction with Board approval of an application filed pursuant to § 584.4 or acquiescence in a filing under § 584.4–1. In evaluating the information provided in accordance with requirements of § 543.2(b) of this Subchapter, the Board will consider the purpose for which the association will be organized, the form of any proposed transactions involving the organizing association, the effect of the transactions on existing institutions involved in the transactions, and the effect of the transactions on the community and on other properly conducted existing thrift institutions.

(c) If a merger or other transaction facilitated by the existence of the interim Federal stock association has not been approved within six months of the approval of the application for

permission to organize, unless extended by the Board in its discretion for good cause shown, the charter shall be void and all subscriptions for capital stock shall be returned.

§ 552.2–3 Federal stock association proposed by Federal Savings and Loan Insurance Corporation.

Sections 552.2–1 and 552.2–2 of this Part do not apply to a Federal stock association which is proposed by the Federal Savings and Loan Insurance Corporation under section 5(p) of the Home Owner's Loan Act of 1933, as amended, or section 406 of the National Housing Act, as amended. Incorporation and organization of such associations are complete when and under such conditions as the Board so determines.

§ 552.2–4 Limitations on transaction of business.

No person may organize a Federal stock association, collect money from others for such purpose, or represent himself as authorized to do so, and no Federal stock association shall transact any business prior to completion of its organization, except as provided in this Part.

5. Amend paragraph (a) of § 552.3 by removing the reference to "552.2" and substituting therefor a reference to "552.2–5".

6. Amend § 552.3 by revising paragraph (b) as follows:

§ 552.3 Issuance of charter.

* * * * *

(b) A Charter S or Charter T in the following form shall be issued to a Federal stock association that has been organized pursuant to §§ 552.2–1, 552.2–2, or 552.2–3 of this Part, and to a state stock institution that has converted to a Federal stock savings and loan association or to a Federal stock savings bank pursuant to § 552.2–6 of this Part. In a case not involving an association that has converted from mutual to stock form, Section 7 of Charter S or Charter T requiring a liquidation account and all references thereto shall be deleted, Sections 8 and 9 shall be redesignated Sections 7 and 8 respectively, and the optional provision contained in § 552.4(b) of this Part shall not be applicable.

Outline of Information To Be Submitted in Support of an Application for Permission To Organize a Federal Association

Federal Home Loan Bank Board

Outline of Information To Be Submitted in Support of an Application for Permission To Organize a Federal Association

Introduction

An application for Permission to Organize a Federal Association must be submitted by persons seeking permission from the Federal Home Loan Bank Board ("Board") to organize a Federal savings and loan association or a Federal savings bank, pursuant to Part 543 or Part 552 of the Rules and Regulations for the Federal Savings and Loan System ("Federal Regulations"). An Application for Permission to Organize a Federal Association must be supported by the documents and information prescribed in this Outline of Information. The term "association" is used in the Outline of Information to refer to either a proposed Federal savings and loan association or a proposed Federal savings bank.

Procedures for filing an Application for Permission to Organize a Federal Association are outlined in Part 543 or Part 552 of the Federal Regulations. The Outline of Information contains two copies of each application form that must be completed by the applicants, one to serve as the work copy and one for the final copy. The original and three copies of all completed application forms, and four copies of all supporting documents, must be submitted to the Supervisory Agent at the Federal Home Loan Bank for the District in which the applicant is or will be located. After the Supervisory Agent at the District Bank determines that the application is complete, the association will be instructed to publish notice in a local newspaper. (A sample of the form of public notice is included in the Outline of Information.)

Statutory Requirements

Section 5(e) of the Home Owners Loan Act, as amended, sets forth the basic criteria which the Board must consider when acting on an application for permission to organize a Federal savings and loan association or Federal savings bank. Section 5(e) states that the Board may grant a Federal charter only if, in the Board's judgment: (1) The organizers are persons of good character and responsibility; (2) a necessity exists for the institution in the community to be served; (3) there is a reasonable probability of the institution's usefulness and success; and (4) the institution can be established without undue injury to other properly conducted local thrift and home-financing institutions. In addition, pursuant to the Community Reinvestment Act of 1977, the Board is required to consider the effect of the application on local community credit needs.

Immediately upon receipt of a Federal charter, the association will be required to apply for and obtain membership in the Federal Home Loan Bank System and insurance of accounts by the Federal Savings and Loan Insurance Corporation. The association thereafter will be subject to the Rules and Regulations for the Federal Home Loan Bank System, the Federal Savings and Loan System and Insurance of Accounts.

Minimum Capital Requirements

To safeguard the Federal Savings and Loan Insurance Corporation against potential loss and to ensure that a new association has sufficient capital to commence operations, the Board will require the organizers of a proposed Federal savings and loan association or Federal savings bank to obtain a minimum amount of pledged savings accounts (mutual association requirement) or capital stock (stock association requirement) prior to beginning operations. The following represents the Board's minimum capital guidelines for newly organized savings and loan associations and savings banks.

If population of area is:	New mutual S&L or Savings Bank	New stock S&L or Savings Bank
	Pledged savings requirement	Capital stock requirement
Under 100,000	$1,000,000	$1,000,000
100,000 and over	2,000,000	2,000,000

When determining the appropriate minimum capital requirement, the population of the area should be based upon (a) the Standard Metropolitan Statistical Area (SMSA) if the association will be located in an SMSA, or (b) the delineated market area or the county in which the association will be located, whichever is greater.

For a mutual association, the full amount of required pledged savings must be collected and the passbooks, savings or investment certificates or the

documents evidencing title to the pledged accounts must be delivered to the District Bank prior to issuance of the institution's insurance certificate. Pledged accounts will be held in escrow at the District Bank for five years or until such time thereafter that the association meets the reserve requirements of Section 563.13 of the Insurance Regulations.

A stock association must collect 100% of the capital stock requirement prior to issuance of the institution's insurance certificate. Generally the amount of paid-in surplus should be limited to 20% of the capital stock requirement.

All stock or subscriptions to stock should be sold at a price that is reasonable and equitable to all parties. Officers, directors and principal organizers should not receive payment of commissions or other compensation for the subscription to or sale of capital stock.

The above schedule represents the Board's minimum capital requirements and higher requirements may be imposed. Any funds collected on these accounts prior to the association opening for business must be deposited with a Federally insured institution or with the District Bank.

Action By the Board

Decision on all Applications for Permission To Organize A Federal Association will be made by the Federal Home Loan Bank Board. The Board's approval of an Application for Permission To Organize A Federal Association will be conditioned upon submission of evidence to the Board that the applicant has complied satisfactorily with certain requirements established by the Board for the granting of a Federal association charter.

Failure by an applicant to comply with the Board's conditions within the time established for such compliance will result in the expiration of the conditional approval. Any subsequent application from such applicant will be treated as a new application. Applicants may obtain a copy of the Board's standard conditions of approval for permission to organize a Federal association from the Supervisory Agent at the District Bank.

Notice of Filing of Application for Permission To Organize a Federal (Savings and Loan Association or Savings Bank)

This is to inform the public that under § 543.2 of the Rules and Regulations for the Federal Savings and Loan System ("Federal Regulations"), (Name of organizing group) ——— has filed an application with the Federal Home Loan Bank Board for permission to organize a (Federal Savings and Loan Association or Federal Savings Bank) to be located at, or in the immediate vicinity of, (Street Address) ———, (City) ———, (State) ———.

Anyone may write in favor or protest of the application. Four copies must be sent to "Supervisory Agent, Federal Home Loan Bank of ———, (Street Address) ———, (City) ———, (State and Zip Code) ———," within 10 days of the publication of this notice. An additional 7 days to submit comments may be obtained if a written request is received by the Supervisory Agent within the 10-day period.

Anyone sending a protest deemed substantial by the Principal Supervisory Agent may request an oral argument on the application by submitting a written request to the Supervisory Agent during the 10-day period. For a protest to be considered substantial, it must be written and received on time, the reasons for the protest must be consistent with the regulatory basis for denial of the application, and the protest must be supported by the information specified in § 543.2(e)(4) of the Federal Regulations.

You may look at the application and all comments filed at the Federal Home Loan Bank of ———, unless any such materials are exempt by law from disclosure. If you have any questions concerning these procedures, contact the Federal Home Loan Bank of ——— at (telephone number) ———.

Application for Permission To Organize a Federal Association

Section I

Legal Documents and Forms

Instructions: Items 1 Through 6 Must Be Submitted By All Applicants. Items 7, 8 and 9 Must Be Submitted For Proposed Stock Associations.

1. Properly executed form for (a) Application For Permission To Organize A Federal Mutual Savings and Loan Association (FHLBB Form 138–A, Revised); (b) Application for Permission To Organize A Federal Mutual Savings Bank (FHLBB Form 138–B, Revised); (c) Application For Permission To Organize A Federal Stock Savings and Loan Association (FHLBB Form 138–C, Revised); or (d) Application For Permission To Organize A Federal Stock Savings Bank (FHLBB Form 138–D, Revised). Copies of the appropriate form can be obtained from the Supervisory Agency at the District Bank.

2. Proposed charter in the prescribed form.

3. Proposed bylaws.

4. Each form of withdrawable account certificate or passbook proposed (share certificate, investment certificate, mutual capital certificate, passbook, or other evidence of shareholding), together with an opinion from legal counsel that such forms of certificate comply with the requirements of applicable laws and regulations and the institution's charter and bylaws.

5. A copy of the proposed Community Reinvestment Act Statement to be adopted by the institution's board of directors/trustees pursuant to Part 563e of the Rules and Regulations for Insurance of Accounts (Community Reinvestment).

6. Any proposed contract not entered into in the ordinary course of business or in excess of 15% of the proposed operating budget.

Stock Association

7. Proposed form of stock certificate, including any required restrictive legends.

8. If a holding company is involved in the organization of a new Federal stock association, submit copies of the holding company application including its: (a) existing charter, as amended; (b) existing bylaws, as amended; (c) description of business, including background; and (d) the most recent and past five years certified financial statement.

9. Any proposed voting trust agreements.

Section II

Management

Instructions: All Applicants Must Submit Items A through C.

A. For each organizer, proposed director/trustee and proposed managing officer, submit a Biographical and Financial Report (FHLBB Form 139), properly prepared and executed. (Note: Pages 4 through 7 of Form 139 will be held confidential by the Federal Home Loan Bank Board and will not be available for public disclosure.)

B. Submit the following information on the proposed managing officer of the association:

(1) A description of the managing officer's qualifications and previous experience with other financial institutions and the amount of his or her

proposed salary, including any provisions for bonuses; and

(2) Copies of any proposed employment contract and evidence that the contract will comply with the provisions of Section 563.39 of the Insurance Regulations; and

C. If applicable, describe in complete detail any proposed stock option plans for employees of the association.

Application for Permission To Organize a Federal Association

Section III

Financial Program

Instructions: Each Item In This Section Is To Be Completed By All Applicants.

A. *Capital Structure* (Complete Applicable Section)

(1) *Mutual Associations:* Provide a complete description of the association's plans for the acquisition of the minimum amount of pledged savings accounts required pursuant to the Board's Minimum Capital Requirements for establishment of a Federal association. List the name of each pledgor, indicating his/her prospective affiliation with the association (i.e., director, officer or other), and total dollar amount of accounts to be pledged. If the pledgor is not required to submit a Biographical or Financial Report (FHLBB Form 139), also indicate the pledgor's residential address.

(2) *Capital Stock Associations:*

(a) *Sales Price:* Provide complete information relative to the sales price of the capital stock, including a breakdown of the amount included in the price which is to be allocated to each of the following: capital stock, paid-in surplus and other capital accounts.

(b) *Ownership of Capital Stock:* Provide a complete schedule of the subscribers to capital stock proposed to be issued initially. List the name of each subscriber, indicating his/her prospective affiliation with the association (i.e., director/trustee, officer or other), the number of shares, and the total cost of capital stock. If a subscriber is not required to submit a Biographical and Financial Report (FHLBB Form 139), also indicate the residential address of the subscriber.

(c) *Dividends on Capital Stock:* Provide a statement of the association's plans for the payment of dividends on capital stock.

(3) *Mutual and Stock Associations:* Provide a complete description of any offering of securities by a Federal association in connection with its organization or upon the commencement of its operations. Include the following:

(a) a copy of any offering materials used or to be used in connection with an offering of its securities; and

(b) a legal opinion that the offering and issuance of securities, as described, is in accordance with applicable requirements under Federal and/or state law.

B. *Budget*

Complete the Proposed Operating Budget (following this section) for the first two years following the date of opening for business. The Proposed Operating Budget should be accompanied by a written explanation outlining the assumptions used in formulating the budget projections.

Section IV

Office Quarters and Market Area

Instructions: Each Item In This Section Is To Be Completed By All Applicants.

1. Identify and briefly describe the market area to be served by the applicant and the characteristics of the community. Submit data relating to population trends and income levels.

2. Provide a brief description of the proposed office quarters and the area in the immediate vicinity. If office quarters will be purchased or leased from an affiliated person, as defined in Section 561.29 of the Insurance Regulations, the applicant should follow the procedures set forth in Section 563.41 of the Insurance Regulations.

3. Discuss the convenience and draw of the proposed office location and its relationship to all sections of the proposed market area.

4. Provide a map which delineates the proposed market area, the applicant's proposed office location, and the location of all offices of thrift institutions and commercial banks in the market area and within a one-mile radius of the market area boundary. The map must be legible and contain a distance scale and the following notations:

(a) Proposed Market Area—Outlined with a heavy line.

(b) Proposed Office Location)—Identified as an encircled X.

(c) Thrift Institutions—Numbered and inscribed in triangles.

(d) Commercial Banks—Numbered and inscribed in diamonds.

5. Submit a description of the proposed market area (value, type and number of existing and proposed residential units, shopping centers, office buildings, industries and major economic base, etc.)

6. Describe the savings and lending services the association proposes to initially offer to its community.

7. Provide any additional information considered pertinent and in support of the application.

Federal Home Loan Bank Board

Application for Permission To Organize a Federal Mutual Savings and Loan Association

City ——
State ——
Date ——

To: Federal Home Loan Bank Board,
Washington, D.C.

The Undersigned, citizens of the United States, desirous of forming a thrift institution for the deposit and investment of funds and for the extension of credit for homes and other goods and services, being persons of good character and responsibility, believing in the necessity for such an association in the community to be served and in the reasonable probability of its usefulness and success without undue injury to properly conducted existing local thrift and home-financing institutions, and having complied in all respects with the Home Owners' Loan Act of 1933, as amended, and with the rules and regulations governing the organization of a Federal savings and loan association ("association").

Do Respectfully Make Application to the Federal Home Loan Bank Board for permission to organize, under such terms and conditions as the Federal Home Loan Bank Board may prescribe, a Federal mutual savings and loan association and for approval of a Charter, pursuant to 12 C.F.R. Part 543 of the Rules and Regulations for the Federal Savings and Loan System, under the name of ——, such association to be located at or in the immediate vicinity of ——, in the —— of ——, County of ——, State of ——, And Do Hereby Agree To Raise Initial Savings Capital That Will Be Pledged as guaranty to the association against operating deficits and losses in excess of its reserves in the amount of not less than $—— or such other amount as may be designated by the Federal Home Loan Bank Board, under such conditions as it may prescribe,

FHLBB Form 138A
REV.

And Hereby Appoint —— of —— to represent the undersigned before the Federal Home Loan Bank Board, and to receive all notices, correspondence, and documents relating to this application.

And Do Jointly And Severally Represent And Warrant to the Federal Home Loan Bank Board, for the purpose of inducing the Federal Home Loan Bank Board to permit the organization of said Federal savings and loan association upon the terms and conditions as may be required by the Federal Home Loan Bank Board (and with the intention that the Federal Home Loan Bank Board should rely upon the following), that:

The Undersigned Will Not Represent Themselves as authorized to organize such association until this application is approved and, upon notification that the application has been approved, they will proceed only in accordance with the provisions of the Home Owners' Loan Act of 1933, as amended, Title IV of the National Housing Act, Federal Home Loan Bank Act, and with rules and regulations made thereunder;

The Undersigned Are Not Acting in this application as representative of or on behalf of any person, partnership, association, or corporation undisclosed to the Federal Home Loan Bank Board;

No Charge Or Expense incurred in connection with the organization of the Federal savings and loan association shall be charged to the association;

No Money Will Be Collected on account of such association prior to the approval of a charter to it by the Board.

An Organization Committee Will Be Created promptly when the Board approves an application for permission to organize a Federal savings and loan association and the members of such committee will serve as temporary officers of the association until officers are elected by the association.

The Association Will Qualify as a member of the appropriate Federal Home Loan Bank Board and meet all requirements necessary to obtain insurance of accounts by the Federal Savings and Loan Insurance Corporation.

The Undersigned, Being Duly Sworn, Depose And Say:

That We Are The Applicants in this Application for Permission to Organize a Federal Mutual Savings and Loan Association;

That We Will Constitute The Members of the organization committee and agree that we will organize the association upon approval of a charter by the Board and that those signing as officers of such committee will serve as temporary officers of the association until officers of such association have been elected by its board of directors in accordance with the provisions of Section 543.6 of the Rules and Regulations for the Federal Savings and Loan System.

That All Of The Statements And Representations made in this Application for Permission to Organize, signed by each affiant, and dated the—— day of——, 19—, and all evidence and data submitted in support thereof are consistent with the facts to the best of our information and belief.

The Association Will notice, pursuant to its charter and bylaws, of a meeting of its stockholders to elect a board of directors, pursuant to its charter promptly upon the completion of the sale of its capital stock. The directors will meet immediately following their election to elect the officers of the association and to undertake any other action necessary under the charter or bylaws to complete corporate organization.

The Association Will Proceed to offer and sell its capital stock pursuant to the requirements of Part 563g of the Rules and Regulations for Insurance of Accounts upon the issuance of a charter.

The Association Will Qualify as a member of the appropriate Federal Home Loan Bank and meet all requirements necessary to obtain insurance of accounts by the Federal Savings and Loan Insurance Corporation.

The Undersigned, Being Duly Sworn, Depose And Say:

That We Are The Applicants in this Application for Permission to Organize a Federal Savings Bank;

That We Will Constitute The Interim Board Of Directors upon Board approval of the Application and the issuance of the charter until the association's board

of directors have been elected in accordance with the provisions of Section 552.2–1(g) of the Federal Regulations, and agree that we will organize the association, and that those persons set forth in the Application will serve as interim officers of the association until officers have been elected by the association's board of trustees in accordance with the provisions of Section 552.2–1(g) of the Federal Regulations.

That All Of The Statements And Representations made in this Application for Permission to Organize, signed by each affiant, and dated the —— day of ——, 19—, and all evidence and data submitted in support thereof are consistent with the facts to the best of our information and belief.

BILLING CODE 4720-01-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 82-NM-74 AD, Amdt. 39-4585]

Airworthiness Directives: Boeing Model 747 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This Amendment adds a new Airworthiness Directive (AD) which requires inspection of the wing landing gear jury strut spindles for cracks. In one incident a broken spindle resulted in the wing landing gear being down but not locked. An unlocked wing gear could be dislocated by touchdown forces and allow a wing-low rollout which could result in damage/loss of the outboard engine and a possible fire. Terminating action will be the replacement of the spindle with an improved spindle.

DATE: Effective April 18, 1983.

Compliance schedule as prescribed in the body of the AD, unless already accomplished.

ADDRESS: The Boeing Service bulletin specified in this AD may be obtained upon request from the Boeing Commercial Airplane Company, P.O. Box 3707, Seattle, Washington 98124.

FOR FURTHER INFORMATION CONTACT: Mr. Owen Schrader, Airframe Branch, ANM-120S, telephone (206) 767-2516. Mailing Address: Seattle Aircraft Certification Office, FAA, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION: A proposal to amend Part 39 of the Federal Aviation Regulations to include an AD was published in the **Federal Register** on September 20, 1982 (47 FR 41399). The comment period for the proposal closed on November 8, 1982.

Interested persons have been afforded an opportunity to participate in the making of this AD. Due consideration has been given to all comments received.

Since publication of the Notice of Proposed Rulemaking, Boeing has issued Service Bulletin 747-32-2261 Rev. 1, dated October 8, 1982, which defines terminating action. Termination action consists of installing an improved wing landing gear jury strut spindle assembly and modification of the jury strut attachment fitting assembly. The inspection requirements, also defined in this Service Bulletin, will continue until terminating action is taken.

The manufacturer requested that the replacement schedule be based on gear cycles/hours if different than airplane cycles/hours. The FAA concurs, and this change is incorporated into paragraph D. of the amendment.

The Air Transport Association of America requested that credit be given to the operators for inspections already accomplished. The FAA concurs, and paragraph A. is accordingly revised.

Another comment was received which proposed tracking inspection cycles/hours directly against the spindle part number. The FAA concurs, and the final rule accommodates this when approved by the Principal Maintenance Inspector.

Since this condition is likely to exist or develop on other airplanes of the same type design, an Airworthiness Directive is being issued which requires inspection of the wing gear jury strut spindle and replacement of the spindle as terminating action.

It is estimated that 170 airplanes of U.S. registry will be affected by this AD, that it will take approximately 42 manhours per airplane to accomplish the required actions, and that the average labor cost will be $40 per manhour. Repair parts are estimated at $1,800 per airplane. Based on these figures, the total cost impact of the AD is estimated to be $591,600. For these reasons the proposed rule is not considered to be a major rule under the criteria of Executive Order 12291. Few, if any, small entities within the meaning of the Regulatory Flexibility Act would be affected.

After careful review of the available data, including the comments noted above, the FAA has determined that air safety and the public interest require the adoption of the proposed rule with the changes noted.

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

Adoption of the Amendment

Accordingly, and pursuant to the authority delegated to me by the Administrator, § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) is amended by adding the following new Airworthiness Directive:

Boeing: Applies to all Boeing Model 747 series airplanes certificated in all categories listed in Boeing Service Bulletin 747-32-2261 Rev. 1, or later FAA approved revisions. To prevent wing landing gear jury strut spindle failures, accomplish the following:

A. Unless already accomplished within the last 375 landings, within the next 375 landings after the effective date of this AD or prior to the accumulation of 7625 landings, whichever is later, and thereafter at intervals not to exceed 750 landings, magnetic particle or dye penetrant inspect the wing landing gear jury strut spindles for cracks in accordance with Table I of Boeing Service Bulletin 747-32-2261 Rev. 1, or later FAA approved revisions. Cracked parts are to be replaced prior to further flight.

B. Upon the installation of the improved spindles in accordance with Boeing Service Bulletin 747-32-2261 Rev. 1, or later FAA approved revisions, the requirements of this AD are terminated.

C. Alternate means of compliance with this AD which provides an equivalent level of safety may be used when approved by the Manager, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region.

D. For purposes of complying with this AD, subject to acceptance by the assigned FAA Principal Maintenance Inspector, the number of flight cycles may be determined by dividing each airplane's hours time in service by the operator's fleet average from takeoff to landing for the airplane type. If the gear/jury strut spindle cycles and hours are different from the airplane cycles and hours, the gear/jury strut spindle times shall be used.

E. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base for the accomplishment of inspections and/or modifications required by this AD.

All persons affected by this directive who have not already received these documents from the manufacturer may obtain copies upon request to Boeing Commercial Airplane Company, P.O. Box 3707, Seattle, Washington 98124. These documents may also be examined at FAA, Northwest Mountain Region, 9010 East Marginal Way South, Seattle, Washington.

This amendment becomes effective April 18, 1983.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, 1423); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.89)

Note.—For the reasons discussed earlier in the preamble, the FAA has determined that this regulation is not considered to be major under Executive Order 12291 or significant under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). I certify under the criteria of the Regulatory Flexibility Act that this rule will not have a significant economic effect on a substantial number of small entities since it involves few, if any, small entities. A final evaluation has been prepared for this regulation and has been placed in the docket. A copy of it may be obtained by contacting the person identified under the caption "FOR FURTHER INFORMATION CONTACT."

Issued in Seattle, Washington on March 2, 1983.

Charles R. Foster,

Director, Northwest Mountain Region.

BILLING CODE 4910-13-M

---

14 CFR Part 39

[Docket No. 83-NM-08-AD; Amdt. 39-4584]

Airworthiness Directives; Boeing Model 767-200 Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action publishes in the Federal Register and makes effective as to all persons an amendment adopting a new airworthiness directive (AD) which was previously made effective to all known U.S. owners and operators of certain Boeing Model 767-200 airplanes by individual telegrams. The AD requires eddy current inspection of the horizontal stabilizer hinge fittings on the body station 1809.5 bulkhead to ensure that these parts are correctly heat treated. This action was prompted by the discovery that two such parts, on two separate airplanes on the manufacturer's production line, had not been properly heat treated per design. Two adjacent incorrectly heat treated parts could result in progressive deterioration and ultimate breakage of the hinge fittings which would seriously affect airplane controllability.

DATES: Effective March 22, 1983, as to all persons except those persons to whom it was made immediately effective by telegraphic AD T83-03-52 dated February 4, 1983, which contained this amendment.

Compliance required before further flight after the effective date of this AD, unless already accomplished.

ADDRESSES: The Boeing Service Bulletin specified in this directive may be obtained upon request to the Boeing Commercial Airplane Company, P.O. Box 3707, Seattle, Washington 98124. A copy of the service bulletin is contained in the Rules Docket at FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington 98168.

FOR FURTHER INFORMATION CONTACT: Mr. Richard Yarges, Airframe Branch, ANM-120S, telephone (206) 767-2516. Mailing address: FAA, Northwest Mountain Region, Seattle Aircraft Certification Office, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION: This AD was prompted by the discovery that two horizontal stabilizer hinge fittings, on two separate airplanes on the manufacturers production line, had not been properly treated. The left and right horizontal stabilizer hinge fittings on the body station 1809.5 bulkhead consist of two pairs of nested, angle shaped, fittings. These parts constitute a primary structural support for the horizontal stabilizer. The parts are made of 7075 aluminum and should be heat treated to the T73 temper. The discrepant parts were in the unheat-treated condition, having material strength and durability properties considerably different than those necessary for the structural integrity of the stabilizer support. Two adjacent incorrectly heat treated parts could result in progressive deterioration and ultimate breakage of the hinge fitting which would seriously affect airplane controllability. The manufacturer's investigation indicated that eight airplanes may have been delivered to commercial service with one or more unheat-treated fittings.

Unheat-treated parts can be identified using an eddy current conductivity test. Boeing Service Bulletin 767-53A1 describes the test procedure applicable to the horizontal stabilizer hinge fitting.

Since it was found that immediate corrective action was required, notice and public procedure thereon were impracticable and contrary to public interest, and good cause existed to make the AD effective immediately by individual telegrams issued February 4, 1983, to all known U.S. owners and operators of certain Boeing Model 767-200 airplanes. These conditions still exist and the AD is hereby published in the Federal Register as an amendment to § 39.13 of Part 39 of the Federal Aviation Regulations to make it effective as to all persons.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

Adoption of Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) is amended by adding the following new Airworthiness Directive:

Boeing: Applies to Boeing Model 767-200 airplanes certificated in all categories. This AD is required to detect improperly heat treated horizontal stabilizer hinge fittings, which could fail during flight, resulting in a possible reduction in controllability of the airplane.

Unless previously accomplished, perform the following prior to further flight on those airplanes listed in Boeing Alert Service Bulletin 767-53A1 dated February 3, 1983, or later FAA approved revision:

A. Inspect the horizontal stabilizer hinge fittings for correct heat treatment in accordance with the accomplishment instructions of paragraph III of Boeing Alert Service Bulletin 767-53A1, dated February 3, 1983, or later FAA approved revision.

B. Replace any hinge fittings found not to have the correct heat treatment with serviceable fittings prior to further flight.

C. Ferry flights not permitted without prior concurrence of the Manager, Seattle Aircraft Certification Office.

All persons affected by this directive who have not already received these documents from the manufacturer may obtain copies upon request to Boeing Commercial Airplane Company, P.O. Box 3707, Seattle, Washington 98124. These documents may also be examined at FAA Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington.

This amendment becomes effective March 22, 1983, as to all persons except those persons to whom it was made immediately effective by telegraphic AD T83-03-52 issued February 4, 1983, which contained this amendment.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.89)

Note.—The FAA has determined that this regulation is an emergency regulation that is not considered to be major under Executive Order 12291. It is impracticable for the agency to follow the procedures of Order 12291 with respect to this rule since the rule must be issued immediately to correct an

unsafe condition in aircraft. It has been further determined that this action involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). If this action is subsequently determined to involve a significant/major regulation, a final regulatory evaluation or analysis, as appropriate, will be prepared and placed in the regulatory docket (otherwise, an evaluation is not required). A copy of it, when filed, may be obtained by contacting the person identified above under the caption "FOR FURTHER INFORMATION CONTACT."

Issued in Seattle, Washington on March 2, 1983.

Charles R. Foster,

Director, Northwest Mountain Region.

BILLING CODE 4910-13-M

---

14 CFR Part 39

[Docket No. 83-CE-10-AD; Amendment 39-4582]

Airworthiness Directives; British Aerospace, Aircraft Group, (Formerly Scottish Aviation Limited) Model HP.137 Jetstream MK-1 and Series 200 Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new Airworthiness Directive (AD), applicable to British Aerospace Aircraft Group Model HP.137 Jetstream MK-1 and Series 200 airplanes. It requires removal and inspection of the fuel filter bleed pipe non-return valves (NRV). There have been reports of NRV failures in the open position. This undetected failure could result in engine failure in the event of an electrical system failure when the fuel level in the tank is lower than the NRV, and may cause inability to isolate the engine fuel system if the fuel level in the tanks is above the fuel filter. Undetected open position failures of both NRV could result in a total power loss in the event of an electrical failure. The actions prescribed in this AD will preclude engine failure due to lack of fuel transfer capabilities.

DATES: Effective date: March 17, 1983.

Compliance: As prescribed in the body of the AD.

ADDRESSES: Scottish Aviation Limited Jetstream Service Bulletin (SB) No. 18/3 dated February 22, 1974, and British Aerospace Aircraft Group Jetstream Modification No. 5179 Issue 1, dated December 1981, applicable to this AD may be obtained from British Aerospace Incorporated, 13850 McLearen Road, Dulles Industrial Aerospace Park, Herndon, Virginia 22070. A copy of this information is also contained in the Rules Docket, FAA, Office of the Regional Counsel, Room 1558, 601 East 12th Street, Kansas City, Missouri 64106.

FOR FURTHER INFORMATION CONTACT: Mr. A. Astorga, Aircraft Certification Staff, AEU-100, Europe, Africa and Middle East Office, FAA, c/o American Embassy, 1000 Brussels, Belgium, Telephone 513.38.30; or Mr. P. Cormaci, FAA, ACE-109, 601 East 12th Street, Kansas City, Missouri 64106 Telephone 816/374-6932.

SUPPLEMENTARY INFORMATION: Two instances have been reported of the fuel filter bleed pipe NRV Part Number (P/N) 702CD02 having failed in the open position on Model HP.137 MK-1 airplanes. This filter would not normally be detected during a 100 hour inspection and it will not affect the normal operation of the system. It could, however, result in engine failure following an electrical failure with no booster pumps available, if the tank fuel level fell below the level of the NRV. Also, it will result in the inability to isolate the engine fuel system if the tank fuel level is above the level of the fuel filter. Since failures can go undetected indefinitely during normal operation the potential exists for a complete power loss following an electrical failure. Further the inability to isolate an engine fuel system could result in an unsafe condition. As a result, Scottish Aviation Limited has issued Jetstream SB No. 18/3 which specifies an initial inspection within 20 hours and recurrent inspections each 200 hours thereafter until British Aerospace Modification No. 5179 is installed. The United Kingdom Civil Aviation Authority (UKCAA) who has responsibility and authority to maintain the continuing airworthiness of these airplanes in the United Kingdom has classified this SB and the actions recommended therein by the manufacturer as mandatory to assure the continued airworthiness of the affected airplanes. On airplanes operated under United Kingdom registration, this action has the same effect as an AD on airplanes certified for operation in the United States. The FAA relies upon the certification of UKCAA combined with FAA review of pertinent documentation in finding compliance of the design of these airplanes with the applicable United States airworthiness requirements and the airworthiness and conformity of products of this design certificated for operation in the United States.

The FAA has examined the available information related to the issuance of Scottish Aviation Limited Jetstream SB No. 18/3 and the mandatory classification of this SB by the UKCAA.

Based on the foregoing, the FAA has determined that the condition addressed by this SB is an unsafe condition that may exist on other products of the same type design certificated for operation in the United States.

Therefore, an AD is being issued requiring removal and visual inspection of the fuel filter bleed pipe NRV on British Aerospace Aircraft Group Model HP.137 Jetstream MK-1 and series 200 airplanes in accordance with Scottish Aviation Limited Jetstream SB No. 18/3 dated February 22, 1974. Because an emergency condition exists that requires the immediate adoption of this regulation, it is found that notice and public procedure hereon are impractical and contrary to the public interest, and good cause exists for making this amendment effective in less than 30 days.

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of the Federal Aviation Regulations (14 CFR Section 39.13) is amended by adding the following new AD.

British, Aerospace, Aircraft Group, Scottish Division: Applies to Model HP.137 Jetstream MK-1 and Series 200 airplanes (all serial numbers) certificated in any category.

Compliance: Required as indicated, unless already accomplished. To preclude failure of the fuel filter bleed pipe non-return valve (NRV) Part Number (P/N) 702CD02 unless accomplished in the previous 200 hours time-in-service within the next 20 hours time-in-service after the effective date of this AD and thereafter at intervals not to exceed 200 hours time-in-service, accomplish the following:

(a) Remove and visually inspect the fuel filter bleed pipe NRV P/N 702CD02 for cleanliness and correct operation in accordance with the "Action" section of Scottish Aviation Limited Jetstream SB No. 18/3 dated February 22, 1974, or FAA approved equivalent.

(b) If a defective NRV is found, prior to further flight, clean, repair, or replace the valve as necessary in accordance with the vendor's overhaul manual.

(c) The intervals between the repetitive inspections required by this AD may be adjusted up to 10 percent of the specified interval to allow accomplishing these inspections concurrent with other scheduled maintenance of the airplane.

(d) The inspections required by paragraph (a) of this AD are no longer required when British Aerospace Modification No. 5179 is installed.

(e) Aircraft may be flown in accordance with FAR 21.197 to a location where this AD can be accomplished.

(f) An equivalent method of compliance with this AD if used must be approved by the Manager, Aircraft Certification Staff, AEU-100, Europe, Africa and Middle East Office, FAA, c/o American Embassy, 1000 Brussels, Belgium.

This amendment becomes effective on March 17, 1983.

(Secs. 313(a), 601 and 603 of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421 and 1423); Sec. 6(c) Department of Transportation Act (49 U.S.C. 1655(c)); Sec. 11.89 of the Federal Aviation Regulations (14 CFR 11.89))

Note.—The FAA has determined that this regulation is an emergency regulation that is not major under Section 8 of Executive Order 12291. It is impracticable for the agency to follow the procedures of Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been further determined that this document involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). If this action is subsequently determined to involve a significant regulation, a final regulatory evaluation or analysis, as appropriate, will be prepared and placed in the regulatory docket (otherwise, an evaluation is not required). A copy of it, when filed, may be obtained by contacting the Rules Docket under the caption "ADDRESSES" at the location identified.

Issued in Kansas City, Missouri, on March 1, 1983.

Murray E. Smith,

Director, Central Region.

14 CFR Part 39

[Docket No. 82-ANE-10; Amdt. 39-4526]

Airworthiness Directives; Garrett Turbine Engine Company Engine Models TSE331-3; Correction

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule; correction.

SUMMARY: This document corrects a typographical error in Docket No. 82-ANE-10, Amdt. 39-4526, which revised the turbine wheel life limit and was published in the Federal Register on January 10, 1983 (48 FR 1031).

FOR FURTHER INFORMATION CONTACT: Bill Moring, Aerospace Engineer, ANM-174W, Western Aircraft Certification Field Office, Northwest Mountain Region, Post Office Box 92007, Worldway Postal Center, Los Angeles, California 90009; telephone: (213) 536-6361.

Accordingly, the FAA is correcting Amendment No. 39-4526 on page 1033 of the Federal Register of January 10, 1983 (48 FR 1031), paragraph "h", in the line beginning "either this time for initial inspection of this" as follows: change "of" to "or".

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); 14 CFR 11.89)

Issued in Burlington, Massachusetts, on March 7, 1983.

BILLING CODE 4910-13-M

---

14 CFR Part 39

[Docket No. 83-CE-9-AD; Amendment 39-4583]

Airworthiness Directives; Partenavia Costruzioni Aeronautiche S.p.A., Models P68 and P68B Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new Airworthiness Directive (AD), applicable to Partenavia Models P68 and P68B airplanes which requires replacement of the engine oil cooler left-hand elbow fitting and a visual inspection of the engine oil cooler hoses for wear. The manufacturer has indicated that this fitting may develop cracks and the routing to accommodate this fitting can cause chafing of the oil cooler hoses. The replacement of this fitting and inspection of the oil hoses will preclude these occurrences and consequent loss of engine oil.

DATES: Effective date: March 17, 1983.

Compliance: As prescribed in the body of the AD.

ADDRESSES: Partenavia SB No. 45, Registro Aeronautico Italiano (RAI) approved July 9, 1979, applicable to this AD may be obtained from Partenavia Costruzioni Aeronautiche S.p.A., Via Cava, Casoria-Napoli, Italy. A copy of this information is also contained in the Rules Docket, FAA, Office of the Regional Counsel, Room 1558, 601 East 12th Street, Kansas City, Missouri 64106.

FOR FURTHER INFORMATION CONTACT: Mr. Al O. Astorga, Aircraft Certification Staff, Europe, Africa, and Middle East Office, FAA, c/o American Embassy, 1000 Brussels, Belgium, Telephone 513.38.30; or Mr. Paul Cormaci, 601 East 12th Street, Kansas City, Missouri 64106, Telephone (816) 374-6942.

SUPPLEMENTARY INFORMATION: The manufacturer indicates that the engine oil cooler installation may develop cracks in the left-hand elbow fitting and the routing of the hose to this fitting can cause chafing of the engine oil cooler hoses on Partenavia Models P68 and P68B airplanes. Occurrences of this type could result in the loss of engine oil, engine failure or an inflight fire. As a result, Partenavia issued SB No. 45, R.A.I. approved July 9, 1979, which recommends replacement of the engine oil cooler left-hand elbow fitting, P/N AN822-6-6D, with a new fitting, P/N 7.5541-1, and an inspection of the engine oil cooler hoses for wear. The R.A.I., who has responsibility and authority to maintain the continuing airworthiness of these airplanes in Italy, has classified this Service Bulletin and the actions recommended therein by the manufacturer as mandatory to assure the continued airworthiness of the affected airplanes. On airplanes operated under Italian registration, this action has the same effect as an AD on airplanes certified for operation in the United States. The FAA relies upon the certification of the R.A.I. combined with FAA review of pertinent documentation in finding compliance of the design of these airplanes with the applicable United States airworthiness requirements and the airworthiness and conformity of products of this design certificated for operation in the United States. The FAA has examined the available information related to the issuance of Partenavia SB No. 45 and the mandatory classification of this Service Bulletin by the R.A.I.

Based on the foregoing, the FAA has determined that the unsafe condition described herein is likely to exist or develop in other products of the same type design certificated for operation in the United States. Accordingly, an AD is being issued requiring replacement of the engine oil cooler left-hand elbow fitting and a visual inspection of the engine oil cooler hoses for wear on Partenavia Costruzioni Aeronautiche S.p.A., Models P68 and P68B airplanes. Because an emergency condition exists that requires the immediate adoption of this regulation, it is found that notice and public procedure hereon are impractical and contrary to the public interest, and good cause exists for making this amendment effective in less than 30 days.

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of the Federal Aviation Regulations (14 CFR Section 39.13) is amended by adding the following new AD.

Partenavia Costruzioni Aeronautiche S.p.A.: Applies to Models P68 and P68B (Serial Nos. 1 through 182, excluding Serial Nos. 74, 89, 133, 142, 155, 163, and 171) airplanes certificated in any category.

Compliance: Required as indicated, unless already accomplished. To prevent possible failure of the engine oil cooler left-hand elbow fittings and oil cooler hoses, within the next 50 hours time-in-service on airplanes having 500 or more hours time-in-service on the effective date of this AD or prior to 550 hours time-in-service on airplanes having less than 500 hours time-in-service on the effective date of this AD, accomplish the following:

(a) Replace the engine oil cooler left-hand elbow fitting in accordance with steps one through nine of the INSTRUCTIONS FOR REPLACEMENT section of Partenavia Costruzioni Aeronautiche S.p.A. SB No. 45, R.A.I. approved July 9, 1979.

(b) Visually inspect the oil cooler hoses for chafing or damage, and prior to further flight, replace any unairworthy hoses.

(c) The airplane may be flown in accordance with FAR 21.197 to a location where this AD may be accomplished.

(d) An equivalent method of compliance with this AD may be used if approved by the Manager, Aircraft Certification Staff, Federal Aviation Administration, AEU-100, Europe, Africa, and Middle East Office, FAA, c/o American Embassy, 1000 Brussels, Belgium.

This amendment becomes effective on March 17, 1983.

(Secs. 313(a), 601 and 603 of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421 and 1423); Sec. 6(c) Department of Transportation Act (49 U.S.C. 1655(c)); Sec. 11.89 of the Federal Aviation Regulations (14 CFR Sec. 11.89))

Note.—The FAA has determined that this regulation is an emergency regulation that is not major under Section 8 of Executive Order 12291. It is impracticable for the agency to follow the procedures of Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been further determined that this document involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). If this action is subsequently determined to involve a significant regulation, a final regulatory evaluation or analysis, as appropriate, will be prepared and placed in the regulatory docket (otherwise, an evaluation is not required). A copy of it, when filed, may be obtained by contacting the Rules Docket under the caption "ADDRESSES" at the location identified.

Issued in Kansas City, Missouri, on March 1, 1983.

Murray E. Smith,

Director, Central Region.

BILLING CODE 4910-13-M

---

14 CFR Part 71

[Airspace Docket No. 82-ASO-57]

Alteration of Control Zone, Anniston, Alabama

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment alters the Anniston, Alabama, control zone by revising the geographical coordinates of the airport and increasing the size of the control zone arrival extension. The arrival extension presently established is not of sufficient size to contain aircraft while they are executing the nondirectional radio beacon instrument approach procedure to Runway 5 (NDB RWY 5). This action will provide the required controlled airspace.

EFFECTIVE DATE: 0901 G.m.t., June 9, 1983.

FOR FURTHER INFORMATION CONTACT: Donald Ross, Airspace and Procedures Branch, Air Traffic Division, Federal Aviation Administration, P.O. Box 20636, Atlanta, Georgia 30320.; telephone: (404) 763-7646.

SUPPLEMENTARY INFORMATION:

History

On Monday, December 27, 1982, the FAA proposed to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) by revising the geographical coordinates of the Anniston-Calhoun County Airport and increasing the size of the control zone extension associated with the NDB RWY 5 instrument approach procedure (47 FR 57498). Subsequent to issuance of the Notice, the final approach course of the instrument approach procedure was changed from 235° to 237°. This change is reflected in the revised description of the control zone. Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments were received in response to publication. Except for the change in final approach course noted above, this amendment is the same as that proposed in the notice. Section 71.171 of Part 71 of the Federal Aviation Regulations was republished in Advisory Circular AC 70-3A dated January 3, 1983.

The Rule

This amendment to Part 71 of the Federal Aviation Regulations corrects the coordinates of the Anniston-Calhoun County Airport and increases the size of the control zone extension to accommodate aeronautical activities in the vicinity of the airport.

List of Subjects in 14 CFR Part 71

Aviation safety, Airspace, Control zone.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, § 71.171 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) (as amended) is further amended, effective 0901 G.m.t., June 9, 1983, as follows:

Anniston-Calhoun County Airport, AL—Amended

By deleting the words, "* * * (latitude 33° 35'23"N., longitude 85° 51'20"W.); within 1 mile each side of the ILS localizer SW course, extending from the 5-mile zone to the OM * * *", and substituting for them the words, "* * * (Lat. 33° 35'24"N., Long. 85° 51' 20"W.); within 3 miles each side of the 237° bearing from the Anniston RBN, extending from the 5-mile radius zone to 8.5 miles southwest of the RBN * * *".

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); Sec. 6 (c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.69)

Note.—The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in East Point, Georgia, on March 3, 1983.

Thomas H. Protiva,

Acting Director, Southern Region.

BILLING CODE 4910-13-M

CIVIL AERONAUTICS BOARD

14 CFR Part 385

[Organization Regulation Amendment No. 122; Regulation OR-208]

Delegations and Review of Action Under Delegation; Nonhearing Matters

AGENCY: Civil Aeronautics Board

ACTION: Final rule.

SUMMARY: The CAB amends its delegations of authority to allow the Director, Bureau of International Aviation, to grant waivers of its filing fee requirements to foreign air carriers. This rule is intended to simplify the waiver process for these carriers.

DATES: Effective: March 14, 1983.

Adopted: March 9, 1983.

FOR FURTHER INFORMATION CONTACT: Patricia DePuy, Regulatory Affairs Division, 202-673-5878; or Joseph A. Brooks, Office of the General Counsel, Civil Aeronautics Board, 1825 Connecticut Avenue, NW., Washington, D.C. 20428, 202-673-5442.

SUPPLEMENTARY INFORMATION: By OR-204 (48 FR 635, January 6, 1983), the Board adopted a new filing fee schedule for work items primarily benefiting the applicant (14 CFR Part 389). In that rule, the Board stated that it did not have the authority to grant a blanket waiver from these fees for foreign air carriers. Under section 1102 of the Federal Aviation Act, however, the Board is required to act in accordance with international agreements and treaties, between the United States and foreign countries (49 U.S.C. 1502). For that reason, the Board further stated that it would consider granting waivers to foreign carriers to the extent that their home countries charge or do not charge fees to U.S. air carriers for filing documents.

By this rule, the Board is delegating authority to the Director, Bureau of International Aviation (BIA), to grant or deny applications under 14 CFR 389.24 by foreign air carriers, based on reciprocity with their home governments, for waivers of the filing fee requirements in Part 389. The Director, BIA, has knowledge of reciprocity issues and handles many of the filing by foreign carriers.

List of Subjects in 14 CFR Part 385

Administrative practice and procedure, and Authority delegations.

PART 385—[AMENDED]

1. Accordingly, the Civil Aeronautics Board amends 14 CFR Part 385, *Delegations and Review of Action under Delegation: Nonhearing Matters*, as follows:

1. The authority for Part 385 is:

Authority: Secs. 102, 204, 401, 402, 403, 407, 410, Pub. L. 85-726, as amended; 72 Stat. 740, 743, 754, 757, 758, 766, 771; 49 U.S.C. 1302, 1324, 1371, 1372, 1378, 1377, 1388. Reorganization Plan No. 3 of 1961, 26 FR 5989.

2. Section 385.26 is amended by adding a new paragraph (dd) to read:

§ 385.26 Delegation to the Director of the Bureau of International Aviation

* * * * *

(dd) Grant or deny, or ask for additional information about, applications by or on behalf of foreign air carriers, when filed under § 389.24 of this chapter, for waiver of the Board's filing fee requirements, in accordance with Board policy and precedent.

By the Civil Aeronautics Board:

Phyllis T. Kaylor,

Secretary.

[FR Doc. 83-6820 Filed 3-11-83; 8:45 am]

BILLING CODE 6320-01-M

14 CFR Part 389

[Organization Regulations Amdt. No. 32; Regulation OR-209]

Fees and Charges for Special Services

AGENCY: Civil Aeronautics Board.

ACTION: Final rule.

SUMMARY: The CAB amends its filing fee rules to require that applications for waivers of fees by foreign air carriers be filed with the Director, Bureau of International Aviation. This will simplify the processing of those applications.

DATES: Effective: March 14, 1983. Adopted: March 9, 1983.

FOR FURTHER INFORMATION CONTACT: Patricia DePuy, Regulatory Affairs Division, 202-673-5878; or Joseph A. Brooks, Office of the General Counsel, 1825 Connecticut Avenue, NW., Washington, D.C. 20428, 202-673-5442.

SUPPLEMENTARY INFORMATION: The reasons for this rule are explained in OR-208, issued contemporaneously.

List of Subjects in 14 CFR Part 389

Archives and Records.

Accordingly, the Civil Aeronautics Board amends 14 CFR Part 389, *Fees and Charges for Special Services*, as follows:

PART 389—[AMENDED]

1. The authority for Part 389 is:

Authority: Secs. 204, 1002, Pub. L. 85-726, as amended, 72 Stat. 743, 797; 49 U.S.C. 1324, 1502. Act of August 3, 1951, Ch. 370, 65 Stat. 290; 31 U.S.C. 483a.

2. Section 389.24 is revised to read:

§ 389.24 Foreign air carriers.

A foreign air carrier, or such carriers, if from the same country, acting jointly, may apply for a waiver of the requirements of this part based on reciprocity for U.S. air carriers contained in the requirement of their home governments, or as provided in a treaty or agreement with the United States. To apply for a waiver under this section, foreign air carriers shall send waiver requests to the Director, Bureau of International Aviation. The request should include applicable official government rules, decisions, statements of policy, or comparable evidence concerning filing fees for U.S. air carriers, or for all carriers serving that country. Once a waiver has been granted for a specific country, no further waiver applications need be filed for that country.

By the Civil Aeronautics Board.

Phyllis T. Kaylor,

Secretary.

SECURITIES AND EXCHANGE COMMISSION

17 CFR Part 240

[Release No. 33-6456; 34-19565; IC-13069; File No. 57-921]

Prohibitions Against Trading by Persons Interested in a Distribution

AGENCY: Securities and Exchange Commission.

ACTION: Final rule.

SUMMARY: The Commission is adopting amendments to Rule 10b-6 under the Securities Exchange Act of 1934. The rule regulates trading in securities by participants in a distribution of those securities. Among other things, the amendments define the term "distribution" for purposes of the rule and permit certain distribution participants to continue trading securities until the commencement of the applicable two or ten business day cooling-off period. The Commission also is adopting an amendment to Rule 10b-8 under the Act, which applies to purchases and sales during rights offerings. The amendment extends the scope of Rule 10b-8 to cover purchasing and selling activity by broker-dealers who act as "standby underwriters" in connection with a call for redemption of convertible securities.

EFFECTIVE DATES: April 13, 1983.

FOR FURTHER INFORMATION CONTACT: Any of the following attorneys in the Office of Legal Policy and Trading Practices, Division of Market Regulation, Securities and Exchange Commission, 450 Fifth Street, NW, Washington, D.C. 20549: John B. Manning, Jr., (202–272–2879); Howard A Bartnick (202–272–2880); Kenneth B. Orenbach (202–272–7391); Joel M. Bludman (202–272–2846); Allyn C. Shepard (202–272–2828); Eneida Rosa (202–272–7496); Nancy J. Burke (202–272–2878); Kevin A. Corcoran (202–272–7394).

SUPPLEMENTARY INFORMATION:

Executive Summary

I. Background

The Securities and Exchange Commission is adopting amendments to Rules 10b–6 [1] and 10b–8 [2] under the Securities Exchange Act of 1934 (the "Act"). These amendments were published for comment on March 16, 1982.[3]

Subject to certain exceptions, Rule 10b–6 prohibits persons who are engaged in a distribution of securities from bidding for or purchasing, or inducing other persons to bid for or purchase, such securities, any security of the same class and series at those securities, or any right to purchase any such security until they have completed their participation in the distribution. The rule's purpose is to prevent those persons from conditioning the market to facilitate the distribution. The rule is thus designed to protect the integrity of the securities trading market as an independent pricing mechanism during the distribution period. The rule originally contained eleven exceptions to its general prohibitions that were designed to facilitate an orderly distribution of securities or to limit disruption in the trading market for the securities being distributed.

Rule 10b–8 was adopted, together with rules 10b–7 [4] and 10b–8, in 1955.[5] Over the succeeding quarter century, the securities markets have changed considerably. For many securities, the markets are deeper and generally more liquid. The implementation of new trading systems has greatly enhanced market efficiency. Also, the dissemination of market information concerning securities transactions has vastly improved. These changes suggest that the scope of the original prohibitions of the rule is more restrictive than necessary today.

In addition, increasingly varied techniques have been developed since 1955 to effect distributions of securities. At the same time, the process by which securities are registered for sale has been streamlined. These developments have raised questions under Rule 10b–6 that were not contemplated when it was adopted, involving in many instances transactions that would be prohibited if the rule were literally applied but that do not present a significant opportunity for manipulative abuse. Through the exemptive and no-action and interpretive processes, the Commission and its staff have attempted to accommodate the rule to changing business needs consistent with its anti-manipulative purpose. A result of this process, however, has been the development of staff positions under the rule that, in connection with various kinds of transactions, require case-by-case application to the Commission for routine exemptive relief. In addition, some interpretive positions have not received sufficient publicity to avoid uncertainty among market participants. The amendments adopted today codify many staff interpretive positions, substantially reducing the need to seek interpretive relief under the rule, and thereby eliminate unnecessary costs and burdens that have been imposed on both the Commission and persons subject to the rule.

Sixty-one comments were received with respect to the proposed amendments to Rule 10b–6.[6] Many commentators supported the rule changes proposed while making suggestions concerning the substance and language of the rule. Many of these suggestions have been incorporated by the Commission in the amendments adopted today.

II. Summary of Amendments

In general, these amendments track those proposed in March 1982, as more fully discussed below. The rule, as amended, permits underwriters, prospective underwriters, and dealers to continue solicited purchasing activity, as principal, whether in the over-the-counter market or on an exchange, until two business days before commencement of any offers or sales in a distribution, in the case of stock with a minimum price of five dollars per share and a minimum public float of 400,000 shares, or a security of the same class and series as such stock, or any right to purchase any such security. Purchases as principal by participants in distributions of securities that do not meet those criteria remain subject to the traditional ten day "cooling-off" period.[7] The amendments also allow unsolicited principal transactions to be effected until the date of commencement of offers and sales in a distribution, without regard to the type of security being distributed. The rule now also permits issuers and certain related persons to effect purchases that otherwise would be prohibited until the applicable two or ten business day "cooling-off" period before any offers or sales in the distribution.[8]

The Commission also is adopting a definition of the term "distribution" for purposes of the rule. The definition codifies principles established through administrative and judicial decisions. After considering adverse comments, however, the Commission has decided not to adopt the "safe harbor" provision that was set forth in the definition as proposed. The Commission has also adopted new Exception (xiii) to Rule 10b–6. This exception covers bids for and purchases of nonconvertible debt securities and nonconvertible preferred stock rated by at least one nationally recognized statistical rating organization as being of "investment grade."

III. Review of Rule 10b–6

Rule 10b–6, as amended today, is designed to apply to all types of distributions, including shelf-registered

[6] File No. S7–821 contains these public comment letters as well as a Summary of Comments prepared by the staff of the Commission. Three comment letters were received by the Commission subsequent to the preparation of the Summary of Comments. These letters are contained in the rulemaking file and were considered by the Commission in reaching its conclusions with regard to this rulemaking proceeding.

[7] Of course, this ten business day period will now apply to exchange as well as over-the-counter transactions.

[8] This release discusses the applicability of the rule to participants in shelf offerings under new Rule 415 under the Securities Act of 1933 ("Securities Act"). 17 CFR 230.415; Securities Act Release No. 6383 (March 3, 1982), 47 FR 11380 (release adopting temporary Rule 415); Securities Act Release No. 6423 (September 2, 1982), 47 FR 39799 (release extending Rule 415). In Securities Exchange Act Release No. 18699, (April 20, 1982), 47 FR 18359, the Commission published a letter of its Division of Market Regulation in which the Division set forth certain interpretive positions regarding the application of the proposed amendments to certain activities engaged in during offerings of securities involving the use of Rule 415 ("Interpretive Release"). To the extent that this release or any of the final amendments are inconsistent with positions set forth in the Interpretive Release, such positions are so modified.

offerings pursuant to Rule 415. Prior to December 31, 1983, the Commission will determine whether to adopt Rule 415 on a permanent basis, whether to adopt modifications to the rule, or whether to allow it to expire.[9] When the Commission makes that determination, it will have the opportunity to re-examine the changes to Rule 10b–6 being implemented today. In that regard, the Commission invites interested persons to provide their views and any supporting data concerning the effects of these amendments. The Commission expects that any reevaluation of Rule 10b–6 will consider the operation of the amendments to Exception (xi) and the adoption of Exception (xii), the impact of the single distribution analysis on participants in shelf-registered offerings, the appropriate categories of persons that should be subject to the rule's prohibitions, the practicability of pre-effective stabilization in compliance with Rule 10b–7, the advisability of shortening the cooling-off period for the exercise of exchange-traded call options, and the advisability of permitting solicited brokerage transactions under Exception (xi) or (v).

IV. Regulatory Flexibility Act Considerations

The Chairman of the Commission has certified that the proposed amendments to Rules 10b–6 and 10b–8, if adopted, would not have a significant impact on a substantial number of small entities. The Commission received two comments concerning the Chairman's certification. Both of these comments, however, related to the proposed definitional safe harbor which the Commission has determined not to adopt.

V. Effects On Competition and Statutory Basis

Section 23(a)(2) of the Act[10] requires the Commission, in adopting rules under the Act, to consider the anti-competitive effect of such rules, if any, and to balance any impact against the regulatory benefits gained in terms of furthering the purposes of the Act. The Commission has considered the amendments to Rules 10b–6 and 10b–8 in light of the standards cited in Section 23(a)(2) and believes for the reasons stated in this release that adoption of the amendments will not impose any burden on competition not necessary or appropriate in furtherance of the Act.

The amendments to Rules 10b–6 and 10b–8 are adopted under the Act, 15 U.S.C. 78a *et seq.*, and particularly Sections 2, 3, 9(a)(6), 10(b), 13(e), 15(c) and 23(a), 15 U.S.C. 78b, 78c, 78i(a)(6), 78j(b), 78m(e), 78o(c) and 78w(a).

Additional Information

The discussion concerning the amendments is divided into five parts. The first discusses the definition of the term "distribution" for purposes of the rule, including the Commission's interpretation of the term in the context of shelf offerings under Rule 415. The second part discusses the securities covered by the rule, specifically new Exception (xiii) relating to certain nonconvertible investment grade securities. The third section discusses persons subject to the rule, specifically affiliated purchasers of issuers or other persons ("selling shareholders") on whose behalf a distribution is being made and affiliates of underwriters, prospective underwriters, brokers and dealers. The fourth part discusses the relaxation of the rule's prohibitions by amendment to Exception (xi) and the adoption of Exception (xii). This part includes a discussion of the operation of these exceptions in connection with both mergers and Rule 415 offerings. The fifth part of the release details the amendments to Exceptions (ii), (iii), (iv) and (vii) of the rule (and certain conforming changes to Rule 10b–8), the status of "overallotment" options for purposes of Rule 10b–6, and an amendment to Rule 10b–8 relating to standby underwriting arrangements.

I. Definition of the Term "Distribution" for Purposes of Rule 10b–6

A. *Definition of "Distribution".* In the Proposing Release, the Commission published for public comment a definition of the term "distribution" for purposes of Rule 10b–6. As proposed, a distribution would have been distinguished from customary trading and market making transactions by reference to the magnitude of the offering or the presence of special selling efforts and selling methods or the payment of compensation greater than that normally paid in connection with ordinary trading transactions. These criteria were intended to identify circumstances that may give rise to an incentive to engage in manipulative purchasing activities.[11] The definition as proposed also included a "safe harbor" that would have excepted from its scope transactions that comply with the volume limitations and manner of sale provisions of Rule 144 under the Securities Act.

After analyzing comments received, the Commission has determined to include in Rule 10b–6 a definition of the term distribution that substantially reflects current decisional law, particularly that set forth in the *Bruns, Nordeman* case.[12] That is, a distribution for purposes of Rule 10b–6 is to be distinguished from ordinary trading transactions on the basis of the magnitude of the offering and the presence of special selling efforts and selling methods.[13] The Commission believes that it is useful to codify as a part of Rule 10b–6 its longstanding approach to the distribution question. By specifically including in the rule the factors under existing case law that should be applied to specific facts, the Commission will provide issuers, broker-dealers and other persons subject to Rule 10b–6 a measure of guidance in determining whether certain of their activities fall within the scope of the rule. At the same time, the definition retains the flexibility necessary to take into account changes in the securities markets and the processes by which securities are offered and sold.

B. The Proposed Safe Harbor. In the Proposing Release, the Commission proposed to add to the definition of distribution a "safe harbor" for sales of securities that comply with the volume limitations and the manner of sale provisions of paragraphs (e) and (f), respectively, of Rule 144 under the Securities Act.[14] The Commission received a significant number of comments that opposed inclusion of the safe harbor in the definition. Several commentators argued that the safe harbor was unnecessary and of uncertain utility, particularly in light of the narrow scope of Rule 144, the

[9] Securities Act Release No. 6423 (September 2, 1982).

[10] 15 U.S.C. 78w(a)(2).

[11] In the leading decision discussing the scope of the term "distribution" as used in Rule 10b–6, the Commission noted that the term, construed in light of the rule's purposes, includes offerings of securities of such a nature or magnitude that purchases by participants should be restricted in order to prevent manipulative practices. Thus, a distribution was to be distinguished from ordinary trading transactions and other normal conduct of a securities business based upon the magnitude of the offering and the selling efforts and selling methods employed. *See In the Matter of Bruns, Nordeman & Co.*, 40 SEC 652, 660 (1961) (*"Bruns, Nordeman"*).

[12] One commentator proposed a definition that would limit the term "distribution" to primary public offerings of securities for cash or in exchange for other publicly-held securities and organized secondary offerings involving unusual selling efforts. Such a definition would, however, represent a significant departure from administrative and judicial cases construing the term "distribution" for purposes of Rule 10b–6, which hold that there may be situations in which other offerings constitute distributions.

[13] The presence of special selling efforts and selling methods may be indicated in a number of ways, including the payment of compensation greater than that normally paid in connection with ordinary trading transactions.

[14] 17 CFR 230.144.

likelihood that any sale of securities that satisfied its requirements would clearly fall outside of the scope of the traditional definition of distribution, and the potential interpretive difficulties that could arise from incorporating portions of a Securities Act rule into Rule 10b–6.[15] Accordingly, the Commission has determined not to adopt the "safe harbor" proviso.

C. Application of the Term "Distribution" to Shelf-Registered Offerings. The definition of "distribution" adopted today applies to offerings of securities currently permitted under Rule 415 of the Securities Act. As indicated in the Proposing Release, the determination of whether there is a distribution for purposes of Rule 10b–6 in the context of both primary and secondary shelf-registered offerings will depend on the same factors as does any other offering of securities.[16] The Commission continues to believe that any shelf-registered offering that constitutes a Rule 10b–6 distribution should be considered a single distribution for purposes of the rule. The issuer or selling shareholder therefore will be deemed to be engaged in a distribution from the time it determines to proceed with a shelf-registered offering of securities that constitutes a distribution. As discussed below in greater detail, when a broker-dealer will be deemed to have commenced its participation in a shelf-registered distribution will depend upon the particular circumstances of its decision to participate in an offering.[17]

Since there may be extended periods during which there are no selling efforts under an effective shelf-registration, the Commission believes it is unnecessary to subject issuers, broker-dealers and other persons otherwise subject to Rule 10b–6 to the strict prohibitions of the rule throughout the life of the shelf. For that and other reasons, the Commission today is adopting new Exception (xii) [18] and has modified Exception (xi),[19] to permit issuers, underwriters, prospective underwriters and dealers and certain other persons engaged in a distribution, including a shelf distribution, of securities to bid for or purchase the securities that are the subject of the distribution up until at least two business days prior to any offers or sales off the shelf,[20] in the case of securities meeting the minimum price and public float test. Issuers, underwriters, prospective underwriters, dealers and other participants in a distribution of other securities would be subject to the traditional ten business day cooling-off period. Persons subject to the rule as a consequence of their participation in a shelf-registered distribution therefore are only required to cease their purchasing activities with respect to the security in distribution during the applicable cooling-off period and during any period in which offers or sales are being made off the shelf. The short "cooling-off" periods afforded by these exceptions are designed, in part, to eliminate any unnecessary hardship that Rule 10b–6 may have on persons that come within the rule's prohibitions as a result of their participation in a shelf-registered distribution. The Commission plans to continue to review the impact of Rule 10b–6 on persons participating in shelf-registered distributions and welcomes the views and supporting data of any interested persons.

II. Securities Covered by Rule 10b–6: A New Exception for Nonconvertible Investment Grade Debt and Preferred Securities

Historically, Rule 10b–6 has applied to distributions of all types of securities. The Commission is today adopting a new exception to the rule, Exception (xiii), that permits persons subject to the rule to bid for or purchase certain nonconvertible investment grade securities of an issuer during a distribution of such securities or during a distribution of certain other nonconvertible investment grade securities of that issuer that are of the same class and series as those to be purchased.

As proposed, Exception (xiii) substantially followed the criteria established in a no-action letter concerning American Telephone and Telegraph Company (dated February 20, 1975) ("AT&T letter") and reflected the Commission's belief that the fungibility of certain investment grade debt securities makes manipulation of their price very difficult. The Commission proposed that transactions in nonconvertible debt securities be excepted from Rule 10b–6, provided that the issuer is subject to the reporting requirements of Section 13 or Section 15(d) of the Act; that the securities in distribution and those to be purchased are rated in one of the four highest rating categories by at least two nationally recognized statistical rating organizations ("NRSROs"); and that the issuer's outstanding public debt amount to an aggregate of at least $100 million in face value.

Every commentator that addressed Exception (xiii) argued that requiring the securities to be rated by two NRSROs was overly restrictive, particularly since it is not uncommon for an issuer of debt securities to obtain just one such rating.[21] Accordingly, the Commission has modified Exception (xiii) to specify that the nonconvertible securities must be rated by at least one NRSRO in one of its generic rating categories that signifies investment grade. Both the securities in distribution and those to be purchased must have an investment grade rating. Moreover, the exception will still be available for securities that are rated investment grade by one NRSRO but lower by one or more other NRSROs.

To ensure flexibility, the Commission has determined not to specifically define the particular categories signifying investment grade. Rather, the Commission accepts, for purposes of the exception, the investment grade categories adopted by each NRSRO or, if a particular NRSRO does not specifically designate certain categories as investment grade, those categories commonly viewed as investment grade within the securities industry. For general guidance, the Commission notes that the definition of "investment grade securities" contained in the General Instructions to Form S–3 under the Securities Act typically includes the four highest rating categories, within which there may be sub-categories or gradations. The Commission recognizes,

---

[15] Many commentators feared that the safe harbor would become a prescriptive standard as a result of which any sale of securities failing to meet both the volume limitations and manner of sale provisions of Rule 144 automatically would be deemed to constitute a distribution within the meaning of Rule 10b–6, although no such presumption was intended nor reasonably implied by the Commission's proposal.

[16] Among the volume factors historically utilized by the staff to determined whether a shelf offering constitutes a distribution for purposes of Rule 10b–6 are the number of shares to be registered for sale by the issuer and the percentage of the outstanding shares, the public float and the trading volume that those shares represent.

[18] See Section IV.B. *infra.*

[19] See Section IV.A. *infra.*

[20] Depending on the particular security, two or ten business days is the maximum "cooling-off" period. Depending upon when a broker-dealer becomes a participant in the distribution, that period may be shorter. In a shelf-registered offering, a broker-dealer will generally not be subject to the prohibitions of Rule 10b–6 for the entire distribution period unless it has a continuing agreement with the issuer. See Section IV.A.4. *infra.*

[21] Most commentators favored the approach taken by the Commission in its adoption, as part of the integrated disclosure system, of Form S–3 under the Securities Act, pursuant to which certain primary offerings of nonconvertible debt and preferred securities need be rated investment grade by only on NRSRO to qualify for registration on Form S–3, provided that the registrants meet the other eligibility requirements for use of that form. *See* Securities Act Release No. 6383 (March 3, 1982).

however, that a particular NRSRO may utilize a differing rating system (*e.g.*, a number scale) as to which that definition is not helpful and which may include more than four investment grade categories.

Several commentators suggested expanding the exception to include nonconvertible preferred securities. Nonconvertible preferred securities possess some of the attributes of debt securities and, when rated investment grade, generally trade on the basis of their value in relation to comparably-rated offerings of other issuers. In light of those comments, and particularly in light of the fact that the potential for price manipulation of such securities appears negligible, the Commission has decided to include in the exception, as adopted, investment grade nonconvertible preferred securities.

Commentators were specifically requested to address the need for the conditions contained in the AT&T letter which required that (1) the issuer be a reporting company and (2) the issuer maintain a minimum aggregate outstanding public debt. Two commentators remarked that it was unnecessary to require reporting by the issuer since the availability of information under the reporting provisions did not cause such investment grade securities to be more or less subject to manipulative abuse than other investment grade securities. In addition, as a practical matter, publicly offered debt and preferred securities, aside from certain foreign issues, generally do not receive an investment grade rating unless the issuer is a reporting company. Consequently, the Commission has determined not to include this condition in Exception (xiii) as adopted.

Commentators also questioned the need for the condition requiring the issuer's total outstanding public debt to aggregate at least $100 million in face amount. As with the reporting condition, it was argued that this requirement was unnecessary, especially in view of the apparent difficulty of manipulating the price of investment grade securities that trade on the basis of their relative value. As the Commission indicated in the Proposing Release, the aggregate outstanding public debt condition may be somewhat inconsistent with the concept on which Exception (xiii) is based, *viz*, that investment grade debt and preferred securities are traded on the basis of their yields and financial ratings and therefore are largely fungible. Since such a requirement may provide only limited added assurance against price manipulation in a context in which manipulation seems difficult, the Commission has also adopted Exception (xiii) without this condition.

In the case of debt securities failing to satisfy the requirements of proposed Exception (xiii), the Commission noted in the Proposing Release the staff's intention to adhere to the position taken in the no-action letter concerning Gamble-Skogmo, Inc. (dated January 11, 1974) ("Gamble-Skogmo letter"). In the Gamble-Skogmo letter, the staff considered outstanding non-investment grade debt securities of an issuer that varied by at least one percent in the coupon interest rate and by at least ten years in the maturity date from the terms of the debt securities being distributed not to be of the "same class and series." [22]

The Commission solicited comments, however, regarding whether the staff should modify the *Gamble-Skogmo* standards. A few commentators proposed that the debt securities outstanding and those in distribution should not be deemed to be of the "same class and series" whenever a significant variation exists in either the interest rates or maturity dates. One of these commentators suggested retaining the current one percent factor while lowering the maturity date factor to five years, but adopting these as alternative criteria. Another commentator recommended that the *Gamble-Skogmo* standards be revised to require a two percent variation in the coupon rates and a four year variation in the maturity dates in order for the debt securities outstanding and those being distributed not to be considered of the "same class and series." Although the Commission has decided not to modify, on an across the board basis, the *Gamble-Skogmo* criteria in the case of debt securities that do not fall within Exception (xiii), the staff may continue to provide no-action relief where an appropriate set of facts and circumstances indicates that outstanding noninvestment grade debt to be purchased is not part of the same class and series as the securities being distributed.

III. Affiliates and Affiliated Purchasers of Distribution Participants

A. *Affiliated Purchasers of Issuers and Selling Shareholders.* Historically, the prohibitions of Rule 10b–6 have been interpreted to apply to distribution participants and to all affiliates of such participants.[23] Thus, unless specifically exempted from or excepted by the rule, an affiliate of a distribution participant has been precluded from bidding for or purchasing the security being distributed or any other security covered by the rule during the distribution period.

Today, the Commission has narrowed the categories of persons associated with issuers or other persons (selling shareholders) on whose behalf a distribution is being made that are covered by the rule. Rule 10b–6 now applies to issuers and selling shareholders and their "affiliated purchasers," a new term defined in the rule by alternative tests. Under the definition of "affiliated purchaser," any person acting in concert with the issuer or selling shareholder in connection with the acquisition or distribution of the issuer's securities is subject to Rule 10b–6. The Commission notes that persons, particularly decisional officers of the issuer, that participate directly or indirectly in the recommendation of, determination to proceed with, or implementation of, the distribution will be considered to be acting in concert with the issuer in effecting purchases during periods when the issuer would be prohibited from purchasing.

The second clause of the definition restricts coverage of the rule to any affiliate who, directly or indirectly, controls the purchases of the issuer or selling shareholder, whose purchases are controlled by the issuer or selling shareholder, or whose purchases are under common control with those of the issuer or selling shareholder.[24] As guidance, the Commission notes that one kind of control relationship covered by the second clause of the definition would arise when an affiliate of the issuer or selling shareholder has the ability or authority to purchase, or direct the purchase of, the issuer's securities for such issuer or selling shareholder.[25]

---

[22] The staff in the Gamble-Skogmo letter also viewed outstanding debt securities of the issuer not to be of the "same class and series" as the debt securities being distributed when there existed a 23-year difference in the securities' maturity dates, regardless of their respective interest rates.

[23] To determine whether certain persons were covered by Rule 10b–6 owing to their relationship as an affiliate of a distribution participant, the staff has looked to whether a person controls, is controlled by, or is under common control with such participant. In addition, the prohibitions of the rule have been considered applicable to any other person sharing a special relationship with the distribution participant which would provide that person with an incentive to condition the market to facilitate the distribution of the offered security.

[24] The term "affiliated purchaser," as defined in new paragraph (c)(6) of Rule 10b–6, is similar to the definition of that term contained in paragraph (a)(2) of Rule 10b–18, 17 CFR 240.10b–18(a)(2). See Securities Exchange Act Release No. 19244 (November 17, 1982), 47 FR 53333.

[25] The determination of whether an affiliate satisfies any of the control criteria specified in the definition must in the first instance be made by the issuer, selling shareholder or the affiliate. While the definition of affiliated purchaser is intended to limit

Of course, affiliates of the issuer or selling shareholder, *e.g.*, officers and directors, who do not have the ability or authority to purchase, or to direct purchases of, the issuer's securities on behalf of the issuer or selling shareholder, would not be affiliated purchasers under this clause of the definition, although depending on their involvement, certain of them may be affiliated purchasers under the first clause thereof.

B. *Affiliates of Underwriters and Broker-dealers.* In the Proposing Release, the Commission did not propose to modify its historical position that all affiliates of an underwriter, prospective underwriter, broker or dealer participating in a distribution are subject to the prohibitions of Rule 10b–6 to the same extent as the distribution participant. The Commission recognizes, however, that to continue to subject every affiliate of a broker-dealer to the rule's restrictions may be unnecessarily restrictive, particularly in light of the increasing number of firms that are offering diversified financial services, often through separate but affiliated entities. In addition, certain affiliates of financial service firms may not offer financial services at all.

The Commission intends to reconsider the appropriate scope of Rule 10b–6 as it applies to affiliates of underwriters, brokers, and dealers involved in a distribution. In that connection, the Commission may consider a variety of approaches to the affiliate issue. It might, for example, be appropriate to amend the rule to delineate with greater particularity the precise categories of natural persons and entities that should be subject to the rule's purchasing limitations. Since the Commission has not previously solicited comment on this issue and commentators generally did not address it, the Commission is not now amending Rule 10b–6 in this area. The Commission, however, encourages interested persons to submit their views on whether the Commission should amend the rule to define more precisely its application to affiliates of an underwriter or broker-dealer.

IV. General Relaxation of Trading Restrictions

A. *Exception (xi).* Exception (xi) of the rule has permitted underwriters, prospective underwriters and dealers participating in a distribution of securities to bid for or purchase covered securities ten or more business days prior to the proposed commencement of such distribution (or five business days in the case of unsolicited purchases) provided that such bids and purchases are made otherwise than on a securities exchange. As proposed, Exception (xi) would have been amended to permit underwriters and other dealer participants to bid for or purchase covered securities until the later of three business days before the commencement of offers or sales of the security in distribution or such other time as those persons become participants in the distribution.[26] In addition to shortening the cooling-off period, the proposed revisions would have eliminated the distinction that existed under the exception between exchange traded and over-the-counter transactions.[27]

The comments on the proposed amendments to Exception (xi) generally supported making the exception less restrictive in light of the changes in the securities markets since the rule's adoption. Many commentators, however, suggested alternative approaches regarding the appropriate duration of the cooling-off period and the parties to whom the exception should apply. After considering these comments, the Commission has determined to adopt the proposed amendments with certain modifications.

In summary, the Commission has determined to shorten the maximum cooling-off period to two business days in the case of stock with a minimum price of five dollars per share and a minimum public float of 400,000 shares, or any security of the same class and series as that stock, or any right to purchase any such security. A five business day maximum cooling-off period is imposed for the exercise of exchange-traded call options on such securities. The current ten business day maximum cooling-off period is retained for all other securities. In addition, the Commission is adopting its proposal to extend the application of Exception (xi) to both exchange and over-the-counter transactions. The Commission has also determined to adopt proposed revisions to the exception permitting unsolicited purchases of any type of security until the date of commencement of offers or sales in a distribution.

1. *Cooling-Off Period.* In the Proposing Release, the Commission proposed reducing the maximum ten business day cooling-off period under Exception (xi) for solicited bids and purchases by underwriters, prospective underwriters and dealers to three business days. The Commission, however, requested comment on whether there should be a longer cooling-of period for certain securities, such as securities of issuers qualified only to use new Form S–1 under the Securities Act.

Many of the commentators supported this proposal without significant qualifications. Some also supported requiring a longer cooling-off period in connection with distributions of illiquid, thinly traded securities that might be easily manipulated. In response to the Commission's request for comments on whether a longer cooling-off period should be imposed in distributions of securities of an issuer qualified only to use Form S–1, several commentators asserted that criteria other than eligibility for a particular registration form should be used to determine which issuers should be subject to a longer cooling-off period. Several approaches were suggested.

One commentator suggested a test based on the depth and liquidity of the market, while another recommended that specific criteria, such as volume, number of market makers and availability of quotation information, be used. Another commentator suggested that the three business day period be made available to those issuers that meet the eligibility standards of paragraphs B (securities registered under the Act) and C(1) (three year reporting company) of Form S–2 under

---

the persons who otherwise would be subject to Rule 10b–6, the issuer need not institute or maintain a formal program providing for the repurchase of its securities as a prerequisite to an affiliate's designation as an affiliated purchaser. The critical factor is whether the affiliate is empowered, expressly or implicitly, to bid for or purchase the issuer's securities, or to direct such purchasing activities, on behalf of the issuer or selling shareholder, if such purchases were to be effected.

[26] Unsolicited bids or purchases could be made until the day offers or sales commence.

[27] In the Proposing Release, the staff took the position that it would not recommend that the Commission take enforcement action under Rule 10b–6 if broker-dealers participating in certain distributions subject to Rule 10b–6 conformed their trading activity to the proposed amendments from the date of the Proposing Release until the amendments to the rule were adopted. Under this interim no-action position, broker-dealers participating in distributions conducted on behalf of issuers qualified to use Form S–2 or S–3 under the Securities Act were subject to the proposed three day cooling-of period. The traditional ten day cooling-off period continued to apply to distributions of securities of those issuers solely qualified to use Form S–1 under the Securities Act. The longer cooling-off period was applied to broker-dealer participants in distributions on behalf of issues for whom only Form S–1 is available, because the markets for these securities may be less liquid and stable than the markets for securities of issuers qualified to use Form S–2 or S–3. In addition, less information is publicly available concerning such issuers and these issuers do not have extensive reporting histories. The Commission also specifically solicited comment on whether a longer cooling-off period should be provided under Exception (xi) for distributions of certain securities, in particular, securities of an issuer qualified only to use Form S–1, and whether criteria other than the particular registration statement filed by an issuer should be utilized to determine the appropriate length of the cooling-off period.

the Securities Act, asserting that this standard would ensure that the issuer has been part of the integrated disclosure system for a suitable period of time. Two commentators suggested that the Commission apply the three day cooling-off period to all issuers for a limited period on an experimental basis until such time as the Commission determines that a different period is appropriate for some issuers.

One commentator asserted that the cooling-off period should be reduced to two business days. In addition, in response to the Commission's request for comments as to whether a longer cooling-off period should be applied to distributions of securities of an issuer qualified only to use Form S–1, this commentator asserted that the two business day cooling-off period should extend to all reporting companies, but suggested that if a longer cooling-off period were to be imposed for certain securities, the shorter cooling-off period should be extended, at a minimum, to all securities quoted in the National Association of Securities Dealers Automated Quotation system or listed on an exchange.

After considering the comments, the Commission has determined to shorten the cooling-off period from three to two business days in the case of certain securities. Bids for or purchases of stock, whether common or preferred, having a minimum price per share of five dollars and a minimum public float of 400,000 shares will be permitted by underwriters, prospective underwriters, or dealers prior to two business days before the commencement of offers or sales or the time they determine to participate, whichever is later. This shortened period also applies to purchases of any security of the same class and series as such stock, or any right to purchase any such security.[28] The current cooling-off period under which bids and purchases are permitted ten or more business days before the commencement of offers or sales or up until the determination to participate, whichever is later, will continue to apply to those securities that do not meet the minimum price and public float requirements for the two day cooling-off period.[29] The two day period will alleviate the liquidity problems for such securities and may also facilitate pre-effective stabilization, as more fully discussed below. At the same time, the Exception (xi) proviso prohibiting purchases made for the purpose of manipulating the market, as well as the general antifraud and anti-manipulative provisions under the Act, remain applicable in the event manipulative conduct does occur.

The manner in which the minimum price and minimum public float requirements are to be determined under Exception (xi) are codified in new paragraph (c)(7) of the rule. In the case of a stock the principal market for which last sale information is made available pursuant to Rule 11Aa3–1 under the Act,[30] the five dollar minimum prices per share requirement of Exception (xi) will be computed by use of the average of the closing price so reported during a two consecutive calendar week period commencing within 30 business days prior to the commencement of offers or sales of the security to be distributed. For stocks listed and registered on a national securities exchange for which last sale information is not made available pursuant to Rule 11Aa3–1, the minimum price shall be computed by reference to the average of the closing prices for such security on such exchange during that same period. With respect to all other stocks, *i.e.*, securities traded solely in the over-the-counter market which are not national market system securities, the minimum price shall be computed by reference to the average of the best independent bids or the best independent closing bids during that period.

As set forth in paragraph (c)(7), the minimum public float requirement of Exception (xi) will be computed by determining the total number of shares of stocks outstanding minus shares held by officers, directors and any persons who are, directly or indirectly, the beneficial owners of ten percent or more of the underlying stock in distribution. Information regarding the public float should be obtained by reference to the most recently available information as is possible by reasonable inquiry.[31]

The requirements used to determine eligibility for the shortened cooling-off period are based on market related criteria of a stock in distribution and, thus, are more appropriate to an anti-manipulative rule, like Rule 10b–6, than criteria based on a particular registration form. The Commission believes that public float provides a reasonable indication of the depth and liquidity of the market for a security. In addition, the Commission believes that a minimum price per share requirement is an appropriate criterion in light of the generally greater volatility of low-priced stocks. The standard adopted today also has the advantage of being relatively certain and easily determinable.[32]

The Commission has determined to retain the current ten business day cooling-off period for those securities that do not meet the minimum price and public float requirements for the two day cooling-off period. Such securities usually do not enjoy a market of significant depth and liquidity. The impact of purchases of such securities by distribution participants would not likely be dissipated quickly. Thus, the markets for these securities may be less stable than the markets for securities meeting the minimum price and public float requirements and more easily manipulated. As a result, a reduced cooling-off period would not ensure that market forces would establish independent prices for such securities.

Only three of the commentators addressed the Commission's proposal to eliminate the five business day cooling-off period for unsolicited purchases.

---

[28] For purposes of Rule 10b–6, convertible securities are considered to be a "right to purchase" the underlying security in distribution when it is economically beneficial for the holder of the convertible securities to convert them, *i.e.*, when they would likely be used as a means of obtaining the underlying securities. That situation arises whenever the relative prices of the convertible securities and the underlying securities and other relevant factors are such that there is a reasonable expectation that significant amounts of convertible securities might be converted.

The shortened cooling-off period applies in cases where a convertible security, which is a right to purchase the qualified underlying stock, is in distribution and distribution participants bid for or purchase the convertible security.

[29] The current ten day period under Exception (xi), the pertinent language that has been retained in Exception (xi) and included in Exception (xii), permits purchases "ten or more business days" before an offering and accordingly actually requires a cooling-off period of only nine full business days, since purchases are permitted on the tenth business day before commencement. In contrast, the two business day cooling-off period is drafted to permit purchases "*prior to* two business days before the commencement of offers or sales" (emphasis added), and accordingly requires a cooling-off period of two full business days.

[30] 17 CFR 240.11Aa3–1. This category would include all stocks included in the consolidated transaction reporting systems, *i.e.*, stocks listed on the New York and American ("Amex") Stock Exchanges and stocks listed on other exchanges which substantially meet Amex listing standards, as well as stocks which are included in the National Association of Securities Dealers Automated Quotation system and have been designated as national market system securities pursuant to Rule 11Aa2–1 under the Act. 17 CFR 240.11Aa2–1.

[31] In determining the number of shares held by officers, directors and ten percent shareholders, persons who do not have access to more recent information generally may rely on the most recent information furnished to the Commission by the issuer pursuant to Item 403 of Regulation S–K. 17 CFR 229.403. Such information is required in proxy soliciting materials, and is also required to be included or incorporated by reference in the issuer's annual report on Form 10–K and in certain registration statements filed under the Securities Act.

[32] The Commission has considered whether the above criteria should include a minimum trading volume requirement, and has decided not to include such a requirement.

Each expressly endorsed the proposed modification. The Commission has determined to adopt this proposal, as a result of which unsolicited purchases will be permitted until the date of commencement of offers or sales in a distribution.[33]

2. *Pre-effective Market Making.* In the Proposing Release, the Commission asked commentators to address whether Rule 10b–6 should permit participants to engage in limited market making activity during the Exception (xi) cooling-off period.[34] Six commentators generally supported the concept of limited market making and argued that various safeguards could be devised to ensure that participants' market activities during the cooling-off period would be passive in nature.[35] The Commission has, however, determined not to amend Rule 10b–6 at this time to permit market making by participants during the cooling-off period. The amendments to Exception (xi) being adopted today should serve to eliminate to a large extent the liquidity problems that arose under the ten business day cooling-off period. Also, the shortening of the Exception (xi) cooling-off period to two business days for securities meeting the minimum price and public float criteria may make it more practicable for participants to engage in pre-effective stabilization in compliance with Rule 10b–7,[36] while the discipline that Rule 10b–7 imposes will protect against the possibility of uncoordinated stabilizing activity occurring during the cooling-off period.[37] The Commission intends, however, to continue to assess the practicability of pre-effective stabilization in compliance with Rule 10b–7. After developing some experience under these amendments, the Commission may revisit this issue, and interested persons may, therefore, wish to provide to the Commission their views and supporting data.

3. *Competitive and Other Bidding Practices.* Several commentators requested that the Commission clarify when a broker-dealer would be deemed to commence its participation in a distribution for purposes of the rule and therefore be subject to the cooling-off period, particularly in the context of shelf-registered offerings under Securities Act Rule 415.[38]

When a broker-dealer submits a bid in response to an issuer's solicitation in the context of formal competitive bidding, the broker-dealer is subject to the cooling-off period beginning at the time that it makes the decision to submit the bid.[39] Manipulative incentives may arise at that point. In Rule 415 offerings an issuer may solicit bids in different ways, indicating that it has some intention to proceed with an offering. It is also possible that broker-dealers may submit bids in the absence of any concrete solicitation by the issuer. The Commission has determined that it is appropriate to treat in the same way distributions involving traditional competitive bidding and Rule 415 shelf offerings where an issuer is soliciting bids, albeit by more indirect or informal means, and is codifying the position that a broker-dealer is subject to the rule at the time it decides to submit a bid in response to such a solicitation in paragraph (c)(2)(i) of the rule. When the issuer has not solicited a bid, however, the broker-dealer submitting a bid will not be deemed a participant until the bid has been accepted or the broker-dealer has reason to believe that it will be accepted.

Some of the factors that would indicate an indirect or informal solicitation of bids are: (1) The issuer has explicitly solicited (orally or in writing) broker-dealers to submit bids; (2) public notification of the impending offering has been made; (3) the issuer has imposed a specific due date for submitting bids; and (4) meetings have been held with prospective underwriters in which bidding terms and procedures have been discussed. Any of these factors may give rise to a reasonable expectation that an offering is imminent.[40] Under this approach, the broker-dealer would be deemed to be a participant in the distribution whenever it decides to submit a bid in response to a particular solicitation of bids by an issuer in connection with a particular underwriting.[41]

4. *Continuing Agreements.* In both the Proposing and Interpretive Releases, the Commission stated that a broker-dealer with a continuing agreement with an issuer to sell, from time to time, securities that are registered on the shelf would be required to be out of the market during the entire cooling-off period before commencing any sales of the offered security.[42] Several

[33] The limited purpose of this exception is to permit a distribution participant to purchase in an unsolicited transaction where the offer to sell is made directly to that participant. It does not apply to purchases in response to offers to sell made to the market generally. Therefore, a purchase by a distribution participant made from or through a broker or dealer in response to any offer made on an exchange floor or displayed or disseminated in any quotation medium would not be an unsolicited purchase.

[34] The National Association of Securities Dealers ("NASD") had suggested permitting participants who are registered as market makers with the interdealer quotation system in which they propose to make stabilizing bids and purchases to engage in market making during the cooling-off period prior to the commencement of a firm commitment offering at a price not in excess of the highest independent bid for such security displayed in that system on the day before the start of the cooling-off period. *See* letter dated November 19, 1981, from Frank J. Wilson, Esq., Executive Vice President, NASD, to Douglas Scarff, Director, Division of Market Regulation, publicly available in File No. S7–921.

[35] These safeguards included support for the NASD proposal to permit market making at a price no higher than the last independent bid, proposals to permit "normal" market making or "bona fide" market making during the cooling-off period and a proposal to permit purchases by participants that comply with the pricing restrictions of the Commission's then-proposed Rule 13e–2. Securities Exchange Act Release No. 17222 (October 17, 1980) 45 FR 70690. Proposed Rule 13e–2 has been withdrawn and new Rule 10b–18, which was derived from it, has recently been adopted by the Commission as a safe-harbor. Rule 10b–18 is not available, however, for purchases prohibited by Rule 10b–6 or otherwise. See Securities Exchange Act Release Nos. 19344 and 19345 (November 17, 1982).

[36] Rule 10b–7(e) permits multiple stabilizing bids on behalf of the syndicate provided they are made in compliance with the provisions of the rule.

[37] Even with respect to the question of manager risk due to late syndicate formation, the Commission is not convinced that a regulatory solution is necessary at this time. Business practices could evolve so that syndicates are formed earlier if pre-effective stabilizing is needed, with the result that the capital exposure associated with stabilizing during a shortened cooling-off period is allocated among the prospective underwriters (even if the offering ultimately does not go forward).

[38] The Proposing Release discussed whether a broker-dealer that is only named in a shelf-registration statement (and that does not have a continuing agreement with the issuer) may be deemed a participant in the distribution. The Commission indicated that whether a broker-dealer has become a participant depends upon the "facts and circumstances surrounding the broker-dealer's relationship with the issuer and its relationship with other broker-dealers acting on the issuer's behalf." Being named as a possible underwriter would not alone, however, cause a broker-dealer to be deemed a participant in a distribution. Securities Exchange Act Release No. 18528, 47 FR 11488, n. 36 (March 3, 1982). In Securities Exchange Act Release No. 18666 (April 20, 1982), the staff reiterated the Commission's position that the key consideration is the nature of its agreement with the issuer. That release also discussed various factors that, alone or in combination, would not result in a broker-dealer being deemed a participant in a shelf-registered distribution. The Commission endorses those views.

[39] The staff has consistently interpreted the language of paragraph (c)(2)(i) of Rule 10b–6 (which defined "prospective underwriter" as a person "who has agreed to submit or has submitted a bid") to mean a person "who has decided to submit a bid." The Commission has determined to clarify this interpretation by codifying this position.

[40] These factors, however, are not the exclusive means of determining whether solicitation of bids has been made by an issuer. In addition, they are not necessarily of equal importance. Obviously, explicit solicitation is the clearest of the factors, although the others also tend to show solicitation.

[41] Under circumstances where an issuer solicits bids from one or more broker-dealers identified in a shelf registration statement as possible underwriters, the broker-dealer also would not be deemed a "prospective underwriter" until it has made the decision to submit its bid in connection with a particular offering.

[42] For examples of recent shelf-registered offerings containing continuing agreements, see

commentators argued that this position inappropriately discriminated against broker-dealers with continuing agreements since subjecting such broker-dealers to the prohibitions of the rule would put them at a disadvantage compared to other broker-dealers through whom the issuer would still be free to offer securities without the full cooling-off period. One commentator suggested that Rule 10b–6 should be amended to provide that broker-dealers with such agreements would be deemed participants only after they know that the issuer has determined to proceed with a particular offering as promptly as possible or at a fixed future date. Other commentators recommended that a broker-dealer with a continuing agreement should be considered a participant only after the broker-dealer and issuer have communicated with regard to a reasonably imminent sale of particular securities.

The Commission continues to believe that a broker-dealer with a continuing agreement may have an incentive to condition the market to facilitate a distribution because of the certainty of its participation in such a distribution. Although it is difficult to delineate with precision when a firm would or would not have a continuing agreement with an issuer, such agreements are likely to result in close and continuous contact and coordination between an issuer and the broker-dealer concerning details, including timing, of an offering. Consequently, the Commission reiterates its view that a broker-dealer that agrees with the issuer always to participate in all offerings, or in all of a particular type of offering, of securities registered on the shelf would be deemed to have a "continuing agreement" with the issuer and would be a participant in all offerings of the type for which it has such an agreement with the issuer. Such agreements tend to present precisely the sort of manipulative potential that Rule 10b–6 is designed to address. As a result, the broker-dealer, because it is a distribution participant throughout the effectiveness of the shelf registration, will be subject to the entire two or ten business day cooling-off period that is applicable before any particular offer or sale off the shelf.[43]

5. *Dissemination of Research Reports.* Rule 10b–6 prohibits any person participating in a distribution from inducing any person to purchase securities covered by the rule. A number of commentators recommended that Exception (xi) be amended expressly to permit inducements to purchase prior to the commencement of the cooling-off period. These commentators were particularly concerned with the dissemination of research reports by market professionals before an offering commences.[44]

After considering the suggestions made by these commentators, the Commission has determined not to amend the provisions of Exception (xi) to include in it the dissemination of research reports that by their nature constitute inducements to purchase.[45] Extending the provisions of the exception to include the dissemination of such research reports could generate purchase activity in the security to be distributed unrelated to the special market making continuity concerns historically associated with Exception (xi). In addition, the Commission is concerned that the dissemination of promotional research reports by underwriters, prospective underwriters or dealers would generate purchases for an undetermined period of time subsequent to the dissemination of the reports, thereby nullifying the cooling-off period provided under Exception (xi).

The Commission has concluded, however, that research reports disseminated as part of a firm's continuing research program covering industry or sub-industry groups need not be considered "inducements to purchase," for purposes of Rule 10b–6. These kinds of reports, issued in the ordinary course of the firm's research activities, would usually cover several issuers without giving special treatment to the security to be distributed or would constitute a factual or statistical update on an issuer in an industry or sub-industry regularly covered by the firm. These research reports would also be substantially similar in appearance and tone and would be distributed with reasonable regularity by the broker-dealer.

Historically, the staff has taken the position that the guidelines for the type of research reports that will be permitted as not constituting inducements to purchases are provided by the provisions of Rule 139 under the Securities Act.[46] The Division of Corporation Finance anticipates reviewing Rules 137, 138 and 139 under the Securities Act, with a view to determining whether the scope of permissible research reports under the Securities Act may be broadened. In connection with that review, the Commission may redefine permissible research reports under Rule 10b–6 by reference to such rules. In the interim, the Commission notes that research reports in addition to those that meet the limitations currently contained in Rule 139, in some instances, may constitute neither inducements to purchase for Rule 10b–6 purposes nor offers for sale or offers to sell securities for purposes of Sections 2(10) and 5(c) of the Securities Act.[47] For example, an industry or sub-industry report circulated as part of a firm's continuing research program would not constitute a

---

Middle South Utilities, Inc., (Reg. No. 2–80949) (declared effective January 6, 1983); Pacific Gas and Electric Company, (Reg. No. 2–80820) (declared effective January 5, 1983); The Southern Company, (Reg. No. 2–80970) (declared effective November 23, 1982); Sea Containers, Ltd., (Reg. No. 2–80998) (declared effective November 22, 1982).

[43] As proposed, the amendment to Exception (xi) would have permitted bids for or purchases of securities until the later of three business days "before the commencement of offers or sales of the securities to be distributed." In Securities Exchange Act Release No. 18666, the Division of Market Regulation sought to clarify that the cooling-off period under Exception (xi) is measured from the commencement of an offer and not merely the solicitation of indications of interest. The Division stated that the language of Exception (xi) refers to "offers subsequent to the effective date of the registration statement" and that, in the case of transactions off a shelf that require only the filing of a prospectus supplement relating to such transactions, the phase "commencement of offers or sales" refers to offers made subsequent to the filing of the prospectus supplement relating to such transactions. One commentator noted that where no post-effective amendment is required, sales off a shelf might be completed before the filing of the prospectus supplement and no additional offers made thereafter. Although the Commission believes that the language of Exception (xi) indicating that the cooling-off period is measured from the "commencement of offers or sales of the securities to be distributed" need not be changed at this time, it agrees that "offers or sales," whether made before or after the filing of the prospectus supplement relating to such transactions, is the reference point for the cooling-off period.

[44] As an alternative to adopting this proposed change to Exception (xi), several commentators proposed that the Commission redefine "inducement" to exclude research reports.

[45] In Securities Exchange Act Release No. 18666, the staff indicated that the proposed amendments to Rule 10b–6 as well as the interim no-action position taken in the Proposing Release would not prohibit the dissemination of research reports prior to the commencement of the cooling-off period under Exception (xi) irrespective of whether such research complies with Rule 138 or 139 under the Securities Act. 17 CFR 230.138 and 139. Moreover, the staff stated that the dissemination of such research would not by itself operate to disqualify participants from relying on Exceptions (ii), (v) and (xi) in connection with purchases that occur after the dissemination of these reports. The superseding position adopted by the Commission today, therefore, changes the position taken heretofore by the staff.

[46] With respect to research reports distributed by broker-dealers with continuing agreements with the issuer, in Securities Act Release No. 6383 (March 3, 1982), 47 FR 11380, n. 94, the Commission indicated that the staff has generally taken the position that reports complying with Rule 139 under the Securities Act do not constitute prohibited inducements to purchase under Rule 10b–6.

[47] 15 U.S.C 77b(10) and 77c(c). This position modifies the interim no-action position with respect to Rule 139 which was set forth in footnote 94 of Securities Act Release No. 6383 (March 3, 1982), 47 FR 11398, n.94.

prohibited inducement to purchase even if it does not comply with the requirements of Rule 139 and even if it specifically recommends the issuer's securities, provided that the report is of the nature outlined above. Research that does not fall within that category, however, will continue to be prohibited throughout the distribution.[48]

6. *Exchange-traded Options.* In the Proposing Release, the Commission stated that the interim no-action position taken at that time with respect to the amendments to Exception (xi) would not be available with respect to the exercise of exchange-traded call options by participants in a distribution of the security underlying such options. At that time, the Commission stated that it might be appropriate to impose a longer cooling-off period under Exception (xi) for the exercise of exchange-traded call options and requested comments on the latest time before commencement of sales in the underlying stock that persons subject to Rule 10b–6 should be permitted to exercise exchange-traded call options.

Commentators generally opposed the imposition a of longer cooling-off period for the exercise of exchange-traded call options. One commentator stated that option holders would have little incentive to condition the price of the security in a distribution. Another indicated that it was unlikely that an option holder with an incentive to manipulate would attempt to do so by exercising options.[49]

The selection of a cooling-off period for option exercises raises difficult balancing questions involving the likelihood that options could or would be used to manipulate the underlying security and the desirability of avoiding unnecessary regulatory restraints on the trading of securities. The exercise of exchange-traded call options creates a potential for manipulative abuse because the exercise of these options on the eve of the cooling-off period can reasonably be expected to result in market purchases during the cooling-off period since some percentage of option writers are uncovered. The impact of the exercise of exchange-traded call options is both delayed and reasonably certain to occur within the cooling-off period because market purchases that occur pursuant to an exercise usually take place one to three days after the option holder notifies the Options Clearing Corporation of his desire to exercise.

In order to minimize the probability that market purchases will occur during the two business day cooling-off period as a result of the exercise of options for securities qualified for the shortened cooling-off period, the Commission has determined to impose a five business day cooling-off period prior to the commencement of offers or sales of the underlying security for the exercise of such exchange-traded call options by participants in a distribution. Under the amendment, exercises would be permitted prior to five business days before any offers or sales or the time an underwriter, prospective underwriter, or dealer determines to participate, whichever is later. This period reflects the Commission's continuing concern that some potential for manipulation exists in this context. The Commission will analyze its experience under this cooling-off period and will continue to consider whether exercise limits and general antifraud and anti-manipulative provisions may make possible a further reduction in the cooling-off period or its eventual elimination.[50]

7. *Solicited Brokerage Transactions.* Since the publication of the Proposing Release, the Division of Market Regulations has received a number of requests to clarify the Commission's position with respect to solicited brokerage transactions and Exceptions (v) and (xi).

Exception (xi) was originally intended to permit dealer participants in an offering of over-the-counter securities to act as market makers until ten days before the commencement of the offering. The exception reflected the desirability of maintaining market making continuity to the maximum extent possible, consistent with the objectives of Rule 10b–6. In the Proposing Release, the Commission for several reasons proposed to broaden this principal exception to cover exchange as well as over-the-counter transactions.[51] The provisions of Exception (v) under Rule 10b–6, by contrast, permit unsolicited brokerage transactions throughout the time the subject security is in distribution. No exception currently permits solicited brokerage.[52]

One commentator specifically proposed that the Commission amend the provisions of Exception (v) to permit solicited brokerage transactions prior to a cooling-off period. While the Commission is not at this time amending Rule 10b–6 to permit solicited brokerage transactions, it is prepared to consider, and solicits the views of interested persons on, whether there are any circumstances when broker-dealer participants should be permitted under Rule 10b–6 to effect solicited brokerage transactions before the commencement of offers and sales in a distribution. While, in the case of conventional offerings, Section 5 under the Securities Act [53] may impose limitations independent of Rule 10b–6, the extent to which Rule 10b–6 should prohibit such conduct raises somewhat different considerations.

Currently, the prohibition on solicited brokerage transactions might create some hardship for those broker-dealers with continuing agreements with issuers to sell securities registered on a shelf pursuant to Rule 415, in view of the Commission's position that such persons are continuous distribution participants. Accordingly, the staff has determined that it will not recommend that the Commission take enforcement action under Rule 10b–6 if broker-dealers with continuing agreements with issuers engage in solicited brokerage transactions ten or more business days

---

[48] Whether a particular research report is an inducement to purchase instead of ordinary course research is a judgment which, in the first instance, must be made by the issuing broker-dealer in light of the above factors. Pending the anticipated review of Rules 137, 138 and 139, the staff will not issue interpretive advice under Rule 10b–6 on particular research reports.

[49] Two commentators indicated that the Commission should eliminate all restrictions on the exercise of exchange-traded options. They argued that the exercise of exchange-traded options has a limited impact on the market for the underlying security.

[50] In Securities Exchange Act Release No. 17609 (March 6, 1981), 46 FR 16670, the staff took a "no-action" position under Rule 10b–6 to permit underwriters, prospective underwriters, brokers or dealers participating in a distribution of securities underlying exchange-traded options to effect closing call option purchases and closing put option sales for their proprietary accounts and to recommend and effect such transactions for their customers until five business days before the proposed commencement of the distribution. The staff has reconsidered this position and has determined that it is unnecessarily restrictive in light of current industry practices and that such closing transactions should be permitted at any time during a distribution. Therefore, the staff will not recommend that the Commission take enforcement action under Rule 10b–6 if an underwriter, prospective underwriter, broker or dealer, with regard to an option position entered into prior to its participation in a distribution, effects closing call option purchases or closing put option sales for their proprietary accounts or recommends or effects such transactions for its customers during a distribution. To the extent that any other position taken in Securities Exchange Act Release No. 17609 is inconsistent with the amendments adopted today, such other positions are so modified.

[51] See Securities Exchange Act Release No. 18528 (March 3, 1982), 47 FR 11487.

[52] It should be noted that where either side of a brokerage transaction is unsolicited, a broker may solicit the other side and still rely on Exception (v). For example, where a seller approaches a broker with an unsolicited order to sell securities the broker may solicit a customer to purchase such securities under the exception. Similarly, the solicitation of a sell order is permitted if the broker first receives an unsolicited order to purchase securities.

[53] 15 U.S.C. 77e.

before the commencement of offers or sales of securities registered on the shelf, or the time at which they determine to participate in an offer or sale off the shelf, whichever is later (in the case of any offers or sales made subsequent to an initial offering pursuant to an effective shelf registration).[54] The alternative periods in the no-action position eliminate the necessity of the broker-dealer determining in advance the time when offers or sales are to be made off the shelf.

B. *Exception (xii).* In the Proposing Release, the Commission suggested adding to Rule 10b–6 a new exception, to be denominated Exception (xii), that would have relaxed the rule's prohibitions generally as they apply to issuers or other persons (selling shareholders) on whose behalf a distribution is being made and their affiliated purchasers. Under proposed Exception (xii), those persons would have been permitted to bid for or purchase the security that is the subject of the distribution, and any other covered security, until three business days prior to the commencement of any offers or sales of such security.[55]

Certain commentators indicated that the Commission, in making any modifications to proposed Exceptions (xi) and (xii), should attempt to make the provisions of these two exceptions as congruent as possible. Two commentators expressed their view that a distinction should not be made between the purchasing activities of broker-dealers and those of issuers, selling shareholders and their affiliated purchasers.

The Commission has determined to adopt Exception (xii) substantially as proposed. The cooling-off periods under Exception (xii) are coextensive with those contained in Exception (xi). In addition, the Commmission is adopting, with technical changes, the limitation as to the coverage of the rule to affiliated purchasers of issuers and selling shareholders.

C. *Applicability of Exception (xii) to Issuer Purchases During Distributions Resulting from Mergers.* Exception (xii), a proposed, was not intended to address activities by an issuer in the context of mergers and other acquisitions involving a distribution of the issuer's securities.[56] In a merger that constitutes a distribution for purposes of Rule 10b–6,[57] an issuer traditionally has been deemed to be engaged in such distribution from the time it reaches an agreement in principle with respect to the merger. Accordingly, after that time, unless specifically exempted from or excepted by Rule 10b–6, an issuer or its affiliates could not purchase the security subject to the distribution (or any other securities covered by Rule 10b–6, including any "right to purchase" the subject security),[58] until the distribution was over. In such situations, the staff routinely has granted exemptions from Rule 10b–6 to permit issuers and their affiliates to purchase the security in distribution and the securities of the target company [59] pursuant to certain conditions, including a prohibition on such purchases from the earlier of thirty days prior to the target company's shareholder vote on the merger or five business days prior to the mailing of proxy materials to target company shareholder.[60] Such prohibitions generally remained in effect until the merger was abandoned or until target company shareholders voted on the merger. Furthermore, if there were any period during which the market price of the offered security was a factor in determining the consideration to be paid pursuant to the merger ("valuation period"), under the exemption the issuer was required to cease bidding for or purchasing the security five business days to and for the duration of the valuation period. A similar restriction was applied to any period during which target company shareholders had the right to elect among various forms of consideration offered in connection with merger ("election period").[61]

In the Proposing Release, the Commission suggested that it may be appropriate to reduce the five business day cooling-off period to three business days with respect to the mailing of proxy materials and the valuation periods and asked commentators to respond to the advisability of codifying these proposed positions. Several commentators supported codification of these proposals.

In light of the Commission's determination to extend Exception (xii) to purchasing activities by issuers and their affiliated purchasers in the case of any distribution, Exception (xii) also applies to mergers or similar acquisitions that constitute distributions. For purposes of the exception, the mailing of proxy solicitation materials [62] will be deemed to be the equivalent of the "commencement of offers or sales of the securities to be distributed." Thus, the issuer and its affiliated purchasers must cease bidding for or purchasing the security being distributed, or any related security, during the applicable two or ten business day cooling-off period for the issuer prior to the solicitation of proxies and for the duration of the period during which proxies are

---

[54] This position applies to shelf-registered distributions of all securities, even those as to which Exception (xi) is available for solicited principal transactions until two business days before the date of commencement of the offering.

[55] Pending final Commission actions on the amendments to Rule 10b–6, the staff in the Proposing Release took a no-action position to permit issuers, selling shareholders and their affiliated purchasers to rely on proposed Exception (xii) in connection with their purchasing activities in the context of a distribution involving a shelf-registered offering pursuant to Rule 415, provided that the issuer was qualified to use Form S–3 or S–3 under the Securities Act.

[56] For purposes of this section, the term "issuer" generally refers to the acquiring company and its affiliated purchasers, but where attribution of the distribution or purchases is warranted, it may also apply to the target company.

[57] Historically, the staff has applied the *Bruns, Nordeman* criteria to determine whether a merger constitutes a distribution within the meaning of Rule 10b–6. The staff has traditionally considered the solicitation of proxies which is aimed at insuring a favorable vote on the merger by target company shareholders to satisfy "the presence of special selling efforts and selling methods" criterion of *Bruns, Nordeman.*

As noted above, the *Bruns, Nordeman* criteria have been codified in the definition of distribution. As such, there should be no change from prior practice with respect to the determination of whether certain merger transactions constitute Rule 10b–6 distributions.

[58] For purposes of Rule 10b–6, the securities of the target company are deemed to be "rights to purchase" the securities that are the subject of a distribution in connection with the merger.

[59] It is not free from doubt whether the public announcement by an acquiring company of its intention to make pre-merger purchases of target company securities constitutes a tender offer for purposes of Rule 10b–13 under the Act. 17 CFR 240.10b–13. If such an announcement does constitute a tender offer, purchases of, or the making of any arrangements to purchase, such securities otherwise than pursuant to the offer, including in the merger itself, would be prohibited by Rule 10b–13 after such announcement. Nevertheless, the staff has routinely stated that it would not recommend that the Commission take enforcement action under Rule 10b–13 for pre-merger purchases of up to 15 percent of the outstanding shares of the target company.

[60] In the case of bids or purchases by the acquiring company or any affiliates of the issuer's own securities, such exemptions were conditioned on compliance with the provisions of an appendix (denominated as Appendix C) that was attached to the staff's exemptive letter. Appendix C contained restrictions on the volume, price, timing and manner of purchase of the acquiring company's securities.

[61] In mergers with post-shareholder vote valuation periods or election periods, the distribution is deemed to continue until the termination of such periods.

[62] In certain instances, procedures other than the formal solicitation of proxies may be utilized in connection with the consummation of the merger. For example, a letter of transmittal or similar materials may be forwarded to target company shareholders to inform them of the proposed acquisition and of any steps that they may want or need to take prior to the transaction's consummation. In such cases, the staff will provide advice to issuers or their counsel concerning the event that triggers the applicable Exception (xii) cooling-off period.

solicited, until the merger is abandoned or the target company shareholders vote on the merger.[65] Similarly, the Commission will consider the commencement of any valuation period or any election period as the equivalent of the "commencement of offers or sales" for purposes of the exception. Thus, the issuer and its affiliated purchasers must also cease purchasing activities during the applicable cooling-off period and for the duration of the valuation period or election period. The historical staff position regarding the period of an issuer's participation in a distribution resulting from a merger is retained. Accordingly, unless the merger is abandoned, an issuer generally will be deemed to have completed its participation in the merger once the target company shareholders have voted on the merger or, in the case of post-shareholder vote valuation periods or election periods, upon termination of all such periods.[66]

V. Other Amendments

A. *Exception (ii).* The Commission has adopted the proposed amendments to Exception (ii) of the rule. Previously, Exception (ii) excepted "unsolicited privately-negotiated purchases, each involving a substantial amount of such security, effected neither on an exchange nor from or through a broker or dealer." Although Exception (ii) was originally intended to require that purchases be made in the over-the-counter market or otherwise off an exchange, the staff for some time has interpreted the exception to permit purchases that otherwise qualify under the exception to be effected on an exchange. The continuing development of market information and trading systems that involve transactions effected both on and off exchanges have made distinctions in Rule 10b–6 between these markets less justifiable.[67]

The Commission believes that the requirements that transactions effected in reliance on the exception must be "privately-negotiated," "unsolicited" and not made "from or through a broker or dealer," are sufficient to preclude the use of Exception (ii) in any systematic scheme to manipulate the price of a security.[68] Accordingly, the Commission is adopting the proposed amendment to the exception to eliminate the requirement that transactions not be effected on an exchange. The Commission is also codifying the staff's position that the phrase "substantial amount" for purposes of the exception means a "block" of such security.[69]

B. *Exception (iii).* The Commission is adoping the proposed amendment to Exception (iii) to Rule 10b–6 [70] with several modifications. The amendment, as proposed and adopted, codifies the staff's long-standing position that, for an issuer to avail itself of Exception (iii), purchases of the subject security must be made in order to satisfy mandatory sinking fund obligations that become due within twelve months of the date of purchase. The purpose of the exception is to permit issuers to satisfy such obligations that are both mandatory and current. Purchases of recently distributed securities that are made solely to satisfy current sinking fund obligations after the forty day cooling-off period should not be manipulative.

The only commentator to address Exception (iii) supported the Commission's proposal to amend it. However, this commentator believed that the Proposing Release's discussion of sinking fund purchases should apply equally to such obligations for both debt securities and preferred stock. The Commission has concluded that Exception (iii), as proposed and adopted, permits purchases for the purpose of fulfilling mandatory sinking fund or similar obligations regardless of whether such obligations apply to debt securities or preferred stock.

The commentator also expressed concern about the operation of the exception in the context of a shelf offering registered under Rule 415. The commentator asserted that if a distribution were to commence each time sales are made off the shelf, the utility of the exception would be diminished substantially because the forty day waiting period would be triggered each time sales commence. The Exception (iii) waiting period is intended, however, to be imposed only once in connection with a single distribution. To make that clear, the Commission has amended Exception (iii) to provide expressly that the waiting period is to be measured from the effective date of the registration statement or, in the case of an unregistered distribution, the commencement of offers or sales.

C. *Exception (iv).* The Commission is adopting certain amendments to Exception (iv) to Rule 10b–6. Historically, Exception (iv) excepted from the prohibitions of Rule 10b–6 "odd-lot transactions (and the off-setting round-lot transactions hereinafter referred to) by a person registered as an odd-lot dealer in such security on a national securities exchange who offsets such odd-lot transactions in such security by round-lot transactions as promptly as possible."

Today, not all odd-lot dealers are registered as such with the national securities exchanges, and the function formerly performed by such dealers is now often performed by exchange specialists and other broker-dealers. Accordingly, the Commission is amending Exception (iv) substantially as proposed, to continue to except from Rule 10b–6 the function formerly performed by registered odd-lot dealers by excepting "odd-lot transactions and round-lot transactions that offset odd-lot transactions previously or simultaneously executed or reasonably anticipated in the usual course of business by a person who acts in the capacity of an odd-lot dealer."[71] This exception recognizes that such odd-lot transactions and the accompanying

---

[65] Because of the applicability of Exception (xii), the staff will no longer impose Appendix C conditions in the case of bids and purchases by the acquiring company or any affiliates of its own securities. During periods in which purchases are not prohibited by Rule 10b–6, issuers and their affiliated purchasers may wish to look to the guidelines of recently adopted Rule 10b–18 in connection with their purchases.

[66] In the case of post-shareholder vote valuation periods or election periods, issuers and their affiliated purchasers are permitted to begin purchasing activities after the vote, but must cease such activities during the applicable cooling-off period prior to the valuation period or election period and for the duration of such period.

[67] See Securities Exchange Act Release No. 18628 (March 3, 1982), 47 FR 11489.

[68] Several commentators on the proposed amendments to Exception (ii) suggested that the prohibition against having a broker-dealer on the "sell" side of the transaction be eliminated. The Commission, however, continues to believe that broker-dealers should not be permitted on the sell side of transactions effected under Exception (ii), as principal or as agent, because of the enhanced manipulative opportunity that they have, as a result of their proximity to the market as market professionals. Non-participating broker-dealers who hold blocks or who have the ability to accumulate blocks for resale to distribution participants can exert undue pressure on participants to purchase such blocks. Thus, a relaxation in the exception could undermine the exception's provision requiring "unsolicited" purchases and otherwise affect the integrity of the market as a pricing mechanism.

[69] The Commission has not defined the term "block" for purposes of Rule 10b–6, but participants in distributions may look to the definition of the term "block" contained in Rule 10b–18(a)(14) for guidance with regard to purchases of common stock. For other securities not covered by that definition, the term "block" will have the same meaning as is normal and customary in the securities industry.

[70] Exception (iii) provided that purchases by an issuer that were effected more than forty days after the commencement of a distribution, for the purpose of satisfying a sinking fund or similar obligation to which the issuer was subject, were not prohibited by Rule 10b–6.

[71] One commentator expressed concern that the proposal to amend Exception (iv) deleted the requirements that round-lot transactions be "off-setting" and that they be effected "as promptly as possible." The exception, as adopted, appropriately addresses these concerns. In addition, the exception avoids any inference that the odd-lot transactions must precede the off-setting round-lot transactions.

round-lot transactions do not ordinarily raise manipulative concerns that require the absolute bar of Rule 10b–6.

The Commission is also adopting a corresponding change to Rule 10b–6(a)(2).[70]

D. *Exception (vii).* The Commission is amending Exception (vii) to Rule 10b–6 substantially as proposed to provide an exception for "the exercise of any right or conversion privilege, set forth in the instrument governing a security, to acquire any security directly from the issuer." The amendment clarifies the scope of Exception (vii) to eliminate any possibility that the exception may be interpreted as applying to exchange-traded options [71] or to the exercise of contractual or other options that are not conferred pursuant to the terms of a security.[72] Exception (vii), which was originally drafted before the advent of exchange-traded options, was intended to permit transactions involving the exercise or conversion of a security that do not involve any significant market impact or manipulative potential and are thus not subject to the concerns at which Rule 10b–6 is directed.

E. *Overallotment Options.* In connection with a firm commitment public offering, the underwriters may create a syndicate short position by selling more than the maximum amount of securities being offered, for the primary purpose of anticipating customer cancellations.[73] The managing underwriter thus may negotiate with the issuer to obtain an overallotment option that can be used to cover the syndicate short position that may result from such oversales. In the Proposing Release, the Commission solicited comment on whether it should codify a staff interpretive position that a distribution in connection with a public offering of securities is not deemed to have been completed for purposes of Rule 10b–6 until any overallotment option granted in connection with the distribution has been either exercised or cancelled.

Commentators critized the Commission's proposal to amend paragraph (c)(3)(ii) of the rule to codify the staff position. They argued that an underwriter should not be forced to make a potentially uneconomic decision with respect to how it should cover a syndicate short position at a time when the distribution, that is, the selling effort in connection with the sale of offered securities, has already been completed. The commentators stated that there is not any manipulative potential in permitting an underwriter to cover its short position by means of purchases both in the open market and pursuant to the overallotment option.

The Commission has decided to amend paragraph (c)(3)(ii) of the rule consistent with the concerns raised by the commentators. To ensure that the distribution has in fact terminated, *i.e.*, all selling efforts have ceased, prior to the time when purchases are made to cover a syndicate short position, the Commission is amending the rule to indicate that an underwriter may exercise its overallotment option at any time after such selling efforts have ceased, but only to the extent of any remaining syndicate short position. If the overallotment option is exercised for securities beyond the amount necessary to cover the short position, the distribution will not be deemed to have been completed and any open market purchases made prior to the exercise of the option would constitute a violation of Rule 10b–6.

F. *Amendment to Rule 10b–8.* The Commission has determined to amend Rule 10b–8 under the Act. The proposed amendment would have excepted from Rule 10b–6, by operation of Exception (ix), purchases of convertible securities ("Convertibles") by an underwriter pursuant to a standby underwriting agreement with an issuer in connection with a call for redemption of the Convertibles, if such purchases were made in compliance with Rule 10b–8(d). As adopted, Exception (ix) will except such purchases from Rule 10b–6, and Rule 10b–8, as amended, will provide that the conditions contained in paragraphs (b) and (c) of Rule 10b–8 also apply to sales of the underlying security made in connection with such a standby underwriting.[74]

Pursuant to a standby underwriting agreement, an underwriter generally agrees to make an offer to purchase any Convertibles tendered to it by holders ("Standby Offer"), to convert all such securities into common stock, and thereafter to sell the common stock. The underwriter also will agree to purchase from the issuer the common stock underlying any Convertibles that the issuer actually redeems, and to resell such common stock.

To minimize its exposure to market fluctuations and the risk that it will hold large amounts of the issuer's common stock at the end of the redemption period, the underwriter may sell short shares of the common stock. It may purchase Convertibles, either in the market or pursuant to the Standby Offer, and convert them and use the common stock received upon conversion to cover its short position or it may sell the securities directly pursuant to a Securities Act registration statement.[75]

The standby underwriting agreement marks the commencement of the underwriter's participation in a distribution, for purposes of Rule 10b–6, of the common stock obtained upon conversion of the Convertibles. In the absence of an exemption of exception, Rule 10b–6(a) prohibits purchases of a security in distribution or any "right to purchase" such a security, *i.e.*, the Convertible, by a participant in the distribution.[76]

Exception (ix) to Rule 10b–6 permits participants in a distribution of securities offered through rights issued on a pro rata basis to bid for or purchase those rights in compliance with the conditions set forth in Rule 10b–8. Convertibles, although they generally would be deemed to be "rights to purchase" the underlying common stock in the context of a redemption call by an issuer, are not "rights issued on a pro rata basis," and thus are not

---

[70] The Commission also proposed a corresponding technical change to Rule 10a–1(e) (3) and (4) under the Act. 17 CFR 240.10a–1(e) (3) and (4). In view of the fact that Rule 10a–1 already specifically excepts short sales by any persons acting in the capacity of an odd-lot dealer (whether on an exchange or over-the-counter), the Commission does not believe it is necessary to adopt the proposed change to Rule 10a–1 to bring it in conformity with Rule 10b–6.

[71] The amendments to Exceptions (xi) and (xii) that the Commission is adopting today permit exercises of certain exchange-traded call options by participants in a distribution until five business days before the commencement of offers or sales in the distribution. The Commission is adopting this position in order to ensure that any purchases of such a security resulting from option exercises will be made at least two business days prior to the commencement of offers or sales in the distribution.

[72] The staff has, in the past, taken an interpretive position that options that are not conferred pursuant to the terms of a security are not within the scope Exception (vii). Options that are excluded from Exception (vii) on this basis include, but are not limited to, options granted pursuant to the terms of a "lock-up" option arrangement or executory contract in the context of a merger or tender offer.

[73] See Securities Exchange Act Release No. 18528 (March 3, 1982) 47 FR 11490, n. 48.

[74] In order to eliminate possible ambiguities in the amendment, the Commission has made certain technical revisions. The Commission has revised the amendment to state that purchases of Convertibles made pursuant to a standby redemption plan are included within the definition of "rights" as used in paragraph (a)(3)(ix) of Rule 10b–8. The amendment as redrafted clarifies that purchases of Convertibles made in connection with a redemption standby agreement (as purchases of rights during rights offerings) are subject to paragraph (d) of Rule 10b–8 only in the situations described in the introductory text to that paragraph. In addition, the amendment has been revised to conform to the Commission's position that, in the context of standby underwriting agreements, the conditions of Rule 10b–8(d) apply to market purchases only, and not to standby purchases.

[75] This strategy is analogous to that employed by underwriters in connection with certain pro rata rights offerings ("Shields Plans"). Shields Plans were developed for use in connection with rights offerings conducted in compliance with Rule 10b–8.

[76] See note 28 *supra*.

specifically addressed by Rule 10b–8 and Exception (ix). Consequently, underwriters intending to purchase Convertibles pursuant to a Standby Offer have had to apply to the Commission for a written exemption from Rule 10b–6. In granting such exemptions, the staff, pursuant to delegated authority, historically has treated such purchases as analogous to purchases during a rights offering, and has permitted such purchases conditioned on compliance with Rule 10b—8.[77] The Commission is codifying this past practice.

In addition to suggesting revisions to clarify certain ambiguities in the proposed amendment to Rule 10b–8,[78] two commentators suggested that paragraphs (b) and (c) of that rule should also apply to a standby underwriting since it is conducted in a manner analogous to a Shields Plan pro rata offering.[79] Paragraph (b) of Rule 10b–8 sets certain price limitations upon sales of the securities being distributed in a rights offering. Paragraph (c) of the rule lists six exceptions to paragraph (b). The Commission agrees that sales made during a standby underwriting should not be treated differently from sales made during a pro rata rights offering.[80] It has therefore decided to make clear that the conditions of paragraphs (b) and (c) apply to sales of the underlying security by participants during the redemption period.

List of Subjects in 17 CFR Part 240

Reporting requirements, Securities.

VI. Text of Amendments to Rules 10b–6 and 10b–8

In accordance with the foregoing, Part 240 of Chapter II of Title 17 of the Code of Federal Regulations is amended as follows:

PART 240—GENERAL RULES AND REGULATIONS, SECURITIES EXCHANGE ACT OF 1934

1. By amending § 240.10b–6, by revising paragraphs (a)(2), (a)(3) (ii), (iii), (iv), (vii) and (xi), (c)(2)(i), and (c)(3)(ii), and adding paragraphs (a)(3) (xii) and (xiii), and (c) (5), (6) and (7) as follows:

§ 240.10b–6 Prohibitions against trading by persons interested in a distribution.

(a) * * *

(2) Who is the issuer or other person on whose behalf such a distribution is being made, or who is an affiliated purchaser, as that term is defined in paragraph (c)(6) of this section, or

(3) * * *

(ii) Unsolicited privately negotiated purchases, each involving at least a block of such security, that are not effected from or through a broker or dealer; or

(iii) Purchases by an issuer effected more than forty days after the effective date of the registration statement covering the securities being distributed, or in the case of an unregistered distribution, more than forty days after the commencement of offers or sales of the securities being distributed, for the purpose of satisfying a sinking fund or similar obligation to which it is subject and which becomes due as of a date that does not exceed twelve months from the date of purchase; or

(iv) Odd-lot transactions and round-lot transactions that offset odd-lot transactions previously or simultaneously executed or reasonably anticipated in the usual course of business by a person who acts in the capacity of an odd-lot dealer; or

* * * * *

(vii) The exercise of any right or conversion privilege, set forth in the instrument governing a security, to acquire any security directly from the issuer; or

* * * * *

(xi) Bids or purchases by an underwriter, prospective underwriter, or dealer, if none of such bids or purchases is for the purpose of creating actual, or apparent, active trading in or raising the price of the security, and if all such bids or purchases are made (A) In the case of stock with a minimum price of five dollars per share and a minimum public float of 400,000 shares, or any security of the same class and series as such stock, or any right to purchase any such security, except for the exercise of exchange-traded call options, prior to the later of two business days before the commencement of offers or sales of the securities to be distributed or the time such person becomes a participant in the distribution, or (B) In the case of the exercise of exchange-traded call options of securities qualified under paragraph (a)(3)(xi)(A) of this section, prior to the later of five business days before the commencement of offers or sales of the securities to be distributed or the time such person becomes a participant in the distribution, or (C) In the case of other securities, by the later of ten or more business days prior to the commencement of offers or sales of the securities to be distributed or the time such person becomes a participant in the distribution, or (D) In the case of unsolicited purchases, prior to the later of the date of commencement of offers or sales of the securities to be distributed or the time such person becomes a participant in the distribution; or

(xii) Bids or purchases by an issuer or other person on whose behalf a distribution is being made or by an affiliated purchaser (as defined in paragraph (c)(6) of this section), if none of such bids or purchases is for the purpose of creating actual, or apparent, active trading in or raising the price of such security, and if all such bids or purchases are made (A) In the case of stock with a minimum price of five dollars per share and a minimum public float of 400,000 shares, or any security of the same class and series as such stock, or any right to purchase any such security, except for the exercise of exchange-traded call options, prior to two business days before commencement of offers or sales of the securities to be distributed, or (B) In the case of the exercise of exchange-traded call options of securities qualified under paragraph (a)(3)(xiii)(A) of this section, prior to five business days before the commencement of offers or sales of the securities to be distributed, or (C) In the case of other securities, by ten or more business days prior to the commencement of offers or sales of the securities to be distributed, or (D) In the case of unsolicited purchases, prior to the date of commencment of offers or sales of the securities to be distributed; or

(xiii) Transactions in nonconvertible debt securities or nonconvertible preferred securities: *Provided, however,* That at least one nationally recognized statistical rating organization, as that term is used in Rule 15c3–1 under the Act, [§ 240.15c3–1] has rated both the nonconvertible securities being distributed and those to be purchased in

---

[77] The Commission's staff, in granting exemptive relief, has, in the past, required aggregation of market purchases and standby purchases made pursuant to a Standby Offer for the purpose of determining whether paragraphs (d)(1)–(7) of Rule 10b–8 apply to market purchases. Stabilizing purchases were not required to be aggregated, however. The staff, on its own initiative, has reconsidered this position in the context of granting exemption requests, and has concluded that all market purchases, *including* stabilizing purchases, must be aggregated in making the determination. This interpretive position applies to the amendments adopted today.

[78] The Commission has acted upon these proposals. See note 74 *supra.*

[79] In a Shields Plan offering, the underwriter reduces the market risk of a decline in the price of the underlying security by making short sales of the underlying security, and using securities obtained upon conversion of rights to acquire that security to cover the short sales.

[80] In fact, in granting exemption requests for redemption standby offerings, the staff has routinely subjected both purchases of the Convertibles and sales of the underlying security to the conditions of the rule.

one of its generic rating categories that signifies investment grade.

* * * * *

(c) * * *

(2) * * *

(i) who has decided to submit a bid to become an underwriter of securities as to which the issuer or other person on whose behalf the distribution is to be made, has issued, directly or indirectly, an invitation for bids, or

* * * * *

(3) * * *

(ii) an underwriter, when he has distributed his participation, including all other securities of the same class acquired in connection with the distribution, and any stabilization arrangements and trading restrictions with respect to such distribution to which he is a party have been terminated: *Provided, however,* That an underwriter will not be deemed to have completed his participation if he has obtained an option in connection with that distribution pursuant to which he purchases from the issuer an additional amount of securities not necessary to cover any syndicate short position that remains in connection with that distribution;

* * * * *

(5) For purposes of this section only, the term "distribution" means an offering of securities, whether or not subject to registration under the Securities Act of 1933, that is distinguished from ordinary trading transactions by the magnitude of the offering and the presence of special selling efforts and selling methods.

(6) The term "affiliated purchaser" means (i) A person acting in concert with the issuer or other person on whose behalf the distribution is being made in connection with the acquisition or distribution of the issuer's securities, or (ii) an affiliate who, directly or indirectly, controls the purchases by the issuer or other person of the issuer's securities, whose purchases are controlled by the issuer or such other person, or whose purchases are under common control with those of the issuer or such other person.

(7) For purposes of paragraphs (a)(3)(xi) and (xii) of this section, the "minimum price" will be computed (i) In the case of a stock for which last sale information is reported pursuant to Rule 11Aa3–1 under the Act, [§ 240.11Aa3–1] by use of the average of the closing prices so reported during a two consecutive calendar week period commencing within thirty business days prior to the commencement of offers or sales of the securities to be distributed, (ii) in the case of stocks listed and registered on a national securities exchange for which last sale information is not available pursuant to Rule 11Aa3–1, by use of the average of the closing prices for such stock on such exchange during such period, or (iii) in the case of all other stocks, by use of the average of the best independent bids or the best independent closing bids during such period. For purposes of such paragraphs, the "minimum public float" will be computed by the total number of shares of the stock outstanding minus shares held by officers, directors, and any persons who, directly or indirectly, are the owners of ten percent or more of the stock in distribution.

* * * * *

2. By amending § 240.10b–6 by revising paragraph (c)(2) and adding a new sentence at the end of paragraph (a) and adding a new sentence at the end of the introductory text of paragraph (d) as follows:

§ 240.10b–6 Distributions through rights.

(a) * * * The provisions of this section and Rule 10b–6 (a)(3)(ix) under the Act [§ 240.10b–6(a)(3)(ix)] apply to convertible securities called for redemption pursuant to a standby underwriting agreement; the convertible securities are deemed to be rights and the securities issuable upon conversion thereof are deemed to be the securities being distributed.

* * * * *

(c) * * *

(2) odd-lot transactions and the round-lot transactions that offset odd-lot transactions previously or simultaneously executed or reasonably anticipated in the usual course of business by a person who acts in the capacity of an odd-lot dealer.

* * * * *

(d) * * * In connection with purchases of convertible securities that have been called for redemption, the conditions imposed upon bids for or purchases of rights in paragraphs (d)(1) through (7) of this section shall apply only to market purchases of such securities effected in accordance with a standby underwriting agreement.

(1) * * *

Dated: March 4, 1983.

By the Commission.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

21 CFR Part 1308

Exempt Chemical Preparations

AGENCY: Drug Enforcement Administration, Justice.

ACTION: Final rule.

SUMMARY: By this rule, the below listed chemical preparations and mixtures which contain controlled substances have, as indicated, either been added to or deleted from the list of exempt chemical preparations set forth in Title 21, Code of Federal Regulations, § 1308.24. Those which are included in the list are exempted from the application of various provisions of the Comprehensive Drug Abuse Prevention and Control Act of 1970, (21 U.S.C. 801 *et seq.*), and from certain Drug Enforcement Administration (DEA) regulations. This action is in response to DEA's periodic review of the exempt chemical preparation list and of applications for exemptions filed with DEA, and is consistent with the needs of researchers, chemical analysts, and suppliers of these products.

DATE: This rule is effective May 13, 1983, subject to being suspended, reinstated, revoked or amended by the Deputy Assistant Administrator of the Office of Diversion Control upon consideration of any comments or objections timely filed on or before May 13, 1983, which raise significant issues on any finding of fact or conclusion of law supporting this rule.

FOR FURTHER INFORMATION CONTACT: Howard McClain, Jr., Chief, Drug Control Section, Drug Enforcement Administration, Washington, D.C. 20537, Telephone (202) 633–1366.

SUPPLEMENTARY INFORMATION:

List of Subjects in 21 CFR Part 1308

Administrative practice and procedure, Drug traffic control, Narcotics, Prescription drugs.

The Drug Enforcement Administration (DEA) has received applications pursuant to § 1308.23 of Title 21 of the Code of Federal Regulations (CFR) which ask that several chemical preparations containing controlled substances be granted the exemptions provided for in 21 CFR § 1308.24.

It has been determined that each of the following chemical preparations and mixtures is intended for laboratory, industrial, educational, or special research purposes, is not intended for general administration to man or animal and either (a) contains no narcotic

controlled substances and is packaged in such a form or concentration that the packaged quantity does not present any significant potential for abuse, (b) contains either a narcotic or nonnarcotic controlled substance and one or more adulterating or denaturing agents in such a manner, combination, quantity, proportion, or concentration, that the preparation or mixture does not present any potential for abuse, or (c) the formulation of such preparation or mixture incorporates methods of denaturing or other means so that the controlled substance cannot in practice be removed, and therefore the preparation or mixture does not present any significant potential for abuse. It has been further determined that exemption of the following chemical preparations and mixtures is consistent with the public health and safety as well as the needs of researchers, chemical analysts and suppliers of these products.

DEA has also received correspondence from companies who have discontinued marketing or manufacturing products which had previously been granted exempt chemical preparation status. These discontinued products are being deleted from the list of exempt chemical preparations set forth in 21 CFR § 1308.24.

These matters have been informally discussed with the Office of Management and Budget (OMB). It has been determined that they are minor internal management matters not requiring formal OMB review.

The Deputy Assistant Administrator of the DEA Office of Diversion Control hereby certifies that these matters will have no significant negative impact upon small businesses or other entities within the meaning and intent of the Regulatory Flexibility Act, 5 U.S.C. 501 *et seq.* The addition of preparations to the list of exempt chemical preparations has the effect of exempting them from certain sections of the Controlled Substances Act of 1970 and regulations.

Therefore, pursuant to the Act, the regulations of the Department of Justice and the Drug Enforcement Administration, the Deputy Assistant Administrator of the DEA Office of Diversion Control hereby orders that Part 1308 of Title 21 of the Code of Federal Regulations be amended as hereinafter appears. (Sec. 201, 202, 501(b), Controlled Substances Act, 21 U.S.C. 811, 812, 871(b)).

Dated: March 3, 1983.

Gene R. Haislip,

Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration.

§ 1308.24 [Amended]

a. Section 1308.24(i) is amended by removing the following from the table in paragraph (i):

PART 1308.—SCHEDULES OF CONTROLLED SUBSTANCES

Manufacturer or supplier	Product name and supplier's catalog number	Form of product	Date of application
American Hospital Supply Corp. (Dade Division)	Stratus TDM Control Level I—Subtherapeutic.	Bottle: 5 ml	06-17-81
American Hospital Supply Corp. (Dade Division)	Stratus TDM Control Level II—Therapeutic.	Bottle: 5 ml	06-17-81
American Hospital Supply Corp. (Dade Division)	Stratus TDM Control Level III—Toxic.	Bottle: 5 ml	06-17-81
American Ass'n. Clinical Chemistry	TDM vial A	Serum vial: 10 ml	05-11-79
American Ass'n. Clinical Chemistry	TDM vial C	Serum vial: 10 ml	05-11-79
Harleco, Division of EM Industries, Inc.	Phosphatase Substrate, 65043C.	Bottle: 75 mg dry powder	10-21-81
Harleco, Division of EM Industries, Inc.	Clinicard Pseudocholinesterase Test No. 32307.	Kit: 20 cuvettes	10-21-81
Harleco, Division of EM Industries, Inc.	Buffer Salt Mixture Type B-1, No. 3947.	Vial: 12.12 g	10-21-81
Harleco, Division of EM Industries, Inc.	Buffer Salt Mixture, Type B-2, No. 3948.	Vial: 16.16 g	10-21-81
Hoffmann-La Roche, Inc.	Abuscreen 125 I-Tetrahydrocannabinol Derivative.	Vial: 500 ml, 20 ml	06-14-81
SIGMA Chem Co.	BUN Single Assay, Stock No. 66-1.	Vial: 6 cc	02-24-77
SIGMA Chem Co.	BUN 10 Assay, Stock No. 66-10.	Vial: 30 cc	02-24-77

b. Section 1308.24(i) is amended by adding the following to the table in paragraph (i):

Manufacturer of supplier	Product name and supplier's catalog number	Form of product	Date of application
American Diagnostics	Amerifluor Fluorescent Immunoassay—Phenobarbital	Kit: 100 tests	04-30-82
American Hospital Supply Corp. (Dade Division)	Stratus TDM Control Level I—Low	Bottle: 5 ml	01-21-82
American Hospital Supply Corp. (Dade Division)	Stratus TDM Control Level II—Intermediate	Bottle: 5 ml	01-21-82
American Hospital Supply Corp. (Dade Division)	Stratus TDM Control Level III—High	Bottle: 5 ml	01-21-82
American Hospital Supply Corp. (Dade Division)	Stratus Enzyme-Labeled Phenobarbital	Bottle: 3 ml	01-25-82
American Hospital Supply Corp. (Dade Division)	Stratus Calibrator A-Catalog No. B5700-10	Bottle: 2 ml	07-15-82
American Hospital Supply Corp. (Dade Division)	Moni-Trol. ES Level I.X Special Order Request, B5106-75XX	Vial: 10 ml	09-10-82
Amersham Corp	Amerlex beta-hcg Kit	Kit: 100 tests, 400 tests	04-22-82
Analytical Systems	Proficiency Sample	Bottle: 20 ml	06-22-82
Armed Forces Institute of Pathology	11-nor-9-carboxy-delta 8-THC in Ethanol Ampule	Glass Ampule: 1 mg/ml, 1 ml, 5 ml, 10 ml.	01-25-82
EM Science, A Division of EM Industries, Inc	Phosphatase Substrate, 65043C	Bottle: 75 mg dry powder	10-21-81
EM Science, A Division of EM Industries, Inc	Clinicard Pseudocholinesterase Test No. 32307	Kit: 20 cuvettes	10-21-81
EM Science, A Division of EM Industries, Inc	Buffer Salt Mixture, Type B-1, No. 3947	Vial: 12.12 g	10-21-81
EM Science, A Division of EM Industries, Inc.	Buffer Salt Mixture, Type B-2, No. 3948	Vial: 16.16 g	10-21-81

[FR Doc. 83-6630 Filed 3-11-83; 8:45 am]

BILLING CODE 4410-09-M

21 CFR Part 1308

Schedules of Controlled Substances; Excepted Stimulant and Depressant Drugs

AGENCY: Drug Enforcement Administration, Justice.

ACTION: Final rule.

SUMMARY: This final rule issued by the Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration (DEA), to incorporate the Table of Excepted Prescription Drugs, currently contained in a separate volume of Title 21, into § 1308.32 of Title 21 of the Code of Federal Regulations. This revision does not affect any of the regulations pertaining to the application for or granting of excepted prescription drug status to products under the Controlled Substances Act (CSA). Transferring the Table of Excepted Prescription Drugs will allow DEA to have all of the regulations implementing the CSA in one volume of the Code of Federal Regulations.

DATES: This rule is effective March 14, 1983.

FOR FURTHER INFORMATION CONTACT: Howard McClain, Jr., Chief, Drug Control Section, Drug Enforcement Administration, Washington, D.C. 20537, Telephone (202) 633-1366.

SUPPLEMENTARY INFORMATION: Section 202(d) of the Comprehensive Drug Abuse Prevention and Control Act of 1970 (21 U.S.C. 812(d)) (CSA) authorizes the Attorney General to grant exceptions from specific provisions of the CSA and its regulations to preparations even though they contain controlled substances. Exceptions may be granted to those products meeting the necessary criteria (published at 45 FR 74091-2) and for which an appropriate application has been reviewed as outlined in §§ 1308.13(a-c) and 1308.32 of Title 21 of the Code of Federal Regulations. An alphabetized listing of the excepted products is found in the Table of Excepted Prescription Drugs. Included in the table are the trade name, dosage form, qualitative and quantitative composition, manufacturer or supplier, National Drug Code listing, when available, and marketing status of the excepted preparations. This table was originally published at 42 FR 17300-17412 on March 31, 1977 and updated at 47 FR 53728-53733 on November 29, 1982. It is currently contained in a separate volume of Title 21, entitled Chapter II—Drug Enforcement Administration, Table of Excepted Prescription Drugs to Part 1308.

Many of the products listed in the table of Excepted Prescription Drugs are no longer marketed. Deletion of these products from the table has reduced its size by over fifty percent. Economic considerations no longer make it beneficial to publish the Table in a separate volume of Title 21.

Matters dealing with excepted prescription drugs have been informally discussed with the Office of Management and Budget (OMB). It has been determined that they are minor internal management matters not requiring formal OMB review.

The Deputy Assistant Administrator of the DEA Office of Diversion Control hereby certifies that these matters will have no significant negative impact upon small businesses or other entities within the meaning and intent of the Regulatory Flexibility Act, 5 U.S.C. 501 *et seq.* The transfer of the Table of Excepted Prescription Drugs from a separate volume of Title 21 to section 1308.32 has no effect on the regulations pertaining to excepted prescription drugs under the Controlled Substances Act.

List of Subjects in 21 CFR Part 1308

Administrative practice and procedure, Drug traffic control, Narcotics, Prescription drugs.

PART 1308—[AMENDED]

Therefore, pursuant to the Controlled Substances Act, the regulations of the Department of Justice and the Drug Enforcement Administration, the Deputy Assistant Administrator of the DEA Office of Diversion Control hereby orders that the Table of Excepted Prescription Drugs be transferred from a separate volume of Title 21 to § 1308.23 of Title 21 of the Code of Federal

Regulations; that the Editorial Note at the end of § 1308.32 be deleted; and that § 1308.32 be revised to read as follows: (Sec. 202(d), 301, 501(a), Controlled Substances Act, 21 U.S.C. 812(d), 821, 871(a), 28 CFR 0.100, 47 FR 43370–1).

§ 1308.32 Excepted compounds.

Until criteria are adopted by the Administration by which the Acting Administrator may determine whether to except any compound, mixture or preparation containing any depressant or stimulant substance listed in §§ 1308.12(e), or in 1308.13 (b) or (c), or in 1308.14 or in 1308.15 from the application of all or any part of the Act (21 U.S.C. 812(d)), the drugs listed in the Table of Excepted Prescription Drugs set forth below have been excepted by the Administrator from the application of sections 302 through 305, 307 through 309, 1002 through 1004 of the Act (21 U.S.C. 822, 823, 825, 827–9, 952–4) and §§ 1301.11, 1301.12, 1301.21 through 1301.24, 1301.31, 1301.32, and 1301.71 through 1301.76 of this chapter for administrative purposes only. The exception of these drugs by the Administrator should not be construed as an adoption or rejection of the criteria by which these drugs were originally excepted. Any deviation from the quantitative composition of any of the listed drugs shall require a petition for exception in order for that drug to be excepted.

Dated: March 7, 1983.

Gene R. Haislip,

Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration.

Correction

In FR Doc. 83–1127 beginning on page 1711, in the issue of Friday, January 14, 1983, make the following corrections:

1. On page 1711, second column, second full paragraph, fifteenth line from the bottom, remove the second phrase "owner also".

2. On page 1712, first column, the section number now reading "§ 51–4995–2" should read "§ 51.4995–2"; third column, the authority citation should read as set forth below:

"(This Treasury decision is issued under the authority contained in sections 4995 and 7805 of the Internal Revenue Code of 1954 (95 Stat. 337 and 68A Stat. 917; 26 U.S.C. 4995 and 7805).)"

BILLING CODE 1505-01-M

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

29 CFR Part 1601

706 Agencies; Handling of Employment Discrimination Charges

AGENCY: Equal Employment Opportunity Commission.

ACTION: Final rule.

SUMMARY: The Equal Employment Opportunity Commission amends its regulations designating certain State and local fair employment practices agencies (706 Agencies) so that they may handle employment discrimination charges, within their jurisdictions filed with the Commission. Publication of this amendment effectuates the designation of the City of Salina (Kansas) Human Relations Commission and Department as a 706 Agency.

EFFECTIVE DATE: March 14, 1983.

FOR FURTHER INFORMATION CONTACT: Hollis Larkins, Equal Employment Opportunity Commission, Office of Program Operations, Special Services Staff, 2401 E Street, NW., Washington, D.C. 20506, telephone 202/634–6850.

SUPPLEMENTARY INFORMATION:

List of Subjects in 29 CFR Part 1601

Administrative practice and procedure, Equal employment opportunity, Intergovernmental relations.

PART 1601—PROCEDURAL REGULATIONS

In Title 29, Chapter XIV of the Code of Federal Regulations, § 1601.74(a) is amended by adding in alphabetical order the following agency:

§ 1601.74 Designated and notice agencies.

(a) * * * City of Salina (Kansas) Human Relations Commission and Department

* * * * *

(Sec. 713(a) 78 Stat. 265 (42 U.S.C. 2000e 12(a))

Signed at Washington, D.C. this 8th day of March, 1983.

For the Commission.

John D. Schmelzer,

Legal Advisor.

BILLING CODE 6570-06-M

DEPARTMENT OF DEFENSE

Defense Nuclear Agency

32 CFR Part 218

Guidance for the Determination and Reporting of Nuclear Radiation Dose For DOD Participants in the Atmospheric Nuclear Test Program (1945–1962)

AGENCY: Defense Nuclear Agency, DOD.

ACTION: Final rule.

SUMMARY: This rule establishes guidance to DoD Components for the determination and reporting of ionizing radiation dose for DoD participants in the atmospheric nuclear test program (1945 to 1962). This rule is being published to establish scientific principles on this methodology, and its intended effect is to standardize the methodology used in the dose reconstruction effort of the nuclear test personnel review program.

EFFECTIVE DATE: This rule will be effective March 14, 1983.

FOR FURTHER INFORMATION CONTACT: Mr. Robert L. Brittigan, Defense Nuclear Agency, ATTN: GC, Washington, D.C. 20305 (Telephone 202–325–7681).

SUPPLEMENTARY INFORMATION: On May 20, 1982, the Defense Nuclear Agency (DNA) published and solicited public comments upon a "Request for Comments on Proposed Guidance" (47 FR 21853). Five comments were received; two from individuals and three from organizations. Based upon the comments, the proposed guidance was

amended as indicated below and is now being published as a final rule.

Legal Authority

On March 20, 1982, the United States District Court for the District of Columbia filed a Memorandum Order in the case of *Gott v. Nimmo*, Civil Action No. 80-906. The order requires the Defense Nuclear Agency to promulgate "rules which establish methodologies and standards to calculate radiation exposure." A notice of appeal has been duly filed and, in the event the decision of the District Court is reversed, this rule will be withdrawn.

Discussion of Comments

One organization commented that inadequate data is available to permit any meaningful dose reconstruction and that the Defense Nuclear Agency, because of institutional bias, should not be permitted to engage in dose reconstruction. We believe that adequate data is available regarding film badge records, the radiological environments, activities of participants, internal exposure hazards, and all other factors in the methodology. We also believe that DNA's national security responsibilities do not preclude the Agency from conducting unbiased research. Moreover, promulgation of this rule is required under the Order in *Gott v. Nimmo*, an Order which the commenting organization, representing the plaintiffs, expressly sought and obtained.

Several comments recommended that dose reconstruction methodologies applicable to veterans of the Hiroshima/Nagasaki occupation be included. Although the detonations at Hiroshima and Nagasaki were not tests, American servicemen were involved and their doses were reconstructed using the methodology in this rule ("Radiation Dose Reconstruction, U.S. Occupation Forces in Hiroshima and Nagasaki, Japan, 1945–1946," DNA Report 5512F, Aug. 1980).

One comment addressed the time required for the review and declassification or sanitization of documents. Declassification of documents is outside the scope of this rule. However, substantial declassification has already taken place.

One organization expressed concern that Department of Defense personnel may have participated in unannounced nuclear tests. We know of no unannounced tests involving DoD personnel in the period covered by this rule.

Several comments urged DNA to consider the current health experience of the veterans in determining dose estimates. There are no scientific means to determine a radiation dose based upon the health of an individual some twenty to thirty-five years after exposure.

A comment was received that indicated that DNA methods do not adequately include radiation exposure from radioactive material inhaled or ingested by test participants. Research indicates that the greatest radiation hazard to the majority of test participants was from external gamma radiation. However, where analysis suggests a meaningful contribution from internal dose, its reconstruction is clearly included by the rule.

The methodologies set forth in this rule are based on established scientific principles and reflect our best judgement as to the proper approach. Reports using the methodology have been widely distributed and reviewed. We have received no comments that suggest that the methodology is unsound. Furthermore, the National Academy of Sciences has examined case histories employing the methodology and has not recommended changes thereto. Moreover, each participant can obtain, upon request, detailed information regarding the procedures used to determine his dose and can subject that methodology to independent review.

Regulatory Impact Analysis

Under E.O. 12291, the Department of Defense must determine if a regulation is "major" and therefore subject to a Regulatory Impact Analysis. Because the Department of Defense believes that this amendment is not "major"; it is not subject to such an analysis.

Regulatory Flexibility Act

In accordance with 5 U.S.C. 605(b), as added by the Regulatory Flexibility Act, the Department of Defense certifies that this rule will not have a significant economic impact on a substantial number of small entities.

Paper Work Reduction Act

This rule does not impose any additional reporting or recordkeeping requirements requiring Office of Management and Budget clearance.

List of Subjects in 32 CFR Part 218

Radiation dose determination, Dose reconstruction, Dose reconstruction methodology, Radiation environment.

M. S. Healy,

OSD, Federal Register Liaison Officer, Department of Defense.

Accordingly, Title 32, Chapter 1 is amended by adding a new Part 218, reading as follows:

PART 218—GUIDANCE FOR THE DETERMINATION AND REPORTING OF NUCLEAR RADIATION DOSE FOR DOD PARTICIPANTS IN THE ATMOSPHERIC NUCLEAR TEST PROGRAM (1945-1962)

Sec.

218.1 Policies.
218.2 General procedures.
218.3 Dose reconstruction methodology.

Authority: U.S. District Court of the District of Columbia, Civil Action No. 80-906.

§218.1 Policies.

(a) The basic means by which to measure dose from exposure to ionizing radiation is the film badge. Of the estimated 220,000 Department of Defense participants in atmospheric nuclear weapons tests, about 145,000 have film badge dose data available. The information contained in the records has been reproduced in a standard format and is being provided to each military service, which can use the film badge dose data to obtain a radiation dose for a particular individual from that service. This is done upon request from the individual, the individual's representative, the Veterans' Administration, or others as authorized by the Privacy Act. Upon request, the participant or his or her authorized representative will be informed of the specific methodologies and assumptions employed in estimating his or her dose. The participant can use this information to obtain independent opinions regarding exposure.

(b) From 1945 through 1954, the DoD and Atomic Energy Commission (AEC) policy was to issue badges only to a portion of the personnel in a homogeneous unit such as a platoon of a battalion combat team, Naval ship or aircraft crew. Either one person was badged in a group performing the same function, or only personnel expected to be exposed to radiation were badged. After 1954, the policy was to badge all personnel. But, some badges were unreadable and some records were lost or destroyed, as in the fire at the Federal Records Center in St. Louis. For these reasons the Nuclear Test Personnel Review (NTPR) Program has focused on determining the radiation dose for those personnel (about 75,000) who were not issued film badges or for whom film badge records are not available.

(c) In order to determine the radiation dose to individuals for whom film badge data are not available, alternative approaches are used as circumstances warrant. All approaches require investigation of individual or group activities and their relationship to the

radiological environment. First, if it is apparent that personnel were not present in the radiological environment and had no other potential for exposure, then their dose is zero. Second, if some members of a group had film badge readings and others did not—and if all members had a common relationship with the radiological environment—then doses for unbadged personnel can be calculated. Third, where sufficient badge readings or a common relationship to the radiological environment does not exist, dose reconstruction is performed. This involves correlating a unit's or individual's detailed activities with the quantitively determined radiological environment. The three approaches are described as follows:

(1) Activities of an individual or his unit are researched for the period of participation in an atmospheric nuclear test. Unit locations and movements are related to areas of radiation. If personnel were far distant from the nuclear detonation(s), did not experience fallout or enter a fallout area, and did not come in contact with radioactive samples or contaminated objects, they were judged to have received no dose.

(2) Film badge data from badged personnel may be used to estimate individual doses for unbadged personnel. First, a group of participants must be identified that have certain common characteristics and a similar potential for exposure to radiation. Such characteristics are: individuals must be doing the same kind of work, referred to as activity, and all members of the group must have a common relationship to the radiological environment in terms of time, location or other factors. Identification of these groups is based upon research of historical records, technical reports or correspondence. A military unit may consist of several groups or several units may comprise a single group. Using proven statistical methods, the badge data for each group is examined to determine if it adequately reflects the entire group, is valid for use in statistical calculations, or if the badge data indicate the group should be sub-divided into smaller groups. For a group that meets the tests described above, the mean dose, variance and confidence limits are determined. An estimated dose equal to 95% probability that the actual exposure did not exceed the estimate is assigned to unbadged personnel. This procedure is statistically sound and will insure that unbadged personnel are assigned doses much higher than the average/mean for the group.

(3) Dose reconstruction is performed if film badge data are unavailable for all or part of the period of radiation exposure, if film badge data are partially available but cannot be used statistically for calculations, special activities are indicated for specific individuals, or if other types of radiation exposures are indicated. In dose reconstruction, the conditions of exposure are reconstructed analytically to arrive at a radiation dose. Such reconstruction is not a new concept; it is standard scientific practice used by health physicists when the circumstances of a radiation exposure require investigation. The underlying method is in each case the same. The radiation environment is characterized in time and space, as are the activities and geometrical position of the individual. Thus, the rate at which radiation is accrued is determined throughout the time of exposure, from which the total dose is integrated. An uncertainty analysis of the reconstruction provides a calculated mean dose with confidence limits. The specific method used in a dose reconstruction depends on what type of data are available to provide the required characterizations as well as the nature of the radiation environment. The radiation environment is not limited to the gamma radiation that would have been measured by a film badge, but also includes neutron radiation for personnel sufficiently close to a nuclear detonation, as well as beta and alpha radiation (internally) for personnel whose activities indicate the possibility of inhalation or ingestion of radioactive particles.

§ 218.2 General procedures.

The following procedures govern the approach taken in dose determination:

(a) Use individual film badge data where available and complete, for determining the external gamma dose.

(b) Identify group activities and locations for period(s) of possible exposure.

(c) Qualitatively assess the radiation environment in order to delineate contaminated areas. If no activities occurred in these areas, and if no other potential for exposure exists, a no dose received estimate is made.

(d) If partial film badge data are available, define group(s) of personnel with common activities and relationships to radiation environment.

(e) Using standard statistical methods, verify from the distribution of film badge readings whether the badged sample adequately represents the intended group.

(f) Calculate the mean external gamma dose, with variance and confidence limits, for each unbadged population. Assign a dose equal to 95% probability that actual exposure did not exceed the assigned dose.

(g) If badge data is not available for a statistical calculation, conduct a dose reconstruction.

(h) For dose reconstruction, define radiation environment through use of all available scientific data, e.g., measurements of radiation intensity, decay, radioisotopic composition.

(i) Quantitatively relate activities, shielding, position, and other factors to radiation environment as a function of time. Integrate dose throughout period of exposure.

(j) Where possible, calculate mean dose with confidence limits; otherwise calculate best estimate dose or, if data are too sparse, upper limit dose.

(k) Compare calculations with available film badge records to verify the calculated doses.

(l) Whether or not film badge data is available, calculate initial and internal doses where identified as a meaningful contribution to the total dose.

§ 218.3 Dose reconstruction methodology.

(a) *Concept:* The specific methodology consists of the characterization of the radiation environments to which participants, through all relevant activities, were exposed. The environments, both initial and residual radiation, are corrected with the activities of participants to determine accrued doses due to initial radiation, residual radiation and/or inhaled/ingested radioactive material, as warranted by the radiation environment and the specific personnel activities. Due to the range of activities, times, geometries, shielding, and weapon characteristics, as well as the normal spread in the available data pertaining to the radiation environment, an uncertainty analysis is performed. This analysis quantifies the uncertainties due to time/space variations, group size, and available data. Due to the large amounts of data, an automated (computer-assisted) procedure is often used to facilitate the data-handling and the dose integration, and to investigate the sensitivity to variations in the parameters used. The results of the gamma data calculations are then compared with film badge data as they apply to the specific period of the film badges and to the comparable activities of the exposed personnel, in order to validate the procedure and to identify personnel activities that could have led to atypical doses. Radiation dose from

neutrons and dose commitments due to inhaled or ingested radioactive material are not detected by film badges. Where required, these values are calculated and recorded separately.

(b) Characterization of the Radiological Environment.

(1) This step describes and defines the radiological conditions as a function of time for all locations of concern, that is, where personnel were positioned or where personnel activities took place. The radiation environment is divided into two standard categories—initial radiation and residual radiation.

(2) The initial radiation environment results from several types of gamma and neutron emissions. Prompt neutron and gamma radiation are emitted at the time of detonation, while delayed neutrons and fission-product gamma, from the decay of radioactive products in the fireball, continue to be emitted as the fireball rises. In contrast to these essentially point sources of radiation, there is gamma radiation from neutron interactions with air and soil, generated within a fraction of a second. Because of the complexity of these radiation sources and their varied interaction properties with air and soil, it is necessary to obtain solutions of the Boltzmann radiation transport equation. The radiation environment thus derived includes the effects of shot-specific parameters such as weapon type and yield, neutron and gamma output, source and target geometry, and atmospheric conditions. The calculated neutron and gamma radiation environments are checked for consistency with existing measured data, as available. In those few cases displaying significant discrepancies that cannot be resolved, an environment based on extrapolation of the data is used if it leads to a larger calculated dose.

(3) In determining the residual radiation environment, all possible sources are considered including radioactive clouds, radiation that may have been encountered from other tests, and radioactive debris that may have been deposited in water during oceanic tests. The residual radiation environment is divided into two general components—neutron-activated material that subsequently emits, over a period of time, beta and gamma radiation; and radioactive debris from the fission reaction or from unfissioned materials that emit alpha, beta, and gamma radiation. Because residual radiation decays, the characterization of the residual environment is defined by the radiation intensity as a function of type and time. Radiological survey data are used to determine specific intensities at times of personnel exposure. Interpolation and extrapolation are based on known decay characteristics of the individual materials that comprise the residual contamination. In those rare cases where insufficient radiation data exist to adequately define the residual environment, source data are obtained from the appropriate weapon design laboratory and applied in standard radiation transport codes to determine the initial radiation at specific distances from the burst. This radiation, together with material composition and characteristics, leads to description of the neutron-activated field for each location and time of interest. In all cases, observed data, as obtained at the time of the operation, are used to calibrate the calculations.

(c) *Activities of Participants.* This step uses all official records, augmented by personnel interviews where gaps exist, to depict a scenario of activities for each individual or definable group. When a dose reconstruction is performed for a specific individual, information available from the individual is accepted unless demonstrably inaccurate. For military units, whose operations were closely controlled and further constrained by radiological safety monitors, the scenario is usually well defined. The same is true for observers, who were restricted to specific locations both during and after the nuclear bursts. Ships' locations and activities are usually known with a high degree of precision from deck logs. Aircraft tracks and altitudes are also usually well defined. Personnel engaged in scientific experiments often kept logs of their activities; moreover, the locations of their experiments are usually a matter of record. Where the records are insufficiently complete for the degree of precision required to determine radiation exposure, participants' comments are used and reasonable judgments are made to further the analysis. Possible variations in the activities, as well as possible individual deviations from group activities, with respect to both time and location, are considered in the uncertainty analysis of the radiation dose calculations.

(d) *Calculation of Dose.* (1) The initial radiation doses to close-in personnel (who were normally positioned in trenches at the time of detonation) are calculated from the above-ground environment by simulating the radiation transport into the trenches. Various calculational approaches, standard in health physics, are employed to relate in-trench to above-trench doses for each source of radiation. Detailed modeling of the human body, in appropriate postures in the trench, is performed to calculate the gamma dose that would have been recorded on a film badge and the maximum neutron dose. The neutron, neutron-generated gamma, and prompt gamma doses are accrued during such a short time interval that the posture in a trench could not be altered significantly during this exposure. The fission-product gamma dose, however, it delivered over a period of many seconds. Therefore, the possibility of individual reorientation (e.g., standing up) in the trench is considered.

(2) The calculation of the dose from residual radiation follows from the characterized radiation environment and personnel activities. Because radiation intensities are calculated for a field (i.e., in two spatial dimensions) and in time, the radiation intensity is determinable for each increment of personnel activity regardless of direction or at what time. The dose from exposure to a radiation field is obtained by summing the contribution (product of intensity and time) to dose at each step. The dose calculated from the radiation field does not reflect the shielding of the film badge afforded by the human body. This shielding has been determined for pertinent body positions by the solution of radiation transport equations as applied to a radiation field. Conversion factors are used to arrive at a calculated film badge dose, which not only facilitates comparison with film badge data, but serves as a substitute for an unavailable film badge reading.

(3) The calculation of the dose from inhaled or ingested radioactivity primarily involves the determination of what radioisotopes entered the body in what quantity. Published conversion factors are then applied to these data to arrive at the radiation dose and future dose commitments to internal organs. Inhalation or ingestion of radioactive material is calculated from the radioactive environment and the processes of making these materials inhalable or ingestible. Activities and processes that cause material to become airborne (such as wind, decontamination or traffic) are used with empirical data on particle lofting to determine airborne concentrations under specific circumstances. Volumetric breathing rates and durations of exposure are used to calculate the total material intake. Data on time-dependent weapon debris isotopic composition and the above-mentioned conversion factors are used to calculate the dose commitment to the body and to specific body organs.

(e) *Uncertainty Analysis.* Because of the uncertainties associated with the

radiological data or calculations used in the absence of data, as well as the uncertainties with respect to personnel activities, confidence limits are detemined where possible for group dose calculations. The uncertainty analysis quantifies the errors in available data or in the model used in the absence of data. Confidence limits are based on the uncertainty of all relevant input parameters, and thus vary with the quality of the input data. They also consider the possible range of doses due to the size of the exposure group being examined. Typical sources of error include orientation of the weapons, specific weapon yields, instrument error, fallout intensity data, time(s) at which data were obtained, fallout decay rate, route of personnel movements, and arrival/stay times for specific activities.

(f) *Comparison with Film Badge Records.* (1) Calculations of gamma dose were compared with film badge records for two military units at Operation PLUMBBOB to initially validate this methodology. Where all parameters relating to radiation exposure were identified, direct comparison of gamma dose calculations with actual film badge readings was possible. Resultant correlations provided high confidence in the methodology.

(2) Film badge data may, in some cases, be unrepresentative of the total exposure of a given individual or group; nevertheless, they are extremely useful for direct comparison of incremental doses for specific periods, e.g., validating the calculations for the remaining, unbadged period of exposure. Moreover, a wide distribution of film badge data often leads to more definitive personnel grouping for dose calculations and to further investigation of the reason(s) for such distribution. In all cases, personnel film badge data are not used in the dose calculations, but rather are used solely for comparison with and validation of the calculations. For dose reconstructions accomplished to date, comparison has been favorable and within the confidence limits of the calculations.

POSTAL SERVICE

39 CFR Part 111

Domestic Mail Manual; Miscellaneous Amendments

AGENCY: Postal Service.

ACTION: Final rule.

SUMMARY: The Postal Service hereby describes the numerous miscellaneous revisions consolidated in the Transmittal Letter for Issue 11 of the Domestic Mail Manual (DMM), which is incorporated by reference in the Federal Register, 39 CFR 111.1

Most of the revisions are minor, editorial or clarifying. Substantive changes, such as the increase in rates for preferred rate mailers, have previously been published in the Federal Register.

EFFECTIVE DATE: January 20, 1983.

FOR FURTHER INFORMATION CONTACT: Paul J. Kemp, (202) 245–4638.

SUPPLEMENTARY INFORMATION: The Domestic Mail Manual, which is incorporated by reference in the Federal Register (see 39 CFR 111.1) has been amended by the publication of a transmittal letter for issue 11, dated January 20, 1983. The text of all published changes is filed with the Director of the Federal Register. Subscribers to the Domestic Mail Manual receive these amendments automatically from the Government Printing Office.

The following excerpt from the Summary of Changes section of the transmittal letter for issue 11 covers the minor changes not previously described in interim or final rules published in the Federal Register.

Note.—Issue 11 contains all DMM revisions published between August 5, 1982 and January 20, 1983 (PB 21351 through 21367).

B. SUMMARY OF CHANGES

Major Revisions

1. * * *

2. *Post Office Boxes.* The term "lockbox" has been replaced by the term "post office box". Therefore, Exhibit 113.66, sections 155, 156, 323, 367, 467, 622, 667, 912, 951, 952, 953, and the Index are revised to replace the term "lockbox" with the term "post office box" (PB 21263, 8–5–82).

3. *Requester Publications.* The term "controlled circulation publication" has been replaced by the term "requester publication". In addition, requester publications are now a subclass of second-class mail rather than a separate classification. The following revisions are made to reflect these changes:

a. Section 159.242*c* is deleted and 159.242*d* through 159.242*h* are renumbered as 159.242*c* through 159.242*g*, respectively (PB 21366, 9–9–82).

b. Section 146.222*c*(3) is deleted and 146.222*c*(4) is renumbered as 146.222*c*(3) (PB 21368, 9–9–82).

c. Section 159.311 is revised to eliminate a reference to "Controlled Circulation" (PB 21368, 9–9–82).

d. Sections 136.311, 137.273*b*(1), 411.3, 422.1, 422.6, 423.14, 423.2, 423.3, 425.6, 441.1, 441.31, 442.1, 443.421, 444.2, 447.1, 447.2, 448.3, 467.7, and 483.2 are revised to replace the term "controlled circulation publications" with the term "requester publications" (PB 21378, 11–18–82).

Other Revisions

1. Section 111.2 is revised to reflect changes in the administrative responsibility for Palau (PB 21374, 10–21–82).

2. Section 113.222 is revised to allow postal customers whose post offices have been discontinued to preserve community identity by retaining their original ZIP Code (PB 21367, 9–2–82).

3. * * *

4. Section 124 is revised to remove the Department of Transportation's "Other Regulated Material" (ORM) marking requirements for domestic surface mail (PB 21366, 8–26–82).

5. Exhibit 125.2 is updated (PB 21386, 1–13–83).

6. Sections 136.1, 221.1, 230, 263.3, and 294.1 are revised, and new section 136.7 is added, to standardize procedures for Express Mail drop shipments (PB 21366, 9–9–82).

7. Exhibit 137.12 and section 137.63 are revised to incorporate changes made in Franking Laws by Public Law 97–69 (PB 21386, 1–13–83).

8. Section 144.13 and Exhibit 144.41a are revised to delete the National Cash Register Company (NCR) as an authorized meter manufacturer (PB 21383, 12–23–82).

9. Section 144.61 is revised to simplify and standardize procedures for postage meter quarterly verifications (PB 21369, 9–16–82).

10. Section 146.15 is revised to eliminate the postage due requirement for incidental written enclosures in second-, third-, and fourth-class matter (PB 21366, 9–9–82).

11. Section 149.3 is revised to reflect that indemnity claims involving mail sent to or from APOs and FPOs are now processed like other domestic mail claims (PB 21382, 12–16–82).

12. Section 156.515 is revised to update the list of approved mailbox manufacturers (PB 21350, 5–6–82).

13. Sections 159.551 and 159.552 are revised to update the list of dead letter branches (PB 21364, 8–12–82).

14. Section 159.561*a* is revised to refer to Publication 65, *National Five-Digit ZIP Code and Post Office Directory*, as the source for determining to which Bulk Mail Center (BMC) area a post office is assigned. Section 159.561*b* is added to provide a list of dead parcel branches, and old 159.561*b* is renumbered as 159.561*c* and revised to reflect changes in dead parcel branch service areas (PB 21364, 8–12–82).

15. Section 411 is revised to clarify regulations concerning the level of sortation required to qualify for certain second-class rates.

16. The last sentence of 425.7*o* is deleted to eliminate the requirement to place certain publications in an envelope or wrapper for mailing (PB 21368, 9–9–82).

17. Sections 467.4, 467.5, and 467.6 are renumbered as 467.5, 467.6, and 467.7 respectively. Section 467.4 is reserved (PB 21371, 9–30–82).

18. * * *

19. Sections 622.14, 667.11, and 667.13 are revised to allow mailers to combine bulk third-class machinable and irregular parcels in 5-digit and optional city sacks (PB 21371, 9–30–82).

20. Sections 667.6 and 667.7 are renumbered as 667.7 and 667.8, respectively. Section 667.6 is reserved (PB 21371, 9–30–82).

21. Exhibit 722 is updated, and a note is added to emphasize rules applying to Intra BMC/ASF rates (PB 21364, 8–12–82; PB 21382, 12–16–82; PB 21385, 1–6–83).

22. Sections 767.411*c*, 767.42*a*, and 767.42*b* are revised and section 767.411*d* is added to reflect changes in the regulations for bundling bound printed matter (PB 21372, 10–7–82).

23. Sections 941.13 and 941.36 are revised to eliminate all references to money order validation and limitation plates (PB 21371, 9–30–82).

24. Section 945.152 is revised to allow checks to be used in payment of fees for the correction of mailing lists (PB 21366, 8–26–82).

25. Minor editorial changes are made to update references and correct printing errors in sections 136.5, 146.222*c*(2), 149.731, 425.82, 467.114, 914.531*b*, 914.61, 945.132, 945.154, and 945.16.

List of Subjects in 39 CFR Part 111

Postal Service.

PART 111—GENERAL INFORMATION ON POSTAL SERVICE

In consideration of the foregoing, 39 CFR 111.3 is amended by adding at the end thereof the following:

§ 111.3 Amendments to the Domestic Mail Manual.

BILLING CODE 7710-12-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[A-4-FRL 2310-2; FL-007]

Approval and Promulgation of Implementation Plans; Florida: Open Burning and Frost Protection Rule

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: The Florida Department of Environmental Regulation (FDER) has revised its open burning and frost protection rule to address the present concerns of the public in areas where there is no trash collection available. EPA today announces its approval of this revision in the Florida plan.

EFFECTIVE DATE: This action will be effective on May 13, 1983 unless notice is received within 30 days that someone wishes to submit adverse or critical comments.

ADDRESSES: Copies of the materials submitted by the State may be examined during normal business hours at the following locations:

Public Information Reference Unit, Library Systems Branch, Environmental Protection Agency, 401 M Street, SW., Washington, D.C. 20400.

Environmental Protection Agency, Region IV, Air Management Branch, 345 Courtland Street, NE., Atlanta, Georgia 30365.

Library, Office of the Federal Register, 1100 L Street NW., Room 8401, Washington, D.C. 20005.
Florida Department of Environmental Regulation, Bureau of Air Quality Management, Twin Towers Office Building, 2000 Blair Stone Road, Tallahassee, Florida 32301.

Comments may be sent to Barry Gilbert at the Region IV address above.

FOR FURTHER INFORMATION CONTACT: Mr. Barry Gilbert, Air Management Branch, EPA Region IV at the above address and telephone number 404/881-3286 or FTS 257-3286.

SUPPLEMENTARY INFORMATION: Florida's open burning and frost protection rules were adopted in 1971 and approved as part of the State Air Implementation Plan in 1972. On January 14, 1976, a revision to Section 17-5.06, Florida Administrative Code (FAC) Frost Protection, was submitted for EPA's approval. This revision was approved on November 1, 1977, at 42 FR 57124. On October 28, 1981, the Florida Environmental Regulation Commission adopted changes in several sections of Chapter 17-5, FAC. These changes included the modification of one definition, the addition of five definitions, a prohibition on burning certain materials, the revision of the frost protection section, the modification of some of the criteria for open burning to clear land, and improvements in the "Open Burning Allowed" section. On April 12, 1982, (47 FR 15581) EPA approved this revision.

On November 15, 1982, FDER submitted a plan revision which again revised the Open Burning and Frost Protection Fires Rule (17-5.03 and 5.09). The amended rule will allow the open burning of trash and household paper products where the following conditions are met: (1) There is no collection service, (2) the burning does not create a nuisance, (3) the burning is more than 200 feet from an occupied building other than that owned or leased by the individual doing the burning, (4) the burning is more than 100 feet from a public road, (5) it is ignited after 9:00 a.m. and is extinguished one hour before sunset, (6) burning is not prohibited by local rule, and (7) prior authorization is obtained from the Division of Forestry unless burning is done in a container covered by a metal mesh or grill.

Action. EPA is today approving the Florida plan for open burning (including frost protection). This is done without prior proposal because the changes in the regulations will have limited impact on air quality and no comments are anticipated.

The public should be advised that this action will be effective 60 days from the date of this **Federal Register** notice. However, if notice is received within 30 days that someone wished to submit adverse or critical comments, this action will be withdrawn and two subsequent notices will be published before the effective date. One notice will withdraw the final action and another will begin a new rulemaking by announcing a proposal of the action and establishing a comment period.

Under Section 307(b)(1) of the Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by May 13, 1983. This action may not be challenged later in proceedings to enforce its requirements. (See 307(b)(2).)

Under 5 U.S.C. 605(b), the Administrator has certified that SIP approvals do not have a significant economic impact on a substantial number of small entities. (See 46 FR 8709.)

The Office of Management and Budget has exempted this rule from the requirements of Section 3 of Executive Order 12291.

Note.—Incorporation by reference of the State Implementation Plan for the State of Florida was approved by the Director of the Federal Register on July 1, 1982.

List of Subjects in 40 CFR Part 52

Air pollution control, Intergovernmental relations, Ozone, Sulfur oxides, Nitrogen dioxide, Lead, Particulate matter, Carbon monoxide, Hydrocarbons.

(Sec. 110 of the Clean Air Act (42 U.S.C. 7410))

Dated: February 25, 1983.

Anne M. Burford,

Administrator.

PART 52—[AMENDED]

Part 52 of Chapter I, Title 40, Code of Federal Regulations, is amended as follows:

Subpart K—Florida

Section 52.520 is amended by adding paragraph (c)(49) as follows:

§ 52.520 Identification of plan.

* * * * *

(c) The plan revisions listed below were submitted on the dates specified. * * *

(49) Changes in Open Burning and Frost Protection Fire Rule, submitted on November 15, 1982, by the Florida Department of Environmental Regulation.

BILLING CODE 6560-50-M

40 CFR Part 62

[A-3-FRL 2272-6]

Approval and Promulgation of State Plans for Designated Facilities and Pollutants; Delaware

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: This notice approves the State of Delaware's certification that there are no kraft pulp mills or primary aluminum reduction plants located in the State of Delaware. These negative declarations were submitted as required by Section 111(d) of the Clean Air Act and 40 CFR Part 62.

EFFECTIVE DATE: This action will be effective May 13, 1983 unless notice is received within 30 days that someone wishes to submit adverse or critical comments.

ADDRESSES: Copies of the submittal are available for inspection during normal business hours at the following offices:
U.S. Environmental Protection Agency, Region III, Air Programs & Energy Branch, Curtis Building, Second Floor, Sixth and Walnut Streets, Philadelphia, PA 19106, Attn: Patricia Gaughan
Delaware Department of Natural Resources & Environmental Control, Air Resources Section, Tatnall Building, P.O. Box 1401, Dover, DE 19901, Attn: Robert R. French
Public Information Reference Unit, Room 2922, EPA Library, U.S. Environmental Protection Agency, 401 M Street, SW., Washington, D.C. 20460
The Office of the Federal Register, 1100 L Street, NW., Room 8401, Washington, D.C. 20408

All comments should be sent to Mr. Henry J. Sokolowski, P.E. (3AW12) at the EPA Region III address listed above.

FOR FURTHER INFORMATION CONTACT: Cynthia A. Clark (3AW12) at the EPA Region III address listed above, telephone 215/597-9377.

SUPPLEMENTARY INFORMATION: Section 111(d) of the Clean Air Act, requires EPA to establish procedures under which States submit plans to control existing sources of particular pollutants. On November 17, 1975 (40 FR 53340), EPA promulgated Subpart B of 40 CFR 60, which establishes procedures and

requirements for adoption and submittal of State plans for control of "designated pollutants" from "designated facilities." Designated pollutants are those not already listed under Section 108(a) (National Ambient Air Quality Standards) or Section 112(b)(1)(A) (Hazardous Air Pollutants) of the Clean Air Act, but for which standards of performance for new sources have been established under Section 111(b) (Standards of Performance for New Stationary Sources). Designated facilities emit designated pollutants.

If a State does not have a designated facility within its borders, it may submit a certification of negative declaration in lieu of a control plan.

On September 8, 1982, the Secretary of the Delaware Department of Natural Resources and Environmental Control submitted certification that there are no kraft pulp mills or primary aluminum reduction plants within the State of Delaware. The negative declarations satisfy Federal regulations and are approved by EPA.

The public is advised that this action will become effective 60 days from the publication date of this notice. However, if notice is received within 30 days that someone wishes to submit adverse or critical comments, this action will be withdrawn and other notices will be published before the effective date. One notice will withdraw the final action and another will begin a new rulemaking by announcing a proposal of the action and establishing a comment period.

The Office of Management and Budget has exempted this rule from the requirements of Section 3 of Executive Order 12291.

Under 5 U.S.C. Section 605(b), I have certified that SIP approvals do not have a significant economic impact on a substantial number of small entities (see 46 FR 8709).

Under Section 307(b)(1) of the Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by May 13, 1983. This action may not be challenged later in proceedings to enforce its requirements. (See 307(b)(2).)

Authority: 42 U.S.C. 7411(d).

Dated: January 12, 1983.

Anne M. Gorsuch,

Administrator.

PART 62—APPROVAL AND PROMULGATION OF STATE PLANS FOR DESIGNATED FACILITIES AND POLLUTANTS

Part 62 of Chapter I, Title 40 of the Code of Federal Regulations is amended as follows:

Subpart I—Delaware

(1) New center headings, § 62.1900, and § 62.1925 are added to read as follows:

Total reduced Sulfur Emissions From Kraft Pulp Mills

§ 62.1900 Identification of plan—negative declaration.

The Delaware Department of Natural Resources and Environmental Control submitted on September 8, 1982, a letter certifying that there are no kraft pulp mills in the State subject to Part 60, Subpart B of this chapter.

Fluoride Emissions From Primary Aluminum Reduction Plants

§ 62.1925 Identification of plan—negative declaration.

The Delaware Department of Natural Resources and Environmental Control submitted on September 8, 1982, a letter certifying that there are no primary aluminum reduction plants in the State subject to Part 60, Subpart B of this chapter.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

43 CFR Public Land Order 6364

[OR-11479 (WASH)]

Washington; Withdrawal of Public Land for Natural Area

AGENCY: Bureau of Land Management, Interior.

ACTION: Public land order.

SUMMARY: This order withdraws 80 acres of public land from surface entry and mining for protection of the Hot Lake Natural Area for a period of 20 years. The land has been and will remain open to mineral leasing.

EFFECTIVE DATE: March 14, 1983.

FOR FURTHER INFORMATION CONTACT: Champ C. Vaughan, Jr., Oregon State Office, 503-231-6905.

SUPPLEMENTARY INFORMATION: By virtue of the authority vested in the Secretary of the Interior by Section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751; 43 U.S.C. 1714, it is ordered as follows:

1. Subject to valid existing rights, the following described public land which is under the jurisdiction of the Secretary of the Interior, is hereby withdrawn from settlement, sale, location, or entry, under the general land laws, including the mining laws (30 U.S.C. Ch. 2), and reserved for its educational, scientific, and research values in connection with the Hot Lake Natural Area:

Willamette Meridian

T. 40 N., R. 27 E.,
Sec. 7, SE¼SE¼;
Sec. 18, NE¼NE¼.

The area described contains 80 acres in Okanogan County.

2. The withdrawal made by this order does not alter the applicability of those public land laws governing the use of the land under lease, license, or permit, or governing the disposal of its mineral or vegetative resources other than under the mining laws.

3. The withdrawal shall remain in effect for a period of 20 years from the effective date of this order.

Inquiries concerning the lands should be addressed to the State Director, Bureau of Land Management, P.O. Box 2965, Portland, Oregon 97208.

Dated: March 3, 1983.

Garrey E. Carruthers,

Assistant Secretary of the Interior.

[FR Doc. 83-6443 Filed 3-11-83; 8:45 am]
BILLING CODE 4310-84-M

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 65

[Docket No. FEMA 6497]

List of Communities With Special Hazard Areas Under the National Flood Insurance Program; Maine et al.

AGENCY: Federal Emergency Management Agency.

ACTION: Final rule.

SUMMARY: This rule identifies communities with areas of special flood, mudslide, or erosion hazards as authorized by the National Flood Insurance Program. The identification of such areas is to provide guidance to communities on the reduction of property losses by the adoption of appropriate flood plain management or other measures to minimize damage. It

will enable communities to guide future construction, where practicable, away from locations which are threatened by flood or other hazards.

EFFECTIVE DATES: The effective date shown at the top right of the table or 30 days after the date of this Federal Register publication, whichever is later.

FOR FURTHER INFORMATION CONTACT: Mr. Richard E. Sanderson, Chief, Natural Hazards Division, (202) 287–0270, 500 C Street Southwest, Donohoe Building, Room 505, Washington, DC 20472.

SUPPLEMENTARY INFORMATION: The Flood Disaster Protection Act of 1973 (Pub. L. 93–234) requires the purchase of flood insurance on and after March 2, 1974, as a condition of receiving any form of Federal or federally related financial assistance for acquisition or construction purposes in an identified flood plain area having special flood hazards that is located within any community participating in the National Flood Insurance Program.

One year after the identification of the community as flood prone, the requirement applies to all identified special flood hazard areas within the United States, so that, after that date, no such financial assistance can legally be provided for acquisition and construction in these areas unless the community has entered the program. The prohibition, however, does not apply in respect to conventional mortgage loans by federally regulated, insured, supervised, or approved lending institutions.

This 30 day period does not supersede the statutory requirement that a community, whether or not participating in the program, be given the opportunity for a period of six months to establish that it is not seriously flood prone or that such flood hazards as may have existed have been corrected by floodworks or other flood control methods. The six months period shall be considered to begin 30 days after the date of publication in the Federal Register or the effective date of the Flood Hazard Boundary Map, whichever is later. Similarly, the one year period a community has to enter the program under section 201(d) of the Flood Disaster Protection Act of 1973 shall be considered to begin 30 days after publication in the Federal Register or the effective date of the Flood Hazard Boundary Map, whichever is later.

This identification is made in accordance with Part 64 of Title 44 of the Code of Federal Regulations as authorized by the National Flood Insurance Program. (42 U.S.C. 4001–4128).

Pursuant to the provisions of 5 USC 605(b), the Associate Director, State and Local Programs and Support, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that this rule, if promulgated will not have a significant economic impact on a substantial number of small entities. This rule provides routine legal notice of technical amendments made to designated special flood hazard areas on the basis of updated information or regarding the completed stages of engineering tasks in delineating the special flood hazard areas of the specified community. This rule imposes no new requirements or regulations on participating communities.

List of Subjects in 44 CFR Part 65

Flood insurance, Flood plains.

Section 65.3 is amended by adding in alphabetical sequence a new entry to the table:

44 CFR Part 65

[Docket No. FEMA—6498]

Communities With Minimal Flood Hazard Areas for the National Flood Insurance Program; New Jersey et al.

AGENCY: Federal Emergency Management Agency.

ACTION: Final rule.

SUMMARY: The Federal Emergency Management Agency, after consultation with local officials of the communities listed below, has determined, based upon analysis of existing conditions in the communities, that these communities' Special Flood Hazard Areas are small in size, with minimal flooding problems. Because existing conditions indicate that the area is unlikely to be developed in the foreseeable future, there is no immediate need to use the existing detailed study methodology to determine the base flood elevations for the Special Flood Hazard Areas.

Therefore, the Agency is converting the communities listed below to the Regular Program of the National Flood

Insurance Program (NFIP) without determining base flood elevations.

EFFECTIVE DATE: Date listed in fourth column of list of Communities with Minimal Flood Hazards Areas.

FOR FURTHER INFORMATION CONTACT: Dr. Brian Mrazik, Acting Chief, Engineering Branch, Natural Hazards Division, (202) 287–0230, Federal Emergency Management Agency, Washington, DC 20472.

SUPPLEMENTARY INFORMATION: In these communities, the full limits of flood insurance coverage are available at actuarial, non-subsidized rates. The rates will vary according to the zone designation of the particular area of the community.

Flood Insurance for contents, as well as structures, is available. The maximum coverage available under the Regular Program is significantly greater than that available under the Emergency Program.

Flood insurance coverage for property located in the communities listed can be purchased from any licensed property insurance agent or broker serving the eligible community, or from the National Flood Insurance Program. The effective date of conversion to the Regular Program will not appear in the Code of Federal Regulations except for the page number of this entry in the Federal Register.

Pursuant to the provisions of 5 U.S.C. 605(b), the Associate Director, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that this rule if promulgated will not have significant economic impact on the substantial number of small entities. This rule provides routine legal notice regarding the completed stage of engineering tasks in delineating the special flood hazards areas of the specified community and imposes no new requirements or regulations on participating communities.

List of Subjects in 44 CFR Part 67

Flood insurance, Flood plains.

PART 65—[AMENDED]

The entry reads as follows:

§ 65.7 List of communities with minimal flood hazard areas.

State	County	Community	Date of conversion to regular program
New Jersey	Bergen	Borough of Edgewater.	Apr. 1, 1983.
Do	Gloucester	Township of Harrison.	Do.
Do	Sussex	Borough of Hopatcong.	Do.
Do	Gloucester	Borough of Pitman.	Do.
New York	Chautauqua	Town of Harrison.	Do.
Do	Chenango	Town of Preston.	Do.
Pennsylvania	Schuylkill	Township of Ryan.	Do.
Do	Chester	Township of West Fallowfield.	Do.
Do	Schuylkill	Township of West Mahanoy.	Do.
Nevada	Unincorporated areas.	Lander County.	Apr. 5, 1983.
Florida	Pasco	City of Zephyrhills.	Apr. 8, 1983.
New Jersey	Salem	Borough of Elmer.	Do.
New York	Chautauqua	Town of Arkwright.	Do.
Do	Chenango	Town of Columbus.	Do.
Do	Wayne	Village of Red Creek.	Do.
Pennsylvania	Chester	Township of Highland.	Do.
Nevada	Unincorporated Areas.	Nye County.	Apr. 12, 1983.
New Jersey	Salem	Township of Quinton.	Apr. 15, 1983.
Arkansas	Lonoke	City of Cabot.	Apr. 19, 1983.
Do	Perry	City of Perryville.	Do.
Oklahoma	Le Flore	Town of Arkoma.	Do.
Do	do.	Town of Cameron.	Do.
Michigan	Monroe	Township of Dundee.	Apr. 22, 1983.
Florida	Hillsborough.	City of Plant City.	Apr. 29, 1983.
New Jersey	Camden	Township of Waterford.	Do.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001–4128; Executive Order 12127, 44 FR 19367; and delegation of authority to Associate Director, State and Local Programs and Support)

Issued February 17, 1983.

Lee M. Thomas,

Associate Director, State and Local Programs and Support.

BILLING CODE 6718-03-M

44 CFR Part 67

National Flood Insurance Program; Final Flood Elevation Determinations

AGENCY: FEMA.

ACTION: Final rule.

SUMMARY: Final base (100-year) flood elevations are listed below for selected locations in the nation.

These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required either to adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

EFFECTIVE DATE: The date of issuance of the Flood Insurance Rate Map (FIRM), showing base (100-year) flood elevations, for the community. This date may be obtained by contacting the office where the maps are available for inspection indicated in the table below.

ADDRESSES: See table below.

FOR FURTHER INFORMATION CONTACT: Dr. Brian R. Mrazik, Acting Chief, Engineering Branch, Natural Hazards Division, Federal Emergency Management Agency, Washington, D.C. 20472 (202) 287–0230.

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency gives notice of the final determination of flood elevation for each community listed.

This final rule is issued in accordance with section 110 of the Flood Disaster Protection Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90–448), 42 U.S.C. 4001–4128, and 44 CFR Part 67). An opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. No appeals of the proposed base flood elevations were received from the community or from individuals within the community.

The Agency has developed criteria for flood plain management in flood-prone areas in accordance with 44 CFR Part 60.

Pursuant to the provisions of 5 U.S.C. 605(b), the Associate Director, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that the (final) flood elevation determinations, if promulgated, will not have a significant economic impact on a substantial number of small entities. A flood elevation determination under section 1363 forms the basis for new local ordinances, which, if adopted by a local community, will govern future construction within the flood plain area. The elevation determinations, however, impose no restriction unless and until the local community voluntarily adopts

flood plain ordinances in accord with these elevations. Even if ordinances are adopted in compliance with Federal standards, the elevations prescribe how high to build in the flood plain and do not prescribe development. Thus, this action only forms the basis for future local actions. It imposes no new requirement; of itself it has no economic impact.

List of Subjects in 44 CFR Part 67

Flood Insurance, Floodplains.

The final base (100-year) flood elevations for selected locations are:

FINAL BASE (100-YEAR) FLOOD ELEVATIONS

State	City/town/county	Source of flooding	Location	#Depth in feet above ground. *Elevation in feet (NGVD)
Arizona	Yuma (City), Yuma, County FEMA-6431	Colorado River	At center of Fourth Avenue Bridge	*136
		Yuma Levee	At the intersection of Colorado Street and 21st Avenue.	*133
		Shallow Flooding	At the intersection of 1st Street and 9th Avenue	*133
			At the intersection of 3rd Street and Maiden Lane	*136
			On 10th Street, 500 feet west of Southern Pacific RR	*142
		East Main Canal	At the intersection of 17th Street and Magnolia Avenue.	#3
			100 feet upstream from 12th Street crossing	#2
Maps available for inspection at the Department of Development Services, 3W 3rd Street, Yuma, Arizona.				
California	Tulare (City), Tulare County FEMA-6431	Elk Bayou	Confluence with Elk Bayou Ditch	*286
		Shallow Flooding	On Avenue 200, one hundred feet east from center of intersection with Southern Pacific Railroad.	#1
		Shallow Flooding	300 feet southwest from confluence of Elk Bayou and Elk Bayou Ditch.	#2
Maps available for inspection at the Planning Department, 411 East Kern Avenue, Tulare, California.				
Florida	Dania, City of, Broward County (Docket No. FEMA-6442).	Atlantic Ocean	50 feet inland from shoreline along Dania Beach	*11
			100 feet inland from shoreline along Dania Beach	*8
		Atlantic Ocean/Inland Waterways	Intersection of 7th Avenue S.E. and Pershing Street	*8
Maps available for inspection at the Office of the City Clerk, City Hall, 100 West Beach Boulevard, Dania, Florida.				
Florida	Unincorporated Areas of Gulf County (FEMA-6431)	St. Joseph Bay	Along the shoreline of St. Joseph State Park	*8
			Along the shoreline of Port St. Joe	*10
			Along the shoreline of Beacon Hill	*10
		Gulf of Mexico	Along the shoreline of St. Joseph Point	*8
			Along the shoreline of Cape San Blas	*9
			Along the southern shoreline of the Indian Peninsula	*10
		Indian Lagoon	Along the north shoreline	*11
		Apalachicola	At confluence of Brothers River	*13
			Approximately 3000 feet downstream of confluence of Chipola River.	*21
Maps available for inspection at Office of the Circuit Court Clerk, Gulf County Courthouse, 100 Fifth Street, Port St. Joe, Florida 32456.				
Florida	Town of Mexico Beach, Bay County (FEMA-6431)	Gulf of Mexico	Approximately 650 feet Seaward from intersection of 38th Street and Highway 98 along 38th Street.	*9
			Approximately 130 feet Seaward from intersection of 15th Street and Highway 98 along 15th Street.	*9
			Approximately 100 feet Seaward of intersection of 1st Street and Highway 98 along 1st Street.	*9
Maps available for inspection at Town Hall, Fourteenth Street, Mexico Beach, Florida 32410.				
Florida	New Port Richey (City), Pasco County (FEMA-6442)	Gulf of Mexico	Intersection of State Highway 55/U.S. Highway 19 and Avery Road.	*12
		Pithlachascotee River	Intersection of Calhoun Street and Wyoming Avenue	*11
Maps available for inspection at Building Department, 320 E. Main Street, New Port Richey, Florida.				
Florida	Port Richey (City), Pasco County (FEMA-6442)	Gulf of Mexico	Intersection of U.S.Highway 19/State Highway 55 and River Gulf Road.	*13
			Intersection of Old Post Road and Beach Drive	*16
Maps available for inspection at City Hall, 100 U.S. 19, Port Richey, Florida.				
Florida	City of Port St. Joe, Gulf County (FEMA-6431)	St. Joseph Bay along the shoreline		*10
Maps available for inspection at City Clerk's Office, City Hall, Fifth and Williams Streets, Port St. Joe, Florida 32456.				
Georgia	Unincorporated Areas of DeKalb County (FEMA-6431).	Barbashela Creek	Just downstream from Redan Road	*836
			Approximately 150 feet upstream of Redan Road	*840
			Approximately 700 feet upstream from Main Street Park Drive.	*849
			Approximately 350 feet downstream from Rockbridge Road.	*861
		Barbashela Creek Tributary A	Approximately 650 feet upstream from Golf Cart Trail Bridge.	*830
			Approximately 70 feet downstream from Hidden Hills Parkway.	*869
		Blue Creek	Approximately 100 feet upstream from River Road	*773
			Just upstream from Dam and Bridge above River Road.	*776
		Burnt Fork Creek	Approximately 300 feet upstream from Druid Hills Road	*911
			Approximately 300 feet upstream from Pangbron Road	*958
			Just upstream from Interstate Highway 285	*1012

FINAL BASE (100-YEAR) FLOOD ELEVATIONS—Continued

State	City/town/county	Source of flooding	Location	#Depth in feet above ground. *Elevation in feet (NGVD)
		Camp Creek	Approximately 120 feet downstream from Antebellum Drive.	*957
			Approximately 140 feet upstream from Antebellum Drive.	*975
		Camp Creek Tributary A	Approximately 1,130 feet upstream from Seaboard Coast Line Railroad.	*852
		Clarks Creek	Just downstream from Heam Road	*726
			Approximately 600 feet upstream from Lombard Road	*737
		Cobbs Creek	Just downstream from Rainbow Drive	*796
			Just upstream from Interstate Highway 20	*802
			Just upstream from Snapfinger Road	*953
			Approximately 90 feet upstream from Glenwood Drive	*870
			Approximately 360 feet upstream from Peachcrest Road.	*904
			Just downstream from Bobbie Lane	*937
		Conley Creek	Approximately 700 feet downstream from Ellingwood Road.	*770
			Approximately 250 feet upstream from Bouldercrest Road.	*777
			Just downstream from east Conley Creek Road	*807
		Corn Creek	Just downstream from Flakes Mill Road	*751
			Just upstream from Flakes Mill Road	*752
		Crooked Creek Tributary, Stone Mountain.	Just upstream from South Deshon Road	*770
			Just downstream from Stephenson Road	*783
			Just upstream from Stephenson Road	*782
		Crooked Creek Tributary A	Just downstream from Mystery Valley—Golf Course Drive.	*839
			Approximately 125 feet upstream from Mystery Valley—Golf Course Drive.	*840
		Crooked Creek Tributary A-1	Just upstream from Kilgore Road	*854
			Approximately 100 feet downstream from Shadow Rock Drive.	*861
		Crooked Creek (South River)	Approximately 160 feet upstream from Browns Mill Road.	*690
			Just downstream from Berline Drive	*694
		Doless Creek	Just upstream from Interstate Highway 285	*783
		Doolittle Creek	Just downstream from Interstate Highway 285	*776
			Approximately 100 feet upstream from Flat Shoals Road.	*803
			Approximately 150 feet upstream from Whites Mill Road.	*816
			Just upstream from Tilson Road	*876
			Just upstream from Barberrie Avenue	*929
		Doolittle Creek Tributary "A"	Just upstream from Hermosa Drive	*805
		Doolittle Creek Tributary "B"	Just upstream from Dawn Drive	*870
		Fowler Branch	Approximately 300 feet upstream from Snapfinger Road.	*819
			Just upstream form Wedgefield Circle	*845
		Nancy Creek	Just upstream from Ashford Dunwoody Road	*872
			Just upstream from Shallow Ford Road	*929
			Just upstream from Cotillion Drive (interstate Highway 285.	*941
			Just upstream from Amberly Drive	*974
		Nancy Creek Tributary A	Just downstream from Peachford Road	*937
			Just downstream from Peeler Road	*951
		Nancy Creek Tributary B	Just downstream from Plantation Lane	*936
		Nancy Creek Tributary C	Approximately 130 feet upstream from Harts Mill Road	*874
		Nancy Creek Tributary D	Approximately 70 feet downstream from Mill Creek Road.	*855
		North Fork Nancy Creek	Just downstream from Interstate Highway 285	*899
			Just upstream from Private Entrance	*910
		North Fork Peachtree Creek	Just upstream from Buford Highway	*828
			Approximately 150 feet downstream from Clairmont Road.	*854
			Just upstream from Shallowford Road	*882
			Just upstream from Chamblee—Tucker Road	*903
			Just upstream from Pleasantdale Road	*916
		North Fork Peachtree Creek Tributary A.	Approximately 200 feet downstream from Buford Highway.	*851
			Just downstream from Dresden Drive	862*
		North Fork Peachtree Creek Tributary B.	Just upstream from Capehart Circle	*881
			Just upstream from Plaster Road	*890
		North Fork Peachtree Creek Tributary C.	Just upstream from Summitridge Drive	*914
		North Fork Peachtree Creek Tributary D.	Approximately 100 feet downstream from Melinda Drive.	*859
		Panthers Branch	Just upstream from Snapfinger Road	*765
			Just upstream from Zinzendorf Drive	*769
			Just upstream from Thompson Mill Road	*809
			Just upstream from Interstate Highway 20	*844
		Peachtree Branch	Approximately 200 feet downstream from Henderson Mill Road.	*808
		Peavine Creek	Approximately 300 feet downstream from Oxford Road	*857
			Just upstream from North Decatur Road	*888
			Just upstream from Durand Falls Drive	*925
		Pole Bridge Creek	Just upstream from Browns Mill Road	*859
			Just upstream from Evans Mill Road	*736
			Just upstream from Hillandale Road	*798

FINAL BASE (100-YEAR) FLOOD ELEVATIONS—Continued

State	City/town/county	Source of flooding	Location	#Depth in feet above ground. *Elevation in feet (NGVD)
			Just upstream from Marbut Road	*834
		Pole Bridge Creek Tributary A	Approximately 100 feet upstream from Hillandale Road	*769
		Pole Bridge Creek Tributary B	Approximately 100 feet upstream form Covington Road.	*815
			Approximately 80 feet upstream from Marbut Road	*838
		[illegible] Creek	Just upstream from Columbia Drive	*759
			Just upstream from Rainbow Drive	*788
			Just upstream from Ember Drive	*814

			Just downstream from Reden Road	*864
			Just downstream from Raye Road	*900
			Just downstream from Hemlock Drive	*927
			Just upstream from Memorial Drive	*945
		Snapfinger Creek Tributary A	Approximately 140 feet upstream from dam	*775
			Approximately 80 feet downstream from Harvest Hill Court.	*805
		Snapfinger Creek Tributary B	Approximately 220 feet downstream from South Indian Creek Drive.	*867
		Snapfinger Creek Tributary C	Just upstream from Memorial Drive	*905
			Just upstream from Memorial College Avenue	*906
			Just upstream from Dunleith Court	*919
		Snapfinger Creek Tributary D	Just upstream from Memorial Drive	*932
			Just upstream from Krueger Store Access Road	*940
			Just downstream from Abingdon Drive	*948
		Snapfinger Creek Tributary E	Approximately 100 feet downstream from Central Drive	*975
		South Fork Peachtree Creek	Just downstream from Old Briarcliff Road	*839
			Approximately 300 feet upstream from Old Clairmont Road.	*850
			Just upstream from Willvee Drive	*901
			Just upstream from Stone Mountain Freeway	*915
			Just upstream from Idlewood Road	*998
			Just downstream from Elmdale Drive	*1049
		South Fork Peachtree Creek Tributary A.	Just upstream from Brockett Road	*879
			Approximately 100 feet downstream from Jarlco Road	*995
		South Fork Peachtree Creek Tributary B.	Just upstream from Stone Mountain Freeway (U.S. Highway 87).	*995
			Just upstream from Franke Drive	*997
		South Fork Peachtree Creek Tributary C.	Just downstream from Access Road	*922
			Just upstream from Milecott Drive	*939
			Just upstream from Access Bridge	*941
		South River	Just upstream from Bridge Road	*690
			Just upstream from McDonough Road	*705
			Just upstream from Flakes Mill Road	*737
			Just upstream from Waldrop Road	*753
			Just upstream from Panthersville Road	*760
			Just upstream from Boulder Chreet Road	*772
			Just upstream from Moreland Avenue	*792
		South River Tributary A	Just upstream from Lehigh Boulevard	*815
		Stephenson Creek	Just upstream from Browns Mill Road	*697
			Just upstream from South Goddard Road	*701
		Stone Mountain Creek	Just upstream from Rock Chapel Road	*745
			Just upstream from North Deshon Road	*773
			Just upstream from Stewart Mill Road	*788
			Approximately 200 feet upstream from Stone Mountain Freeway (U.S. Highway 78) (State Road 10).	*830
			Just upstream from Silver Hill Road	*880
		Stone Mountain Creek Tributary A	Approximately 100 feet upstream from North Deshon Road.	*817
		Sugar Creek	Approximately 100 feet downstream from Clifton Church Road.	*774
			Approximately 200 feet upstream from Mary Lou Lane	*895
			Approximately 100 feet upstream from Fayetteville Road.	*901
		Sugar Creek Tributary A	Just upstream from Glenwood Avenue	*925
		Swift Creek	Just upstream from Georgia Railroad Spur	*761
			Approximately 200 feet downstream from Rogers Lake Road.	*807
		Swift Creek Tributary A	Approximately 140 feet downstream from Dam	*765
			Just upstream from Georgia Railroad Spur	*827
			Just downstream from Rogers Lake Road	*873
		Tom George Pine Mountain Creek	Just upstream from Dam	*751
			Just downstream from Lithonia Corporate Limits	*851
		Yellow River	Just downstream from Pleasant Hill Road	*720
			Approximately 700 feet downstream from County Line	*744

Maps available for inspection at Director of the County Development Department, Room 308, Calloway Building, Decatur, Georgia 30030.

Georgia	Unincorporated Areas of Fayette County (FEMA-[illegible])	Line Creek	Just upstream of Castlewood Road	*857
			Just upstream of Palmetto Road	*870
		Whitewater Creek	Just upstream of Starrs Mill Pond Lake Dam	*752
			Just upstream of Bernhard Road	*770
			Just upstream of Willow Pond Road	*785
		South Camp Creek	Just upstream of Redwine Road	*773
			Just downstream of E.A. Brown Dam	*782

FINAL BASE (100-YEAR) FLOOD ELEVATIONS—Continued

State	City/town/county	Source of flooding	Location	#Depth in feet above ground. *Elevation in feet (NGVD)
			Just upstream of E.A. Brown Dam	*787

		Camp Creek	Just downstream of Helmer Road	*816
			Just upstream of Helmer Road	*819
			Just downstream of State Highway 138	*831

Maps available for inspection at Zoning Administrator's Office, Fayette County Courthouse, 692 North Glynn Street, Fayetteville, Georgia 30214.

Georgia	City of Gainesville, Hall County (FEMA-6442)	Flat Creek	Approximately 150 feet downstream of McEver Road	*1,095
			Approximately 500 feet upstream of Old Flowery Branch Road.	*1,130
			Approximately 125 feet downstream of Jones and Dale Road.	*1,140

Maps available for inspection at Planning and Zoning Department, City-County Administration Building, 300 Green Street, Gainesville, Georgia 30503.

Georgia	Unincorporated Areas of Newton County (FEMA-6442)	South River	Just upstream of Butler Bridge Road	*592
			State Highway 20	*614
		Yellow River	Just downstream of Rocky Plains Road	*650
			Just upstream of the Georgia Railroad	*644
		Dried Indian Creek	Just upstream of Flat Shoals Road	*584
		Turkey Creek	Approximately 5300 feet upstream of the confluence with Yellow River.	*638
		Big Haynes Creek	At Bald Rock Road	*652
		Little Haynes Creek	Just upstream of the Dials Mill Pond Dam	*677
			Just upstream of State Highway 138	*687

Maps available for inspection at Building Inspection Department, Newton County Courthouse, Covington, Georgia 30209.

Georgia	City of Stockbridge, Henry County (FEMA-6333)	Brush Creek	Just upstream of East Atlanta Road	*745
			Just upstream of Davis Road	*758
			Just upstream of Shields Road	*774

Maps available for inspection at City Hall, 130 Berry Street, Stockbridge, Georgia 30281.

Illinois	(V) Channahon will County (Docket No. FEMA-6299)	Du Page River	At mouth at Des Plaines River	*511
			About 600 feet downstream of Channahon	*517
			Just upstream of Channahon Dam	*522
			About 900 feet upstream of Eames Street	*524
		Rock Run South	About 500 feet downstream of Chicago, Rock Island and Pacific Railroad.	*521
			Just downstream of Chicago, Rock Island and Pacific Railroad.	*522

Maps available for inspection at the Village Hall, R.R. #1 CC, Channahon, Illinois.

Illinois	(V(Joppa Massac County (Docket No. FEMA-6431)	Ohio River	About 0.6 mile downstream of confluence of Bayou Creek.	*305
			About 0.2 mile upstream of confluence of Bayou Creek.	*336

Maps available for inspection at the Village Hall, Joppa, Illinois.

Illinois	(V) Lake Zurich Lake County (Docket No. FEMA-6431).	Buffalo Creek	At downstream of corporate limit	*803
			About 600 feet downstream of Sandalwood Court	*820
			About 1,000 feet upstream of Old Mill Grove Road	*823
		North Flint Creek	Just upstream of U.S. Route 12	822*
			Just downstream of Briarwood Road	*834
		Echo Lake	Within corporate limits	*844
		Lake Zurich	Within corporate limits	*844

Maps available for inspection at the Village Clerk's Office, Municipal Building, 61 West Main Street, Lake Zurich, Illinois.

Illinois	(Uninc.) Massac County (Docket No. FEMA-6431)	Ohio River	About 15.3 miles downstream of Interstate 24 (at downstream county boundary).	*334
			About 12.7 miles upstream of Interstate 24 (at upstream county boundary).	*341
		Massac Creek	Just upstream of U.S. Route 45	*338
			Just downstream of County Highway 13	*345
			Just downstream of Interstate 24	*369
			Just downstream of State Route 145	*404

Maps available for inspection at the County Clerk's Office, County Courthouse,Superman Square, Metropolis, Illinois.

Illinois	(C) McHenry, McHenry County (Docket No. FEMA-5700).	Fox River	Within corporate limits	*740
		Boone Creek	Just upstream of Green Street	*740
			About 350 feet downstream of Dam	*765
			Just upstream of Dam	*767

FINAL BASE (100-YEAR) FLOOD ELEVATIONS—Continued

State	City/town/county	Source of flooding	Location	#Depth in feet above ground. *Elevation in feet (NGVD)
		Lakeland-Park Drainage Ditch	About 1.2 miles upstream of Dam	*772
			Mouth at Boone Creek	*743
			About 0.25 miles upstream of Chicago and North Western Railroad	*747
Maps available for inspection at the City Clerk's Office, City Hall, 1111 North Green Street, McHenry, Illinois.				
Illinois	(V) Olmsted, Pulaski County (Docket No. FEMA-6431)	Ohio River	At downstream corporate limit	*332
			At upstream corporate limit	*333
Maps available for inspection at the Village Hall, Olmsted, Illinois.				
Indiana	(C) Gas City, Grant County (Docket No FEMA-6442)	Mississinewa River	About 0.7 mile downstream of State Route 22	*819
			About 0.9 mile upstream of State Route 22	*823
Maps available for inspection at City Hall, 211 East Main, Gas City, Indiana.				
Indiana	(T) Mauckport, Harrison County (Docket No. FEMA-6442).	Ohio River	Within the community	*436
Maps available for inspection at Town Hall, Mauckport, Indiana.				
Indiana	(T) New Amsterdam, Harrison County (Docket No. FEMA-6442).	Ohio River	Within the community	*434
Maps available for inspection at Town Hall, Central, Indiana.				
Indiana	(T) Troy, Perry County (Docket No. FEMA-6442)	Ohio River	Within the community	*368
Maps available for inspection at Town Hall, Troy, Indiana.				
Maine	Ogunquit, Village York County (Docket No. FEMA-6431).	Josias River	At confluence with basin	*9
			Downstream of U.S. Route 1	*27
			Upstream corporate limits	*34
		Ogunquit River	At Beach Street	*9
			Upstream of U.S. Route 1	*25
			At confluence of Ogunquit River Tributary	*62
			Upstream of North Village Road	*87
		Ogunquit River	At confluence with Ogunquit River Tributary	*62
			Downstream of Maine Turnpike	*71
		Atlantic Ocean	At southern corporate limits	*23
			At Jacks Cove	*13
			At Perkins Cove	*15
			At Oarweed Cove	*14
			At northern corporate limits	*14
Maps available for inspection at the Village Hall, School Street, Ogunquit, Maine.				
Maine	Wells, Town York County (Docket No. FEMA-6431)	Blacksmith Brook	Confluence with Webhannet River	*9
			Upstream of U.S. Route 1	*44
			Approximately 1,050' upstream of U.S. Route 1	*63
		Depot Brook	Confluence with Webhannet River	*9
			Upstream of Concrete Dam	*38
			Approximately 2,600' upstream of U.S. Route 1	*77

44 CFR Part 70

[Docket No. FEMA-5909]

Letter of Map Amendment for the City of Glendale, Artzona Under National Flood Insurance Program; Correction

AGENCY: Federal Emergency Management Agency.

ACTION: Final Rule, Map Correction.

SUMMARY: The Federal Emergency Management Agency (FEMA) published a list of communities for which maps identifying Special Flood Hazard Areas have been published. This list included the City of Glendale, Arizona. It has been determined by the Associate Director, State and Local Programs and Support, after acquiring additional flood information and after further technical review of the Flood Insurance Rate Map for the City of Glendale, Arizona, that certain property is not within the Special Flood Hazard Area.

This map amendment, by establishing that the subject property is not within the Special Flood Hazard Area, removes the requirement to purchase flood insurance for that property as a condition of Federal or federally related financial assistance for construction or acquisition purposes.

EFFECTIVE DATE: March 14, 1983.

FOR FURTHER INFORMATION CONTACT: Dr. Brian R. Mrazik, Acting Chief, Engineering Branch, Natural Hazards Division, Federal Emergency Management Agency, Washington, D.C. 20472, (202) 287–0230.

SUPPLEMENTARY INFORMATION: If a property owner was required to purchase flood insurance as a condition of Federal or federally related financial assistance for construction or acquisition purposes, and the lender now agrees to waive the property owner from maintaining flood insurance coverage on the basis of this map amendment, the property owner may obtain a full refund of the premium paid for the current policy year, provided that no claim is pending or has been paid on the policy in question during the same policy year. The premium refund may be obtained through the insurance agent or broker who sold the policy, or from the National Flood Insurance Program (NFIP) at: P.O. Box 34294, Bethesda, Maryland 20034, Telephone: (800) 638–6620.

The map amendments listed below are in accordance with § 70.7(a):

Map No. 040045, Panels 0006C and 0007C, published on October 6, 1980, in 45 FR 66116, indicate that the existing structures located on Lots 282 through 304, Westree Unit 1, Phase 4, Glendale, Arizona, as recorded in Book 208, page 22 of records, in the Office of the Recorder, Maricopa County, Arizona, are located within the Special Flood Hazard Area.

Map No. 040045, Panels 0006C and 0007C are hereby corrected to reflect that the existing structures located on the above-mentioned lots are not within the Special Flood Hazard Area identified on October 6, 1980. These structures are in Zone B.

Pursuant to the provisions of 5 U.S.C. 605(b), the Associate Director, State and Local Programs and Support, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that this rule if promulgated will not have a significant economic impact on a substantial number of small entities. This rule provides routine legal notice of technical amendments made to designated Special Flood Hazard Areas on the basis of updated information and imposes no new requirements or regulations on participating communities.

[Docket No. FEMA-5908]

Letter of Map Amendment for the City of Mesa, Ariz., Under National Flood Insurance Program; Correction

AGENCY: Federal Emergency Management Agency.

ACTION: Final Rule, Map Correction.

SUMMARY: The Federal Emergency Management Agency (FEMA) published a list of communities for which maps identifying Special Flood Hazard Areas have been published. This list included the City of Mesa, Arizona. It has been determined by the Associate Director, State and Local Programs and Support, after acquiring additional flood information and after further technical review of the Flood Insurance Rate Map for the City of Mesa, Arizona, that certain property is not within the Special Flood Hazard Area.

This map amendment, by establishing that the subject property is not within the Special Flood Hazard Area, removes the requirement to purchase flood insurance for that property as a condition of Federal or federally related financial assistance for construction or acquisition purposes.

EFFECTIVE DATE: March 14, 1983.

FOR FURTHER INFORMATION CONTACT: Dr. Brian R. Mrazik, Acting Chief, Engineering Branch, Natural Hazards Division, Federal Emergency Management Agency, Washington, D.C. 20472, (202) 287–0230.

SUPPLEMENTARY INFORMATION: If a property owner was required to purchase flood insurance as a condition of Federal or federally related financial assistance for construction or acquisition purposes, and the lender now agrees to waive the property owner from maintaining flood insurance coverage on the basis of this map amendment, the property owner may obtain a full refund of the premium paid for the current policy year, provided that no claim is pending or has been paid on the policy in question during the same policy year. The premium refund may be obtained through the insurance agent or broker who sold the policy, or from the

National Flood Insurance Program (NFIP) at: P.O. Box 34294, Bethesda, Maryland 20034, Telephone: (800) 638–6620.

The map amendments listed below are in accordance with § 70.7(a):

Map No. 040048, Panel 0020B, published on October 6, 1980, in 45 FR 66116, indicates that the existing structure located on Lot 42 of Woodland Heights, Recorded as Instrument No. 354930 in Book 227, page 23, in the Office of the Recorder, Maricopa County, Arizona, is located within the Special Flood Hazard Area.

Map No. 040048, Panel 0020B is hereby corrected to reflect that the existing structure located on the above-mentioned lot is not within the Special Flood Hazard Area identified on October 6, 1980. This structure is in Zone B.

Pursuant to the provisions of 5 U.S.C. 605(b), the Associate Director, State and Local Programs and Support, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that this rule if promulgated will not have a significant economic impact on a substantial number of small entities. [Docket No. FEMA-5908]

Letter of Map Amendment for the City of Phoenix, Arizona Under National Flood Insurance Program; Correction

AGENCY: Federal Emergency Management Agency.

ACTION: Final rule, map correction.

SUMMARY: The Federal Emergency Management Agency (FEMA) published a list of communities for which maps identifying Special Flood Hazard Areas have been published. This list included the City of Phoenix, Arizona. It has been determined by the Associate Director, State and Local Programs and Support, after acquiring additional flood information and after further technical review of the Flood Insurance Rate Map for the City of Phoenix, Arizona, that certain property is not within the Special Flood Hazard Area.

This map amendment, by establishing that the subject property is not within the Special Flood Hazard Area, removes the requirement to purchase flood insurance for that property as a condition of Federal or federally related

financial assistance for construction or acquisition purposes.

EFFECTIVE DATE: March 14, 1983.

FOR FURTHER INFORMATION CONTACT: Dr. Brian R. Mrazik, Acting Chief, Engineering Branch, Natural Hazards Division, Federal Emergency Management Agency, Washington, D.C. 20472, (202) 287–0230.

SUPPLEMENTARY INFORMATION: If a property owner was required to purchase flood insurance as a condition of Federal or federally related financial assistance for construction or acquisition purposes, and the lender now agrees to waive the property owner from maintaining flood insurance coverage on the basis of this map amendment, the property owner may obtain a full refund of the premium paid for the current policy year, provided that no claim is pending or has been paid on the policy in question during the same policy year. EFFECTIVE DATE: March 14, 1983.

FOR FURTHER INFORMATION CONTACT: Dr. Brian R. Mrazik, Acting Chief, Engineering Branch, Natural Hazards Division, Federal Emergency Management Agency, Washington, D.C. 20472, (202) 287–0230.

SUPPLEMENTARY INFORMATION: If a property owner was required to purchase flood insurance as a condition of Federal or federally related financial assistance for construction or acquisition purposes, and the lender now agrees to waive the property owner from maintaining flood insurance coverage on the basis of this map amendment, the property owner may obtain a full refund of the premium paid for the current policy year, provided that no claim is pending or has been paid on the policy in question during the same policy year. The premium refund may be obtained through the insurance agent or broker who sold the policy, or from the National Flood Insurance Program (NFIP) at: P.O. Box 3494, Bethesda, Maryland 20034, Telephone: (800) 638–6620.

The map amendments listed below are in accordance with § 70.7(a):

Map No. 060424, Panel 0002B, published on October 6, 1980, in 45 FR 66117, indicates that the existing structures located on Lots 1 through 4, inclusive of the Covell Health Center, Subdivision No. 3121, filed in the Office of the County Recorder of Yolo County, California, in Map Book 12, Page Nos. 78 through 80, on May 21, 1982, as per Certificate No. 3433, are located within the Special Flood Hazard Area.

Map No. 060424, Panel 0002B is hereby corrected to reflect that the existing structures located on Lots 1 through 4 are not within the Special Flood Hazard Area identified on October 6, 1980. These structures are in Zone C.

Pursuant to the provisions of 5 U.S.C. 605(b), the Associate Director, State and Local Programs and Support, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that this rule if promulgated will not have a significant economic impact on a substantial number of small entities. This rule provides routine legal notice of technical amendments made to designated Special Flood Hazard Areas on the basis of updated information and imposes no new requirements or regulations or participating communities.

44 CFR Part 70

[Docket No. FEMA-5908]

Letter of Map Amendment for City of Novato, California; Under National Flood Insurance Program; Correction

AGENCY: Federal Emergency Management Agency.

ACTION: Final Rule, Map Correction.

SUMMARY: The Federal Emergency Management Agency (FEMA) published a list of communities for which maps identifying Special Flood Hazard Areas have been published. This list included the City of Novato, California. It has been determined by the Associate Director, State and Local Programs and Support, after acquiring additional flood information and after further technical review of the Flood Insurance Rate Map for the City of Novato, California, that certain property is not within the Special Flood Hazard Area.

This map amendment, by establishing that the subject property is not within the Special Flood Hazard Area, removes the requirement to purchase flood insurance for that property as a condition of Federal or federally related financial assistance for construction or acquisition purposes.

EFFECTIVE DATE: March 14, 1983.

FOR FURTHER INFORMATION CONTACT: Dr. Brian R. Mrazik, Acting Chief, Engineering Branch, Natural Hazards Division, Federal Emergency Management Agency, Washington, D.C. 20472, (202) 287-0230.

SUPPLEMENTARY INFORMATION: If a property owner was required to purchase flood insurance as a condition of Federal or federally related financial assistance for construction or acquisition purposes, and the lender now agrees to waive the property owner from maintaining flood insurance coverage on the basis of this map amendment, the property owner may obtain a full refund of the premium paid for the current policy year, provided that no claim is pending or has been paid on the policy in question during the same policy year. The premium refund may be obtained through the insurance agent or broker who sold the policy, or from the National Flood Insurance Program (NFIP) at: P.O. Box 34294, Bethesda, Maryland 20034, Telephone: (800) 638-6620.

The map amendments listed below are in accordance with § 70.7(a):

Map No. 060178, Panel 0003A, published on October 6, 1980, in 45 FR 66118, indicates that any existing structures located on Lot 12, as shown upon that certain map entitled "The Woodlands, Novato, Marin County, California", filed for record August 9, 1978, in Volume 17 of Maps at page 50, in the Office of the Recorder, Marin County, California, are located within the Special Flood Hazard Area.

Map No. 060178, Panel 0003A is hereby corrected to reflect that existing structures located on the above-mentioned lot are not within the Special Flood Hazard Area identified on October 6, 1980. These structures are in Zone C.

Pursuant to the provisions of 5 U.S.C. 605(b), the Associate Director, State and Local Programs and Support, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that this rule if promulgated will not have a significant economic impact on a substantial number of small entities. This rule provides routine legal notice of technical amendments made to designated Special Flood Hazard Areas on the basis of updated information and imposes no new requirements on regulations or participating communities.

Box 34294, Bethesda, Maryland 20034, Phone Toll Free (800) 638–8620.

The map amendments listed below are in accordance with § 70.7(a):

Map Number H and I 125139 B, Panel 09, published on October 6, 1980 in 45 FR 66060 indicates that a parcel of land containing 18.2 acres more or less in Section 6, Township 29 South, Range 16 East, in Pinellas County, Florida, said parcel being the site of the proposed Coachman Ridge Condominium project and being recorded in Deed Reference 5431, Pages 1408 and 1409, and Deed Reference 5288, Pages 393 and 394 in the Public Records of Pinellas County, Florida, is located within the Special Flood Hazard Area.

Map Number H and I 125139 B, Panel 09 is hereby corrected to reflect that the above-mentioned property is not within the Special Flood Hazard Area identified on July 8, 1977.

Pursuant to the provisions of 5 U.S.C. 605(b), the Associate Director, State and Local Programs and Support, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that this rule if promulgated, will not have a significant economic impact on a substantial number of small entities. This rule provides routine legal notice of technical amendments made to designated special flood hazard areas on the basis of updated information and imposes no new requirements or regulations on participating communities.

[Docket No. FEMA-5002]

Letter of Map Amendment for Village of Orland Park, Ill.; Under National Flood Insurance Program; Correction

AGENCY: Federal Emergency Management Agency.

ACTION: Final rule, map correction.

SUMMARY: The Federal Emergency Management Agency published a list of communities for which maps identifying Special Flood Hazard Areas have been published. This list included the Village of Orland Park, Illinois. It has been determined by the Associate Director, State and Local Programs and Support after acquiring additional flood information and after further technical review of the Flood Insurance Rate Map for the Village of Orland Park, Illinois, that a certain structure is not within the Special Flood Hazard Area.

This map amendment, by establishing that the subject structure is not within the Special Flood Hazard Area, removes the requirement to purchase flood insurance for that property as a condition of Federal or federally-related financial assistance for construction or acquisition purposes.

EFFECTIVE DATE: March 14, 1983.

FOR FURTHER INFORMATION CONTACT: Dr. Brian R. Mrazik, Acting Chief, Engineering Branch, Natural Hazards Division, Federal Emergency Management Agency, Washington, D.C. 20472, (202) 287–0230.

SUPPLEMENTARY INFORMATION: If a property owner was required to purchase flood insurance as a condition of Federal or federally-related financial assistance for construction or acquisition purposes, and the lender now agrees to waive the property owner from maintaining flood insurance coverage on the basis of this map

amendment, the property owner may obtain a full refund of the premium paid for the current policy year, provided that no claim is pending or has been paid on the policy in question during the same policy year. The premium refund may be obtained through the insurance agent or broker who sold the policy, or from the National Flood Insurance Program (NFIP) at: P.O. Box 34294, Bethesda, Maryland 20034, Phone Toll Free (800) 638–6620.

The map amendments listed below are in accordance with § 70.7(a):

Map Number 170140, Panel 0002D, published on March 5, 1981, in 46 FR 15269, indicates that the existing structure located on Lot 88, Park View Estates Subdivision, Village of Orland Park, Illinois, as recorded on Instrument No. 2506648 in the Recorder's Office of Cook County, Illinois, is located partially within the Special Flood Hazard Area.

Map Number 170140, Panel 0002D is hereby corrected to reflect that the existing structure located on Lot 88 of the above-mentioned property is not within the Special Flood Hazard Area identified on February 4, 1981. This structure is in Zone C.

Pursuant to the provisions of 5 U.S.C. 605(b), the Associate Director, State and Local Programs and Support, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that this rule if promulgated, will not have a significant economic impact on a substantial number of small entities. [Docket No. FEMA-5909]

Letter of Map Amendment for City of Iowa City, Iowa; Under National Flood Insurance Program; Correction

AGENCY: Federal Emergency Management Agency.

ACTION: Final rule, map correction.

SUMMARY: The Federal Emergency Management Agency published a list of communities for which maps identifying Special Flood Hazard Areas have been published. This list included the City of Iowa City, Iowa. It has been determined by the Associate Director, State and Local Programs and Support after acquiring additional flood information and after further technical review of the Flood Insurance Rate Map for the City of Iowa City, Iowa, that a certain

structure is not within the Special Flood Hazard Area.

This map amendment, by establishing that the subject structure is not within the Special Flood Hazard Area, removes the requirement to purchase flood insurance for that property as a condition of Federal or federally-related financial assistance for construction or acquisition purposes.

EFFECTIVE DATE: March 14, 1983.

FOR FURTHER INFORMATION CONTACT: Dr. Brian R. Mrazik, Acting Chief, Engineering Branch, Natural Hazards Division, Federal Emergency Management Agency, Washington, D.C. 20472, (202) 287–0230.

SUPPLEMENTARY INFORMATION: If a property owner was required to purchase flood insurance as a condition of Federal or federally-related financial assistance for construction or acquisition purposes, and the lender now agrees to waive the property owner from maintaining flood insurance coverage on the basis of this map amendment, the property owner may obtain a full refund of the premium paid for the current policy year, provided that no claim is pending or has been paid on the policy in question during the same policy year. The premium refund may be obtained through the insurance agent or broker who sold the policy, or from the National Flood Insurance Program (NFIP) at: P.O. Box 34294, Bethesda, Maryland 20034, Phone Toll Free (800) 638–6620.

The map amendments listed below are in accordance with § 70.7(a):

Map Number 190171, Panel 0010B, published on October 6, 1980, in 45 FR 66102, indicates that the property located at 412 and 416 South Linn Street, being a part of Block 19, Iowa City, Iowa, and recorded as Instrument No. 5941 in Deed Book 605, Page 332 of the Johnson County Records, is located within the Special Flood Hazard Area.

Map Number 190171, Panel 0010B is hereby corrected to reflect that the existing structure located at 412 and 416 South Linn Street, being a part of Block 19, Iowa City, Iowa, is not within the Special Flood Hazard Area identified on May 2, 1977. This structure is in Zone B.

Pursuant to the provisions of 5 U.S.C. 605(b), the Associate Director, State and Local Programs and Support, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that this rule if promulgated, will not have a significant economic impact on a substantial number of small entities. [Docket No. FEMA–5923]

Letter of Map Amendment for City of Las Vegas, Nev.; Under National Flood Insurance Program; Correction

AGENCY: Federal Emergency Management Agency.

ACTION: Final Rule, Map Correction.

SUMMARY: The Federal Emergency Management (FEMA) published a list of communities for which maps identifying Special Flood Hazard Areas have been published. This list included the City of Las Vegas, Nevada. It has been determined by the Associate Director, State and Local Programs and Support, after acquiring additional flood information and after further technical review of the Flood Insurance Rate Map for the City of Las Vegas, Nevada, that certain property is not within the Special Flood Hazard Area.

This map amendment,by establishing that the subject property is not within the Special Flood Hazard Area, removes the requirement to purchase flood insurance for that property as a condition of Federal or federally related financial assistance for construction or acquisition purposes.

EFFECTIVE DATE: March 14, 1983.

FOR FURTHER INFORMATION CONTACT: Dr. Brian R. Mrazik, Acting Chief, Engineering Branch, Natural Hazards Division, Federal Emergency Management Agency, Washington, D.C. 20472, (202) 287–0230.

SUPPLEMENTARY INFORMATION: If a property owner was required to purchase flood insurance as a condition of Federal or federally related financial assistance for construction or acquisition purposes, and the lender now agrees to waive the property owner from maintaining flood insurance coverage on the basis of this map amendment, the property owner may obtain a full refund of the premium paid for the current policy year, provided that no claim is pending or has been paid on the policy in question during the same policy year. The premium refund may be obtained through the insurance agent or broker who sold the policy, or from the National Flood Insurance Program (NFIP) at: P.O. Box 34294, Bethesda, Maryland 20034, Telephone: (800) 638–6620.

The map amendments listed below are in accordance with § 70.7(a):

Map No. 325276, Panel 0025B, published on October 21, 1980, in 45 FR 69451, indicates that the existing structures located on Lots 13 through 20, Block 1, and Lots 7 through 12, Block 2, of The Village at Washington, Las Vegas, Nevada, recorded as Document No. 1530678 in Book 28, page 9 of Plats, Book No. 1571 of Official Records, in the Office of the Recorder, Clark County, Nevada, are located within the Special Flood Hazard Area.

Map No. 325276, Panel 0025B is hereby corrected to reflect that the existing structures located on the above-mentioned lot are not within the Special Flood Hazard Area identified on September 30, 1982. These structures are in Zone B.

Pursuant to the provisions of 5 U.S.C. 605(b), the Associate Director, State and Local Programs and Support, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that this rule if promulgated will not have a significant economic impact on a substantial number of small entities. 44 CFR Part 70

[Docket No. FEMA-6490]

Letter of Map Amendment for Shelby County, Tennessee; Under National Flood Insurance Program; Correction

AGENCY: Federal Emergency Management Agency.

ACTION: Final Rule, Map Correction.

SUMMARY: The Federal Emergency Management Agency published a list of communities for which maps identifying Special Flood Hazard Areas have been published. This list included the Unincorporated Areas of Shelby County, Tennessee. It has been determined by the Associate Director, State and Local Programs and Support, after acquiring additional flood information and after further technical review of the Flood Insurance Rate Map for Shelby County, Tennessee, that certain property is not within the Special Flood Hazard Area.

This map amendment, by establishing that the subject property is not within the Special Flood Hazard Area, removes the requirement to purchase flood insurance for that property as a condition of Federal or federally related financial assistance for construction or acquisition purposes.

EFFECTIVE DATE: March 14, 1983.

FOR FURTHER INFORMATION CONTACT: Dr. Brian R. Mrazik, Acting Chief, Engineering Branch, Natural Hazards Division, Federal Emergency Management Agency, Washington, D.C. 20472, (202) 287-0230.

SUPPLEMENTARY INFORMATION: If a property owner was required to purchase flood insurance as a condition of Federal or federally-related financial assistance for construction or acquisition purposes, and the lender now agrees to waive the property owner from maintaining flood insurance coverage on the basis of this map amendment, the property owner may obtain a full refund of the premium paid for the current policy year, provided that no claim is pending or has been paid on the policy in question during the same policy year. The premium refund may be obtained through the insurance agent or broker who sold the policy, or from the National Flood Insurance Program (NFIP) at: P.O. Box 34294, Bethesda, Maryland 20034, Phone Toll Free (800) 638-6620.

The map amendments listed below are in accordance with § 70.7(a):

Map Number 470214, Panel 0135B, published on January 7, 1983 in 48 FR 795, indicates that Lots 63-75 and 91-97 in Sections E and F of Greenfields Subdivision, as recorded in Plat Book 82, Pages 21 and 22 in the Office of the Register, Shelby County, Tennessee are located within the Special Flood Hazard Area.

Map Number 470214, Panel 0135B is hereby corrected to reflect that Lots 63-75 and 91-97 in Sections E and F of Greenfields Subdivision are not located within the Special Flood Hazard Area identified on December 1, 1982. Lots 65-74 and 93 are located in Zone B. Lots 63-64, 75, 91-92, and 97 are located in Zone C.

Pursuant to the provisions of 5 U.S.C. 605(b), the Associate Director, State and Local Programs and Support, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that this rule if promulgated, will not have a significant economic impact on a substantial number of small entities. This rule provides routine legal notice of technical amendments made to designated special flood hazard areas on the basis of updated information and imposes no new requirements or regulations on participating communities.

44 CFR Part 70

[Docket No. FEMA-5909]

Letter of Map Amendment for Brazoria County, Texas; Under National Flood Insurance Program; Correction

AGENCY: Federal Emergency Management Agency.

ACTION: Final Rule, Map Correction.

SUMMARY: The Federal Emergency Management Agency (FEMA) published a list of communities for which maps identifying Special Flood Hazard Areas have been published. This list included Brazoria County, Texas. It has been determined by the Associate Director, State and Local Programs and Support, after acquiring additional flood information and after further technical review of the Flood Insurance Rate Map for Brazoria County, Texas, that certain property is not within the Special Flood Hazard Area.

This map amendment, by establishing that the subject property is not within the Special Flood Hazard Area, removes the requirement to purchase flood insurance for that property as a condition of Federal or federally-related financial assistance for construction or acquisition purposes.

EFFECTIVE DATE: October 27, 1978.

FOR FURTHER INFORMATION CONTACT: Dr. Brian R. Mrazik, Acting Chief, Engineering Branch, Natural Hazards Division, Federal Emergency Management Agency, Washington, D.C. 20472, (202) 287-0230.

SUPPLEMENTARY INFORMATION: If a property owner was required to purchase flood insurance as a condition of Federal or federally-related financial assistance for construction or acquisition purposes, and the lender now agrees to waive the property owner from maintaining flood insurance coverage on the basis of this map amendment, the property owner may obtain a full refund of the premium paid for the current policy year, provided that no claim is pending or has been paid on the policy in question during the same policy year. The premium refund may be obtained through the insurance agent or broker who sold the policy, or from the National Flood Insurance Program (NFIP) at: P.O. Box 34294, Bethesda, Maryland 20034, Telephone: (800) 638-6620.

The map amendments listed below are in accordance with § 70.7(a):

Map Number FIRM 485458 C, Panel Number 32, published on October 6, 1980, in FR Volume 45 No. 195, page 66097, indicates that the 46.22162 acre tract, as described in Deed Book Volume 1531, pages 338-340, of Brazoria County, Texas, is located within the Special Flood Hazard Area.

Map Number FIRM 485458 C, Panel Number 32, is hereby corrected to reflect that existing structure located on a 46.22162 acre tract of the above-mentioned property is not within the Special Flood Hazard Area identified on October 27, 1978.

Pursuant to the provisions of 5 U.S.C. 605(b), the Associate Director, State and Local Programs and Support to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that this rule, if promulgated, will not have a significant economic impact on a substantial number of small entities. This rule provides routine legal notice of technical amendments made to designated special flood hazard areas on the basis of updated information and imposes no new requirements or regulations on participating communities.

Proposed Rules

Federal Register
Vol. 48, No. 50
Monday, March 14, 1983

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

FEDERAL HOME LOAN BANK BOARD

12 CFR Parts 563, 563c, and 563g

[No. 83-126]

Securities Offerings

March 3, 1983.

AGENCY: Federal Home Loan Bank Board.

ACTION: Proposed rule.

SUMMARY: The Federal Home Loan Bank Board ("Board"), as the operating head of the Federal Savings and Loan Insurance Corporation ("FSLIC" or "Corporation"), proposes to adopt regulations governing certain offers or sales of securities issued by an institution ("issuer") where (1) institution is an "insured institution" as that term is defined in § 561.1 of the Board's Insurance regulations, (2) the institution is in organization as a Federally-chartered insured institution, or (3) the institution is in organization as a state-chartered institution and applies for insurance of accounts by the FSLIC within one year of organization. The proposed rules would provide that an issuer's offer or sale of securities shall only be made through the use of an offering circular which has been filed with and declared effective by the Corporation. Exemptions would be available for offerings (1) commenced prior to the effective date of any final rules, (2) to employees or directors pursuant to certain plans, (3) of securities exempt from registration under the securities Act of 1933 ("Securities Act") other than by section 3(a)(5) of the Securities Act, (4) complying with board's regulations on retail repurchase agreements, except where the issuer has a net-worth deficiency, (5) in conversions from mutual-to-stock form other than in a supervisory case, and (6) in certain non-public offerings. The offering circular would be required to comply with certain items of Form OC and, when applicable, Form PS under the Board's Conversion Regulations and with all of the item requirements of the form that the issuer would be entitled to use were it required to register the securities under the Securities Act. The Board also is proposing to amend its mutual capital certificate, outside borrowing, and subordinated debt regulations to eliminate offering circular requirements that would be rendered unnecessary by the proposed regulations, delete the minimum-denomination requirements for outside borrowing and subordinated debt securities not sold in the offices of insured institutions, and permit under specified circumstances the sale of mutual capital certificates, outside borrowing, and subordinated debt securities in the offices of insured institutions provided that the securities have a minimum denomination of $2,500. Finally, the Board proposes to amend its retail repurchase agreement regulations to clarify the offering circular requirements.

The purpose of the proposed amendments is to establish uniform rules for securities offerings applicable to all insured institutions and to relieve current restrictions on securities activities by insured institutions at their offices.

DATE: Comments must be received by May 9, 1983.

ADDRESS: Send comments to Director, Information Services, Office of the Secretariat, Federal Home Loan Bank Board, 1700 G Street, N.W., Washington, D.C. 20552. Comments will be available for public inspection at this address.

FOR FURTHER INFORMATION CONTACT: Harry M. Zimmerman, Jr., (202-377-6459), Associate General Counsel, Division of Securities and Corporate Analysis, Office of General Counsel, of John P. Harootunian, (202-377-6415), Attorney, Division of Securities and Corporate Analysis, Office of General Counsel, Federal Home Loan Bank Board, at the above address.

SUPPLEMENTARY INFORMATION:

The Regulation of Securities Offerings by Insured Institutions

The securities offering regulations proposed today by the Board would be applicable to institutions the accounts of which are insured by the FSLIC ("insured institutions"), Federally-chartered stock savings and loan associations and savings banks in organization, and state-chartered stock savings and loan associations in organization which apply for insurance of accounts by the FSLIC within one year of organization.

Pursuant to section 3(a)(5) of the Securities Act, securities issued by savings and loan associations and similar institutions "supervised and examined by State or Federal authority having supervision over . . . such institution[s]" are exempt from the registration requirements of the Securities Act. However, because the section 3(a)(5) exemption from securities registration is limited to savings and loan associations and similar institutions that are regulated by a Federal or state authority (which is similar to the registration exemption for commercial banks under section 3(a)(2) of the Securities Act), a principal implicit ground for the exemption is that the locus of regulation of the securities activities of financial institutions supervised and examined by state or Federal authorities should be those authorities rather than the Securities and Exchange Commission. Thus, because it has through the FSLIC supervisory and examination authority over insured institutions, it is the Board's responsibility to regulate the securities activities of those institutions when it finds such regulation to be appropriate for the protection of the investing public.

In addition, while securities issued by insured institutions are exempt from the Securities Act registration requirements, the offer and sale of those securities are subject to the antifraud provisions of the Securities Act and the Securities Exchange Act of 1934 ("Exchange Act"). Although the antifraud provisions are prohibitions against fraudulent conduct, their effect is to prescribe that an issuer make full and fair disclosure of all information material to an investment decision in connection with the offer and sale of securities. A violation of the Federal securities laws antifraud provisions would generally constitute an unsafe and unsound practice by an insured institution. In addition, the safety and soundness of the savings and loan industry is dependent upon its access to capital and the rational free market allocation of capital among individual insured institutions. The use of inadequate or misleading disclosure by individual insured institutions in connection with the offer and sale of

securities could have a significant adverse effect on the capabilities of other insured institutions to raise capital, could result in economic irrational allocation of capital within the industry, and could lead to illiquid and disorderly markets for the securities of insured institutions. Therefore, the Board also has the responsibility of regulating the securities activities of insured institutions when it finds such regulation to be appropriate for the preservation of the safety and soundness of insured institutions and the savings and loan industry. Finally, of course, the Board has the responsibility of regulating the securities activities of Federally-chartered insured institutions upon a determination that such regulation is appropriate in securing the purposes of those institutions.

The Board long has found it appropriate to regulate the offer and sale of debt securities by all insured institutions. See, 12 CFR 563.8 (f), (g), and (h), 12 CFR 563.8–1(d), and 12 CFR 563.8–4. The Board also has regulated the offer and sale of equity securities by insured institutions converting from the mutual to the stock form of organization. See, 12 CFR Part 563b. However, the Board has not regulated the post-conversion offer and sale of equity securities by insured institutions. One reason that regulation has not been extended to this area is that the constraints imposed upon converted institutions by the periodic reporting requirements of the Exchange Act ensure to some extent that disclosure made by competing insured institutions in post-conversion public offerings of equity securities would be comparable. In addition, because most converted institutions have not been in the stock form long enough to contemplate post-conversion primary offerings of equity securities, the subject of the regulation of such offerings has not before been viewed as one appropriate for immediate regulatory action.

The Board also has not regulated the offer and sale of equity or debt securities by state-chartered stock institutions in organization or the post-organization offer and sale of equity securities by state-chartered stock insured institutions. The principal reasons that regulation has not been exended to these activities are that (1) the Board did not have the power to charter *de novo* Federal stock institutions and thus did not regulate initial equity offerings of Federally-chartered institutions in organization, and (2) the Board did not regulate the post-conversion offer and sale of equity securities by Federally-chartered stock institutions. Time and events have significantly altered these considerations.

The Garn-St Germain Depository Institutions Act, of 1982, Pub. L. No. 97–320, amended section 5(a) of the Home Owners' Loan Act of 1933 (12 U.S.C. 1464(a)) to authorize the Board, under such rules and regulations as it may prescribe, to provide for the organization, examination, operation, regulation, and chartering of *de novo* Federal stock savings and loan associations and savings banks. Previously, the Board's *de novo* chartering authority was limited to Federal mutual savings and loan associations, and Federal stock charters could be issued only to existing insured institutions that had converted from the mutual to the stock form or, pursuant to Section 404 of the Depository Institutions Deregulation and Monetary Control Act of 1980, had converted from state stock charter to Federal stock charter. The regulations proposed today would apply to the offer and sale of securities by Federally-chartered stock institutions in organization.

The Board's new *de novo* stock chartering authority is more than simply an additional power; it is emblematic of a demonstrable shift of the savings and loan industry from the mutual to the stock form of organization. This shift is most visible in the Board's highly successful stock conversion program. However, because of the expanded powers granted to Federal savings and loan institutions by the Garn-St Germain Depository Institutions Act of 1982, the Board anticipates that there will be a significant number of applications for *de novo* Federal charters. The Board anticipates also that there will be increasingly intense competition for capital in the public and private markets by (1) Federally-chartered stock institutions in organization, (2) state-chartered stock institutions in organization which seek insurance of accounts by the FSLIC, (3) state and Federally-chartered mutual insured institutions converting to the stock form, (4) state-chartered stock insured institutions seeking to issue additional securities; (5) seasoned converted state-chartered and Federally-chartered stock insured institutions seeking to issue additional securities; and (6) non-diversified savings and loan holding companies seeking to issue additional securities.

It is in the interest of the Board, as the primary regulator of Federally-chartered institutions, and in the interests of the FSLIC, which is secured by the capital of insured institutions, that all insured institutions compete for capital on an equal basis with full and fair disclosure of all material information; that the disclosure of insured institutions be uniform and comparable both on an intra-industry and an inter-industry basis; and that the public and private markets for the securities of insured institutions and their holding companies be liquid and orderly.

Equality of competition, comparability of disclosure, and orderly markets may all be achieved by uniform disclosure requirements. In addition the establishment for all insured institutions of regulations governing disclosure in connection with the offer and sale of securities would serve as a significant benefit to insured institutions by providing ascertainable guides to the extent and nature of the disclosure mandated by the antifraud provisions of the Federal securities laws. Therefore, the Board in these proposed securities offering regulations does not distinguish between categories of institutions, but rather, would apply the proposed regulations to the offering of equity or debt securities by any insured institution or by any state or Federally-chartered insured institution in organization.

The Board believes that these proposed regulations, along with major revisions to its Conversion Regulations to be proposed in the near future, and prompt consideration of final revisions to its financial statement regulations, will establish a modern, uniform, systematic, and rational body of regulations governing the securities activities of insured institutions that will grant to and secure for insured institutions the full benefits of the stock form of organization.

Forms and Regulations of the Securities and Exchange Commission

In adopting the Securities Act, Congress charged the Securities and Exchange Commission ("Commission") with the responsibility of developing regulations that would define and ensure full and fair disclosure. The disclosure rules set forth in the Board's Conversion Regulations and in its financial statement regulations are modeled after the rules and regulations of the Commission. As is set forth in greater detail below, the Board proposes to require insured institutions to observe many of the forms and regulations of the Commission under the 1933 Act, as modified where appropriate by the Board's regulations, in the preparation of disclosure documents used in the public offer and sale of securities. This is not proposed by the Board in the

belief that the form and regulations of the Commission approach perfection; they undergo constant revision by the Commission itself. Rather, it is proposed because it is those forms and the information disclosed pursuant to those regulations that are the forms and the information recognized in the public markets, and it would be difficult for insured institutions to compete for capital in those markets if their offering documents were not comparable with those of other companies also seeking capital. In addition, the disclosure of insured institutions should be comparable to that of savings and loan holding companies, which register their securities with the Commission. Finally, insured institutions which did not closely observe those forms and regulations would be susceptible to a greater risk of possible liability under the antifraud provisions of the Federal securities laws by the very fact of deviance from long established and universally recognized disclosure practices.

Also in the proposed regulations, the Board proposes to adopt for non-public offerings of securities by insured institutions substantially all the requirements of Regulation D of the Commission under the 1933 Act, 12 CFR 230.501 *et seq.* The Board is proposing this action as a means to differentiate a public offering from a non-public offering, *i.e.*, if an offering by an insured institution would qualify as an exempt offering under Regulation D if it were undertaken by a corporation the securities of which were subject to the registration requirements of the Securities Act, the offering would be exempt from the public offering rules of the Board's proposed regulations.

Non-Exempt Public Offerings

Proposed § 563g.2 states that unless the offering is exempt, no insured institution, Federally-chartered stock institution in organization, or state-chartered institution in organization which applies for insurance of accounts by the FSLIC within one year of the completion of organization, shall offer or sell, directly or indirectly, a security issued by it unless the offer or sale is made through an offering circular that has been filed with and declared effective by the FSLIC.

Proposed § 563g.7 would require the offering circular to comply with all of the requirements of the registration form of the Commission the issuer would be entitled to use if it were required to register its securities under the Securities Act, with appropriate modifications from the form and Regulation S–K of the Commission to comply with the Board's regulations governing the non-financial statement portion of offering circulars found in Forms PS and OC under the Conversion Regulations. The financial statements would be required to conform to the Board's offering circular accounting requirements, Subpart A of Part 563c, and, to the extent they are not inconsistent, the accounting requirements of Regulation S–X of the Commission and the financial information requirements of Regulation S–K.

Under proposed § 563g.8(a), an offering circular or an amendment declared effective by the Corporation could not be used more than nine months after the effective date unless the information contained n the offering circular were of a date not more than sixteen months prior to its use. Proposed § 563g.8(c) would prohibit the use of an offering circular subsequent to any material change in an issuer's business operations or financial condition until an amendment had been filed and declared effective. Proposed § 563g.5(b)(3) would provide a means of filing "stickered" offering circulars to reflect non-material changes.

Under proposed § 563g.8, an offering circular of an insured institution which has a class of equity securities registered with the Board under the Exchange Act and has timely filed its required reports would be deemed automatically effective ten days after filing. Offering circulars of other insured institutions would be deemed automatically effective upon the expiration of twenty days. However, if it appeared that an offering circular were incomplete or inaccurate in any material respect, the Corporation could declare the offering circular not effective until an appropriate amendment were filed.

Miscellaneous proposed regulations under Part 563g would govern matters such as communications not deemed an offer (§ 563g.2(b)), the use of a preliminary offering circular (§ 563g.2(c)), filing and signature requirements (§ 563g.5), escrow requirements (§ 563g.10), withdrawal or abandonment (§ 563g.11), public disclosure and confidential treatment (§ 563g.13), waiver (§ 563g.14), and requests for interpretive advice or waiver (§ 563.15). Proposed § 563g.9 would establish the Board's antifraud rule for securities offerings, which would be identical with Rule 10b–5 adopted by the Commission under § 10 of the Exchange Act. Proposed § 563g.12 would require the filing of a post-sale report with the Principal Supervisory Agent and the Division of Securities and Corporate Analysis of the Office of General Counsel.

Exempt Public Offerings

Proposed § 563g.3 would exempt from the offering circular requirements the following offers and sales of securities that may involve public offerings:

(a) Offerings commenced prior to the date Part 563g becomes effective, unless the issuer is a *de novo* Federally-chartered stock institution in organization.

(b) Offerings to an issuer's employees, officers, or directors pursuant to any stock purchase, stock option, or employee benefit plan;

(c) Offerings complying with the requirements for retail repurchase agreements of § 563.8–4, except where the issuer has a net-worth deficiency under that section;

(d) Offerings exempt from registration under the Securities Act by reason of an exemption other than section 3(a)(5) of the Securities Act; and

(e) Offerings made in connection with a conversion from the mutual to the stock form of organization pursuant to Part 563b, except for supervisory conversions undertaken pursuant to § 563b.1(a).

The Board does not believe that it is necessary to regulate the issuance of securities to an issuer's employees, officers, or directors because of the likelihood that they would have the information required to make an informed investment decision. Retail repurchase agreements already are subject to extensive disclosure regulations that were drafted in view of the nature of the securities, particularly their secured status and their short maturity, and the Board is not inclined at this time to bring retail repurchase agreements under the proposed securities offering regulations unless the issuing institution has a net-worth deficiency as defined in § 563.8–4. The Board also does not believe it necessary to regulate offerings that are exempt from registration under the Securities Act by reason of an exemption other than section 3(a)(5), that is, an exemption not related to the fact that the issuer is examined and supervised by the Board. Conversion stock offerings would continue to be subject to the Conversion Regulations. The Board notes, however, that offering circulars for conversion stock and offering circulars for equity securities of non-converting institutions engaged in a public offering pursuant to these proposed rules would be comparable because of the requirement of proposed § 563g.7 that public offering circulars

comply with applicable items of Forms PS and OC of the Conversion Regulations.

Exempt Non-Public Offerings

The Board proposes in § 563g.4 that offerings in which securities are not sold to more than 15 persons and offerings which comply with Regulation D of the Commission (except with regard to the notice requirement and the resale restriction provisions) would be exempt from the offering circular requirements. Generally, Regulation D establishes disclosure requirements for offerings that qualify under the regulation for an exemption from registration by reason of the small amount involved or the limited character of the public offering under section 3(b) of the Securities Act, or by reason of the non-public character of the offering under section 4(2) of the Securities Act. Under Rule 504 of Regulation D, securities aggregating less than $500,000 may be offered and sold by an institution the equity securities of which are not registered under the Exchange Act to an unlimited number of purchasers and no specific disclosure rules are required to be observed (except, of course, for the antifraud provisions of the Federal securities laws). Rule 505 of Regulation D is limited to offers and sales of securities not exceeding $5,000,000 in any six-month period while Rule 506 has no aggregate offering price limitation. However, the two rules are similar except in regard to the specific disclosure requirements and the requirement that all purchasers in a Rule 506 transaction must be either accredited or sophisticated. Both rules prohibit sales to more than 35 investors who are not accredited investors. Accredited investors are defined in Rule 501(a) and the term includes certain institutions and organizations, officers, directors, or general partners of the issuer, and individuals with substantial net worth or income. Generally, offers and sales made pursuant to Regulation D may not involve any form of general solicitation or general advertising.

The Board does not propose in its securities offering regulations to require pre-sale filing or clearance of offering documents in an offering that meets the requirements of Regulation D. Rather, in proposed § 563g.12 it would require, as in a public sale of securities, the filing of a post-sale report that would include all of the information required in a public offering post-sale report, a statement of the factual and legal grounds for the claim of a non-public offering exemption under the Board's regulations, and copies of all offering materials. In addition, to ensure that a claimed non-public offering is not actually a step in a transaction leading to a public distribution of securities, the Board would require under § 563g.4(d) that the securities acquired in an exempt non-public offering could not be resold or otherwise disposed of for a period of two years following the sale without the written consent of the Corporation.

Revision of Minimum Denomination Rule

The Board's outside borrowing (§ 563.8), subordinated debt (§ 563.8–1), and mutual capital certificate regulations (§ 563.7–4), all have minimum denomination rules that (1) establish minimum denominations for those securities, (2) regulate disclosure in connection with the offer and sale of the securities, and (3) prohibit the sale of the securities in the offices of the issuing institution or any of its affiliates except in very limited circumstances. The Board is proposing to revise these minimum denomination rules to (1) delete all disclosure requirements (since disclosure would be regulated under proposed Part 563g), (2) permit the sale of the securities in the offices of the issuing institution or its affiliates, (3) delete all minimum denomination requirements except as to securities evidencing outside borrowings, subordinated debt securities, and mutual capital certificates sold in the offices of the issuing institution or its affiliates, and (4) establish a minimum denomination of $2,500 for securities evidencing outside borrowings, subordinated debt securities, and mutual capital certificates sold in the offices of the issuing institution or its affiliates.

The prohibition against the sale of debt securities and mutual capital certificates in the offices of issuing insured institutions or their affiliates arose out of two concerns. First, there generally was a perception that the sale of such securities in the offices of a depository institution would constitute an evasion of deposit rate control. Second, there was apprehension that some insured institutions would permit the sale of such securities to unsophisticated customers who perhaps could not reasonably be expected to fully comprehend the risks of the investment (particularly an investment in long-term securities) and who may mistakenly assume that the securities were insured. The Board does not believe that, assuming these concerns are valid, they maybe properly approached only through a flat prohibition of direct institutional sales.

It is the Boards view that issues relating to rate control, which in any event is rapidly expiring, perhaps could be preferably approached by permitting the direct institutional sale of securities evidencing outside borrowings, subordinated debentures, and mutual capital certificates in the minimum denomination established by the Depository Institution Deregulatory Commission for the market-rate account mandated by the Garn-St Germain Depository Institutions Act of 1982, *i.e.*, $2,500. It also appears to the Board that concerns regarding the sale by insured institutions of securities to their customers could be resolved through the disclosure mechanism. The issuing institution would be required under the proposed regulations to provide customers with an offering circular prepared pursuant to proposed Part 563g, which would make full and fair disclosure of all information material to an investment decision, and would state in bold-face type on its cover that the security is not insured by FSLIC. In addition, the Board is proposing in § 563.8(g), to adopt the following safeguards on direct institutional sales activities to prevent possible abuses: (1) No commissions would be permitted to be paid to any employee or other person; (2) no offers or sales would be permitted to be made at a teller counter; (3) offers and sales would be permitted to made only by regular, full-time employees; (4) no unsolicited telephone calls or visits would be permitted to be made by the issuing institution to any person in connection with the offer or sale of the securities; and (5) except for retail repurchase agreements offered and sold pursuant to § 563.8–4 the issuing institution would be required to meet at the commencement of and during any offering its regulatory net-worth requirement as calculated under generally accepted accounting principles Proposed restrictions (1) through (4) would also be extended to the offer and sale of retail repurchase agreements.

In connection with this proposal, the Board specifically solicits comments regarding (1) whether insured institutions should be permitted to offer and sell mutual capital certificates, outside borrowing, and subordinated debt securities to the public at their offices, (2) whether a minimum denomination should be established for the direct offer and sale of those securities, and (3) what safeguards, if any should be imposed on insured institutions engaged in the direct sale of such securities.

Delegation

In order that action required under proposed Part 563g could be taken

expeditiously, the Board proposes in § 563g.16 to delegate its authority under Part 563g to the General Counsel or his designee.

Initial Regulatory Flexibility Analysis

Pursuant to Section 3 of the Regulatory Flexibility Act, Pub. L. 96-354, 94 Stat. 1164 (September 19, 1980), the Board is providing the following regulatory flexibility analysis.

1. *Reasons, objective, and legal basis underlying the proposed rules.* These elements have been incorporated elsewhere in the supplementary information regarding the proposals.

2. *Small entities to which the proposed rules will apply.* The proposed rules would apply only to offers or sales of securities issued by an institution where (1) the institution is an "insured institution" defined in the Board's regulations, (2) the institution is in organization as a Federally-chartered institution, or (3) the institution is in organization as a state-chartered institution and applies for insurance of accounts from the FSLIC within one year after completion of organization.

3. *Impact of the proposed rules on small institutions.* Since the proposed rules would clarify the disclosure obligations of insured institutions in connection with the offer or sale of securities, insured institutions that may be considered small entities would be benefited. Moreover, the proposed rules would substantially reduce significant restrictions on the sale by insured institutions of debt securities and mutual capital certificates, which would benefit insured institutions that may be considered small entities.

4. *Overlapping or conflicting Federal rules.* There are no Federal rules that may duplicate, overlap, or conflict with the proposal.

5. *Alternatives to the proposed rules.* The proposed rules would clarify the requirements for information disclosure in connection with an insured institution's offering of securities. It is not possible to eliminate or significantly modify these requirements for small entities, since the disclosure requirements are governed by the nature of the offering rather than be the identity or the sized of the affected institution.

Regulatory Analysis

The elements of regulatory analysis for major proposed regulations required by Board Resolution No. 80-584 (September 11, 1980) have been incorporated into the supplementary information regarding the proposals.

List of Subjects in 12 CFR Parts 563, 563c, and 563g

Accounting, Savings and loan associations, Securities.

Accordingly, the Federal Home Loan Bank Board hereby proposes to amend Parts 563 and 563c, and to add a new Part 563g under Subchapter D, Chapter V of Title 12, Code of Federal Regulations, as set forth below.

SUBCHAPTER D—FEDERAL SAVINGS AND LOAN INSURANCE CORPORATION

PART 563—OPERATIONS

1. Amend § 563.7-4 by removing paragraph (h); redesignating paragraphs (i), (j), (k), and (l) as paragraphs (h), (i), (j), and (k), respectively; and revising paragraphs (e) and (f); as follows:

§ 563.7-4 Mutual capital certificates.

* * * * *

(e) *Minimum denominations of mutual capital certificates.* (1) *General rule.* The minimum denomination of a mutual capital certificate shall be $2,500.

(2) *Exemptions.* There is no minimum denomination for mutual capital certificates which satisfy any of the exemptions under § 563.8(f)(2) of this Part.

(f) *Direct sales.* Mutual capital certificates shall only be offered or sold at an office of an insured institution or an affiliate if the requirements of § 563.8(g) are satisfied.

* * * * *

(h) *Supervisory objection.* * * *

(i) *Limitation on an offering period.* * * *

(j) *Reports.* * * *

(k) *Requirements as to mutual capital certificates.* * * *

2. Amend § 563.8 by removing paragraph (h); redesignation paragraphs (i), (j), and (k) as paragraphs (h), and (i), and (j), respectively, and revising paragraphs (f) and (g); as follows:

§ 563.8 Borrowing limitations.

* * * * *

(f) *Minimum denominations of securities evidencing outside borrowings.*

(1) *General rule.* The minimum denomination of a security evidencing an outside borrowing shall be $2,500.

(2) *Exemptions.* There is no minimum denomination for a security evidencing an outside borrowing:

(i) Complying with § 563.8-4 of this Part; or

(ii) Not offered or sold at any office of the institution or any of its affiliates; and

(iii) The offer and sale of which complies with Part 563g of this Subchapter.

(g) *Direct sales.* Securities evidencing outside borrowings shall only be offered or sold at an office of an insured institution or an affiliate if:

(1) No commissions are paid to any employee or other person;

(2) No offers or sales are made by tellers or at the teller counter;

(3) Offers and sales are made only by regular, full-time employees;

(4) No unsolicited telephone calls or visits are made by the issuing insured institution to any person in connection with any offers or sales; and

(5) Except for an institution issuing securities complying with § 563.8-4 of this Part, the institution's net worth at the commencement of and during any offering meets its regulatory net-worth requirement calculated under generally accepted accounting principles.

(h) *Note accounts.* * * *

(i) *Sales and repurchase of loans or loan participations.* * * *

(j) *Reverse repurchase agreements used for arbitraging.* * * *

3. Amend § 563.8-1 by revising paragraph (d)(1)(v) and by adding a new paragraph (d)(4), as follows:

§ 563.8-1 Insurance of subordinated debt securities.

* * * * *

(d) *Requirements as to securities.* * * *

(1) *Form of certificate.* * * *

(v) Be in a minimum denomination of $2,500, except that there is no minimum denomination for securities which would be exempt from the minimum denomination requirement of § 563.8(f)(2) of this Subchapter.

* * * * *

(4) *Direct sales.* Subordinated debt securities shall only be offered or sold at an office of an insured institution or an affiliate if the requirements of § 563.8(g) of this Part are satisfied.

* * * * *

4. Amend § 563.8-4 by revising paragraph (b)(5) and by adding a new paragraph (b)(6) as follows:

§ 563.8-4 Transfer and repurchase of government securities.

* * * * *

(b) * * *

(5) *Disclosure.* An institution issuing repurchase agreements shall provide each prospective repurchase agreement purchaser with an offering document which shall contain full and accurate disclosure of all material information regarding the repurchase agreement and the issuing institution. Any material change in any of the material representations set forth in the offering document shall be reflected in a revised

offering document that shall be provided to purchasers before any renewal or automatic renewal of a repurchase agreement may be effected. An institution that has a net-worth deficiency under paragraph (b)(7) of this Section shall be subject to the requirements of Part 563g of this Subchapter, except that the following financial statements may be substituted for those required to be included in an offering circular required under Part 563g:

(i) The institution's audited statements of condition and operations for its last fiscal year prepared in accordance with the requirements of § 563c.1 of this Subchapter;

(ii) On a comparative basis, the institution's latest unaudited statement of condition for the quarter ending within 135 days of any sale, renewal, or automatic renewal of a repurchase agreement, and an unaudited statement of operations for the period then ended, prepared in accordance with the requirements of § 563c.1; and

(iii) The institution's latest monthly financial report filed with the Corporation.

* * * * *

(8) *Direct sales.* Repurchase agreements shall only be offered or sold at an office of an insured institution or an affiliate if the requirements of § 563.8(g) of this Part are satisfied.

PART 563c—ACCOUNTING REQUIREMENTS

5. Amend § 563c.1 by revising paragraph (a)(2) as follows:

Subpart A—Form and Content of Financial Statements in Offering Circulars

§ 563c.1 Application of this subpart.

(a) * * *

(2) any offering circular or nonpublic offering materials required to be used in connection with an offer or sale of securities under Part 563g of this Subchapter.

* * * * *

6. Add a new Part 563g, as follows:

PART 563g—SECURITIES OFFERINGS

Sec.

563g.1 Definitions.
563g.2 Offering circular requirements.
563g.3 Exemptions.
563g.4 Nonpublic offerings.
563g.5 Filing and signature requirements.
563g.6 Effective date.
563g.7 Form, content, and accounting.
563g.8 Use of the offering circular.
563g.9 Manipulative and deceptive devices.
563g.10 Escrow requirement.
563g.11 Withdrawal or abandonment.
563g.12 Securities sale report.
563g.13 Public disclosure and confidential treatment.
563g.14 Waiver.
563g.14 Requests for interpretive advice or waiver.
563g.15 Delegation of authority.

Authority: Secs. 402, 403 and 407 of the National Housing Act, 48 Stat. 1256, 1257 and 1260, as amended, 12 U.S.C. 1725, 1726 and 1730; Sec. 5 of the Home Owners' Loan Act of 1933, 48 Stat. 132, as amended, 12 U.S.C. 1464; Reorg. Plan No. 3 of 1947, 12 FR 4981, 3 CFR, 1943–48 Comp., p. 1071.

§ 563g.1 Definitions.

(a) For purpose of this Part, the following definitions apply:

(1) "Accredited investor" means the same as in Commission Rule 501(a) (17 CFR 230.501(a)) under the Securities Act, and includes any insured institution.

(2) "Beneficial owner" means the same as in Commission Rule 13d–3 (17 CFR 240.13d–3) under the Exchange Act. (15 U.S.C. 78a–78jj).

(3) "Business combination" means the same as in Rule 501(d) (12 CFR 230.501(d)) under the Securities Act.

(4) "Commission" means the Securities and Exchange Commission.

(5) "Exchange Act" means the Seucrities and Exchange Act of 1934 (15 U.S.C. 78a–78jj).

(6) "Filing date" means the date on which any documents are actually received during business hours by the Division of Securities and Corporate Analysis, Office of General Counsel, Federal Home Loan Bank Board, 1700 G Street, NW., Washington, D.C. 20552.

(7) "Insured institution" means the same as in § 561.1 of this Subchapter, and includes an institution in organization as a Federally-chartered insured institution under Part 552 of this Chapter, and an institution in organization as a state-chartered institution if it applies to the Corporation for insurance of accounts within one year after completion of organization, provided that the offer of sale of securities was commenced after the effective date of this Part.

(8) "Issuer" means an insured institution which issues or proposes to issue any security.

(9) "Offer" includes "offer to sell" and "offer for sale" and means the same as in § 563b.2(a)(22) of this Subchapter.

(10) "Person" means the same as in § 563b.2(a)(24) of this Subchapter, and includes an insured institution.

(11) "Purchase" and "buy" means the same as in § 563b.2(a)(28) of this Subchapter.

(12) "Sale" and "sell" include every contract to sell or otherwise dispose of a security or interest in a security for value.

(13) "Securities Act" means the Securities Act of 1933 (15 U.S.C. 77a–77aa).

(14) "Security" means the same as in § 561.41 of this Subchapter.

(15) "Underwriter" means the same as in § 563b.2(a)(36) of this Subchapter.

(b) A term not defined in this Part but defined in another part of this Subchapter, when used in this Part, shall have the meanings given in such other part, unless the context otherwise requires.

(c) When used in any rules, regulations, or forms of the Commission referred to in this Part, the term "Commission" shall be deemed to refer to the Corporation or the Board, the term "registrant" shall be deemed to refer to an issuer defined in this Part, and the term "registration statement" shall be deemed to refer to an offering circular filed under this Part, unless the context otherwise requires.

§ 563g.2 Offering circular requirements.

(a) *General.* No insured institution shall offer or sell, directly or indirectly, any security issued by it unless:

(a) The offer or sale is made thorugh the use of an offering circular which has been filed and declared effective pursuant to this Part; or

(2) An exemption is available under this Part.

(b) *Communications not deemed an offer.* The following communications shall not be deemed an offer under this Part:

(1) Prior to filing an offering circular, any notice of a proposed offering which statisfies the requirements of Commission Rule 135 (17 CFR 230.135) under the Securities Act; and

(2) Subsequent to filing an offering circular, any notice, circular, advertisement, letter, or other communication published or transmitted to any person which satisfies the requirements of Commission Rule 134 (17 CFR 320.134) under the Securities Act.

(c) *Preliminary offering circular.* A preliminary offering Circular may be used prior to the effective date of the offering circular if:

(1) The preliminary offering circular has been filed pursuant to this Part;

(2) The preliminary offering circular includes the information required by this Part, except for the omission of information relating to offering price, discounts or commission, amount of proceeds, conversion rates, call prices, or other matters dependent on the offering price; and

(3) The offering circular declared effective by the corporation is furnished to the purchaser prior to any sale.

§ 563g.3 Exemptions.

The offering circular requirments of § 563g.2 of this Part shall not apply to an issuer's offer or sale of securities:

(a) Commenced prior to the date this Part becomes effective, unless the issuer is a *de novo* Federally-chartered stock institution in organization.

(b) To its employees or directors pursuant to any stock purchase, stock option or employee benefit plan;

(c) Complying with the requirements for retail repurchase agreements of § 563.8–4 of this Subchapter, except where the issuer has a net worth deficiency under that Section;

(d) Exempt from registration under the Securities Act by reason of an exemption other than § 3(a)(5) of the Securities Act;

(e) In a conversion from the mutual to the stock form of organization pursuant to Part 563b of this Subchapter, except for a supervisory case conversion undertaken pursuant to § 5636.1(a) of this Subchapter; or

(f) in a non-public offering which satisfies the requirements of § 563g.4 of this Part.

§ 563g.4 Nonpublic offerings.

(a) *Requirements.* An exemption under this Part for a nonpublic offering is available for any offer or sale by an issuer of its securities which satisfies the requirements of paragraphs (b), (c), and (d) of this Section and either:

(1) The Commission's Regulation D (17 CFR 230.501–230.506), except for the notice requirements of Commission rule 503 (17 CFR 230.503) and the limitations on resale in Commission rule 502(d) (17 CFR 230.502(d)) or;

(2) The securities are sold to not more than 15 persons during the offering period, as determined under the integration provision of Commission Rule 502(a) (17 CFR 230.502(a)).

(b) *Notice.* A notice shall be filed with the Corporation not later than 10 days prior to the time any security is offered or sold in reliance on the exemption provided for a nonpublic offering, which shall include the following:

(1) The name, address, and Board file number of the issuer;

(2) The title, number, aggregate and per-unit offering price of the securities to be offered;

(3) The number of persons to whom the securities are to be offered; and

(4) A detailed statement of the grounds for the exemption claimed.

(c) *Termination of offering.* Upon the termination of a nonpublic offering, the issuer shall file a report describing the sale of its securities as required by § 563g.12(b) of this Part.

(d) *Limitations on resale.* Securities acquired in a transaction under this exemption shall not be resold or otherwise disposed of for a period of two years without the prior written consent of the Corporation.

(1) The issuer shall exercise reasonable care to ensure that the purchasers of the securities are not purchasing for resale or distribution, which reasonable care shall include, but not be limited to, the following:

(i) Reasonable inquiry to determine if the purchaser is acquiring the securities for himself or for other persons;

(ii) Written disclosure to each purchaser prior to sale that the securities cannot be resold or otherwise disposed of for a period of two years without the prior written consent of the Corporation; and

(iii) Placement of a legend on the certificate or other document that evidences the securities which states that: "The securities evidenced by this certificate are restricted as to transfer for a period of two years from the date of this certificate pursuant to the rules and regulations of the Federal Savings and Loan Insurance Corporation and may not be sold or otherwise disposed of without the prior written consent of the Federal Savings and Loan Insurance Corporation."

(2) The determination of the period securities have been held after acquisition for the purposes of this Section shall be made as would be determined under the provisions of Commission Rule 144(df (17 CFR 230.144(d)).

(3) Where securities of the issuer are exchanged for other securities in any business combination, securities of the issuer which are restricted under this Section may be exchanged for other securities which are similarly restricted and have the legend required by paragraph (b)(1)(iii) of this Section, and the holding periods may run consecutively.

§ 563g.5 Filing and signature requirements.

(a) *Procedures.* An offering circular, amendment, notice, report, or other document required by this Part shall, unless otherwise indicated, be filed in accordance with the requirements of paragraphs (e)(1), (3) and (4); (f) to (q), and (s) of § 563b.8 of this Subchapter.

(b) *Number of copies.* (1) Unless otherwise required, any filing under this Part shall include 10 copies of the document to be filed with the Corporation.

(2) Within five days after the effective date of an offering circular or the commencement of a public offering after the effective date, whichever occurs later, 25 copies of the offering circular used shall be filed with the Corporation.

(3) After the effective date of an offering circular, an offering circular which varies from the form previously filed shall not be used, unless it includes only non-material supplemental or additional information and until 10 copies have been filed with the Corporation.

(c) *Signature.* (1) Any offering circular, amendment, exhibit, or consent filed with the Corporation pursuant to this Part, shall include an attached manually signed signature page which authorizes the filing and has been signed by:

(i) the issuer, by its duly authorized representative;

(ii) the issuer's principal executive officer;

(iii) the issuer's principal financial officer;

(iv) the issuer's principal accounting officer; and

(v) At least a majority of the issuer's directors.

(2) Any other document filed pursuant to this Part shall be signed by a person who is duly authorized.

(3) At least two copies of every document filed pursuant to this Part shall be manually signed and every copy of a document filed shall:

(i) Have the name of each person who signs typed or printed beneath the signature;

(ii) State the capacity or capacities in which the signature is provided; and

(iii) Provide the name of each director of the issuer, if the majority of directors is required to sign the document.

§ 563g.6 Effective date.

An offering circular filed by an insured institution that has a class of equity securities which are registered with the Board under Section 12 of the Exchange Act (15 U.S.C. 78*l*), and which has filed in a timely manner all reports required to be filed during the twelve calendar months preceding the filing of the offering circular and any portion of a month immediately preceding the filing of the offering circular, shall be deemed to have been automatically declared effective by the Corporation on the tenth day after filing or on such earlier date as the Corporation may determine for good cause shown, and an offering circular filed by any other insured institution shall be deemed to have been automatically declared effective by the Corporation on the twentieth day after filing or on such earlier date as the

Corporation may determine upon a showing of good cause, provided that:

(a) If any amendment is filed prior to the effective date, the offering circular shall be deemed to have been filed when such amendment was filed;

(b) the period until automatic effectiveness under § 563g.9 shall be stated at the bottom of the facing page of the Form OC or any amendment;

(c) The effectiveness will be delayed if a duly authorized amendment, telegram confirmed in writing, or letter states that the effective date is delayed until a further amendment is filed specifically stating that the offering circular will become effective in accordance with § 563.6; and

(d) If it appears to the Corporation at any time that the offering circular is incomplete or inaccurate in any material respect, the Corporation may determine to declare the offering circular not effective until a materially complete and accurate amendment is filed.

§ 563g.7 Form, content, and accounting.

(a) *Form and content.* Any offering circular or amendment filed pursuant to this Part shall:

(1) Be filed under cover of Form OC, which is under Part 563b of this Subchapter;

(2) Comply with the requirements of Items 3 and 4 of Form OC and the requirements of all items of the form that the issuer would be entitled to use were it required to register the securities under the Securities Act (17 CFR Part 239);

(3) Where a form specifies that the information required by an item in the Commission's Regulation S–K (17 CFR Part 229) should be furnished, include the information as modified by any corresponding item in Form PS, which is under Part 563b of this Subchapter;

(4) Include after the facing page of the Form OC a cross reference sheet listing each item requirement of the Securities Act form used and indicate for each item the applicable heading or subheading in the offering circular under which the required information is disclosed;

(5) Where undertakings are required by the Securities Act form used, include in Part II of the Form OC only the applicable undertakings with appropriate modifications;

(6) Where the securities offering is on behalf of a Federally-chartered institution in organization, include as an additional exhibit in Part II of the Form OC a copy of the application for permission to organize, and if the institution is a state-chartered institution in organization, include as an additional exhibit in Part II of the Form OC a copy of the application for insurance of accounts by the Corporation; and

(7) Include such information which the Corporation by interpretive release or otherwise has deemed necessary.

(b) *Accounting requirements.* To be declared effective, and offering circular or amendment shall satisfy the accounting requirements in Subpart A of Part 563c of this Subchapter and, to the extent they are not inconsistent, the accounting rules in the Commission's Regulation S–X (17 CFR Part 210) and the financial information requirements in the Commission's Regulation S–K (17 CFR Part 229).

§ 563g.8 Use of the offering circular.

(a) An offering circular or amendment declared effective by the Corporation shall not be used more than nine months after the effective date, unless the information contained therein is as of a date not more than sixteen months prior to such use.

(b) An offering circular filed under § 563g.5(b)(3) of this Part shall not extend the period for which an effective offering circular or amendment may be used under paragraph (c) of this section.

(c) No offering circular shall be used and no offer or sale of securities subject to the offering circular requirements of this Part shall be made subsequent to any material change in an issuer's business operations or financial condition, until the offering circular has been amended to include information as to the material changes and the amended offering circular has been filed with and declared effective by the Corporation.

§ 563g.9 Manipulative and deceptive devices.

In any offer, purchase, or sale in connection with an issuer's offering of its securities, exempt or not exempt under this Part, no person, directly or indirectly, shall:

(a) Employ any device, scheme, or artifice to defraud,

(b) Make any untrue statement of a material fact or to omit to state a material fact necessary in order to make the statements made, in the light of the circumstances under which they were made, not misleading, or

(c) Engage in any act, practice, or course of business' which operates or would operate as a fraud or deceit upon any person.

§ 563g.10 Escrow requirement.

(a) Any funds received in an offering pursuant to this Part, shall be held in an escrow or similar separate account prior to the termination of the sale of the issuer's securities.

(b) If an offering of securities pursuant to this Part is not completed within the term of the proposed offering period, any funds collected shall be promptly refunded.

§ 563g.11 Withdrawal or abandonment.

(a) Any offering circular, amendment, or exhibit may be withdrawn prior to the effective date. A withdrawal shall be signed and state fully the grounds upon which it is made. Any documents withdrawn will not be removed from the files of the Corporation, but will be marked "Withdrawn upon the request of the issuer on (date)."

(b) When an offering circular or amendment has been on file with the Corporation for a period of nine months and has not become effective the Corporation may, in its discretion, determine whether the filing has been abandoned, after notifying the issuer that the filing is out of date and must either be amended to comply with the applicable requirements of this Part or be withdrawn within 30 days after the date of such notice. Where a filing is abandoned, the documents will not be removed from the files of the Corporation, but will be marked "Declared abandoned by the FSLIC on (date)."

§ 563g.12 Securities sale report.

(a) Within 10 days after the termination of an offering pursuant to this Part, the issuer shall file a report with the Principal Supervisory Agent and the Division of Securities and Corporate Analysis of the Office of General Counsel describing the sale of its securities which shall include:

(1) The name, address, and Board file number of the issuer;

(2) The title, number, aggregate and per-unit offering price of the securities sold;

(3) The aggregate and per-unit dollar amounts of actual itemized expenses, discounts or commissions, and, other fees;

(4) The aggregate and per-share dollar amounts of the net proceeds raised; and

(5) The number of purchasers of each class of securities sold and the number of beneficial owners of each class of the issuer's equity securities at the termination of the offering.

(b) Within 10 days after the termination of an offering which is claimed to be exempt from filing as a non-public offering, the issuer shall file a report with the Principal Supervisory Agent and the Division of Securities and Corporate Analysis of the Office of

General Counsel describing the results of the sale of its securities, which shall include:

(1) All of the information required by paragraph (a) of this Section;

(2) A detailed statement of the factual and legal grounds for the exemption claimed; and

(3) Copies of all offering materials used attached as an exhibit.

§ 563g.13 Public disclosure and confidential treatment.

(a) Any offering circular, amendment, exhibit, notice, or report filed pursuant to this Part will be made available to the public. Any other documents relating to a filing under this Part will not be made available except in accordance with the provisions of the Freedom of Information Act (5 U.S.C. 552), the Privacy Act of 1974 (5 U.S.C. 552a), and Parts 505 and 505a of this Chapter.

(b) Any requests for confidential treatment of information in a document required to be filed under this Part, shall be made as required under Commission Rule 24b–2 (17 CFR 240.24b.2— under the Exchange Act.

§ 563g.14 Waiver.

The Corporation may waive any requirements of this Part, or any required information:

(a) Determined to be unnecessary by the Corporation;

(b) In a supervisory case; or

(c) Where a provision of this Part conflicts with a requirement of applicable state law.

§ 563g.15 Requests for interpretive advice or waiver.

Any requests to the Corporation for interpretive advice or a waiver with respect to any provision of this Part shall satisfy the following requirements:

(a) Six copies of the request, including any attachments, shall be filed with the Board's Division of Securities and Corporate Analysis;

(b) The provisions of this Part to which the request relates, the participants in the proposed transaction, and the reasons for the request, shall be specifically identified or described; and

(c) The request shall include a legal opinion as to each legal issue raised and an accounting opinion as to each accounting issue raised.

§ 563g.16 Delegation of Authority.

The General Counsel or his designee is authorized to act on behalf of the Corporation and the Board with respect to the exercise of any authority pursuant to this Part.

(Secs. 402, 403 and 407 of the National Housing Act, 48 Stat. 1256, 1257 and 1260, as amended, 12 U.S.C. 1725, 1726 and 1730; Sec. 5 of the Home Owners' Loan Act of 1933, 48 Stat. 132, as amended, 2 U.S.C. 1464; Reorg. Plan No. 3 of 1947, 12 FR 4981, 3 CFR, 1943–48 Comp., p. 1071)

BILLING CODE 6720-01-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 83–NM–02–AD]

Airworthiness Directives: British Aerospace Aircraft Group Model H.S. 748 Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes an Airworthiness Directive (AD) that would require inspections for cracks, repairs and modifications to the aileron control assembly on certain British Aerospace Aircraft Group H.S. 748 airplanes in order to prevent structural failures which could result in loss of the airplane.

DATE: Comments must be received on or before May 2, 1983.

ADDRESSES: The applicable service information and copies may be obtained from British Aerospace, Inc., Librarian, Box 17414, Dulles International Airport, Washington, D.C. 20041, or may also be examined at the address shown below.

FOR FURTHER INFORMATION CONTACT: Mr. Sulmo Mariano, Foreign Aircraft Certification Branch, ANM–150S, Seattle Aircraft Certification Office, FAA Northwest Mountain Region, 9010 East Marginal Way South, Seattle, Washington, telephone (206) 767–2530. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket or notice number and be submitted in duplicate to the address specified below. All communications received on or before the closing date for comments specified above will be considered by the Administrator before taking action on the proposed rule. The proposals contained in this notice may be changed in the light of comments received. All comments submitted will be available both before and after the closing date for comments in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Availability of NPRM

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the FAA, Northwest Mountain Region, Office of the Regional Counsel, Attention: Airworthines Rules Docket No. 83–NM–02–AD, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168.

Discussion: The Civil Aviation Authority of the United Kingdom has classified certain British Aerospace Aircraft Group service bulletins as mandatory. These bulletins require inspections, replacements, and/or modifications to correct unsafe conditions as indicated below that exist or may develop in H.S. 748 airplanes operating under British registry.

1. On three occasions cracks have been found on the outboard side, aft of the pivot boss, on the inboard main landing gear pivot brackets on high time-in-service aircraft. Repetitive inspections are needed to detect cracks in these areas. The brackets must be replaced when the cracks reach a length of 1.20 inches (reference British Aerospace Aircraft Group H.S. 748 Service Bulletin 57/59.

2. Cracks have been detected along the vertical bend/joggle line of the tailplane lower front spar web joint plate on a number of airplanes with 23,000 to 29,000 hours time in service. On one airplane with 19,000 hours time in service, a crack was detected along the vertical bend/joggle line of the tailplane front upper spar web joint plate. Inspections for cracks are needed since growth of the cracks could lead to structural failure (reference British Aerospace Aircraft Group H.S. 748 Service Bulletin 55/19, Revision 1).

3. Three cases of fatigue cracks have occurred at the lower spigot on the aileron control quadrant assembly on high time-in-service aircraft. Modifications to the aileron quadrant assemblies are necessary to prevent occurrence of this condition which could lead to structural failure (reference British Aerospace Aircraft Group H.S. 748 Service Bulletin 27/75).

This airplane model is manufactured in the United Kingdom and type certificated in the United States under the provisions of Section 21.29 of the Federal Aviation Regulations and the applicable airworthiness bilateral agreement.

Since these conditions are likely to exist or develop on airplanes of this model registered in the United States, an AD is proposed that would require: Inspections for cracks and replacement of parts, as necessary, on the joints between the tailplane center torsion box and outer tailplanes and modifications to the aileron quadrant assemblies.

It is estimated that 5 airplanes would be affected by this AD, that it would take approximately 63 manhours per airplane to accomplish the required actions, and that the average labor cost will be $35 per manhour. Repair parts are estimated at $2,204 per airplane. Based on these figures, the total cost impact of this proposed Ad is estimated to be $22,045. For these reasons, the proposed rule is not considered to be a major rule under the criteria of Executive Order 12291. Few small entities within the meaning of the Regulatory Flexibility Act would be affected.

Aviation safety, Aircraft.

The Proposed Amendment

Accordingly, the Federal Aviation Administration proposes to amend § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) by adding the following new Airworthiness Directive:

British Aerospace Aircraft Group: Applies to all Model H.S. 748 series 1, 2, and 2A airplanes, certificated in all categories. To prevent the development of unsafe conditions, the following three actions are required, unless previously accomplished:

1. To prevent progression of cracks with potential failure of the main landing gear inboard pivot bracket, accomplish the following: For airplanes with main landing gear inboard pivot brackets, part numbers 15F11365 and 16F11365, prior to accumulating 25,000 landings or within the next 750 hours time in service after the effective date of this AD, whichever occurs later, and thereafter at intervals not exceeding 1,500 landings from the last inspection, inspect the inboard pivot brackets for corrosion, loose bolts, and cracks, and repair if necessary, in accordance with the instructions in paragraph 2, Accomplishment Instructions, British Aerospace Aircraft Group H.S. 748 Service Bulletin 57/59, dated October 1979.

Note.—Operators of the aircraft must contact the manufacturer for repair instructions if inboard pivot brackets are corroded to a depth greater than 0.060 inch.

2. To detect cracks in the joints between the tailplane center torsion box and outer tailplanes, and to prevent structural failure at the joints, accomplish the following: Prior to the accumulation of 18,000 hours time in service or within the next 750 hours time in service if not previously accomplished within the last 750 hours time in service, and thereafter at intervals not to exceed 3,000 hours time in service, inspect and repair if necessary, the tailplane front and rear spar joint plates and webs in accordance with paragraph 2, Accomplishment Instructions of British Aerospace Aircraft Group H.S. 748 Service Bulletin 55/19, Revision 1, dated September 1982.

3. To prevent failure of the aileron control quadrant assembly and possible loss of control of the airplane which incorporates part numbers 1R4583 and 2R4583, accomplish the following: Prior to the accumulation of 12,000 hours time in service or within the next 750 hours time in service, whichever occurs later after the effective date of this AD, incorporate Modification 6112 in accordance with paragraph 2.B of British Aerospace Aircraft Group H.S. 748 Service Bulletin 27/75 dated April 4, 1978.

4. Alternate means of compliance which provide an equivalent level of safety may be used when approved by the Manager, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region.

5. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base for the accomplishment of inspections and/or modifications required by this AD.

(Sec. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.85)

Note.—For the reasons discussed earlier in the preamble, the FAA has determined that this document (1) involves a proposed regulation which is not major under Executive Order 12291, and (2) is not a significant rule pursuant to the Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and it is certified under the criteria of the Regulatory Flexibility Act that this proposed rule, if promulgated, will not have a significant economic impact on a substantial number of small entities. A regulatory evaluation has been prepared and has been placed in the public docket.

Issued in Seattle, Washington, on March 2, 1983.

Charles R. Foster,

Director, Northwest Mountain Region.

14 CFR Part 71

[Airspace Docket No. 83-AGL-1]

Proposed Alteration of Transition Area and Control Zone

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of Proposed Rulemaking.

SUMMARY: This notice proposes to alter the Yankton, South Dakota, control zone and transition area descriptions to accommodate two new instrument approach procedures to Chan Gurney Municipal Airport, i.e., and NDB (Non-directional Radio Beacon Runway 31 and an ILS (Instrument Landing System) Runway 31 procedure, and to revise/reduce the airspace designated for the transition area.

The intended effect of this action is to ensure segregation of the aircraft using these approach procedures in instrument weather conditions from other aircraft operating under visual weather conditions in controlled airspace.

DATE: Comments must be received on or before April 18, 1983.

ADDRESS: Send comments on the proposal in triplicate to FAA Office of Regional Counsel, AGL-7, Attention: Rules Docket Clerk, Docket No. 83-AGL-1, 2300 East Devon Avenue, Des Plaines, Illinois 60018.

The official docket will be available for examination by interested persons in the Office of the Regional Counsel, Federal Aviation Administration, 2300 East Devon Avenue, Des Plaines, Illinois 60018.

An informal docket will also be available for examination during normal business hours in the Airspace, Procedures, and Automation Branch, Air Traffic Division, Federal Aviation Administration, 2300 East Devon Avenue, Des Plaines, Illinois 60018.

FOR FURTHER INFORMATION CONTACT: Edward R. Heaps, Airspace, Procedures, and Automation Branch, Air Traffic Division, AGL-530, FAA, Great Lakes Region, 2300 East Devon Avenue, Des Plaines, Illinois 60018, telephone (312) 694-7380.

SUPPLEMENTARY INFORMATION: The current transition area charted for Yankton, South Dakota, does not accurately depict the description as published in Advisory Circular 70-3A, Compilation of Regulations. This action revises the description of the transition area as well as the description of the Yankton control zone to accommodate both the existing airspace requirements and the future airspace requirements for two new instrument approach procedures at Chan Gurney Municipal Airport, i.e., a Runway 31 Non-directional Radio Beacon (NDB) procedure and a Runway 31 Instrument Landing System (ILS) procedure. The control zone will be extended an additional 1½ miles northwest to accommodate existing procedures. The

control zone will also be extended to the southeast from the 5¾-mile radius to the 8¾-mile radius of the Yankton very high frequency omni-directional range (VOR) with an extension width of approximately 7 miles to accommodate the two new procedures. The transition area will now be described referencing only that airspace extending upward from 700 feet above the surface within a 9-mile radius of the Chan Gurney Municipal Airport, although minimum descent altitudes for these procedures may be established below the floor of the 700-foot controlled airspace. Any reference to airspace extending from 1200 feet above the surface has been determined no longer necessary and has been deleted.

Aeronautical maps and charts will reflect the defined areas which will enable other aircraft to circumnavigate the area in order to comply with applicable visual flight rule requirements.

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of proposal. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 83–AGL–1." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Rules Docket both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM

Any person may obtain a copy of this notice of proposed rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA–430, 800 Independence Avenue, S.W., Washington, D.C. 20591, of by calling (202) 426–8058. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11–2, which describes the application procedures.

The Proposal

The FAA is considering an amendment § 71.171 and 71.181 of part 71 of the Federal Aviation Regulations (14 CFR Part 71) to alter the control zone and transition area airspace near Yankton, South Dakota.

Section 71.171 and 71.181 of Part 71 of the Federal Aviation Regulations were published in Advisory Circular AC 70–3A dated January 3, 1983.

List of Subjects in 14 CFR Part 71

Control zones, Transition areas, Aviation safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend § 71.171 and 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as follows:

Yankton, SD

Within a 5-mile radius of the Chan Gurney Municipal Airport (latitude 42°55'.01" N., longitude 97°23'11" W.); within 2¾ miles each side of the YanktonVOR 321° radial extending from the 5-mile radius to 8¾ miles northwest of the VOR; within 2¾ miles southwest of the Yankton 140° radial and 2¾ miles northest of the Yankton 137° radial extending from the 5-mile radius to 8¾ miles southeast of the VOR.

Yankton, SD

That airspace extending upward from 700 feet above the suface within a 9-mile radius of the Chan Gurney Municipal Airport (latitude 42°55'01" N., longitude 97°23'11" W.).

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.65.)

Note.—The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It is certified that this—(1) is not a "major rule" under Executive Order 12291; (20 is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (30 does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Monte R. Belger,

Acting Director Great Lakes Region.

BILLING CODE 4910–13–M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Social Security Administration

20 CFR Part 404

Federal Old-Age, Survivors, and Disability Insurance Benefits; Basic Computation of Benefits and Lump Sums; Old-Age, Disability, Dependents' and Survivors' Insurance Benefits; Period of Disability; Deductions; Reductions; and Nonpayments of Benefits; Repeal of Minimum Benefit Provision and Rounding of Benefits

AGENCY: Social Security Administration, HHS.

ACTION: Proposed rule.

SUMMARY: In these proposed regulations, we explain the prospective repeal of the Old-Age, Survivors and Disability Insurance (OASDI) minimum benefit provision and the revised rules for rounding benefit amounts. We also provide an extension of the December 1978 table used to compute the primary insurance amount of many individuals. This table provides for primary insurance amounts of less than the repealed $121.80 minimum (December 1978 rate). These regulations implement the provisions of sections 2201 and 2206 of the Omnibus Budget Reconciliation Act of 1981 (Pub. L. 97–35) and section 2 of Pub. L. 97–123.

DATE: We will consider your comments if we receive them on or before May 13, 1983.

ADDRESSES: Comments should be submitted in writing to the Commissioner of Social Security, Department of Health and Human Services, P.O. Box 1585, Baltimore, Maryland 21203, or delivered to the Office of Regulations, Social Security Administration, 3–A–3 Operations Building, 6401 Security Boulevard, Baltimore, Maryland 21235 between 8:00 a.m. and 4:30 p.m. on regular business days. Comments received may be

inspected during these same hours by making arrangements with the contact person shown below.

FOR FURTHER INFORMATION CONTACT: Phil Berge, Room 3–B–4 Operations Building, 6401 Security Boulevard, Baltimore, Maryland 21235, (301) 594–7452.

SUPPLEMENTARY INFORMATION: The 1981 amendments to the Social Security Act repealed the minimum benefit provision for newly eligible beneficiaries as one step in reducing the costs and improving the equity of the Social Security program. Under that provision, the minimum primary insurance amount (before any applicable cost-of-living adjustments) on which benefit amounts are based for beneficiaries newly eligible after 1978 was $122 ($121.80 if the primary insurance amount had been computed under the old-start method in 20 CFR 404.240–404.242 or the guaranteed-alternative method explained in 20 CFR 404.230–404.233). Thus, if a computation based on a worker's earnings resulted in a primary insurance amount less than the minimum, it was raised to the minimum. Now, for a worker to whom the repeal is applicable, we will use the primary insurance amount computed on the basis of earnings regardless of how low it is. However, some beneficiaries whose OASDI benefit amount is affected by the repeal will now be eligible for Supplemental Security Income benefits.

The repeal applies to workers who first become eligible for benefits after 1981 or who die after 1981 without having become eligible before 1982. For some members of certain religous orders, the repeal is applicable to individuals who first become eligible for benefits after 1991 or who die after 1991 without having become eligible for benefits.

In these regulations, we explain that computations of primary insurance amounts for workers reaching age 62 during the period 1982 through 1983 using the guaranteed-alternative computation method will be based on the table that was in the Social Security Act in December 1978, except that it has now been extended downward to show primary insurance amounts under $121.80. We also explain the methodology used to extend the December 1978 table. This table replaces the table now in Subpart C as published on July 15, 1982 at 47 FR 30731. Where it is necessary to initially compute benefits for months before this table became effective, we will use the relevant earlier tables, as appropriate.

The revised provisions on rounding reflect the intention of congress to reduce program costs by rounding to the next lower dime at intermediate steps in the benefit computation and rounding final benefit amounts (the actual benefit amount payable to a beneficiary) to the next lower multiple of a dollar if not already a multiple of a dollar. Although the statutory provisions were effective for computations and adjustments of primary insurance amounts and benefit amounts beginning with September 1981, we did not implement the provisions until June 1982 due to processing limitations which made earlier implementation impractical.

Regulatory Procedures

Executive Order 12291—The regulations have been reviewed under E.O. 12291 and do not meet any of the criteria for a major regulation. Therefore, a regulatory impact analysis is not required. Arguably, the large program savings resulting from repeal of the minimum benefit and rounding of benefits might constitute "an annual effect on the economy of $100 million or more" (sec. 1(b)(1) of Executive order 12291) and, therefore, make these regulations major. However, the program savings result from statutory amendments, which leave the Secretary no significant regulatory discretion, and not from the regulation.

Paperwork Reduction Act—These regulations impose no reporting/recordkeeping requirements requiring OMB clearance.

Regulatory Flexibility Act—We certify that these regulations will not, if promulgated, have a significant economic impact on a substantial number of small entities because they affect only benefit amounts payable to individuals. Therefore, a regulatory flexibility analysis as provided in Pub. L. 96–354, the Regulatory Flexibility Act, is not required.

PART 404—[AMENDED]

Part 404 of Chapter III of Title 20 of the Code of Federal Regulations is amended as follows:

1. Section 404.212, as published on July 15, 1982, at 47 FR 30731, is amended by revising paragraph (c) and by adding paragraph (e) to read as follows:

§ 404.212 Computing your primary insurance amount from your average indexed monthly earnings.

* * * * *

(c) *Computing your primary insurance amount from the benefit formula.* We compute our primary insurance amount by applying the benefit formula to your average indexed monthly earnings and adding the results for each step of the formula. For computations using the benefit formulas in effect for 1979 through 1982, we round the total amount to the next higher multiple of $0.10 if it is not a multiple of $0.10 and for computations using the benefit formulas effective for 1983 and later years, we round to the next lower multiple of $0.10. (See paragraph (e) of this section for a discussion of the minimum primary insurance amount.)

* * * * *

(e) *Minimum primary insurance amount.* If you were eligible for benefits, or if the insured worker died without having been eligible, before 1982, the primary insurance amount computed under this method cannot be less than $122. This minimum benefit provision has been repealed effective with January 1982 for most workers and their families where the worker initially becomes eligible for benefits in that or a later month, or dies in January 1982 or a later month without having been eligible before January 1982. For members of a religious order who are required to take a vow of poverty, as explained in 20 CFR 404.1024, and which religious order elected Social Security coverage before December 29, 1981, the repeal is effective with January 1982 based on first eligibility or death in that month or later.

2. Section 404.222, as published on July 15, 1982, at 47 FR 30731, is amended by revising paragraph (b) to read as follows:

§ 404.222 Use of benefit table in finding your primary insurance amount from your average monthly wage.

* * * * *

(b) *Finding your primary insurance amount from benefit table.* We find your average monthly wage in column III of the table. Your primary insurance amount appears on the same line in column IV (column II if you are entitled to benefits for any of the 12 months preceding the effective month in column IV). As explained in § 404.212(e), there is a minimum primary insurance amount of $122 payable for persons who became eligible or died after 1978 and before January 1982. There is also an alternative minimum of $121.80 (before the application of cost-of-living increases) for members of this group whose benefits were computed from the benefit table in effect in December 1978 on the basis of either the old-start computation method in §§ 404.240 through 404.242 or the guaranteed alternative computation method explained in §§ 404.230 through 404.233. However, as can be seen from the extended table in Appendix III, the lowest primary insurance amount under this method is now $1.70 for individuals for whom the minimum benefit has been repealed.

Example. In the example in § 404.221(d), we computed Mr. B's average monthly wage to be $502. We refer to the December 1978 benefit table in Appendix III. Then we find his average monthly wage in column III of the table. Reading across, his primary insurance amount is on the same line in column IV and is $390.50. A 9.9 percent automatic cost-of-living benefit increase was effective for June 1979, increasing Mr. B's primary insurance amount to $429.20, as explained in §§ 404.270 through 404.277. Then, we increase the $429.20 by the 14.3 percent June 1980 cost-of-living benefit increase and get $490.60, and by the 11.2 percent June 1981 increase to get $545.60.

3. Section 404.261, as published on July 15, 1982, at 47 FR 30731, is amended by revising paragraph (a)(2) to read as follows:

§ 404.216 Computing your special minimum primary insurance amount.

(a) *Years of coverage.*

* * * * *

(2) You must have at least 11 years of coverage to qualify for a special minimum primary insurance amount computation. However, special minimum primary insurance amounts based on little more than 10 years of coverage are usually lower than the regular minimum benefit that was in effect before 1982 (see §§ 404.212(e) and 404.222(b) of this Part). In any situation where your primary insurance amount computed under another method is higher, we use that higher amount.

* * * * *

4. Section 404.275, as published on July 15, 1982, at 47 FR 30731, is amended by revising the sentence before the example to read as follows:

§ 404.275 Amount of automatic cost-of-living increase.

* * * * *

We round the resulting amounts to the next lower multiple of $0.10 if not already a multiple of $0.10. (We round to the next higher multiple of $0.10 for increases effective before June 1982.)

* * * * *

§ 404.277 [Amended]

5. Section 404.277 is amended in paragraph (a) by adding "and before 1982," after "1978" in the second sentence.

6. Appendix III, as published on July 15, 1982, at 47 FR 30731, is amended by revising the narrative after the first paragraph and the table to read as follows:

Appendix III—Benefit Table

* * * * *

The benefit table in effect in December 1978 had a minimum primary insurance amount of $121.80. As explained in § 404.222(b), certain workers eligible, or who died without having been eligible, before 1982 had their benefit computed from this table. However, the minimum benefit provision was repealed for other workers by the 1981 amendments to the Act (the Omnibus Budget Reconciliation Act of 1981, Pub. L. 97–35 as modified by Pub. L. 97–123). As a result, this benefit table includes a downward extension from the former minimum of $121.80 to the lowest primary insurance amount now possible. The extension is calculated as follows: For each single dollar of average monthly wage in the benefit table, the primary insurance amount shown for December 1978 is $121.80 multiplied by the ratio of that average monthly wage to $76. The upper limit of each primary insurance benefit range in Column I of the table is $16.20 multipled by the ratio of the average monthly wage in Column III of the table to $76. The maximum family benefit is 150 percent of the corresponding primary insurance amount.

The repeal of the minimum benefit provision is effective with January 1982 for most workers and their families where the worker initially becomes eligible for benefits after 1981 or dies after 1981 without having been eligible before January 1982. For members of a religious order who are required to take a vow of poverty, as explained in 20 CFR 404.1024, and which religious order elected Social Security coverage before December 29, 1981, the repeal is effective with January 1982 based on first eligibility or death in that month or later.

To use this table, you must first compute the primary insurance benefit (column I) or the average monthly wage (column III), then move across the same line to either column II or column IV as appropriate. To determine increases in primary insurance amounts since December 1978 you should see Appendix VI. Appendix VI tels you, by year, the percentage of the increases. In applying each cost-of-living increase to primary insurance amounts, we round the increased primary insurance amount to the next lower multiple of $0.10 if not already a multiple of $0.10. (For cost-of-living increases which are effective before June 1982, we round to the next higher multiple of $0.10.)

		652.90	1,471	1,475	695.40	1,216.90

7. Section 404.304 is amended by removing and reserving paragraph (c) and by adding paragraph (f) to read as follows:

§ 404.304 General rules on benefit amounts.

* * * * *

(c) [Reserved]

* * * * *

(f) *Rounding.* After all other deductions or reductions, any monthly benefit which is not a multiple of $1 is reduced to the next lower multiple of $1.

§ 404.402 [Amended]

8. Section 404.402 is amended in paragraph (a)(2) by changing the cross-reference from § 404.409 to § 404.304(f).

§ 404.403 [Amended]

9. Section 404.403 is amended in paragraph (c) by changing "higher" to "lower" in the last sentence.

10. Section 404.405 is amended by revising the second sentence of paragraph (p)(3) to read as follows:

§ 404.405 Amended.

* * * * *

(p) * * *

(3) * * * Any such increased amount, if it is not a multiple of $0.10, will be raised to the next higher multiple of $0.10 for months before June 1982 and reduced to the next lower multiple of $0.10 for months after May 1982.

§ 404.409 [Reserved]

11. Section 404.409 is removed and reserved.

12. Section 404.410 is amended in the opening paragraph by adding after the

fourth sentence the following sentence, to read as follows:

§ 404.410 Reduction in benefits for age—general.

* * * * *

Any reduction amount under this section or §§ 404.411–404.413 which is not a multiple of $0.10 will be raised to the next higher multiple of $0.10.

* * * * *

§ 404.439 [Amended]

13. Section 404.439 is amended in the second sentence by adding "and before the application of § 404.304(f) to round to the next lower dollar" after "retirement age". This section is further amended by revising the example to read as follows:

Example: A is entitled to an old-age insurance benefit of $165 and his wife is entitled to $82.50 before rounding, making a total of $247.50. After A's excess earnings have been charged to the appropriate months, there remains a partial benefit of $200 payable for October, which is apportioned as follows:

	Original benefit	Fraction of original	Benefit after deductions for excess earnings and after rounding per § 404.304(f)
A	$165	5/6	$133
Wife	82.50	1/6	66
Total	247.50		199

§ 404.440 [Amended]

14. Section 404.440 is amended by removing the last sentence and revising the example to read as follows:

* * * * *

Example: Family maximum is $150. Insured individual's excess earnings charged to the month are $25. The remaining $125 is prorated as partial payment.

	Original benefit	Fraction of original total benefits	Benefit after deductions for excess earnings but before reduction for family maximum	Benefit reduced for maximum but without deductions for excess earnings	Benefit payable after both deductions and reductions (and rounded)
Insured individual	$100	5/8	50	109.70	75
Wife	50	1/8	25	16.60	16
Child	50	1/8	25	16.60	16
Child	50	1/8	25	16.60	16

15. Section 404.441 is revised to read as follows:

§ 404.441 Partial monthly benefits; insured individual and another person entitled (or deemed entitled) on the same earnings record both have excess earnings.

Where both the insured individual and another person entitled (or deemed entitled) on the same earnings record have excess earnings (as described in § 404.430), their excess earnings are charged, and their partial monthly benefit is apportioned, as follows:

Example: M and his wife are initially entitled to combined total benefits of $264 per month based on M's old-age insurance benefit of $176. For the taxable year in question, M's excess earnings were $1,500 and his wife's excess earnings were $265.

Both were under age 65. M had wages of more than $340 in all months of the year except February, while his wife had wages of more than $340 in all months of the year. After M's excess earnings have been charged to the appropriate months (all months through July except February), there remains a partial benefit payment for August of $240, which is allocated to M and his wife in the ratio that the original benefit of each bears to the sum of their original benefits: $106 and $63. His wife's excess earnings are charged against her full benefit for February ($88), her partial benefit for August ($63), her full benefit for September, and from $9 of her October benefit, leaving an $82 benefit payable to her for that month.

§ 404.501 [Amended]

16. Section 404.501 is amended in paragraph (a)(2) by inserting the words "or decrease" after the word "increase" and by removing the reference to section 202(m).

BILLING CODE 4190-11-M

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 1

[LR-274-81]

Accounting for Long-Term Contract

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: This document contains proposed amendments to regulations under sections 446, 451 and 471 of the Internal Revenue Code relating to accounting for long-term contracts. The proposed amendments would conform the regulations to section 229 of the Tax Equity and Fiscal Responsibility Act of 1982 and would affect taxpayers who have long-term contracts whether or not they use a long-term contract method of accounting for such contracts.

DATES: Written comments and requests for a public hearing must be delivered or mailed by May 13, 1983. In general, the proposed regulations relating to the allocation of indirect costs to extended period long-term contracts, and the rules relating to the use of LIFO or the lower of cost or market inventory methods with a long-term contract method are proposed to be effective for taxable years beginning after December 31, 1982. The proposed regulations relating to completion of contracts, and aggregating and severing contracts are proposed to be effective for taxable years ending after December 31, 1982. Except as otherwise provided, all other provisions of the proposed regulations are proposed to be effective for all taxable years beginning after December 31, 1953 and ending after August 16, 1954.

ADDRESS: Send comments and requests for a public hearing to: Commissioner of Internal Revenue, Attention: CC:LR:T (LR–274–81), Washington, D.C. 20224.

FOR FURTHER INFORMATION CONTACT: Joseph M. Rosenthal of the Legislation and Regulations Division, Office of Chief Counsel, Internal Revenue Service, 1111 Constitution Ave, NW., Washington, D.C. 20224, Attention: CC:LR:T, 202–566–3671, not a toll-free call.

SUPPLEMENTARY INFORMATION:

Background

This document contains proposed amendments to the Income Tax Regulations (26 CFR Part 1) under sections 446, 451 and 471 of the Internal Revenue Code of 1954.

These amendments are proposed to conform the regulations to the requirements of section 229 of the Tax Equity and Fiscal Responsibility Act of 1982 (Pub. L. 97–248, 96 Stat. 324, 493) and are to be issued under the authority contained in that section, and in sections 471 and 7805 of the Internal Revenue Code of 1954 (68A Stat. 159, 917; 26 U.S.C. 471, 7805).

Cost Allocation Rules

Under existing regulation § 1.451–3, taxpayers are permitted to include income from a long-term contract in gross income in accordance with the percentage of completion method or the completed contract method, or any other

method if the method chosen clearly reflects income.

Under the completed contract method the gross contract price of a long-term contract is generally included in gross income, and the cost allocable to such contract (contract costs) are deducted, in the taxable year in which the contract is completed. Under the existing regulations contract costs include all direct costs, and all indirect costs that are incident to and necessary for the performance of particular contracts. In the case of taxpayers using the completed contract method, paragraph (d)(5) of § 1.451–3 contains rules for determining the indirect costs that are required to be allocated to long-term contracts and the costs that are not required to be allocated to long-term contracts. Costs that are not required to be allocated to a long-term contract may generally be deducted from gross income in the taxable year they are incurred (period costs).

Under the current regulations, certain indirect costs incurred by a taxpayer in the performance of particular long-term contracts must be allocated to such contracts. However, other costs (such as general and administrative expenses, research and experimental expenses, accelearated depreciation, pension costs and other employee benefits) are treated as costs not required to be allocated to long-term contracts without regard to whether such costs are incurred in the performance of particular long-term contracts. The present cost allocation regulations make no distinction between long-term contracts that will continue for an extended period of time and long-term contracts that are completed within a shorter period of time.

It has now been determined that in the context of accounting for extended period long-term contracts (as defined in the following section), the present period cost classification rules distort the timing of recognition of income and deductions with the result that the completed contract method does not clearly reflect income from extended period long-term contracts.

Accordingly, effective for taxable years beginning after December 31, 1982, the proposed regulations contain new indirect cost and period cost allocation rules that will result in a clear reflection of income of taxpayers using the completed contract method of accounting for extended period long-term contracts. The treatment of direct costs remains unchanged. The classifications of costs that are to be treated as indirect costs allocable to particular extended period long-term contracts are expanded and the classifications of costs not required to be included in costs attributable to extended period long-term contracts are reduced. Under the proposed regulations indirect costs required to be allocated to extended period long-term contracts include the direct and indirect costs incurred by centralized administrative, service and support functions, or departments which taxpayers might have treated as general and administrative period costs under the existing regulations. Under the proposed regulations a portion of an indirect cost may be allocable to an extended period long-term contract even though the cost also benefits another contract or another activity of the taxpayer. The indirect cost allocation rules applicable to long-term contracts that are not extended period long-term contracts are unchanged, except for clarification of the existing indirect cost allocation rules relating to research and experimental expenses and depreciation.

The proposed indirect cost allocation rules for extended period long-term contracts are proposed to be effective, with a 3-year phase-in period, for costs incurred in taxable years beginning after December 31, 1982, with respect to contracts entered into after December 31, 1982. Detailed transitional rules are provided in proposed § 1.451–3(g).

Effective for taxable years beginning after December 31, 1982, the proposed regulations also provide that the proposed cost allocation rules shall apply (and the cost allocation rules of § 1.471–11 shall no longer apply) to extended period long-term contracts entered into after December 31, 1982 that the taxpayer accounts for under an accrual-inventory method of accounting. The Commissioner of Internal Revenue invites comments on whether this requirement should be modified in the case of taxpayers using an accrual-inventory method of accounting for extended period long-term contracts under which some threshold amount of the income from such contracts is recognized in taxable years before the taxable year such contracts would be considered completed under the completed contract method.

Definition of Extended Period Long-Term Contract

The proposed indirect cost allocation rules apply only to long-term contracts that are expected to take a relatively long period to complete, with a distinction made between manufacturing contracts and construction contracts, and in the case of construction contracts, a further distinction is made between relatively large and relatively small taxpayers. Thus, an extended period long-term contract is any contract that the taxpayer estimates will not be completed within two years from the contract commencement date; except that a construction contract will not be an extended period long-term contract if (1) the taxpayer estimates that the contract will be completed within three years of the contract commencement date, or (2) if the taxpayer's average annual gross receipts over the three taxable years ending before the taxable year the construction contract is entered into do not exceed $25 million. Special rules are provided for purposes of determining the taxpayer's gross receipts: The gross receipts of trades or businesses under common control are combined under the principles of section 1.52–1 of the regulations; and, in the case of trades or businesses not under common control, under rules similar to the principles of section 318, gross receipts may be attributed to the taxpayer who enters into the contract.

Severing and aggregating Long-Term Contracts

For the purpose of clearly reflecting income from long-term contract activities, it may be necessary in some instances to treat one agreement as several contracts or to treat several agreements as one contract.

The proposed regulations contain additional rules intended to clarify the circumstances under which the severing and aggregating provisions may be applied. These provisions will apply both in the case of a taxpayer using a long-term contract method and in the case of a taxpayer using any other method of accounting for long-term contracts.

The proposed amendments are proposed to be effective for taxable years ending after December 31, 1982, with a special transitional rule for contracts that would be considered completed in an earlier taxable year under the proposed revisions.

Completion of Contracts

The proposed regulations also provide additional guidance on when a long-term contract will be considered "completed" for tax purposes. These proposed amendments are proposed to be effective for taxable years ending after December 31, 1982, with a special transitional rule for contracts that would be considered completed in an earlier taxable year under the proposed revisions.

Clear Reflection of Income

The proposed regulations clarify that the long-term contract methods, the

percentage of completion method and the completed contract method, are subject to the clear reflection of income standard of section 446. The purpose of the application of the clear reflection of income doctrine to the complete contract method is to insure (1) that taxpayers properly apply the method, and (2) that in unusual circumstances, for example when a liquidation or reorganization occurs, the Commissioner may require income to be reported on a basis other than the completed contract method. Generally the clear reflection of income standard of section 446 does not require that a taxpayer using the completed contract method for tax purposes also use that method for financial reporting purposes.

Bidding Expenses

The Commissioner of Internal Revenue invites comments on the appropriate treatment of bidding expenses incurred in the solicitation of particular extended period long-term contracts. The proposed regulations provide that bidding expenses incurred in the solicitation of particular extended period long-term contracts are to be deferred until the contract is awarded. If the contract is awarded to the taxpayer the bidding costs become a part of the indirect costs of the contract and will be deducted when income from the contract is recognized. Bidding costs incurred in the solicitation of contracts not awarded to the taxpayer become deductible in the taxable year it is determined that the taxpayer will not be awarded the contract. Bidding expenses do not include research and experimental expenditures described in section 174 and the regulations thereunder.

In the case of a taxpayer who generally is awarded only a small proportion of the total number of bids or proposals made with respect to extended period long-term contracts, the rule in the proposed regulations may be unduly harsh. Such a taxpayer's income might be clearly reflected if the taxpayer deducted bidding expenses incurred in the solicitation of extended period long-term contracts in the year such expenses are paid or incurred, and "recaptured" such expenses in the year the taxpayer is awarded an extended period long-term contract. Other treatments of such bidding expenses might also be appropriate.

Multi-Unit Contracts

The proposed regulations also clarify that under an accrual method of accounting, income from a multi-unit contract accrues at the time each item under the contract is shipped, delivered, or accepted, or when title to the item passes to the purchaser.

Lifo Method and Lower of Cost or Market Method

The proposed regulations clarify that the LIFO method and the lower of cost or market method may not be used to determine the costs attributable to a long-term contract accounted for under a long-term contract method, including the use of such methods to determine the cost of raw materials or components assigned to a long-term contract. This provision is proposed to be effective for taxable years beginning after December 31, 1982. Although this provision is to be applied prospectively, it does not represent a change in the position of the Internal Revenue Service. *See*, Rev. Rul. 59-329, 59-2, C.B. 136.

Non-Applicability of Executive Order 12291 and Regulatory Flexibility Act

The Treasury Department has determined that this proposed regulation is not subject to review under Executive Order 12291 or the Treasury and OMB implementation of the Order dated April 28, 1982.

Although this document is a notice of proposed rulemaking which solicits public comment, the Internal Revenue Service has concluded that the regulations proposed herein are interpretative and that the notice and public procedure requirements of 5 U.S.C 553 do not apply. Accordingly, these proposed regulations do not constitute regulations subject to the Regulatory Flexibility Act (5 U.S.C. Chapter 6).

Comments and Request for a Public Hearing

Before adopting these proposed regulations, consideration will be given to any written comments that are submitted (preferably six copies) to the Commissioner of Internal Revenue. All comments will be available for public inspection and copying. A public hearing will be held upon written request to the Commissioner by any person who has submitted written comments. If a public hearing is held, notice of the time and place will be published in the **Federal Register**.

Drafting Information

The principal author of this regulation is Joseph M. Rosenthal of the Legislation and Regulations Division of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the regulations, both on matters of substance and style.

Income taxes, Accounting, Deferred compensation plans.

Proposed Amendments to the Regulations

The proposed amendments to 26 CFR Part 1 are as follows:

Income Tax Regulations

(26 CFR Part 1)

Paragraph 1. Paragraph (c)(1)(ii) of § 1.446-1 is revised to read as follows:

§ 1.446-1 General rule for methods of accounting.

* * * * *

(c) *Permissible methods—(1) In general.* * * *

(ii) *Accrual method.* Generally, under an accrual method, income is to be included for the taxable year when all the events have occurred which fix the right to receive such income and the amount thereof can be determined with reasonable accuracy. Under such a method, deductions are allowable for the taxable year in which all the events have occurred which establish the fact of the liability giving rise to such deduction and the amount thereof can be determined with reasonable accuracy. The method used by the taxpayer in determining when income is to be accounted for will be acceptable if it accords with generally accepted accounting principles, is consistently used by the taxpayer from year to year, and is consistent with the Income Tax Regulations. For example, under an accrual method, a taxpayer engaged in a manufacturing business may account for the sale of an item when the item is shipped, when the item is delivered, when the item is accepted, or when title to the item passes to the customer, whether or not billed, dpending upon the method regularly employed in keeping the taxpayer's books.

* * * * *

Par. 2. Section 1.451-3 is amended as follows:

1. Paragraph (a) is amended by revising paragraph (a) (1) and (3), by adding a heading to paragraph (a)(2), and by adding new paragraphs (a)(4) (a)(5) and (a)(6);

2. Paragraph (b) is amended by adding headings to paragraphs (b)(1) (i) and (ii), revising paragraph (b)(2) and adding new paragraph (b)(3);

3. Paragraph (d) is amended by revising paragraphs (d) (1) and (5), redesignating paragraph (d)(5)(iv) as paragraph (d)(7), revising and redesignating paragraph (d)(6) as

paragraph (d)(6), and by adding new paragraphs (d) (8) and (9);

4. Paragraph (e) is amended by revising paragraph (e)(1), revising example (2) of paragraph (e)(2), redesignating example (3) of paragraph (e)(2) as example (4), and adding new examples (3), (5), and (6) to paragraph (e)(2); and

5. A new paragraph (g) is added.

The revised and added provisions read as follows:

§ 1.451-3 Long-term contracts.

(a) *Introduction*—(1) *In general.* Income from a long-term contract (as defined in paragraph (b)(1) of this section) may be included in gross income in accordance with one of the two long-term contract methods, namely, the percentage of completion method (as described in paragraph (c) of this section) or the completed contract method (as described in paragraph (d) of this section), or any other method, if the long-term contract method or the other method chosen clearly reflects income. Whichever method is chosen, it must be applied consistently to all long-term contracts within the same trade or business except that a taxpayer who has long-term contracts (as defined in paragraph (b)(1) of this section) of substantial duration and long-term contracts of less than substantial duration in the same trade or business may report the income from all the contracts of substantial duration on the same long-term contract method and report the income from the contracts of less than substantial duration pursuant to another proper method of accounting. For example, if a manufacturer of heavy machinery has special-order contracts of a type that generally take 15 months to complete and also has contracts of a type that generally take 3 months to complete, the manufacturer may use a long-term contract method for the 15-month contracts and a proper inventory method pursuant to section 471 and the regulations thereunder for the 3-month contracts. Similarly, if a construction contractor has construction contracts of a type that generally take 15 calendar months to complete and other construction contracts that take only 5 months to complete but that are long-term contracts because they are not completed in the taxable years in which they are entered into (pursuant to paragraph (b)(1)(i) of this section), such contractor may either use a long-term contract method for all the contracts of both types or use a long-term contract method for the 15-month contracts and another proper method of accounting for the 5-month contracts. If a taxpayer distinguishes between contracts of substantial duration and other long-term contracts of less than substantial duration, he must adhere to a consistently applied standard for determining substantial duration.

(2) *Reporting requirement.* When a taxpayer reports income under the percentage of completion method or the completed contract method, a statement to that effect shall be attached to his income tax return.

(3) *Allocation among activities required.* The percentage of completion method and the completed contract method apply only to the accounting for income and expenses attributable to long-term contracts. The term "expenses attributable to long term contracts" means all direct labor costs and direct material costs (within the meaning of paragraph (d)(5)(i) or (6)(i) of this section), and all indirect costs except those described in paragraph (d) (5)(iii) or, in the case of extended period long-term contracts, paragraph (d)(6)(iii). Other income and expense items, such as investment income or expenses not attributable to such contracts and costs incurred with respect to any guarantee, warranty, maintenance, or other service agreement relating to the subject matter of such contracts, shall be accounted for under a proper method of accounting. See section 446(c) and § 1.446-1(c).

(4) *Severing and aggregating contracts of certain taxpayers.* This (4) applies to taxable years ending after December 31, 1982, in the case of income from a long-term contract (as defined in paragraph (b) (1) of this section) included in gross income in accordance with a method other than one of the two long-term contract methods described in paragraph (c) or (d) of this section. For the purpose of clearly reflecting income, it may be necessary in some instances either to treat one agreement as several contracts or to treat several agreements as one contract. The rules of paragraph (e)(1) of this section shall apply to determine whether an agreement should be so severed or several agreements so aggregated.

(5) *Certain taxpayers not using a long-term contract method.* In the case of a taxpayer using an inventory method of accounting for any extended period long-term contract (as defined in paragraph (b)(3) of this section) entered into after December 31, 1982, see paragraph (d)(6) of this section.

(6) *LIFO method and lower of cost or market method not permitted.* Effective for taxable years beginning after December 31, 1982, the taxpayer may not use the LIFO inventory method described in section 472, or the lower of cost or market inventory method § 1.451-3(a)(6) described in § 1.471-2(c) and § 1.471-4 to determine the costs attributable to a long-term contract accounted for under a long-term contract method, including the use of such methods to determine the cost of materials assigned to a long-term contract or to determine the cost of finished or semi-finished components assigned to a long-term contract. See § 1.471-4(d) and § 1.472-2(m).

(b) *Definitions and special rules relating to certain contracts*—(1) *Long-term contract*—(i) *In general.* Except as provided in subdivision (ii) of this subparagraph, the term "long-term contract" means a building, installation, construction or manufacturing contract which is not completed within the taxable year in which it is entered into.

(ii) *Manufacturing contracts.* Notwithstanding subdivision (i) of this subparagraph, a manufacturing contract is a "long-term contract" within the meaning of this subparagraph only if such contract involves the manufacture of *(a)* unique items of a type which is not normally carried in the finished goods inventory of the taxpayer or (*b*) items which normally require more than 12 calendar months to complete (regardless of the duration of the actual contract). Thus, for example, a contract to manufacture a unit of industrial machinery specifically designed for the needs of a customer and not normally carried in the taxpayer's inventory or a contract to manufacture machinery which will require more than 12 calendar months to complete are long-term contracts within the meaning of this subparagraph; however, a contract to manufacture 15,000 folding chairs which take 3 days each to manufacture is not a long-term contract within the meaning of this subparagraph even though it takes more than 12 calendar months to manufacture all 15,000 chairs and the contract is not completed within the taxable year it is entered into.

§1.451-3 (B)(1)(ii)

(2) *Completion*—(i) *Final completion and acceptance*—(A) *General rule.* Except as otherwise provided in this (2), and in paragraph (d)(2), (3), and (4) of this section (relating to disputes), a long-term contract shall not be considered "completed" until final completion and acceptance have occurred. Nevertheless, a taxpayer may not delay the completion of a contract for the principal purpose of deferring Federal income tax. If the preceding sentence applies to a contract, (*1*) "final completion and acceptance" shall be determined without regard to such delay, (*2*) the entire gross contract price shall be included in gross income for the taxable year in which the contract is

completed, (*3*) all costs properly allocable to the contract and which have been incurred prior to the end of the taxable year in which such contract is completed shall be deducted in such year, and (*4*) all other costs properly allocable to such contract shall be accounted for under a proper method of accounting.

(B) *Examples.* The principles of paragraph (b)(2)(i)(A) of this section are illustrated by the following examples:

Example (1). In 1982, X, a calendar year taxpayer who manufactures industrial machinery, contracts with F to build and install one large item of industrial machinery to be delivered in August 1983 and to be installed and tested by X in F's factory. The contract provides that the machinery will not be accepted by F unless the tests performed by X demonstrate that the machinery will perform within certain environmental standards required by a government agency. Because of technical problems the machinery is not ready for delivery until December 1983. F accepts delivery of the machinery in December 1983 subject to installation and testing to determine if the assembled machinery meets the environmental standards. The machinery is installed and tested during December 1983 through February 1984, and F accepts the machinery in February 1984. Under these circumstances final completion and acceptance of the machinery for Federal income tax purposes occurs in February 1984.

Example (2). In 1982, A, a calendar year contractor, contracts with B to construct a building. The initial completion date specified in the contract is October 1984. In November 1984, the building is completed in every respect necessary for the use for which the building is intended and no substantial dispute exists between A and B as to the acceptability of the work performed. Later in November 1984, B occupies the building and notifies A that certain minor deficiencies should be corrected. A agrees to correct the deficiencies without modification of the contract price. Under these circumstances, the contract is considered completed for Federal income tax purposes in A's taxable year ending December 31, 1984, without regard to when A corrects the deficiencies. The contract is considered completed because the parties have dealt with each other in a manner that indicates that the subject matter of the contract has been finally completed and accepted. A must include the gross contract price in gross income for 1984. A must deduct from gross income in 1984 all costs properly allocable to the contract which have been incurred prior to 1985. A must account for the costs properly allocable to the contract but incurred after 1984 under a proper method of accounting.

Example (3). Assume the same facts as example 2, except that there are no deficiencies in the building that require correction or repair. In addition, assume that the contract between A and B provides that none of the retainage under the contract may be released to A until A obtains an architect's certificate that the building has been completed according to the specifications of the contract. A obtains this certificate in February, 1985. Under these circumstances, the contract is considered completed for Federal income tax purposes in A's taxable year ending December 31, 1984, without regard to when A obtains the required architect's certificate, and without regard to when the retainage is released to A, because the parties have dealt with each other and with the subject matter of the contract in a manner that indicates that the contract has been finally completed and accepted.

(ii) *Contracts with more than one subject matter*—(A) *General rule.* This (2)(ii) applies to taxable years ending after December 31, 1982. In the case of a long-term contract (which, after the application of the rules provided in paragraph (e) of this section, is treated as a single long-term contract for Federal income tax purposes) for the building, installation, construction or manufacture of (*1*) one or more units (such as an aircraft or an item of industrial machinery) that represent the primary subject matter of the contract, and for (*2*) other items (such as training manuals, or spare or replacement parts or components) that do not represent the primary subject matter of the contract, "final completion and acceptance" shall be determined without regard to the contractor's obligation to supply the other items that do not represent the primary subject matter of the contract. If at the end of the taxable year in which the long-term contract is completed there remain any other items that do not represent the primary subject matter of the contract and which have not been finally completed and accepted, then (*3*) the costs which have been incurred prior to the end of such year and which are properly allocable to such other items (determined pursuant to paragraph (d)(5) or (6) (as the case may be) of this section), and (*4*) a portion of the gross contract price (if any) reasonably allocable to such other items shall be separated from the long-term contract, and such costs and such portion of the gross contract price shall be accounted for under a proper method of accounting. Such proper method of accounting does not include a long-term contract method or the cash receipts and disbursements method.

(B) *Example.* The principles of paragraph (b)(2)(ii)(A) of this section may be illustrated by the following example:

Example. In 1982, X contracts with the Y Government to manufacture five aircraft and to manufacture 12 spare and replacemnt parts for the five aircraft and for certain other aircraft supplied to Y under prior contracts. Assume that under all the facts and circumstances it is determined that the portion of the contract relating to the 12 spare and replacement parts does not have to be severed from the portion of the contract relating to the five aircraft. Assume also that under all the facts and circumstances it is determined that the five aircraft represent the primary subject matter of the contract, and that the spare and replacement parts do not represent the primary subject matter of the contract. In 1984, X tenders the five aircraft and seven of the spare and replacement parts to Y. Y accepts the aircraft and the parts subject to X's delivery of the balance of the spare and replacement parts. For Federal income tax purposes the contract is deemed to have been completed in 1984. Accordingly, X must include in gross income in 1984 the entire contract price, less the portion of the gross contract price reasonably allocable (if any) to the parts not delivered in 1984. X must deduct from gross income in 1984 the entire costs properly allocable to the contract, less the entire costs incurred that are properly allocable to the parts not delivered in 1984. X will account for the income and costs allocable to the parts not delivered in 1984 under a proper method of accounting.

(iii) *Contingent compensation.* This (2)(iii) applies to taxable years ending after December 31, 1982. In the case of a long-term contract, "final completion and acceptance" shall be determined without regard to any term of the contract providing for additional compensation contingent upon the continued successful performance of the subject matter of the contract after the subject matter of the contract has been accepted by the purchaser (such as an incentive bonus payable if a satellite remains in operation for twenty months after it is placed in orbit). Such contingent compensation shall be accounted for under a proper method of accounting other than a long-term contract method.

(iv) *Certain supervision of installation.* This (2) (iv) applies to taxable years ending after December 31, 1982. In th case of a long-term contract, "final completion and acceptance" shall be determined without regard to any obligation on the part of the contractor to assist or to supervise installation or assembly of the subject matter of the contract where such installation or assembly is to be performed by the purchaser and, under applicable contract law, the subject matter of the contract may be accepted by the purchaser prior to such installation or assembly. If the preceding sentence applies to a contract, (*1*) "final completion and acceptance" shall be determined without regard to such obligation, (*2*) the entire gross contract price less the portion of the gross contract price (if any) reasonably allocable to such obligation, shall be

included in gross income in the taxable year in which the contract is completed, (*3*) all costs properly allocable to the contract and which have been incurred prior to the end of the taxable year in which such contract is completed shall be deducted in such year, and (*4*) all other costs properly allocable to such contract and the portion of the gross contract price reasonably allocable to the obligation to assist or to supervise installation shall be accounted for under a proper method of accounting.

(v) *Subcontractors.* In the case of a subcontractor who completes work on a long-term contract prior to the completion of the entire contract, "final completion and acceptance" of the contract with respect to such subcontractor shall be deemed to have occurred when the subcontractor's work has been completed and has been accepted by the party with whom the subcontractor has contracted.

(vi) *Disputes.* Completion of a long-term contract is determined without regard to whether a dispute exists at the time the taxpayer tenders the subject matter of the contract to the party with whom the taxpayer has contracted. See paragraph (d)(2), (3) and (4) of this section.

(3) *Extended period long-term contract*—(i) *General Rule.* This (3) does not apply to contracts accounted for under the percentage of completion method. Except as provided in paragraph (b)(3)(ii) of this section, the term "extended period long-term contract" means any long-term contract that the taxpayer estimates (at the time such contract is entered into) will not be completed (as defined in paragraph (b)(2) of this section) within the 2-year period beginning on the first date (hereinafter, "the contract commencement date") that the taxpayer incurs any costs (other than costs such as bidding expenses, or expenses incurred in connection with negotiating the contract) allocable to such contract (under the cost allocation rules of paragraph (d)(6) of this section). The preceding sentence shall be applied without regard to when costs allocable to a contract are recorded under the cost accounting procedures used by the taxpayer. In general, the contract commencement date will be the first date that any of the following activities occur: the taxpayer incurs design or engineering costs allocable to the contract other than design or engineering costs incurred solely for purposes of bidding for the contract; materials or equipment are shipped to the jobsite; or workers whose labor cost is treated as direct labor are sent to the jobsite. If under the taxpayer's accounting procedures it is not possible to determine the first date when any costs allocable to a contract are incurred, the contract commencement date of a contract shall be the date such contract is entered into, unless the taxpayer establishes to the satisfaction of the district director that another date is a more appropriate contract commencement date.

(ii) *Certain construction contracts.* The term "extended period long-term contract" does not include any construction contract entered into by a taxpayer—

(A) Who estimates (at the time such contract is entered into) that such contract will be completed within the 3-year period beginning on the contract commencement date of such contract, or

(B) Whose average annual gross receipts (determined under paragraph (b)(3)(iii) of this section) over the 3 taxable years preceding the taxable year the contract is entered into do not exceed $25 million.

For purposes of this section, the term "contruction contract" means any contract for the building, construction, or erection of, or the installation of any integral component to, improvements to real property. For purposes of the preceding sentence, construction includes reconstruction and rehabilitation. Any improvement to real property includes buildings or other structures intended to be permanently affixed to real property, roadways, dams, or bridges, but does not include such items as vessels, or offshore drilling platforms which, for purposes of this section, are considered to be manufactured. An integral component to an improvement to real property includes property not produced at the site of the real property but intended to be permanently affixed to an improvement to real property, for example, elevators and central heating and cooling systems. In the case of a contract that provides for the manufacture and the installation of an integral component to an improvement to real property (such as the pollution control equipment for a power plant), only the part of the overall gross contract price and the costs properly allocable to the work of installing the finished component is a construction contract. For example, in the case of a contract to both manufacture and to install an elevator in an office building, only the portion of the gross contract price and only the costs properly allocable to installing the elevator is a construction contract. However, in determining whether the installation portion of a contract is expected to be completed within three years, the time expected to complete both the manufacture and the installation of the contract subject matter must be taken into account. Similarly, in determining whether the manufacturing portion of a contract is expected to be completed within two years, the time expected to complete both the manufacture and the installation of the contract subject matter must be taken into account. Alternatively, the taxpayer may consistently account for the manufacturing portion and the installation portion of all such agreements as separate contracts provided that the allocation of the gross contract price between the manufacturing portion and the installation portion of the agreement clearly reflects income.

(iii) *Determination of gross receipts*—(A) *Aggregation and attribution of gross receipts.* The following rules shall apply in determining the gross receipts of the taxpayer for purposes of paragraph (b)(3)(ii)(B) of this section, that is, for determining if the average annual gross receipts of the taxpayer over the 3 taxable years preceding the taxable year in which a construction contract is entered into exceed $25 million. Under paragraph (b)(3)(iii)(B) of this section, the gross receipts of all trades or businesses under commom control with the taxpayer who enters into the construction contract are combined. Under paragraph (b)(3)(iii)(C), a portion of the gross receipts of trades or businesses not under common control with the taxpayer who enters into the contract, but which are related to the taxpayer through a chain of attribution (using indirect and constructive ownership), are attributed to the taxpayer who enters into the contract. Except as provided in paragraph (b)(3)(iii)(C)(*4*)(*a*), the rules of paragraph (b)(3)(iii) (B) and (C) are both applied. For purposes of paragraph (b)(3) of this section, "gross receipts" include the gross receipts realized from the conduct of any trade or business, and shall be the gross receipts of the taxable year in which such receipts are recognized properly under the tax accounting method of the taxpayer. Gross receipts include the gross contract price of a long-term contract (whether a general contract or a subcontract).

(B) *Aggregation of gross receipts of trades or businesses under common control.* If, at any time during the calendar year in which the taxpayer enters into a construction contract, such taxpayer and any other trades or businesses (whether or not

incorporated) are under common control, then the gross receipts of such trades or businesses (for the 3 taxable years of such trades or businesses preceding the taxable year of such trades or businesses in which the construction contract is entered into) shall be combined with the gross receipts of the taxpayer for the 3 taxable years of the taxpayer preceding the taxable year of the taxpayer in which the construction contract is entered into. Gross receipts attributable to transactions between trades or businesses under common control shall be eliminated. For purposes of paragaph (b)(3) of this section, the term "trades or businesses under common control" means any group of trades or businesses that is either—

(*1*) A "parent subsidiary group under common control" as defined in § 1.52–1 (c),

(*2*) A "brother-sister group under common control" as defined in § 1.52–1 (d), or

(*3*) A "combined group under common control" as defined in § 1.52–1(e).

(C) *Attribution of gross receipts to or from individuals, proprietorships, corporations, partnerships, trusts and estates not under common control—(1) Attribution of gross receipts to the contractor from persons owning an interest in the contractor.* For purposes of paragraph (b)(3) of this section, if an interest in the person who enters into a construction contract (hereinafter, "the contractor") is owned (at any time during the calendar year in which the construction contract is entered into), directly, or indirectly with the application of this (C), by or for any person, the gross receipts of the contractor (for the 3 taxable years of the contractor preceding the taxable year of the contractor in which the contractor enters into the construction contract) include the gross receipts of such person (for the 3 taxable years of such person preceding the taxable year of such person in which the contractor enters into the construction contract) in proportion to the largest amount of the interest of such person in the contractor during such calendar year.

(*2*) *Attribution of gross receipts to the contractor from persons in which the contractor owns an interest.* For purposes of paragraph (b)(3) of this section, if (at any time during the calendar year in which the contractor enters into a construction contract) an interest in any person is owned, directly, or indirectly with the application of this (C), by or for the contractor, the gross receipts of the contractor (for the 3 taxable years of the contractor preceding the taxable year of the contractor in which the contractor enters into the construction contract) include the gross receipts of such person (for the 3 taxable years of such person preceding the taxable year of such person in which the contractor enters into the construction contract) in proportion to the largest amount of the interest of the contractor in such person during such calendar year.

(*3*) *Rules for determining ownership—*(*a*) *In general.* In determining the ownership of an interest in any person for purposes of paragraph (b)(3)(iii)(C) of this section, the indirect and constructive ownership rules of this (*3*) shall apply, subject to the operating rules contained in paragraph (b)(3)(iii)(C)(*4*). For purposes of paragraph (b)(3)(iii)(C), an "interest" means: in the case of a corporation, stock; in the case of a trust or estate, an actuarial interest; in the case of a partnership, an interest in capital or profits; and in the case of a sole proprietorship, the proprietorship.

(*b*) *Members of a family.* An individual shall be considered as owning any interest in any person owned, directly or indirectly, by or for—

(*i*) Such individual's spouse (other than a spouse who is legally separated from the individual under a decreee of divorce or separate maintenance, whether final or interlocutory), and

(*ii*) Such individual's children, grandchildren, parents and grandparents. A legally adopted child of an individual shall be treated as the child of such individual.

(*c*) *Attribution from partnerships, estates, trusts and corporations—(i) From Partnerships.* An interest in any person owned, directly or indirectly, by or for a partnership shall be considered as owned by any partner having a 5 percent or greater interest in either the profits or capital of the partnership, in proportion to such partner's interest in profits or capital, whichever is greater.

(*ii*) *From estates and trusts—(A) In general.* An interest in any person (hereinafter an "organization interest") owned, directly or indirectly, by or for an estate or trust shall be considered as owned by any beneficiary of such estate or trust who has an actuarial interest of 5 percent or greater in such organization interest, to the extent of such actuarial interest, as determined under § 11.414(c)–4(b)(3).

(*B*) *Grantor trusts, etc.* An interest in any person owned, directly or indirectly, by or for any portion of a trust of which a person is considered the owner under subpart E of part I of subchapter J (relating to grantors and others treated as substantial owners) shall be considered as owned by such person.

(*iii*) *From corporations.* An interest in any person owned, directly or indirectly, by or for a corporation shall be considered as owned by any shareholder who owns (directly, and indirectly with the application of paragraph (b)(3)(iii)(C) of this section) 5 percent or more in value of such corporation's stock, in proportion to the value of the stock owned by such shareholder to the total value of all the outstanding stock in such corporation.

(*d*) *Attribution to partnerships, estates, trusts and corporations—(i) To partnerships.* An interest in any person owned, directly or indirectly, by or for a partner having a 5 percent or greater interest in partnership profits or capital shall be considered as owned by the partnership in proportion to the partner's interest in profits or capital, whichever is greater.

(*ii*) *To estates and trusts—(A) In general.* An interest in any person owned, directly or indirectly, by or for a beneficiary having an actuarial interest of 5 percent or greater in value of property an estate or trust shall be considered as owned by such estate or trust in proportion to the beneficiary's actuarial interest in the assets of the estate or trust. For purposes of this (*A*), the actuarial interest of a beneficiary shall be determined under the maximum excercise of discretion by the executor or trustee in favor of such beneficiary.

(*B*) *Grantor trusts, etc.* An interest in any person owned, directly or indirectly, by or for a person who is considered the owner of any portion of a trust under subpart E of part I of subchapter J (relating to grantors and others treated as substantial owners) shall be considered as owned by such trust.

(*iii*) *To corporations.* An interest in any person owned, directly or indirectly, by or for a shareholder who owns (directly, and indirectly with the application of paragraph (b)(iii)(C) of this section) 5 percent or more in value of the stock in a corporation shall be considered as owned by such corporation, in proportion to the value of the stock owned by such shareholder to the total value of all the outstanding stock in such corporation.

(*e*) *Options.* If a person has an option to acquire any outstanding interest in any organization, such interest shall be considered as owned by such person. An option to acquire shall be considered as an option to acquire such an interest.

(*4*) *Operating rules—(a) Common control.* Paragraph (b)(3)(iii)(C) of this section shall not apply between two persons both of whom, under paragraph (b)(3)(iii)(B), are members of the group of trades or businesses under common

control that includes the contractor. However, in applying paragraph (b)(3)(iii)(C) between two persons where one or both of such persons are not members of the group of trades or businesses that includes the contractor, paragraph (b)(3)(iii)(C) shall be applied without regard to paragraph (b)(3)(iii)(B).

(*b*) *Reattribution.* Except as provided in paragraph (b)(3)(iii)(C) *(4)(c)* (relating to no double family reattrition or *(d)* (relating to no reattribution to certain co-owners), in applying paragraph (b)(3)(iii)(C)*(3)(b)*, *(c)*, *(d)* or *(e)*, an interest constructively owned by a person shall, in applying paragraph (b)(3)(iii)(C)*(3)(b)*, *(c)*, *(d)*, and *(e)*, be considered as actually owned by such person, and such interest may be reattributed to another person.

(*c*) *No double family attribution.* An interest constructively owned by an individual by reason of paragraph (b)(3)(iii)(C)*(3)(b)* shall not be considered as owned by such individual for purposes of again applying such paragraph to make another the constructive owner of such interest.

(*d*) *No reattribution to certain co-owners.* An interest constructively owned by a person by reason of paragraph (b)(3)(iii)(C)*(3)(d)* shall not be considered as owned by such person for purposes of applying paragraph (b)(3)(iii)(C)*(3)(c)* in order to make another person the constructive owner of such interest.

(*e*) *Option rule in lieu of family rule.* If an interest may be considered as owned by an individual under paragraph (b)(3)(iii)(C)*(3)(b)* or *(e)*, it shall be considered as owned by such individual under paragraph (b)(3)(iii)(C)*(3)(e)*.

(*f*) *Limitation.* In applying paragraph (b)(3)(iii)(C)*(3)* to determine the ownership of an interest by any person for any one purpose—

(*i*) A corporation shall not be considered to own its own stock by reason of paragraph (b)(3)(iii)(C)*(3)(d)(iii)*, and

(*ii*) If an interest owned by any person may be included in the computation more than one time, such interest shall be included only once, in the manner that will impute to the person concerned the largest total interest.

(D) *Short taxable years.* For any taxpayer required to determine its average annual gross receipts over the three taxable year period preceding the taxable year in which a construction contract is entered into, if such period includes a taxable year of less than 12 full months, the taxpayer shall place the gross receipts of such taxable year on an annual basis by dividing the gross receipts by the number of full calendar months in such taxable year and multiplying the result by 12.

(iv) *Classification of contracts*—(A) Intial classification. The taxpayer shall determine whether a contract is an extended period long-term contract at the time such contract is entered into. In estimating the time required to perform any contract, the taxpayer shall anticipate and provide a reasonable allowance for delay, rework, change orders, technology or design problems, and other problems, consistent with industry-wide experience based upon comparable contracts. If the taxpayer determines that a contract is an extended period long-term contract, the cost allocation rules of paragraph (d)(6) of this section shall apply, and such contract shall be treated as an extended period long-term contract even if such contract is actually completed within the 2-year period (3 years in the case of certain construction contracts) beginning on the contract commencement date of such contract. Except as provided in paragraph (b)(3)(iv)(B) of this section, a long-term contract that is not completed within the 2-year period (3 years in the case of certain construction contracts) beginning on the actual contract commencement date of such contract and which the taxpayer did not classify and account for as an extended period long-term contract will not be required to be reclassified (for any taxable year) and accounted for as an extended period long-term contract if, at the time the contract was entered into, the taxpayer reasonably could have expected the contract to be completed within that time. The taxpayer shall maintain contemporaneous written records setting forth the basis for classifying each contract, and such records shall be in sufficient detail to enable the district director to determine whether the taxpayer's estimate of the time required to complete a contract was made on a reasonable basis. A contract term specifying an expected completion or delivery date will not be considered evidence that the parties expected completion or delivery to occur on or about that date specified unless the agreement contains reasonable penalties for not meeting the specified date, and a party to the contract with an interest adverse to the taxpayer enforces the penalty term.

The taxpayer's estimate will not be considered unreasonable if a contract was not completed within the expected time solely because of unforeseeable factors not within the control of the taxpayer. For purposes of the preceding sentence, "unforeseeable factors" are abnormal factors that could not reasonably be anticipated considering the nature of the contract and prior industry experience. Unforeseeable factors include, but are not limited to, prolonged third-party litigation that the taxpayer could not reasonably have anticipated, abnormal weather (considering the season and the jobsite), prolonged strikes, and prolonged delays in securing required permits or licenses.

(B) *Exception for unreasonable classification; amended returns.* If under all the facts and circumstances it is determined that a contract which the taxpayer did not classify and account for as an extended period long-term contract reasonably should have been so classified and accounted for, the taxpayer shall reclassify and account for such contract as an extended period long-term contract for the current taxable year and all subsequent taxable years. In addition, the taxpayer shall file amended returns for all prior taxable years in which costs were incurred with respect to such contract, and such amended returns shall reflect an allocation to the contract of costs incurred in such prior years using the cost allocation rules provided in paragraph (d)(6) of this section. If a contract is not an extended period long-term contract by reason of paragraph (b)(3)(ii)(B) of this section, such contract shall not be reclassified regardless of the taxpayer's gross receipts for any subsequent year and regardless of the time required to complete such contract.

(v) *Special rule for contract commencement date in case of components or subassemblies produced by the taxpayer.* If the cost of components or subassemblies produced by the taxpayer represent a significant amount of the total costs allocable to a contract, the contract commencement date of such contract shall be—

(A) The date such contract is entered into, if the first date the taxpayer incurs any costs allocable to such components or subassemblies is before the date such contract is entered into; or

(B) The first date any costs allocable either to (*1*) such components or subassembies, or (*2*) any other subject matter of the contract are incurred, if costs allocable to such components or subassemblies, or (*2*) any other subject the date such contract is entered into.

See § 1.451–3(d)(6)(iv) for the cost allocation rules required in the case of certain components or subassemblies.

* * * * *

(d) *Completed contract method*—(1) *In general.* Except as otherwise provided in paragraphs (d) (2), (3) or (4) (relating to disputes) of this section, under the completed contract method, gross

income derived from long-term contracts must be reported by including the gross contract price of each contract in gross income for the taxable year in which such contract is completed (as defined in paragraph (d)(2) of this section). All costs which are properly allocable to a long-term contract (determined pursuant to paragraph (d) (5) or (6) of this section) must be deducted from gross income for the taxable year in which the contract is completed. In addition, account must be taken of any material and supplies charged to the contract but remaining on hand at the time of completion.

(5) *General rule for allocation of costs to long-term contracts.* Except as provided in paragraph (d)(6) of this section, the following rules shall apply in determining what costs are properly allocable to a long-term contract in the case of a taxpayer using the completed contract method of accounting for tax purposes.

(i) *Direct costs.* Direct material costs and direct labor costs must be treated as costs properly allocable to a long-term contract. "Direct material costs" include the costs of those materials which become an integral part of the subject matter of the long-term contract and those materials which are consumed in the ordinary course of building, constructing, installing, or manufacturing the subject matter of a long-term contract. See § 1.471–3(b) for the elements of direct material costs. "Direct labor costs" include the cost of labor which can be identified or associated with a particular long-term contract. The elements of direct labor costs include such items as basic compensation, overtime pay, vacation and holiday pay, sick leave pay (other than payments pursuant to a wage continuation plan under section 105(d)), shift differential, payroll taxes and payments to a supplemental unemployment benefit plan paid or incurred on behalf of employees engaged in direct labor.

(ii) *Indirect costs allocated to long-term contracts.* The term "indirect costs" includes all costs (other than direct material costs and direct labor costs) which are incident to and necessary for the performance of particular long-term contracts. Indirect costs which must be allocated to long-term contracts include:

(*a*) Repair expenses of equipment or facilities used in the performance of particular long-term contracts,

(*b*) Maintenance of equipment or facilities used in the performance of particular long-term contracts,

(*c*) Utilities, such as heat, light, and power, relating to equipment or facilities used in the performance of particular long-term contracts,

(*d*) Rent of equipment or facilities used in the performance of particular long-term contracts,

(*e*) Indirect labor and contract supervisory wages, including basic compensation, overtime pay, vacation and holiday pay, sick leave pay (other than payments pursuant to a wage continuation plan under section 105(d)), shift differential, payroll taxes and contributions to a supplemental unemployment benefit plan incurred in the performance of particular long-term contracts,

(*f*) Indirect materials and supplies used in the performance of particular long-term contracts,

(*g*) Tools and equipment not capitalized used in the performance of particular long-term contracts,

(*h*) Costs of quality control and inspection incurred in the performance of particular long-term contracts,

(*i*) Taxes otherwise allowable as a deduction under section 164 (other than State and local and foreign income taxes) to the extent such taxes are attributable to labor, materials, supplies, equipment or facilities used in the performance of particular long-term contracts,

(*j*) Depreciation, amortization and cost recovery allowances reported for financial purposes on equipment and facilities used in the performance of particular long-term contracts (but not in excess of the total depreciation, amortization or cost recovery allowance allowable under Chapter I of the Code with respect to any item of equipment or facility),

(*k*) Cost depletion incurred in the performance of particular long-term contracts,

(*l*) Administrative costs incurred in the performance of particular long-term contracts (but not including any cost of selling or any return on capital),

(*m*) Compensation paid to officers attributable to services performed on particular long-term contracts (other than incidental or occasional services),

(*n*) Costs of insurance incurred in the performance of particular long-term contracts, such as insurance on machinery and equipment used in the construction of the subject matter of a long-term contract, and

(*o*) Research and experimental expenses (described in section 174 and the regulations thereunder) directly attributable to particular long-term contracts in existence at the time such expenses are incurred, or incurred under an agreement to perform such research or experimentation.

(iii) *Costs not allocated to long-term contracts.* Costs which are not required to be included in costs attributable to a long-term contract include:

(*a*) Marketing and selling expenses, including bidding expenses,

(*b*) Advertising expenses,

(*c*) Other distribution expenses,

(*d*) Interest,

(*e*) General and administrative expenses attributable to the performance of services which benefit the long-term contractor's activities as a whole (such as payroll expenses, legal and accounting expenses, etc.),

(*f*) Research and experimental expenses (described in section 174 and the regulations thereunder) neither directly attributable to particular long-term contracts in existence at the time such expenses are incurred nor incurred under any agreement to perform such research or experimentation,

(*g*) Losses under section 165 and the regulations thereunder,

(*h*) Percentage depletion in excess of cost depletion,

(*i*) Depreciation, amortization and cost recovery allowances allowable on equipment and facilities that have been placed in service but are temporarily idle, and depreciation, amortization and cost recovery allowances allowable under Chapter I of the Code in excess of depreciation, amortization and cost recovery allowances reported by the taxpayer in the taxpayer's financial reports,

(*j*) Income taxes attributable to income received from long-term contracts,

(*k*) Pension and profit-sharing contributions representing either past service costs or representing current service costs otherwise allowable as a deduction under section 404, and other employee benefits incurred on behalf of labor. These other benefits include workmen's compensation expenses, payments under a wage continuation plan described in section 105(d), amounts includable in the gross income of employees under nonqualified pension, profit-sharing and stock bonus plans, premiums on life and heath insurance and miscellaneous benefits provided for employees such as safety, medical treatment, cafeteria, recreational facilities, membership dues, etc., which are otherwise allowable as deduction under chapter I of the Code,

(*l*) Cost attributable to strikes, rework labor, scrap and spoilage, and

(*m*) Compensation paid to officers attributable to the performance of services which benefit the long-term contractor's activities as a whole.

(6) *Allocation of costs to extended period long-term contracts.* Except as provided in paragraph (g) of this section, this (6) applies to taxable years beginning after December 31, 1982. The following rules shall apply in determining what cost are properly allocable to an extended period long-term contract (as defined in paragraph (b)(3) of this section) in the case of a taxpayer using the completed contract method or an inventory method of accounting for long-term contracts for tax purposes.

(i) *Direct costs.* Direct material costs and direct labor costs must be treated as costs properly allocable to an extended period long-term contract. "Direct material costs" include the costs of those materials which become an integral part of the subject matter of the extended period long-term contract and those materials which are consumed in the ordinary course of building, constructing, installing, or manufacturing the subject matter of an extended period long-term contract. See § 1.471–3(b) for the elements of direct material costs. "Direct labor costs" include the cost of labor which can be identified or associated with a particular extended period long-term contract. The elements of direct labor costs include such items as basic compensation, overtime pay, vacation and holiday pay, sick leave pay (other than payments pursuant to a wage continuation plan under section 105(d)), shift differential, payroll taxes and payments to a supplemental unemployment benefit plan paid or incurred on behalf of employees engaged in direct labor.

(ii) *Indirect costs allocated to extended period long-term contracts.* The term "indirect costs" include all costs other than direct material costs and direct labor costs. In determining what indirect costs are properly allocable to an extended period long-term contract, all such costs that directly benefit the performance of extended period long-term contracts, or are incurred by reason of the performance of extended period long-term contracts must be allocated to extended period long-term contracts unless otherwise provided in paragraph (d)(6)(iii) of this section. Costs may directly benefit, or be incurred by reason of the performance of extended period long-term contracts of the taxpayer even though the same type of costs also benefit other activities of the taxpayer. Indirect costs that must be allocated to extended period long-term contracts include:

(*a*) Repair expenses of equipment or facilities used in the performance of particular extended period long-term contracts,

(*b*) Maintenance of equipment or facilities used in the performance of particular extended period long-term contracts,

(*c*) Utilities, such as heat, light, and power, relating to equipment or facilities used in the performance of particular extended period long-term contracts,

(*d*) Rent of equipment of facilities used in the performance of particular extended period long-term contracts,

(*e*) Indirect labor and contract supervisory wages, including basic compensation, overtime pay, vacation and holiday pay, sick leave pay (other than payments pursuant to a wage continuation plan under section 105(d)), shift differential, payroll taxes and contributions to a supplemental unemployment benefit plan incurred in the performance of particular extended period long-term contracts,

(*f*) Indirect materials and supplies used in the performance of particular extended period long-term contracts,

(*g*) Tools and equipment not capitalized used in the performance of particular extended period long-term contracts,

(*h*) Costs of quality control and inspection incurred in the performance of particular extended period long-term contracts,

(*i*) Taxes otherwise allowable as a deduction under section 164 (other than State and local and foreign income taxes) to the extent such taxes are attributable to labor, materials, supplies, equipment or facilities used in the performance of particular extended period long-term contracts,

(*j*) Depreciation, amortization and cost recovery allowances on equipment and facilities (to the extent allowable as deductions under Chapter I of the Code) used in the performance of particular extended period long-term contracts,

(*k*) Depletion (whether or not in excess of cost) incurred in the performance of particular extended period long-term contracts,

(*l*) Administrative costs (whether or not performed on a job-site) directly attributable to the performance of particular extended period long-term contracts (but not including any cost of selling or any return on capital),

(*m*) Direct and indirect costs incurred by any administrative, service, or support function or department to the extent such costs are allocable to particular extended period long-term contracts pursuant to paragraph (d)(9) of this section,

(*n*) Compensation paid to officers attributable to services performed on particular extended period long-term contracts (but not including any cost of selling),

(*o*) Costs of insurance incurred in the performance of particular extended period long-term contracts, such as insurance on machinery and equipment used in the construction of the subject matter of an extended period long-term contract,

(*p*) Pension and profit-sharing contributions representing current service costs otherwise allowable as a deduction under section 404, and other employee benefits incurred on behalf of labor to the extent such labor cost is allocable to an extended period long-term contract under paragraph (d)(6) of this section. These other benefits include (but are not limited to) workmen's compensation expenses, amounts includable in the gross income of employees under nonqualified pension, profit-sharing and stock bonus plans, premiums on life and health insurance and miscellaneous benefits provided for employees such as safety, medical treatment, cafeteria, recreational facilities, membership dues, etc., which are otherwise allowable as deductions under chapter I of the Code,

(*q*) Research and experimental expenses (described in section 174 and the regulations thereunder) directly attributable to particular extended period long-term contracts in existence at the time such expenses are incurred, or incurred under an agreement to perform such research or experimentation,

(*r*) Rework labor, scrap and spoilage to the extent incurred in the performance of particular extended period long-term contracts, and

(*s*) Bidding expenses incurred in the solicitation of particular extended period long-term contracts. For purposes of this section, the term "bidding expenses" does not include any research and experimental expenses described in section 174 and the regulations thereunder. The taxpayer shall defer all bidding expenses incurred in the solicitation of particular extended period long-term contracts until the contract is awarded. If the contract is awarded to the taxpayer the bidding costs become part of the indirect costs assigned to the contract. If the contract is not awarded to the taxpayer, bidding costs become deductible in the taxable year the contract is awarded, or the taxable year the taxpayer is notified that no contract will be awarded and that the contract (or a similar or related contract) will not be re-bid, or in the taxable year the taxpayer abandons its bid or proposal, whichever occurs first.

See paragraph (d)(6)(iii)(*b*) of this section.

(iii) *Costs not allocated to extended period long-term contracts.* Costs that are not required to be allocated to an extended long-term contract are:

(*a*) Marketing, selling and advertising expenses,

(*b*) Bidding expenses incurred in the solicitation of contracts not awarded to the taxpayer,

(*c*) Interest,

(*d*) General and administrative expenses (but not including any cost described in paragraph (d)(6)(ii)(*l*) or (*m*) of this section) and compensation paid to officers attributable to the performance of services that do not benefit any extended period long-term contracts,

(*e*) Research and experimental expenses (described in section 174 and the regulations thereunder) neither directly attributable to particular extended period long-term contracts in existence at the time such expenses are incurred nor incurred under any agreement to perform such research or experimentation,

(*f*) losses under section 165 and the regulations thereunder,

(*g*) Depreciation, amortization and cost recovery allowances on equipment and facilities that have been placed in service but are temporarily idle,

(*h*) Income taxes attributable to income received from extended period long-term contracts,

(*i*) Pension and profit sharing contributions allowable as a deduction under section 404 to the extent such contributions represent past service costs, and payments under a wage continuation plan described in section 105(d), and

(*j*) Costs attributable to strikes.

(iv) *Special rule for component parts or subassemblies produced by the taxpayer.* In the case of any type of component or subassembly produced by the taxpayer, the taxpayer shall use the cost allocation rules prescribed in paragraph (d)(6) of this section to determine the unit cost of the components or subassemblies that reasonably can be expected to be incorporated into the subject matter of extended period long-term contracts, and the taxpayer may use other proper cost allocation rules to determine the unit cost of the components or subassemblies that reasonably can be expected not to be incorporated into the subject matter of extended period long-term contracts.

(v) *Taxpayers not using a long-term contract method.* Taxpayers who use an inventory method of accounting for extended period long-term contracts for tax purposes must use the cost allocation rules provided in paragraph (d)(6) of this section rather than the cost allocation rules provided in § 1.471–11.

(7) *Definition.* "Costs which are properly allocable to a long-term contract" do not include costs incurred with respect to any guarantee, warranty, maintenance, or other service agreement relating to the subject matter of the long-term contract. See paragraph (a)(3) of this section.

(8) *Allocation method.* This (8) is effective for taxable years beginning after December 31, 1982. For taxable years beginning before January 1, 1983, see 26 CFR 1.451–3(d)(6) (revised as of April 1, 1982). The taxpayer shall maintain separate accounts for each long-term contract, and both the direct costs (as described in paragraph (d)(5)(i) or (d)(6)(i) of this section) and the indirect costs (as described in paragraph (d)(5)(ii) or (d)(6)(ii) of this section) incurred during the taxable year attributable to long-term contract shall be allocated to each long-term contract for the taxable year such costs are incurred. Direct costs incurred during the taxable year shall be allocated to particular long-term contracts using a specific identification (or "tracing") method. However, if direct costs attributable to more than one long-term contract are intermingled so that such costs cannot be identified (or "traced") specifically to a particular long-term contract, such costs shall be allocated to particular long-term contracts using any reasonable method, provided that the method employed reasonably allocates direct costs among long-term contracts completed during the taxable year and long-term contracts that have not been completed as of the end of the taxable year. However, the taxpayer may not use any LIFO or lower of cost or market method of identifying or allocating direct costs to any long-term contract, see § 1.451–3(a)(6). In the case of a taxpayer who is required to allocate indirect costs to long-term contracts pursuant to paragraph (d)(5)(ii) or (6)(ii) of this section, such costs may be allocated among long-term contracts either—

(i) By a specific identification (or "tracing") method, or

(ii) By a method of allocation using burden rates, such as ratios based on direct costs, hours, or other items, or similar formulas, so long as the method employed for such allocation reasonably allocates indirect costs among long-term contracts completed during the taxable year and long-term contracts that have not been completed as of the end of the taxable year. Indirect costs may ordinarily be allocated to long-term contracts on the basis of direct labor and material costs, direct labor hours, or any other basis which results in a reasonable allocation of such indirect costs. However, the taxpayer may not use any LIFO or lower of cost or market method of identifying or allocating indirect costs to any long-term contract, see § 1.451–3(a)(6). Any change in the taxpayer's method of accounting for costs attributable to long-term contracts required by this (8) is a change in method of accounting to which section 446(e) and the regulations and procedures thereunder apply.

(9) *Allocation of administrative, service or support costs to extended period long-term contracts*—(i) *Introduction.* In general, if a function or department of the taxpayer's business organization provides benefits to extended period long-term contracts, or the subject matter of such contracts, or the labor or materials used in the performance of such contracts, the cost of such function or department is allocable to such extended period long-term contracts. However, if a function or department benefits only the overall management or policy guidance functions of the taxpayer, the cost of such function or department may be deducted currently. In some cases, a function or department may provide benefits to the taxpayer's extended period long-term contract activities and to the taxpayer's overall management or policy guidance functions. In such cases, the taxpayer shall reasonably allocate the cost of such function or department between the taxpayer's extended period long-term contract activities and the taxpayer's overall management or policy guidance functions. Paragraph (d)(9) of this section provides guidance in making these allocations. However, if the methods of allocation used by the taxpayer, or the taxpayer's selection of specific types of costs to be allocated differs from the allocation methods or the specific types of costs to be allocated described in this (9), the taxpayer's allocation methods and selection of specific types of costs to be allocated shall generally not be changed, provided, that with respect to each extended period long-term contract, the total amount of costs incurred during the taxable year of a type described in this (9) that the taxpayer allocated to the contract does not differ significantly from the total amount of costs that would be allocated to the contract under this (9).

(ii) *General rule.* The total amount of administrative, service, or support costs that benefit only a particular extended period long-term contract shall be

directly assigned to such contract. The direct and indirect costs (hereinafter "service costs") of administrative, service or support functions or departments (hereinafter "service department") that benefit more than one activity shall be allocated to particular extended period long-term contracts on the basis of a factor or relationship that reasonably relates the incurring of the service cost to the benefits received by the extended period long-term contract. In general, the direct costs of a service department include costs that can be identified specifically with the services provided by the department, and the indirect costs of a service department include costs not identified specifically with the services provided by the function or department, but are incurred by reason of the direct costs of the function or department. Such direct and indirect costs include, but are not limited to, compensation (including compensation described in paragraph (d)(6)(ii)(*e*) and (*p*) of this section) of employees directly engaged in performing the services provided by the department, travel, materials and supplies consumed by the department, supervisory and clerical compensation, occupancy costs (rents or an allocable share of depreciation and property taxes), depreciation or rent of office machines, utilities, telephone, and other department overhead. The types of activities that are administrative, service or support functions or departments are not predetermined, but depend upon the facts and circumstances of each contractor's activities and business organization. In a decentralized business organization, all costs incurred at higher levels, for example, at a parent corporation or organization, or at the headquarters of a subsidiary corporation or division, are not necessarily general and administrative expenses (as described in paragraph (d)(6)(iii)(*d*) of this section) with respect to an extended period long-term contract.

(iii) *Rules for allocation of service costs.* The taxpayer shall allocate the total direct and indirect costs of a service department to extended period long-term contracts by applying consistently any reasonable method authorized by cost accounting principles. Reasonable methods include:

(A) The direct reallocation method, whereby the total costs of all service departments are allocated only to production departments, and then from the production departments to extended period long-term contracts and other production activities that are not extended period long-term contracts. The service costs allocable to such other production activities shall be accounted for under a proper method of accounting. This direct reallocation method ignores services performed by one service department for the benefit of other service departments but also excludes such other service departments from the base used to make the allocation;

(B) The step-allocation method, whereby a sequence of allocations is made beginning with the allocation (to other service departments and to production departments) of the total costs of the service department that provides services to the greatest number of other service departments, and ending with the allocation of the total costs (including the costs allocated to it from the other service departments) of the service department that provides services to the least number of other service departments. Under this allocation method, the costs of service departments allocated properly to functions or departments that are not service departments or production departments (for example, payroll costs allocated to a financial planning function or department) are not reallocated to any other service department or production department. The taxpayer shall then allocate the costs of the production departments (including the reallocated service department costs) to extended period long-term contracts and to other production activities that are not extended period long-term contracts. The service costs allocable to such other production activities shall be accounted for under a proper method of accounting; or

(C) Other methods of cost allocation authorized by cost accounting principles. However, a reasonable method does not include allocating service costs to other service departments without taking such allocation into account in allocating the costs of such other service departments.

(iv) *Relationship of service costs to benefits received.* Factors or relationships that relate the incurring or service costs to the benefits received by an extended period long-term contract include measures based upon the total output of the service department (for example, the approximate number of service hours or the approximate number or the dollar volume of transactions provided to an extended period long-term contract as a fraction of the total number of service hours or the total number or the total dollar volume of transactions provided by the department), or measures based upon the relative size of the extended period long-term contract to the size of the taxpayer's other production activities (for example, the number of direct labor employees or direct labor hours or direct labor cost (as described in paragraph (d)(6)(i) of this section) incurred on an extended period long-term contract as a fraction of the total number of direct labor employees, direct labor hours, or direct labor cost incurred by the taxpayer in all production activities). In general, allocation methods prescribed in regulations of the Cost Accounting Standards Board, 4 CFR Chapter III, Subchapter G, as well as other allocation methods consistent with the principles of paragraph (d)(9) of this section are acceptable allocation methods, provided that the taxpayer applies such methods consistently.

(v) *Additional requirements.* If, pursuant to section 482 and the regulations thereunder, the district director makes an allocation of income or deductions between members of a group controlled entities to reflect the performance of services or the provision of equipment or facilities at other than an arm's length charge, any taxpayer that has extended period long-term contracts and is affected by such allocation shall be required to take such allocation into account in making the taxpayer's allocation to extended period long-term contracts of the cost of administrative, service or support functions or departments. If the taxpayer establishes to the satisfaction of the district director that all of a particular type of administrative, service or support function is only performed at the jobsite, then all the costs of such function incurred at the jobsite shall be directly allocated to each particular extended period long-term contract and no further allocation of that type of cost shall be required. For each taxable year that the taxpayer allocates costs described in paragraph (d)(6)(ii)(*m*) and (d)(9) of this section (service costs) to an extended period long-term contract, the taxpayer shall attach a statement to the taxpayer's tax return briefly describing by type of service cost, the allocation method and the base used in allocating such service cost between the taxpayer's extended period long-term contract and the taxpayer's other activities. A change in the method or base used in allocating such service costs (such as changing from an allocation base using direct labor cost to a base using direct labor hours), or a change in the taxpayer's determination of what functions or departments of the taxpayer are required or not required to be allocated to extended period long-

term contracts is a change in method of accounting to which section 446 (e) and the regulations thereunder apply. See § 1.446–1(e).

(vi) *Illustration of types of activities required and not required to be allocated.* Activities that are administrative, service or support functions or departments generally include, but are not limited to: the administration and coordination of manufacturing or construction projects (wherever performed in the business organization of the taxpayer); personnel operations, including the cost of recruiting, hiring, relocating, assigning, and maintaining personnel records of employees whose labor cost is allocable to extended period long-term contract; purchasing operations, including purchasing materials and equipment, scheduling and coordinating delivery and return of materials and equipment to or from factories or jobsites, and expediting and follow-up; materials handling and warehousing operations; accounting and data services operations related to contract activities, including cost accounting, accounts payable, disbursements, billing, accounts receivable, and payroll; data processing; security services; and legal departments that provide legal services to contracts. Costs incurred by the following types of functions or departments ordinarily are not required to be allocated to extended period long-term contracts: functions or departments responsible for overall management of the taxpayer or for setting overall policy for all of the taxpayer's activities or trade or businesses (such as, the board of directors (including their immediate staff), and the chief executive, financial, accounting and legal officers (including their immediate staffs) of the taxpayer, provided that no substantial part of the costs of such departments or functions directly benefit particular extended period long-term contracts); general business planning; financial accounting (including the accounting services required to prepare consolidated reports, but not including any accounting for particular contracts); general financial planning (including general budgeting) and financial management (including bank relations and cash management); general economic analysis and forecasting; internal audit; shareholder, public and industrial relations; tax department; and other departments or functions that are not responsible for day-to-day operations but are instead responsible for setting policy and establishing procedures to be used by all of the taxpayer's activities or trades or businesses in areas such as purchasing (such as maintaining lists of approved suppliers, developing purchasing manuals and policy directives of general application, developing general quality standards for purchased materials and components, general auditing and review of purchasing activities to assure compliance with the taxpayer's purchasing policy and compliance with government purchasing requirements, and management of small business participation), personnel (such as establishing and managing personnel policy in general, developing general wage, salary and benefit policies, developing employee training programs unrelated to particular contracts, negotiations with labor unions and relations with retired workers), quality control, safety engineering, insurance or risk management (but not including bid or performance bonds or insurance related to particular contracts), and environmental management, provided that the cost of establishing any system or procedure that will only benefit a particular extended period long-term contract shall be directly allocated to such contract. The costs of any administrative, service or support function or department of the taxpayer not described in this (vi) are required to be allocated to extended period long-term contracts to the extent that the nature of the services provided by such function or department are more like the type of services described in the first sentence of this (vi) than like the type of services described in the second sentence of this (vi).

(vii) *Illustrations.* The following examples illustrate the types of considerations that are to be taken into account in making the allocations required by paragraph (d)(9) of this section. The taxpayer need not use the same method to allocate a particular type of administrative, service or support cost as the method described in these examples provided that the method used by the taxpayer is reasonable. The allocation methods illustrated in these examples may be used to allocate other types of service costs not illustrated in these examples:

(A) *Security services.* The cost of security or protection services benefit all areas covered by the service and should be allocated to each physical area that receives the service in proportion either to the size of the physical area, number of employees in the area, or in proportion to the relative fair market value of assets located in the area, or in any other reasonable basis applied consistently. That part of the total cost allocable to a factory or jobsite where an extended period long-term contract is performed shall be directly allocated to the contract. The treatment of the cost of security services allocable to other service departments depends upon the method of allocation adopted by the taxpayer under paragraph (d)(9)(iii) of this section.

(B) *Legal services.* The cost of a legal department includes rent (or an allocation of building depreciation and occupancy costs), travel, office machines, supplies, telephone, library, and other overhead, and the compensation of the attorneys and other employees assigned to the department. For this purpose compensation includes compensation described in paragraph (d)(6)(ii) (*e*) and (*p*) of this section. These costs only benefit activities of the taxpayer requiring legal services. These costs are generally allocable directly to an extended period long-term contract on the basis of the approximate number of hours of legal services (including research) performed in connection with the contract, including bidding, negotiating, drafting, or reviewing the contract (including subcontracts and supply contracts), obtaining necessary licenses and permits, and in resolving contract disputes, termination claims or disputes arising from the performance of the contract. Different hourly rates may be appropriate for different services. In determining the number of hours allocable to any contract, approximations are appropriate, detailed time records need not be kept, and insubstantial amounts of services provided to a contract by senior legal staff as administrators or as reviewers may be ignored. The taxpayer shall also allocate directly to a contract the cost of any outside legal services provided to the contract. Instead of an allocation based upon total hours of legal services provided to an activity, the taxpayer may choose to allocate the costs of a legal department to an extended period long-term contract and to other production activities on the basis of total direct costs (as described in paragraph (d)(6)(i) of this section) incurred on an extended period long-term contract as a fraction of the total direct costs incurred on all production activities. Legal costs may also be allocable to long-term contracts of the taxpayer that are not extended period long-term contracts under paragraph (d)(5)(ii) of this section. Legal activities relating to general corporate functions, financing, securities law compliance, anti-trust law compliance, tax compliance, industrial relations, compliance with laws and regulations not related to particular contracts, after-

the-fact review of contracts to insure compliance with company policies, patents and licensing unrelated to particular contracts, and similar general legal functions are not required to be allocated to long-term contracts.

(C) *Centralized payroll department.* The cost of a payroll department includes rent (or an allocation of building depreciation and occupancy costs), office machines, supplies, telephones and other overhead and compensation of employees assigned to the department. The department cost may also include the cost of data processing and file maintenance, or these costs may be incurred by a separate data processing or records department and allocated to the payroll department. Payroll service costs benefit any production department or other service department incurring labor costs. The cost of a payroll department is generally allocated on the basis of the gross amount of payroll processed.

(D) *Centralized data processing.* The cost of a data processing department includes rent or depreciation of data processing machines, supplies, rent (or an allocation of building depreciation and occupancy costs), power, telephone and other overhead, and the compensation of employees assigned to the department. These costs benefit all production departments and all other service departments that require data processing services. Data processing costs are generally allocated based upon the number of data processing hours supplied. Other reasonable bases, such as an allocation based upon total direct costs, may also be used. The cost of data processing systems developed for a particular long-term contract shall be directly allocated to such contract.

(E) *Engineering and design services.* Unless the engineering and design services provided to a long-term contract are properly accounted for as a separate contract, the total cost of engineering or design service departments generally is directly allocable to a long-term contract (whether or not the contract is an extended period long-term contract) on the basis of the approximate number of hours of work performed on the contract as a fraction of the total hours of engineering or design work performed for all activities. Different services may be allocated at different hourly rates. Engineering and design services may also be treated as direct costs of the contract, provided that the taxpayer also treats all engineering and design overhead as a direct or indirect cost of the contract.

(F) *Safety engineering.* The cost of a safety engineering department includes the compensation paid to employees assigned to the department and the other types of department overhead described in the other examples of paragraph (d)(9)(vi) of this section. These costs benefit all the production activities of the taxpayer and should be allocated to an extended period long-term contract on the basis of the approximate number of safety inspections made on the contract as a fraction of total inspections, or on the basis of the number of employees assigned to the contract as a fraction of total production employees, or on the basis of total labor hours worked on the contract as a fraction of total production hours, whichever is most reasonable. The cost of a safety engineering department responsible only for setting safety policy and establishing safety procedures to be used in all of the taxpayer's production activities or trades or businesses is not required to be allocated to extended period long-term contracts and other production activities. However, in determining the total costs of a safety engineering department to be allocated, costs attributable to providing a safety program only for a particular long-term contract shall be directly assigned to the contract.

(e) *Severing and aggregating contracts.*—(1) *In general.* For the purpose of clearly reflecting income, it may be necessary in some instances either to treat one agreement as several contracts or to treat several agreements as one contract. Whether an agreement should be so severed or several agreements so aggregated will depend on all the facts and circumstances. Generally, one agreement will not be treated as several contracts unless such agreement contemplates separate delivery or separate acceptance of portions of the subject matter of the contract. However, separate delivery or separate acceptance of portions of the subject matter of a contract does not necessarily require severing of a contract.

In addition, an agreement generrally will be treated as several contracts where there is no business purpose for entering into one agreement rather than several agreements. For taxable years ending after December 31, 1982, an example of a factor which may be evidence that there is no business purpose for entering into one agreement rather than several agreements is that the agreement covers two or more subject matters, and (pursuant to paragraph (b)(2)(ii) of this section) it is not readily apparent that one of the subject matters of the agreement is the principal subject matter of the agreement. For taxable years ending after December 31, 1982, if an agreement is modified (as by the exercise of an option or the issuance of a "change order") to increase the number of items to be supplied under the agreement, the additional items under such modification shall generally be treated as a separate contract or as several separate contracts, and shall be treated as entered into on the date such modifcation becomes effective. Several agreements will not generally be aggregated unless the several agreements would be treated as one contract under customary commercial practice in a taxpayer's trade or business or unless there is no business purpose for entering into several agreements rather than one agreement. For taxable years ending after December 31, 1982, an example of a factor which is evidence that two contracts entered into between the same parties should be aggregated is that (without regard to the order in which the contracts were entered into or performed, and without regard to whether one of the contracts could actually be performed without the prior or contemporaneous performance of the other contract) a reasonable business-person would not have entered into one of the contracts for the terms agreed upon but for entering into the other contract for the terms agreed upon in such other contract (or for more favorable terms). See example (2) of paragraph (e)(2) of this section. For taxable years ending after December 31, 1982, an example of a factor which is not evidence that two contracts entered into between the same parties should be aggregated is that one of the contracts would not have been entered into containing the terms agreed upon but for the expectation that the parties would enter into the other contract. See paragraph (b)(2)(ii) of this section for special rules relating to the time for completion of certain contracts having more than one subject matter. In addition to the instances described in paragraph (e)(1) of this section, for the purpose of clearly reflecting income, there may be other instances in which it may be necessary for the Commissioner to either treat one agreement as several long-term contracts or to treat several agreements as one long-term contract.

(2) *Examples.* The application of paragraph (e) of this section may be illustrated by the following examples. Examples (2), (3), (5) and (6) are effective for taxable years ending after December 31, 1982.

Example (1). X, a calendar year taxpayer engaged in the construction business and

using a long-term contract method, enters into one contract in 1972 with A, a real estate developer, to build three houses of different designs in three suburbs of a large city. The houses are to be completed, accepted, and put into service in 1973, 1974, and 1975. The portion of the total contract price attributable to each house can reasonably be determined. In these circumstances, the contract should be severed and treated as if the agreement to build each house were a separate contract for purposes of applying X's long-term contract method.

Example (2). Y, a calendar year shipbuilder using a long-term contract method, enters into two contracts at about the same time during 1982 with M. These contracts are the product of a single negotiation. Under each contract, the taxpayer is to construct for M a submarine of the same class. Although the specifications for each submarine are similar, it is anticipated that, since the taxpayer has never constructed this class of submarine before, the costs incurred in constructing the first submarine (to be delivered in 1983 will be substantially greater than the costs incurred in constructing the second submarine (to be delivered in 1984.) If the contracts are treated as separate contracts, it is estimated that the first contract would result in little or no gain, while the second contract would result in substantial profits. A reasonable businessperson would not have entered into the contract to construct the first submarine for the price specified without entering into the contract to construct the second submarine. In these circumstances, the two contracts must be treated as one contract for purposes of applying Y's long-term contract method.

Example (3). Assume the same facts as in example (2) with the addition of the following new facts: In 1983 the original contract to construct the second submarine is modified by the issuance of a "change order" providing for a third submarine of the same class to be constructed by Y and delivered to M in 1985. The portion of the total contract price attributable to the "change order" providing for the third submarine can reasonably be determined. A reasonable business person would have entered into the contracts to construct the first two submarines for the prices specified without regard to whether the contract for the second submarine would be modified to provide for the third submarine. In these circumstances, the contract to construct the second and third submarines must be severed and the "change order" providing for the third submarine must be treated as a separate contract for purposes of applying Y's long-term contract method.

Example (4). Z, a calendar year taxpayer engaged in the construction business and using a long-term contract method, enters into a contract to build an office building for the Y Bank in 1973. In 1974 the first three floors of the bank building are completed and Y occupies these floors and uses them for the conduct of its banking business. The remaining seven floors are not completed and accepted until 1975. Under the circumstances, it is clear that even though separate acceptance of portions of the subject matter of the contract has occured, the subject matter of the contract was essentially a single unit, namely a building, and that there was a business purpose for entering into one contract rather than several contracts. Consequently, the contract ordinarily will not be severed.

Example (5). T, a calendar year taxpayer engaged in the business of manufacturing aircraft and related equipment, contracts in 1982 with the B government to manufacture 10 military aircraft for delivery in 1984. It is anticipated at the time the contract is entered into that B may contract with T for the production and sale of as many as 300 of these aircraft over the next 20 years. In negotiating the price for the contract B and T take into account the expected total cost of manufacturing the 10 aircraft, the risks and the opportunities associated with the contract, and all other factors that the parties consider relevant, in such a manner that T would have entered into the contract for the terms agreed upon whether or not T would actually enter into one or more additional production contracts. However, it is unlikely that T would have entered into the contract but for the expectation that T and B would enter into additional production contracts. In 1984, the 10 aircraft are completed by T and accepted by B. In 1984, T also enters into a contract with B to manufacture 20 aircraft of the same type for delivery in 1986. In negotiating the price for these 20 aircraft, B and T take into account the fact that the expected unit costs for this production run of 20 will be different than the unit costs of the 10 aircraft completed in 1984, but also that the expected unit costs of this production run of 20 will be substantially higher than the costs of future production runs. Because the price awarded for each of the two contracts takes into account the expected total costs and the risks expected for each contract standing alone, the terms agreed upon for any one of the contracts are independent of the terms agreed upon for the other contracts. Under the facts of this example, the two contracts may not be aggregated.

Example (6). R, a calendar year taxpayer engaged in the manufacture of industrial machinery, enters into one contract in 1982 with Z to manufacture five specialized machines and to manufacture spare and replacement parts for the machines. The machines are to be delivered in 1982 and 1983, and the spare and replacement parts are to be delivered in 1983 through 1985. The portion of the total contract price attributable to the five machines and to the spare and replacement parts can reasonably be determined. The portion of the total contract price reasonably attributable to the spare and replacement parts is more than an insignificant amount of the total contract price. Assume that under all the facts and circumstances it is determined that the portion of the contract attributable to the five machines need not be severed as between the machines. In these circumstances, because the contract comtemplates separate delivery of the machines and the parts, because more than an insignificant amount of the total contract price is allocable to the spare and replacement parts, and because spare or replacement parts are items different than an entire machine, the contract should be severed and the agreement to manufacture the five machines should be treated as a separate contract and the agreement to manufacture the spare and replacement parts should be treated as another separate contract (or as several separate contracts depending on the facts and circumstances) for purposes of applying R's long-term contract method.

. . . . .

(g) *Effective date and transition to 1983 cost allocation rules; special rules*—(1) *In general.* In the case of a taxpayer using the completed contract method or an inventory method of accounting for long-term contracts, the cost allocation rules prescribed in paragraph (d)(6) of this section (hereinafter "the 1983 cost allocation method") shall apply (with the phase-in described in paragraph (g)(2) of this section) to costs incurred by the taxpayer in taxable years beginning after December 31, 1982, but only with respect to extended period long-term contracts (as defined in paragraph (b)(3) of this section) entered into after December 31, 1982. No costs incurred with respect to any contract entered into before January 1, 1983 are required to be accounted for under the 1983 cost

allocation method. Such costs shall be accounted for under the cost allocation method prescribed in paragraph (d)(5) of this section. Section 481 shall not apply to the transition to the 1983 cost allocation method.

(2) *Phase-in.* For costs required to be allocated to an extended period long-term contract under the 1983 cost allocation method that are not required to be allocated to the contract under the cost allocation method prescribed in paragraph (d)(5) of this section (or in paragraph (c) of § 1.471–11 in the case of a taxpayer accounting for extended period long-term contracts under an inventory method of accounting), in lieu of allocating the full amount of such costs to the extended period long-term contract, the taxpayer shall allocate to the contract only the applicable percentage of such costs incurred in taxable years beginning after December 31, 1982 and before January 1, 1986, with respect to extended period long-term contracts entered into after December 31, 1982. The applicable percentage shall be determined as follows:

For taxable years beginning in calendar year	The applicable percentage is
1983	[illegible]
1984	[illegible]
1985 or thereafter	100

In the case of a taxpayer whose taxable year does not begin on January 1, costs incurred with respect to extended period long-term contracts entered into after December 31, 1982, shall be accounted for under the cost allocation method prescribed in paragraph (d)(5) of this section (or paragraph (c) of § 1.471–11 in the case of a taxpayer using an inventory method) in the case of costs incurred in taxable years beginning before January 1, 1983, and under the 1983 cost allocation method (with the application of paragraph (g) of this section) in the case of taxable years beginning after December 31, 1982.

(3) *Special rule for completion of certain contracts in taxable years ending before January 1, 1983.* Any contract that would (but for this (3)) be considered to be completed in a taxable year ending before January 1, 1983, solely by reason of the application of paragraph (b)(2)(ii), (iii), or (iv) of this section, shall be considered to be completed on the first day of the taxpayer's first taxable year ending after December 31, 1982. The application of this (3) shall not be considered to be a change in method of accounting to which section 481 applies.

(4) *Special rule for severing and aggregating certain contracts in taxable years ending before January 1, 1983.* Any contract of a taxpayer that would (but for this (4)) be considered completed in a taxable year ending before January 1, 1983—

(i) Solely by reason of the application of those provisions of paragraph (e)(1) of this section expressly made applicable to taxable years ending after December 31, 1982 (hereinafter, the "severing/aggregating modifications") or,

(ii) Solely by reason of the application of both the severing/aggregating modifications and the application of paragraph (b) (ii), or (iv) of this section (hereinafter, the "completion modifications"), shall be treated as having been completed on the first day after December 31, 1982, on which any contract that was severed from such contract (by reason of the severing/aggregating modifications) is completed (determined with application of the completion modifications). The application of this (4) shall not be considered to be a change in method of accounting to which section 481 applies.

(5) *Special rule for estimated tax payments.* For purposes of the addition to the tax for underpayment of estimated tax under section 6654 (relating to individuals) and section 6655 (relating to corporations), the gross income realized in the taxpayer's first taxable year ending after December 31, 1982, attributable to long-term contracts deemed to be completed in such taxable year solely by the application of paragraphs (b)(2)(ii), (b)(2)(iii), (b)(2)(iv), (g)(3) or (g)(4) of this section, or those portions of paragraph (e)(1) of this section made applicable to taxable years ending after December 31, 1982, shall be considered to be taxable income for such taxable year, but only with respect to installments of estimated tax required to be paid on or after [Insert thirty days after date this document is published in the **Federal Register**].

(6) *Taxpayer changing from a method more inclusive of indirect costs.* If a taxpayer wishes to change to a method of accounting for indirect costs prescribed under this section (or under § 1.471–11(c) in the case of a taxpayer using an inventory method of accounting for long-term contracts) from a method of accounting for indirect costs that is more inclusive of indirect costs, the taxpayer must secure the consent of the Commissioner prior to making the change in accordance with the regulations and procedures established under section 446(e).

(7) *Taxpayers using a long-term contract method and LIFO or lower of cost or market inventory methods.* In the case of a taxpayer using the LIFO or lower of cost or market inventory methods to determine any costs attributable to a long-term contract accounted for under a long-term contract method, such taxpayer shall, for the taxpayer's first taxable year beginning after December 31, 1982, change the method used in determining such costs to a proper method in accordance with the regulations and procedures established under section 446(e).

Par. 3. Paragraph (b) of § 1.451–5 is amended by adding headings to paragraph (b)(1), (2) and (4) and by revising paragraph (b)(3) to read as follows:

§ 1.451–5 Advance payments for goods and long-term contracts.

* * * * *

(b) *Taxable year of inclusion*—(1) In general. Advance payments must be included in income either—

(i) In the taxable year of receipt; or

(ii) Except as provided in paragaph (c) of this section,

(*a*) In the taxable year in which properly accruable under the taxpayer's method of accounting for tax purposes if such method results in including advance payments in gross receipts no later than the time such advance payments are included in gross receipts for purposes of all of his reports (incuding consolidated financial statements) to shareholders, partners, beneficiaries, other proprietors, and for credit purposes, or

(*b*) If the taxpayer's method of accounting for purposes of such reports results in advance payments (or any portion of such payments) being included in gross receipts earlier than for tax purposes, in the taxable year in which includible in gross receipts pursuant to his method of accounting for purposes of such reports.

(2) *Examples.* This paragraph may be illustrated by the following examples:

Example (1). S, a retailer who uses for tax purposes and for purposes of the reports referred to in subparagraph (1)(ii)(a) of this paragraph, an accrual method of accounting under which it accounts for its sales of goods when the goods are shipped, receives advance payments for such goods. Such advance payments must be included in gross recipts for tax purposes either in the taxable year the payments are received or in the taxable year such goods are shipped (except as provided in paragraph (c) of this section).

Example (2). T, a manufacturer of household furniture, is a calendar year taxpayer who uses an accrual method of

accounting pursuant to which income is accrued when furniture is shipped for purposes of its financial reports (referred to in subparagraph (1)(ii)(*a*) of this paragraph) and an accrual method of accounting pursuant to which the income is accrued when furniture is delivered and accepted for tax purposes. See § 1.446–1(c)(1)(ii). In 1974, T receives an advance payment of $6,000 from X with respect to an order of furniture to be manufactured for X for a total price of $20,000. The furniture is shipped to X in December 1974, but it is not delivered to and accepted by X until January 1975. As a result of this contract, T must include the entire advance payment in its gross income for tax purposes in 1974 pursuant to subparagraph (1)(ii)(*b*) of this paragraph. T must include the remaining $12,000 of the gross contract price in its gross income in 1975 for tax purposes.

(3) *Long-term contracts.* In the case of a taxpayer accounting for advance payments for tax purposes pursuant to a long-term contract method of accounting under § 1.451–3, or of a taxpayer accounting for advance payments with respect to a long-term contract pursuant to an accrual method of accounting referred to in the succeeding sentence, advance payments shall be included in income in the taxable year in which properly included in gross receipts pursuant to such method of accounting (without regard to the financial reporting requirement contained in subparagraph (1)(ii) (*a*) or (*b*) of this paragraph). An accrual method of accounting to which the preceding sentence applies shall consist of any method of accounting under which the income is accrued when, and costs are accumulated until, the subject matter of the contract (or, if the subject matter of the contract consists of more than one item, an item) is shipped, delivered, or accepted.

(4) *Installment method.* The financial reporting requirement of subparagraph (1)(ii) (*a*) or (*b*) of this paragraph shall not be construed to prevent the use of the installment method under section 453. See § 1.446–1(c)(1)(ii).

* * * * *

Par. 4. Section 1.471–4 is amended by adding a new paragraph (d) to read as follows:

§ 1.471–4 Inventories at cost or market, whichever is lower.

* * * * *

(d) *Long-term contracts.* The long-term contract methods described in § 1.451–3 are not inventory methods of accounting. Accordingly, effective for taxable years beginning after December 31, 1982, this section may not be used to determine the value of a long-term contract accounted for under a long-term contract method, including use of this section to determine the value of materials assigned to a long-term contract or to determine the value of finished or semi-finished components assigned to a long-term contract accounted for under a long-term contract method.

Par. 5. Paragraph (c) of § 1.471–11 is amended by revising paragraph (c) (1) and (3) to read as follows:

§ 1.471–11 Inventories of manufactures.

* * * * *

(c) *Certain indirect production costs*—(1) *General rule.* Except as provided in paragraph (c)(3) of this section and in paragraph (d)(6) of § 1.451–3, in order to determine whether indirect production costs referred to in paragraph (b) of this section must be included in a taxpayer's computation of the amount of inventoriable costs, three categories of costs have been provided in subparagraph (2) of this paragraph. Costs described in subparagraph (2)(i) of this paragraph must be included in the taxpayer's computation of the amount of inventoriable costs, regardless of their treatment by the taxpayer in his financial reports. Costs described in subparagraph (2)(ii) of this paragraph need not enter into the taxpayer's computation of the amount of inventoriable costs, regardless of their treatment by the taxpayer in his financial reports. Costs described in subparagraph (2)(iii) of this paragraph must be included in or excluded from the taxpayer's computation of the amount of inventoriable costs in accordance with the treatment of such costs by the taxpayer in his financial reports and generally accepted accounting principles. For the treatment of indirect production costs described in subparagraph (2) of this paragraph in the case of a taxpayer who is not using comparable methods of accounting for such costs for tax and financial reporting, see subparagraph (3) of this paragraph (d)(6) of § 1.451–3 rather than after December 31, 1982, notwithstanding this section, taxpayers who use an inventory method of accounting for extended period long-term contracts (as defined in paragraph (b)(3) of § 1.451–3) for tax purposes must use the cost allocation rules provided in paragarph (d)(6) of § 1.451–3 rather than the cost allocation rules provided in this section. After a taxpayer has determined which costs must be treated as indirect production costs includible in the computation of the amount of inventoriable costs, such costs must be allocated to a taxpayer's ending inventory in a manner prescribed by paragraph (d) of this section.

* * * * *

(3) *Exception.* Except as provided in paragraph (d)(6) of § 1.451–3, in the case of a taxpayer whose method of accounting for production costs in his financial reports is not comparable to his method of accounting for such costs for tax purposes (such as a taxpayer using the prime cost method for purposes of financial reports), the following rules apply:

* * * * *

Par. 6. Section 1.472–1 is amended by adding a new paragraph (m) to read as follows:

§ 1.472–1 Last-in, first-out inventories.

* * * * *

(m) *Long-term contracts.* The long-term contract methods described in § 1.451–3 are not inventory methods of accounting. Accordingly, use of the LIFO inventory method to determine the costs attributable to a long-term contract accounted for under a long-term contract method does not clearly reflect income, including the use of the LIFO inventory method to determine the cost of materials assigned to a long-term contract or to determine the cost of finished or semi-finished components assigned to a long-term contract accounted for under a long-term contract method.

Roscoe L. Egger, Jr.,

Commissioner of Internal Revenue.

26 CFR Part 48

[LR—2115]

Manufacturers Excise Taxes on Sporting Goods and Firearms and Other Administrative Provisions of Special Application to Manufacturers and Retailers Excise Taxes

Correction

In FR Doc. 82–35461 beginning on page 442 in the issue of Wednesday, January 5, 1983, make the following corrections:

1. On page 443, second column, sec 6416, number 1, first line, "295" should read "205", number 4 under section 6416, third line, "1967" should read "1976"; third column, section 6421, number 6, second line, "1978" should read "1979".

2. On page 445, second column, sixth line from the top, "file" should read "claim".

3. On page 449, first column, § 48.6161(a)–1, paragraph (a), first line, "*General*" should read "*general*"; third column, in the heading for § 48.6206–1, "**excesdive**" should read "**excessive**".

4. On page 451, first column, § 48.6302(c)–1, paragraph (f), third line

from the bottom, "semiannually" should read "semimonthly".

5. On page 454, second column, § 48.6412–3, paragraph (f)(2), fifth line, "average" should read "averaged".

6. On page 459, first column, § 48.6416(b)(2)–2, paragraph (d), seventh line, "of" should read "or"; second column, § 48.6416(b)(2)–2, paragraph (f), the undesignated paragraph after subparagraph (iv), tenth line from the bottom, "(B)(3)(C)" should read "(b)(3)(C)".

7. On page 460, second column, § 48.6416(b)(2)–3, paragraph (a)(6), eighth line, "claimaing" should read "claiming".

8. On page 462, first column, § 48.6416(b)(2)–4, paragraph (b)(2), second line from the bottom, "fule" should read "fuel", and in § 48.6416(b)(3)–1, third line, insert "an" after "be" and in the same line, "overpayments" should read "overpayment".

9. On page 464, third column, § 48.6416(b)(4)–1, paragraph (d)(1), twelfth line, "chasis" should read "chassis".

10. On page 465, first column, § 48.6416(b)(5)–1, paragraph (b), third line, "4126" should read "4216"; second column, § 48.6416(c)–1, paragraph (b), second line, "*the*" should be removed.

11. On page 466, second column, "**Pars. 31.**" should read "**Par. 31.**"; third column, § 48.6420–1, paragraph (a)(2), fourth line from the bottom, "§ 48.6420–2" should read "§ 48.6420–4"; and in paragraph (c)(1), first line, insert "any" after "or".

12. On page 469, first column, § 48.6420–4, paragraph (j), eleventh line, insert a comma after "Thus".

13. On page 471, first column, § 48.6421–1, paragraph (c)(1), sixth line, the first "State" should read "States" and "or" should be inserted after it.

14. On page 472, first column, § 48.6421–2, paragraph (b), third line from the top, "of" should read "on".

15. On page 473, first column, § 48.6421–3, paragraph (d)(3)(i), tenth line from the bottom, "quarters" should read "quarter" and in ninth line from the bottom, insert the following after "ending": "March 31, and is also entitled to payments of $1,500 for each of the calendar quarters ending".

16. On page 473, first column, § 48.6421–3, paragraph (d)(3)(ii), fourteenth line from the bottom, the first "or" should read "of"; third column, § 48.6421–4, paragraph (b)(3), fourth line from the top, insert "in" after "used".

17. On page 474, second column, § 48.6421–7, paragraph (a), fifth line from the bottom, insert the following after "of": "the income tax return or claim and a copy of"; in paragraph (b)(1), fourth line, "includes" should read "include" and in the second line from the bottom of the same paragraph, "use" should read "used"; subparagraph (4) at the bottom of the page should be removed; third column, paragraphs (b)(1) and (2) at the top of the page should be removed.

18. On page 477, first column, § 48.6424–5, paragraph (a), tenth line from the bottom, "6408" should read "6206"; second column, at the top of the page, the section number should read "§ 48.6424–6".

19. On page 478, third column, § 48.6427–3, paragraph (b)(1)(ii), third line, insert "or" after "§ 48.6427–1(c)" and remove the fourth line and the word "in" in the fifth line should be removed.

20. On page 481, first column, § 48.6427–5, paragraph (a)(3), third line from the bottom, "othe" should read "other"; second column, § 48.6675–1, paragraph (a), second line from the top, "64211" should read "6421".

BILLING CODE 1505-01-M

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 944

Abandoned Mine Land Reclamation Program; Utah

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM) U.S. Department of the Interior.

ACTION: Proposed rule.

SUMMARY: On February 9, 1983, the State of Utah submitted to OSM its proposed Abandoned Mine Land Reclamation Plan (Plan) under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). OSM is seeking public comment on the adequacy of this State Plan.

DATES: Written comments on the Plan must be received on or before 5:00 p.m., April 13, 1983.

ADDRESSES: Copies of the full text of the proposed Utah Plan are available for review during regular business hours at the following locations:

Office of Surface Mining Reclamation and Enforcement, New Mexico Field Office, 219 Central Avenue NW., Suite 216, Albuquerque, New Mexico 97102

State of Utah, Division of Oil, Gas and Mining, 4241 State Office Building, Salt Lake City, Utah 84114

Office of Surface Mining Reclamation and Enforcement, Administrative Record, 1100 L Street, NW., Rm. 5315, Washington, D.C. 20240

Written comments must be mailed or hand carried to; Director, New Mexico Field Office listed above. Comments recieved after 5:00 p.m., April 13, 1983 will not be considered or included in the administrative record for this rulemaking.

The Administrative Record will be available in two locations for public review at the OSM Offices above, on Monday through Friday, 8:00 a.m. to 4:30 p.m. excluding holidays.

FOR FURTHER INFORMATION CONTACT: Robert Hagen, Director, Office of Surface Mining, New Mexico Field Office, 219 Central Avenue, Albuquerque, New Mexico 97102. Telephone (505) 766–1486.

SUPPLEMENTARY INFORMATION: Title IV of the Surface Mining Control and Reclamation Act of 1977 (SMCRA), Pub. L. 95–87, 30 U.S.C 1201 *et seq.*, establishes an abandoned mine land reclamation program for the purposes of reclaiming and restoring lands and water resources adversely affected by past mining. This program is funded by a reclamation fee imposed upon the production of coal. Lands and water eligible for reclamation are those that were mined or affected by mining and abandoned or left in an inadequate reclamation status prior to August 3, 1977 and for which there is no continuing reclamation responsibility under State or Federal law.

Title IV provides that if the Secretary determines that a State has developed and submitted a program for reclamation of abandoned mines and has the ability and necessary State legislation to implement the provisions of Title IV, the Secretary may approve the State program and grant to the State exclusive responsibility and authority to implement the approved program.

On February 9, 1983, OSM received a proposed Abandoned Mine Land Reclamation Plan from the State of Utah. The purpose of this submission is to demonstrate both the State's intent and capability to assume responsibility for administering and conducting the provisions of SMCRA and OSM's Abandoned Mine Land Reclamation (AMLR) program (30 CFR Part 884, 47 FR 28600–28601, June 30, 1983.

This notice describes the proposed program and sets forth information concerning public participation in the Assistant Secretary's determination of whether or not the submitted Plan may be approved. The public participation requirements for the consideration of a State Plan are found in 30 CFR 884.13.

Additional information may be found under corresponding sections of the preamble to OSM's AMLR Program Final Rules (43 FR 49932–49940, 1978).

The receipt of the Utah State Plan submission is the first step in the process which will result in the establishment of a comprehensive program for the reclamation of abandoned mine lands in the state of Utah.

By submitting a proposed Plan, Utah has indicated that it wishes to be primarily responsible for the reclamation of abandoned mine lands in that State. If the program is disapproved and the State does not choose to revise the Plan, a Federal AML Program will be implemented and OSM will be primarily responsible for these activities.

The Field Director has determined that the public was provided adequate notice and opportunity to be heard on the Plan and that the record does not reflect any major unresolved controversies. Therefore, a public hearing will not be held.

Representatives of the Field Director's Office will be available to meet Monday through Friday, excluding holidays, between 8:00 a.m. and 4:00 p.m. in the Field Director's Office at the request of members of the public to receive their advice and recommendations concerning the proposed Utah Reclamation Plan and Program.

Persons wishing to meet with representatives of the Field Director's Office during this time period may place such request with Wayne D. Oliver, telephone (505) 766–1486, at the Field Director's Office.

The Department intends to continue to discuss the State's Plan with representatives of the State throughout the review process. All contacts between Departmental personnel and representatives of the State will be conducted in accordance with OSM's guidelines on contracts with States published September 19, 1979 at FR 54444.

The Office of Surface Mining has examined this proposed rulemaking under Section 1(b) of Executive Order No. 12291 (February 17, 1981) and has determined that, based on available quantitative data, it does not constitute a major rule. The reasons underlying this determination are as follows:

1. Approval will not have an effect on costs or prices for consumers, individual industries, Federal, State, or local government agencies or geographic regions; and

2. Approval will not have adverse effects on competition, employment, productivity, innovation or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

This proposed rulemaking has been examined pursuant to the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq*, and the Office of Surface Mining has determined that the rule will not have significant economic effects on a substantial number of small entities. The reasons for this determination is that approval will not have demographic effects, direct costs, information collection and recordkeeping requirements, indirect costs, nonquantifiable cost, competitive effects, enforcement costs or aggregate effects on small entities.

Further, the Office of Surface Mining has determined that the Utah Plan will not have a significant effect on the quality of the human environment because the decision relates only to the policies, procedures and organization of the State's Abandoned Mine Land Reclamation Program. Therefore, under the Department of the Interior Manual DM 5162.3(A) (1), the Assistant Secretary's decision on the Utah Plan is categorically excluded from the National Environmental Policy Act requirements. As a result, no environmental assessment nor environmental impact statement (EIS) has been prepared on this action. It should be noted that a programmatic EIS was prepared by OSM in conjunction with the implementation of Title IV. Moreover, an environmental analysis or an EIS will be prepared for the approval of grants for the abandoned mine reclamation projects under 30 CFR Part 886.

The Utah Reclamation Plan for Abandoned Mine Reclamation can be approved if:

1. The Assistant Secretary finds that the public has been given adequate notice and opportunity to comment, and the record does not reflect major unresolved controversies.

2. Views of other Federal agencies have been solicited and considered.

3. The State has the legal authority, policies and administrative structure to carry out the Plan.

4. The Plan meets all requirements of the OSM, AMLR Program Provisions.

5. The State has an approved Regulatory Program.

6. It is determined that the Plan is in compliance with all applicable State and Federal laws and regulations.

The following constitutes a summary of the contents of the Utah Reclamation Plan submission: The State of Utah Natural Resources and Energy, Division of Oil, Gas and Mining has been designated by the Governor of the State to implement and enforce the Abandoned Mine Reclamation Program in accordance with SMCRA. The Department has developed State regulations to carry out the State mandate. Contents of the State Plan submission include:

(a) Designation of authorized State Agency to administer the Program;

(b) State's chief legal officer's opinion on the authority of the designated agency to conduct the program in accordance with Title IV of the SMCRA;

(c) Description of the policies and procedures to be followed in conducting the Program including:

(1) Goals and objectives;

(2) Project ranking and selection procedures;

(3) Coordination with other reclamation projects;

(4) Land acquisition, management and disposal;

(5) Reclamation on private land;

(6) Rights of entry; and

(7) Public participation in the Program.

(d) Description of the administrative and management structure to be used in the Program including:

(1) Description of the organization of the designated agency and its relationship to other organizations that will participate in the Program;

(2) Personnel staffing policies;

(3) Purchasing and procurement systems and policies; and

(4) Description of the accounting system including specific procedures for operation of the reclamation fund;

(e) Description of the public's participation in the preparation of the Plan;

(f) A general description of activities to be conducted under the Plan including:

(1) Known or suspected eligible lands and water requiring reclamation, including a map;

(2) General description of the problems identified and how the Plan proposes to deal with them;

(3) General description of how the lands to be reclaimed and proposed reclamation relate to the surrounding lands and land uses;

(4) A table summarizing the quantities of land and water affected and an estimate of the quantities to be reclaimed during each year covered by the Plan;

(5) General description of the social, economic, and environmental conditions in the different geographic areas where reclamation is planned, including:

(i) The economic base;

(ii) Sociologic and demographic characteristics;

(iii) Significant aesthetic, historic or cultural, and recreational values;

(iv) Hydrology, including water quality and quantity problems associated with past mining;

(v) Flora and fauna, including endangered and threatened species and their habits;

(vi) Underlying or adjacent coal beds and other minerals and projected methods of extraction; and

(vii) Anticipated benefits from reclamation.

BILLING CODE 4310-05-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 123

[W-7-FRL 2320-6]

Kansas Department of Health and Environment Underground Injection Control Primacy Application

AGENCY: Environmental Protection Agency.

ACTION: Notice of Public Comment Period and of Public Hearing.

SUMMARY: The purpose of this notice is to announce that: (1) The Environmental Protection Agency (EPA) has received a complete application from the Kansas Department of Health and Environment requesting primary enforcement responsibility for the Underground Injection Control (UIC) Program; (2) the application is now available for inspection and copying; (3) public comments are requested; and (4) a public hearing will be held.

The proposed comment period will provide EPA the breadth of information and public opinion necessary to approve, disapprove or approve in part and disapprove in part the application of the Kansas Department of Health and Environment to regulate Classes I, III, IV, and V injection wells.

DATES: Requests to present oral testimony should be filed by April 11, 1983. The public hearing will be held on April 18, 1983, beginning at 9:00 a.m. and ending at 5:00 p.m. Written comments must be received by April 22, 1983. Should EPA not receive sufficient comments or requests to present oral testimony by April 11, 1983, the Agency reserves the right to cancel the Public Hearing.

ADDRESSES: Comments and/or requests to testify should be mailed to William Pedicino, Ground Water Section, Environmental Protection Agency, Region VII, 324 East 11th Street, Kansas City, Missouri 64106. Copies of the application and pertinent materials are available between 8:00 a.m. and 4:00 p.m., Monday through Friday, at the following locations:

Environmental Protection Agency, Region VII, Room 1320, 324 East 11th Street, Kansas City, Missouri 64106, PH: (816) 374-6515.

Kansas Department of Health and Environment, 202 Century Plaza Building, 111 West Douglas, Wichita, Kansas 67202, PH: (316) 265-3181.

Kansas Department of Health and Environment, Forbes Field, Topeka, Kansas 66620, PH: (913) 862-9360.

The Hearing will be held at the Topeka-Shawnee County Health Department, 1615 West 8th Street, Topeka, Kansas.

FOR FURTHER INFORMATION CONTACT: William Pedicino, Ground Water Section, Environmental Protection Agency, Region VII, 324 East 11th Street, Kansas City, Missouri 64106, (816) 374-6514. Comments should be sent to this address.

SUPPLEMENTARY INFORMATION: This application from the Kansas Department of Health and Environment is for the regulation of Class I, III, IV, and V injection wells.

The Underground Injection Control (UIC) program seeks to protect as "underground sources of drinking water" (USDWs) all aquifers capable of yielding a significant amount of water containing less than 10,000 milligrams per liter of total dissolved solids. If this application from Kansas is approved, the State would protect underground sources of drinking water from endangerment by the following kinds of injection practices:

Class I—wells which are used to inject municipal and industrial wastes (including hazardous wastes) below the deepest USDW in the area.

Class III—wells which are used to inject for the extraction of minerals.

Class IV—wells which are used to inject hazardous wastes into or above USDWs.

Class V—all other wells.

At present, Kansas has 57 known Class I wells, 394 Class III wells under 5 area permits, no identified Class IV wells, and approximately 672 Class V wells.

Class I and III wells would require a permit to operate. The permit would apply a number of technical requirements designed to assure that the injection did not result in native or injected fluids reaching USDWs. Such requirements include criteria for siting, construction, testing, operation, monitoring and abandonment.

Class IV wells will be prohibited. Class V wells will be studied to assess what further regulatory measures may be required.

The Safe Drinking Water Act requires EPA to determine whether the proposed State program meets the requirements of regulations issued at 40 CFR Parts 122, 123, 124, and 146. Should this application be disapproved, the Act requires EPA to prescribe the UIC program for the State.

This application includes a description of the State Underground Injection Control program, copies of all applicable regulations and forms, a statement of legal authority, and the memorandum of agreement between the Kansas Department of Health and Environment and the Region VII office of the Environmental Protection Agency.

The terms listed below comprise a complete listing of the thesaurus terms associated with 40 CFR Part 123 which sets forth the requirements for a State requesting the authority to operate its own permit program of which the Underground Injection Control program is a part; and may not all apply to this particular notice:

List of Subjects in 40 CFR Part 123

Hazardous materials, Indians—lands, Reporting and recordkeeping, Waste treatment and disposal, Water pollution control, Water supply, Intergovernmental relations, Penalties, Confidential business information.

Dated: March 4, 1983.

Rebecca W. Hanmer,

Assistant Administrator for Water.

BILLING CODE 6560-50-M

DEPARTMENT OF TRANSPORTATION

Research and Special Programs Administration

49 CFR Part 192

[Docket No. PS-82; Notice 2]

Transportation of Natural and Other Gas by Pipeline; Leakage Surveys

AGENCY: Materials Transportation Bureau (MTB)

ACTION: Withdrawal of proposed rulemaking.

SUMMARY: More rigid standards were proposed for the frequency and location of leakage surveys to reduce the risk of damage from gas pipeline leaks outside business districts. Also, specific procedures were proposed for conducting leakage surveys on petroleum gas systems. Subsequent review shows that because of the normally short time between the occurrence of leaks and ensuing accidents, the proposed more frequent surveys would not be cost effective in reducing risk. Similarly, the benefits of the proposed petroleum gas procedures are indefinite. As a consequence, the proposed standards are withdrawn.

FOR FURTHER INFORMATION CONTACT: L. M. Furrow, (202) 426–2392.

SUPPLEMENTARY INFORMATION: Part 192 now contains standards for the frequency and location of leakage surveys, but does not specify how the surveys are to be conducted. Section 192.723(b) provides that any portion of a gas distribution system that is located in a "business district" must be surveyed for leaks with gas detector equipment at least once each calendar year. For the remainder of the system, a survey (with or without detector equipment) must be conducted as frequently as necessary, but intervals may not exceed 5 years. On transmission lines, leakage surveys must be conducted as provided by § 192.706(b) once each calendar year. If the transmission line transports unodorized gas, more frequent surveys with gas detector equipment are required when the line crosses certain populated areas.

In Notice 1 (44 FR 72201, December 13, 1979), MTB proposed to amend the existing frequency requirements for leakage surveys so that more stringent standards (more frequent surveys with detection equipment) would apply in three so-called "high risk" areas and in "Class 3" areas as defined by § 192.5(d). The "high risk" areas were described as: (1) Populated areas designated "Class 4" by § 192.5(e), (2) areas where buildings with 20 or more occupants during normal use are located within 100 yards of the pipeline, and (3) paved areas that are susceptible to gas migration. More stringent standards were proposed in the belief that "the hazards associated with gas pipeline leaks * * * would be substantially reduced if leakage surveys were carried out at frequent intervals and with appropriate leak detection equipment." Specific procedures for leakage surveys on petroleum gas systems were proposed in the belief that some operators failed to consider the high density of petroleum gas when conducting leakage surveys on these systems.

After reviewing the numerous comments received on the notice, MTB is persuaded that more stringent frequency requirements, as proposed, would not yield sufficient public benefits to offset the substantial costs ($25 million) of compliance. For potential benefits, in terms of reduced deaths, injuries, and property damage, to offset the high costs, the proposed requirements would have to significantly reduce the expected number of accidents attributable to gas pipeline leaks in the "high risk" and Class 3 areas. To be effective in reducing accidents, it is logical that surveys would have to be conducted frequently enough to detect leaks before accidents occur.

In this regard, most commenters pointed out that in their experience the bulk of gas pipeline accidents result from system failures of recent origin, with time between leak and accident being no more than hours or at most a few days. This result is to be expected when considering sudden failures due to outside force impact, as from excavation equipment. It was substantiated for other accident causes by a study of National Transportation Safety Board accident reports submitted by two commenters, the American Gas Association and the Southern California Gas Company. In 20 of 22 accidents investigated between 1969 and 1979 and caused by underground leakage of natural gas (due to corrosion, settlement, soil stress, and other factors), a fire or explosion occurred very shortly (hours or minutes) after leakage began. In these cases, it is very unlikely that more frequent surveys would have prevented the accidents. For the two accidents with longer periods (months) between the onset of leakage and the occurence of a fire or explosion, due to the even longer time between surveys (1 or 2 years), there is still only a small probability that the proposed standards would have prevented the accidents.

To supplement this study, the gas company also submitted an analysis of the reportable incidents on its system for the years 1974–1979 to determine those incidents that might have been detected by the more frequent surveys proposed in Notice 1, and the results were projected nationwide. The analysis showed that about a 17 percent increase in early detection of accident-causing leaks could be achieved. Translating this increment into savings, however, showed potential benefits nationwide of less than $3 million a year, far less than the projected costs.

Similarly, commenters emphasized that more benefit data are needed to justify imposing the specific survey procedures on petroleum gas systems. Also, various provisions of the propsed procedures were controversial from a technical viewpoint.

In summary, there appears to be little likelihood that the proposed increase in the frequency of leakage surveys would have a positive effect on accident reduction large enough to offset the costs of compliance. Likewise, the currently available information does not show the proposed petroleum gas procedures to be cost beneficial. Therfore, Notice 1 is hereby withdrawn. MTB will not consider making any other changes to the existing leakage survey rules until persuasive cost/benefit data become available.

(49 U.S.C. 1672, 49 CFR 1.53, Appendix A of Part 1, and Appendix A of Part 106)

Issued in Washington, D.C., on March 8, 1983.

Richard L. Beam,

Associate Director for Pipeline Safety Regulation, Materials Transportation Bureau.

DEPARTMENT OF AGRICULTURE

Office of the Secretary

Subcommittee on Human Nutrition; Meeting

In accordance with the Federal Advisory Committee Act Pub. L. 92–463, the U.S. Department of Agriculture announces the following meeting:

Name: Subcommittee for Human Nutrition of the Technical Advisory Committee for Science and Education Research Grants Program.

Date and Time: April 25, 26, and 27, 1983, Monday—9:00 a.m. to 5:30 p.m., Tuesday—9:00 a.m. to 5:30 p.m.; Wednesday—9:00 a.m. to 5:30 p.m.

Place: Department of Agriculture, 1300 Wilson Boulevard, Suite 103, Rosslyn, Virginia.

Type of Meeting: Closed.

Contact Person: Ritva R. Butrum, Associate Program Manager, Human Nutrition Program, U.S. Department of Agriculture, 1300 Wilson Boulevard, Suite 103, Rosslyn, Virginia 22209, Telephone: (703) 235–2646.

Purpose of Subcommittee: To provide advice and recommendation concerning support for research in the Human Nutrition Program.

Agenda: To review and evaluate research proposals and projects as part of the selection process for awards.

Reason for Closing: The proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries, and personal information concerning individuals associated with the proposals. These matters are within exemptions (4) and (6) of 5 U.S.C. 552b(c), the Government in the Sunshine Act.

Authority to Close Meeting: This determination was made by the Secretary of Agriculture pursuant to provisions of Section 10(d) of Pub. L. 92–463.

Orville G. Bentley,
Assistant Secretary, Science and Education.

CIVIL AERONAUTICS BOARD

[Order 83–3–54]

Fitness Determination of Alaska Aeronautical Industries, Inc.

AGENCY: Civil Aeronautics Board.

ACTION: Notice of order to show cause (Order 83–3–54).

SUMMARY: The Board proposes to issue a certificate under section 401 of the Act to Alaska Aeronautical Industries, Inc., to provide scheduled interstate and overseas air transportation of persons, property, and mail between all points in the United States, its territories and possessions, except for intra-Alaska and intra-Hawaii all-cargo service. The complete text of this order is available, as noted below.

DATES: Responses: All interested persons wishing to respond to the Board's issuance of the proposed certificate shall file, and serve upon all persons listed below no later than March 30, 1983, a statement of objections together with a summary of the testimony, statistical data, and other material relied upon to support the objections.

ADDRESSES: Responses or additional data should be filed in Docket 41045 and addressed to the Docket Section, Civil Aeronautics Board, Washington, D.C. 20428, and with all persons listed in Attachment B to the order.

FOR FURTHER INFORMATION CONTACT: Mr. Nicholas Lowry, Bureau of Domestic Aviation, Civil Aeronautics Board, 1825 Connecticut Avenue, NW., Washington, D.C. 20428; (202) 673–5345.

SUPPLEMENTARY INFORMATION: The complete text of Order 83–3–54 is available from the Distribution Section, Room 100, 1825 Connecticut Avenue, NW., Washington, D.C. 20428. Persons outside the metropolitan area may send a postcard request for Order 83–3–54 to that address.

By the Civil Aeronautics Board: March 9, 1983.

Phyllis T. Kaylor,
Secretary.

DEPARTMENT OF COMMERCE

Agency Forms Under Review by the Office of Management and Budget (OMB)

DOC has submitted to OMB for clearance the following proposals for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: International Trade Administration.

Title: Export Trading Company Contact Facilitation Program.

Form Numbers: OMB—None; Agency—ITA—4094P.

Type of Request: New.

Burden: 2,250 respondents; 563 reporting hours.

Needs and Uses: With the passage of the Export Trading Act of 1982, the Administration initiated a high priority program to quickly begin the certification process for Export Trading Companies and to provide related contact facilitation services. The information collected on the requested Contact Facilitation Program form will be used to register in and search a database of organizations interested in finding and using the services of an export trading company.

Affected Public: Service organizations, banks, and manufacturers.

Frequency: On occasion.

Respondent's Obligation: Voluntary. Required to obtain or retain benefit.

OMB Desk Officer: Ken Allen 395–3785.

Agency: International Trade Administration.

Title: Recordkeeping Requirements Contained in Export Administration Regulations (EARs) 15 CFR Part 368 through 399.

Form Numbers: OMC—0625–0104; Agency—N/A.

Type of Request: Extension.

Burden: 905,256 respondents; 241,830 recordkeeping hours.

Needs and Uses: This recordkeeping is required in order to prevent violations under the Export Administration Act of 1972.

Affected Public: Commercial exporters.

Frequency: As required in applicable EAR.

Respondent's Obligation: Required to obtain or retain benefit.

OMB Desk Officer: Ken Allen, 395–3785.

Agency: International Trade Administration.

Title: Application for the President's "E" and "E Star" Awards for Export Expansion.

Form Number: OMB—0625–0065; Agency—ITA—476P.

Type of Request: Extension.

Burden: 100 respondents; 2,000 reporting hours.

Needs and Uses: Executive Order 10978 issued on December 5, 1961 authorizes the establishment of an award program for significant contributions to the export expansion program. The Executive Order authorizes the Secretary of Commerce, with others, to establish procedures for nominations. The application form is the vehicle used to evaluate candidates.

Affected Public: Any person, firm or organization that contributes significantly in the effort to increase U.S. exports.

Frequency: On occasion.

Respondent's Obligation: Voluntary. Required to obtain or retain benefit.

OMB Desk Officer: Ken Allen, 395–3785.

Agency: International Trade Administration.

Title: Information on Articles for Physically or Mentally Handicapped Persons Imported Free of Duty Under Pub. L. 97–446.

Form Numbers: OMB—None; Agency—ITA—362P.

Type of Request: New.

Burden: 5,000 respondents; 1,000 reporting hours.

Needs and Uses: Data will be used to assess possible injury to domestic manufacturers of articles for the handicapped. Assessment will form basis for advice to the President on whether to invoke safeguards in the law limiting U.S. obligations to the strict terms of the treaty.

Affected Public: Handicapped individuals and organizations (both commercial and nonprofit) serving their needs.

Frequency: On occasion.

Respondent's Obligation: Voluntary. Required to obtain or retain benefit.

OMB Desk Officer: Ken Allen, 395–3785.

Agency: International Trade Administration.

Title: Small Business Export Development Assistance Program (SBEDAP) (Quarterly and Final Reports).

Form Numbers: OMB—None; Agency—ITA—4096P.

Type of Request: New.

Burden: 16 respondents; 208 reporting hours.

Needs and Uses: The information to be collected will be used to evaluate program achievements by organizations receiving SBEDAP grants, and to make recommendations to Congress concerning continuation and/or expansion of the program.

Affected Public: State and local government agencies, state universities, small businesses.

Frequency: Quarterly, Other (final report).

Respondent's Obligation: Required to obtain or retain benefit.

OMB Desk Officer: Ken Allen, 395–3785.

Agency: National Oceanic and Atmospheric Administration.

Title: Financial Reports.

Form Numbers: OMB—0648–0102; Form used by Agency—SF 269 and SF 270.

Type of Request: Extension.

Burden: 60 respondents; 300 reporting hours.

Needs and Uses: The Grant-in-Aid for Fisheries program (authorized by Pub. L. 88–309 and Pub. L. 89–304) awards grants to states and non-federal entities for research, conservation, and development of the Nation's fishery resources. Financial status reports of grant expenditures are required annually of grantees. In addition, they submit requests for reimbursements periodically.

Affected Public: All state and territorial fishery agencies, some Indian tribes, universities and interstate commissions.

Frequency: On occasion, Annually.

Respondent's Obligation: Required to obtain or retain benefit.

OMB Desk Officer: Ken Allen, 395–3785.

Agency: National Oceanic and Atmospheric Administration.

Title: Permit/Letters of Agreement Reports.

Form Numbers: OMB—0648–0085; Agency—N/A.

Type of Request: Extension.

Burden: 300 respondents; 900 reporting hours.

Needs and Uses: Section 104(c) of the Marine Mammal Protection Act of 1972 requires that permit holders furnish a report for all activities carried out under permit. The information is used to evaluate compliance with the permit and evaluating applications for permits.

Affected Public: Zoos, aquariums, and researchers.

Frequency: On occasion, Annually.

Respondent's Obligation: Mandatory.

OMB Desk Officer: Ken Allen, 395–3785.

Agency: National Oceanic and Atmosperhic Administration.
Title: Marine Mammal Mortality Reports.
Form Numbers: OMB—0648–0009; Agency—N/A.
Type of Request: Extension.
Burden: 150 respondents; 563 reporting hours.
Needs and Uses: Federal regulations require submission of reports whenever marine mammals are taken during commercial fishing operations. Reports are deemed necessary to monitor the status of populations as required by the Marine Mammal Protection Act.
Affected Public: Commercial fishermen.
Frequency: On occasion.
Respondent's Obligation: Required to obtain or retain benefit.
OMB Desk Officer: Ken Allen, 395–3785.

Agency: National Oceanic and Atmospheric Administration.
Title: Subsequent Purchaser Reports.
Form Numbers: OMB—0648–0079; Agency—N/A.
Type of Request: Extension.
Burden: 150 respondents; 150 reporting hours.
Needs and Uses: The information collected is for the purpose of granting members of the public a privilege to engage in certain trade involving species and wildlife that would otherwise be prohibited under the Endangered Species Act.
Affected Public: Retail stores.
Frequency: On occasion.
Respondent's Obligation: Required to obtain or retain benefit, Mandatory.
OMB Desk Officer: Ken Allen, 395–3785.

Agency: National Oceanic and Atmospheric Administration.
Title: Scientific Research/Public Display Permit Application.
Form Numbers: OMB—0648–0084; Agency—N/A.
Type of Request: Extension.
Burden: 75 respondents; 2,200 reporting hours.
Needs and Uses: Provides information for determining whether or not to issue scientific research and public display permits under the authority of the Marine Mammal Protection Act, Endangered Species Act, and Fur Seal Act.
Affected Public: Zoos, aquariums, researchers.
Frequency: On occasion.
Respondent's Obligation: Required to obtain or retain benefit.
OMB Desk Officer: Ken Allen, 395–3785.

Copies of the above information collection proposals can be obtained by calling or writing DOC Clearance Officer, Edward Michals (202) 377–4217, Department of Commerce, Room 6622, 14th and Constitution Avenue NW., Washington, D.C. 20230.

Written comments and recommendations for the proposed information collections should be sent to Ken Allen, OMB Desk Officer, Room 3235, New Executive Office Building, Washington, D.C. 20503.

Edward Michals,
Departmental Clearance Officer.

BILLING CODE 3510-CW-M

Foreign-Trade Zones Board

[Docket No. 4–83]

Proposed Foreign-Trade Zone; Onondaga County, New York (Syracuse Port of Entry); Application and Public Hearing

Notice is hereby given that an application has been submitted to the Foreign-Trade Zones Board (the Board) by the County of Onondaga, New York, requesting authority to establish a general-purpose foreign-trade zone in the Town of Clay, Onondaga County, adjacent to the Syracuse Customs port of entry. The application was submitted pursuant to the provisions of the Foreign-Trade Zones Act, as amended (19 U.S.C. 81a–81u), and the regulations of the Board (15 CFR Part 400). It was formally filed on March 7, 1983. The applicant is authorized to make this proposal under County Law Section 224 (Subd. 23) of McKinney's Consolidated Laws of New York.

The proposed zone will cover 21 acres within the 1,300-acre Woodward Industrial Park on Steelway Boulevard, in the Town of Clay, some 5 miles from the Syracuse-Hancock International Airport. An existing 64,000 square foot warehouse is available for initial general-purpose zone operations. The property is owned by the Paul-Jeffrey Company, Inc., a distribution and warehousing service, which has been designated the zone operator. The zone project will be administered on behalf of the applicant by the Greater Syracuse Foreign Trade Zone, Ltd., a non-profit corporation affiliated with the Greater Syracuse Chamber of Commerce.

The application contains evidence of the need for zone services in the greater Syracuse area. A number of prospective tenants have indicated an interest in using the zone for warehousing, consolidation, packaging, manipulation and manufacturing of commercial laundry and dry cleaning equipment, compressors, filtration products, automobile lighting and safety equipment, electrical and electronic products, medical instruments, china, frozen food and wooden toys. Specific manufacturing approvals are not being sought at this time, requests to be made to the Board on a case-by-case basis.

In accordance with the Board's regulations, an examiners committee has been appointed to investigate the application and report to the Board. The committee consists of: John J. Da Ponte, Jr. (Chairman), Director, Foreign-Trade Zones Staff, U.S. Department of Commerce, Washington, D.C. 20230; Edward A. Goggin, Assistant Regional Commissioner, U.S. Customs Service, Northeast Region, 100 Summer Street, Boston, Massachusetts 02110; and Colonel Robert B. Hardiman, District Engineer, U.S. Army Engineer District Buffalo, 1776 Niagara Street, Buffalo, New York 14207.

As part of its investigation, the examiners committee will hold a public hearing on April 6, 1983, beginning at 9:00 a.m., in Room 1023 of the James M. Hanley Federal Building, 100 Clinton St., Syracuse, N.Y. The purpose of the hearing is to help inform interested persons about the proposal, to provide an opportunity for their expression of views, and to obtain information useful to the examiners.

Interested parties are invited to present their views at the hearing. They should notify the Board's Executive Secretary of their desire to be heard in writing at the address below or by phone (202/377–2862) by April 1. Instead of an oral presentation, written statements may be submitted in accordance with the Board's regulations to the examiners committee, care of the Executive Secretary at any time from the date of this notice through May 6, 1983. Evidence submitted during the post-hearing period is not desired unless it is clearly shown that the matter is new and material and that there are good reasons why it could not be presented at the hearing. A copy of the application and accompanying exhibits will be available during this time for public inspection at each of the following locations:

Port Director's Office, U.S. Customs Service, Federal Building, Room 1219, 100 South Clinton Street, Syracuse, New York 13260

Office of the Executive Secretary, Foreign-Trade Zones Board, U.S. Department of Commerce, Room 1872, 14th and Constitution, NW., Washington, D.C. 20230

Dated: March 8, 1983.

John J. Da Ponte, Jr.,
Executive Secretary.

BILLING CODE 3510-25-M

[Docket No. 5–83]

Proposed Foreign-Trade Zone, Newport, Vermont; Application and Public Hearing

Notice is hereby given that an application has been submitted to the Foreign-Trade Zones Board (the Board) by the Orleans County Development Corporation (OCDC), a Vermont non-profit development corporation, requesting authority to establish a general-purpose foreign-trade zone in Newport, Vermont, adjacent to the Derby Line Customs port of entry. The application was submitted pursuant to the provisions of the Foreign-Trade Zones Act, as amended (19 U.S.C. 81a–81u), and the regulations of the Board (15 CFR Part 400). It was formally filed on March 7, 1983. The applicant is authorized to make this proposal under Chapter 111, Title 9, Vermont Statutes Annotated.

The proposed foreign-trade zone covers 16 acres within the 22-acre Newport Industrial Park on Prouty Drive in Newport. OCDC owns the property and has plans to construct a 10,000 square foot building for general-purpose zone use. Open space is available for prospective users to construct their own facilities. The Northeastern Vermont Development Association, a regional planning commission, has been designated to market and operate the zone project.

The application contains evidence of the need for zone services in the northeast Vermont area. Several firms have indicated an interest in using the zone for warehousing, distribution, manipulation, and manufacture. The products involved at the outset will be cosmetics, sports apparel, and cutting tools. Specific manufacturing approvals are not being sought at this time, requests to be made to the Board on a case-by-case basis.

In accordance with the Board's regulations, an examiners committee has been appointed to investigate the application and report to the Board. The committee consists of: John J. Da Ponte, Jr. (Chairman), Director, Foreign-Trade Zones Staff, U.S. Department of Commerce, Washington, D.C. 20230; Edward A. Goggin, Assistant Regional Commissioner, U.S. Customs Service, Northeast Region, 100 Summer Street, Boston, Massachusetts 02110; and Colonel Walter M. Smith, Jr., District Engineer, U.S. Army Engineer District New York, 26 Federal Plaza, New York, N.Y. 10278.

As part of its investigation, the examiners committee will hold a public hearing on April 7, 1983, beginning at 2:00 p.m., in the Council Room of the Municipal Building, 2nd Floor, Newport, Vermont. The purpose of the hearing is to help inform interested persons about the proposal, to provide an opportunity for their expression of views, and to obtain information useful to the examiners.

Interested parties are invited to present their views at the hearing. They should notify the Board's Executive Secretary of their desire to be heard in writing at the address below or by phone (202/377–2862) by April 1, 1983. Instead of an oral presentation, written statements may be submitted in accordance with the Board's regulations to the examiners committee, care of the Executive Secretary, at any time from the date of this notice through May 7, 1983. Evidence submitted during the post-hearing period is not desired unless it is clearly shown that the matter is new and material and that there are good reasons why it could not be presented at the hearing. A copy of the application and accompanying exhibits will be available during this time for public inspection at each of the following locations:

Port Director's Office, U.S. Customs Service, Interstate 91, P.O. Box 476, Derby Line, Vermont 05830

Office of the Executive Secretary, Foreign-Trade Zones Board, U.S. Department of Commerce, Room 1672, 14th and Constitution, NW., Washington, D.C. 20230

Dated: March 8, 1983.

John J. Da Ponte, Jr.,
Executive Secretary.

Amendments

A0704.06aUSAREC

System name:

Recruiting Prospect Card Files

Changes:

System Identification:

Delete "aUSAREC"; substitute therefor: "DAPE."

System name:

Change to read: "Army Recruiting Prospect System."

System location:

Delete entry; substitute therefor: "Army recruiting stations, Area and District Recruiting Commands; addresses may be obtained from the Commander, US Army Recruiting Command, Ft. Sheridan, IL. Enlistment inquiries generated by public advertising and follow-up data are maintained by Army contractor—Market Compilation and Research Bureau, Inc."

Categories of individuals covered by the system:

Delete entry; substitute therefor: "Prospects for Army enlistment, individuals who have asked to be excluded from Army promotional mailing, and third parties who refer names of prospects to recruiters."

Categories of records in the system:

Delete entry; substitute therefor: "Name, SSN, home address and telephone number, schools attended, arrest record, names and addresses of parents/spouse of prospective enlistee. On acceptance, applicant's record includes information furnished by the Military Enlistment Processing Command reflecting examination results."

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

Delete entries; substitute the following: "By the Department of the Army: (1) To review an individual's potential for enlisting, (2) to obtain school quotas for potential enlistee's skills/educational/assignment preferences and objectives; (3) to monitor recruiter performance; (4) for personnel management, statistical, and historical reports."

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Delete entry; substitute therefor: "Paper records, cards, magnetic tapes, minidiskettes/disks."

Retrievability:

Delete entry; substitute therefor: "By name or SSN of the prospective enlistee, inquirer, recruiter, or third party referring agent."

Safeguards:

Delete entry; substitute therefor: "Information in this system is maintained in locked storage areas available only to designated individuals having need therefor in the performance of official duties. Personel information on prospects which is entered into the Joint Optical Information Network—a stand-alone data processor—restricts access to specially assigned recruiter ID/program codes. Administrative, physical and technical safeguards employed by the Recruiting Command and its contractor are commensurate with the sensitivity of personal data to ensure preservation of integrity and to preclude unauthorized use/disclosure."

Retention:

Delete entry; substitute therefor: "Information furnished by a prospective enlistee is retained until 3 months following end of enlistee's initial term of service, after which it is destroyed or erased; information concerning individuals who provide names of prospects is retained until no longer needed; information on prospects not enlisted is destroyed/erased at the end of each calendar year."

System manager(s) and address:

Delete entry; substitute therefor: "The Deputy Chief of Staff for Personnel, Headquarters, Department of the Army (DAPE–MPA), the Pentagon, Washington, DC 20310."

Notification procedures:

Delete entry; substitute the following: "Individuals wishing to inquire whether this system contains informatin about them should write to the commander of the recruiting station to which information was provided, or to the Commander, US Army Recruiting Command, Ft. Sheridan, IL 60037. Individual must provide full name, SSN, details that will assist in locating the records, and signature."

Record access procedures:

Delete entry; substitute therefor: "Individuals seeking access to information from this system should furnish information in "Notification procedure" above.

Record source categories:

Delete entry; substitute therefor: "From the individual, high school officials/yearbooks/directories, law enforcement agencies, third parties who provide prospect leads, relevant Army records/reports."

A0710.10DAAG

System name:

Reserve Personnel Information Reporting System

Changes:

System Identification:

Delete "&710.10DAAG"; substitute: "715.07bDAPE."

System Name:

Delete entry; add: "Standard Installation/Division Personnel System—US Army Reserves (SIDPERS-USAR)."

System location:

Delete entry beginning "Decentralized Segments * * * area." Change second paragraph to read: "US Army Reserve Components Personnel and Administration Center, 9700 Page Boulevard, St. Louis, MO 63132."

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

Delete entries; substitute the following: "Used by the Army to accomplish promotions, demotions, transfers, and other personnel actions essential to unit readiness; to identify and fulfill training needs; and to render strength accounting, budgetary, manpower requirements, and other statistical reports. This system interfaces with other automated systems which impact on the personnel management responsibilities of supported commanders."

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Safeguards:

Change entry to read: "Tape files are stored in reel number sequence in a library within a restricted computer room complex having controlled entry. The computer room is restricted to authorized personnel and controlled by security guards. Access to on-line data is controlled within the US Army Reserve Components Personnel and Administration Center (RCPAC) by ENVIRON/1, a product of CINCOM Systems, Inc., via a six position alpha-numeric password. This password controls on-line sub-systems to which user has access. Once access to the sub-system has been gained, a further four position alphanumeric access code is required which determines the specific application which the user may access; second access codes are maintained by the RCPAC Project Management Officer and controlled by designated Major Army Command Headquarters which are on-line to the centralized data base at RCPAC through hard wired terminals. Currently, these are US Forces Command and the First, Fifth, and Sixth US Armies. By end-1984, US Army Western Command and US Army Europe will be added to the system. Users do not have on-line update capability."

Retention and disposal:

Delete entries; substitute therefor: "Information is retained for the duraton of reservist's unit assignment. The current and two previous tape files are retained."

Contesting record procedures:

Delete entry; substitute therefor: "The Army's rules for access to records and for contesting contents and appealing initial determinations are contained in Army Regulation 340–21 (32 CFR Part 505)."

Record source categories:

Change entry to read: "From individual Reservist, Army records and reports."

A1010.07dDAMO

System name:

Biographic Files.

Changes:

Systen name:

Change title to read: "Biographies: USAWC Guests."

System location:

Delete entry; substitute therefor: "US Army War College, Carlisle Barracks, PA 17013."

Categories of individuals covered by the system:

Delete entry; substitute therefor: "Persons under consideration to lecture at the US Army War College (USAWC) or to attend the National Security Seminar as guests."

Categories of records in the system:

Delete entry; substitute the following: "Name, current position, title, address, phone number; date/place of birth; biographical data consisting of education, positions held, awards, honors, etc; information from public sources relevant to the individual or to his/her achievements."

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

Delete entries; substitute therefor: "By the Department of the Army as a basis for selecting guest speakers, guest instructors, and annual National Security Seminar guest attendees."

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Add: "magnetic tape/disk."

Safeguards:

Change to read: "Information is stored in secured buildings; access is restricted to designated individuals having official need therefor. Automated data are further protected by assigned passwords changed periodically to preclude unauthorized use."

Retention and disposal:

Delete entry; substitute therefor: "Biographical data are permanent; hard copy records are retained at USAWC for 5 years, after which they are transferred to the Military History Institute, Carlisle Barracks, PA; other data are destroyed when no longer required for reference."

System manager(s) and address:

Delete entry; substitute therefor: "Chief of Staff, US Army War College, Carlisle Barracks, PA 17013."

Notification procedure:

Delete entry; substitute therefor: "Individuals desiring to know whether or not this system contains information on them may inquire of the Secretary, US Army War College, Carlisle Barracks, PA 17013. Individuals should provide their name, address, details that will facilitate locating the record, and signature."

Record access procedures:

Delete entry; substitute therefor: "Individuals should address requests as in "Notification procedure," furnishing information specified therein."

Prospects for Army enlistment, individuals who have asked to be excluded from Army promotional mailing, and third parties who refer names of prospects to recruiters.

CATEGORIES OF RECORDS IN THE SYSTEM:

Name, SSN, home address and telephone number, schools attended, arrest record, names and addresses of parents/spouse of prospective enlistee. On acceptance, applicant's record includes information furnished by the Military Enlistment Processing Command reflecting examination results.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

10 U.S.C. 503, 504, 510, and 3012.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

By the Department of the Army: (1) To review an individual's potential for enlisting, (2) to obtain school quotas for potential enlistee's skills/educational/assignment preferences and objectives; (3) to monitor recruiter performance; (4) for personnel management, statistical, and historical reports.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper records, cards, magnetic tapes, minidiskettes/disks.

RETRIEVABILITY:

By name of SSN of the prospective enlistee, inquirer, recruiter, or third party referring agent.

SAFEGUARDS:

Information in this system is maintained in locked storage areas available only to designated individuals having need therefor in the performance of official duties. Personal information on prospects which is entered into the Joint Optical Information Network—a stand-alone data processor—restricts access to specially assigned recruiter ID/program codes. Administrative, physical and technical safeguards employed by the Recruiting Command and its contractor are commensurate with the sensitivity of personal data to ensure preservation of integrity and to preclude unauthorized use/disclosure.

RETENTION:

Information furnished by a prospective enlistee is retained until 3 months following end of enlistee's initial term of service, after which it is destroyed or erased; information concerning individuals who provide names of prospects is retained until no longer needed; information on prospects not enlisted is destroyed/erased at the end of each calendar year.

SYSTEM MANAGER(S) AND ADDRESS:

The Deputy Chief of Staff for Personnel, Headquarters, Department of the Army (DAPE–MPA), The Pentagon, Washington, DC 20310.

NOTIFICATION PROCEDURE:

Individuals wishing to inquire whether this system contains information about them should write to the commander of the recruiting station to which information was provided, or to the Commander, US Army Recruiting Command, Ft. Sheridan, IL 60037. Individual must provide full name, SSN, details that will assist in locating the records, and signature.

RECORD ACCESS PROCEDURES:

Individuals seeking access to information from this system should furnish information in "Notification procedures" above.

CONTESTING RECORD PROCEDURES:

The Army's rules for access to records and for contesting contents and appealing initial determinations are contained in Army Regulation 340–21 (32 CFR Part 505).

RECORD SOURCE CATEGORIES:

From the individual, high school officials/yearbooks/directories, law enforcement agencies, third parties who provide prospect leads, relevant Army records/reports.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None.

A0715.07bDAPE

SYSTEM NAME:

Standard Installation/Division Personnel System—US Army Reserve (SIDPERS–USAR).

SYSTEM LOCATION:

US Army Reserve Components Personnel and Administration Center, 9700 Page Boulevard, St. Louis, MO 63132.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

All individuals currently assigned to a US Army Reserve unit.

CATEGORIES OF RECORDS IN THE SYSTEM:

Individual's name, Social Security Account Number, sex, race, civilian occupation, current military assignment, grade/rank, unit identification code, date entered military service, promotion data, security clearance, military obligation expiration date, military qualifications, and other similar relevant data.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

10 U.S.C. 275.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

By the Army to accomplish promotions, demotions, transfer, and other personnel actions essential to unit readiness; to identify and fulfill training needs; and to render strength accounting, budgetary, manpower requirements, and other statistical reports. Information in this system interfaces with other automated systems which impact on the personnel management responsibilities of supported commanders.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Magnetic tapes.

RETRIEVABILITY:

By SSAN and five characters of individual's surname.

SAFEGUARDS:

Tape files are stored in reel number sequence in a library within a restricted computer room complex having controlled entry. The computer room is restricted to authorized personnel and controlled by security guards. Access to on-line data is controlled within RCPAC by ENVIRON/1, a product of CINCOM Systems, Inc., via a six position alphanumeric password. This password controls on-line sub-systems to which user has access. Once access to the sub-system has been gained, a further four position alphanumeric access code is required which determines the specific application which the user may access; second access codes are maintained by the RCPAC Project Management Officer and controlled by designated Major Army Command Headquarters which are on-line to the centralized data base at RCPAC through hard wired terminals. Currently, these are US Forces Command and the First, Fifth, and Sixth US Armies. By end-1984, US Army Western Command and US Army Europe will be added to the system. Users do not have on-line update capability.

RETENTION AND DISPOSAL:

Information is retained for the duration of reservist's unit assignment. The current and two previous tape files are retained at any given time.

SYSTEM MANAGER(S) AND ADDRESS:

Deputy Chief of Staff for Personnel, Headquarters, Department of the Army, The Pentagon, Washington, DC 20310.

NOTIFICATION PROCEDURE:

Individuals wishing to know whether or not this system contains information about them may inquire of the Commander of the Army Headquarters in which the unit is located, furnishing full name, SSAN, and specific information concerning the event or incident that will assist in locating the record.

RECORD ACCESS PROCEDURES:

For access to information in this system, individuals should address an inquiry and furnish information as indicated in "Notification procedure."

CONTESTING RECORD PROCEDURES:

The Army's rules for access to records and for contesting contents and appealing initial determinations are contained in Army Regulation 340–21 (32 CFR Part 505).

RECORD SOURCE CATEGORIES:

From the individual. Army records and reports.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None.

A1010.07dDAMO

SYSTEM NAME:

Biographies: USAWC Guests.

SYSTEM LOCATION:

US Army War College, Carlisle Barracks, PA 17013.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Persons under consideration to lecture at the US Army War College (USAWC) or to attend the National Security Seminar as guests.

CATEGORIES OF RECORDS IN THE SYSTEM:

Name, current position, title, address, phone number; date/place of birth; biographical data consisting of education, positions held, awards, honors, etc; information from public sources relevant to the individual or to his/her achievements.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

10 U.S.C. 3012.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

By the Department of the Army as a basis for selecting guest speakers, guest instructors, and annual National Security Seminar guest attendees.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper records in file folders/notebooks; magnetic tape/disk.

RETRIEVABILITY:

By individual's name.

SAFEGUARDS:

Information is stored in secured buildings; access is restricted to designated individuals having official need therefor. Automated data are further protected by assigned passwords changed periodically to preclude unauthorized use.

RETENTION AND DISPOSAL:

Biographical data are permanent; hard copy records are retained at USAWC for 5 years, after which they are transferred to the Military History Institute, Carisle Barracks, PA; other data are destroy when no longer required for reference.

SYSTEM MANAGER(S) AND ADDRESS:

Chief of Staff, US Army War College, Carlisle Barracks, PA 17013.

NOTIFICATION PROCEDURE:

Individuals desiring to know whether or not this system contains information on them may inquire of the Secretary, US Army War College, Carlisle Barracks, PA 17013. Individuals should provide their name, address, details that will facilitate locating the record, and signature.

RECORD ACCESS PROCEDURES:

Individuals should address requests as in "Notification procedure", furnishing information specified therein.

CONTESTING RECORD PROCEDURES:

The Army's rules for access to records and for contesting contents and appealing initial determinations are contained in Army Regulation 340–21 (32 CFR Part 505).

RECORD SOURCE CATEGORIES:

From the individual, DOD agencies, prior attendees, other academic institutions, newspapers, periodicals, books.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None.

BILLING CODE 3810-01-M

DEPARTMENT OF EDUCATION

National Commission on Excellence in Education; Meeting

AGENCY: National Commission on Excellence in Education.

ACTION: Notice of Closed Meeting.

SUMMARY: This notice is intended to notify the public of a closed meeting held by the National Commission on Excellence in Education. Notice of this meeting is required under Section 10(a)(2) of the Federal Advisory Committee Act.

DATE: March 4, 1983.

LOCATION: Georgetown Inn, 1310 Wisconsin Avenue, NW Lafayette Room, Washington, D.C.

FOR FURTHER INFORMATION CONTACT: Milton Goldberg, Executive Director, or Betty Baten, Administrative Officer (202–254–7920).

The National Commission on Excellence in Education is governed by the provisions of Part D of the General Education Provisions Act (Pub. L. 90–247 as amended; 20 U.S.C. 1233 *et seq.*) and the Federal Advisory Committee Act (Pub. L. 92–463; 5 U.S.C. Appendix I) which set forth standards for the the formation and use of advisory committees. The Commission is established to advise and make recommendations to the nation and to the Secretary of Education.

The National Commission in Education met in closed session on March 4, 1983 to disscuss, review and edit in detail extensive drafts of its Final Report which is to presented to the public and to the Secretary of Education in April, 1983 under a charter issued by the Secretary in August, 1981.

The Commission had planned to assemble on March 4, 1983 in separate work groups to discuss, review and edit in detail drafts of the Final Report. Just prior to that date it was determined that these discussions should be conducted by the full Commission. It was then determined that discussions of this nature might be considered a formal Commission meeting and that such a meeting should be closed because detailed discussion in public session of the contents of an advanced draft of the Final Report would be detrimental. Therefore, approval was sought and received, from appropriate officials of the Department of Education to close the meeting of the Commission under the authority of exemption (9)(B) of Section 552b(c) of 5 U.S.C. and under Section 10(d) of the Federal Advisory Committee Act.

A summary of the activities at the closed session and related matters which are informative to the public consistent with the policy of Title 5 U.S.C. 552b will be available to the public within fourteen days of the meeting at the Commission's office located at 1200 19th Street, NW., Room 222, Monday through Friday, from the hours of 8:00 a.m. to 5:00 p.m.

Dated: March 8, 1983.

Donald J. Senese,

Assistant Secretary for Educational Research and Improvement.

BILLING CODE 4000-01-M

DEPARTMENT OF ENERGY

Voluntary Agreement and Plan of Action To Implement the International Energy Program; Meetings

In accordance with section 252(c)(1)(A)(i) of the Energy Policy and Conservation Act (42 U.S.C. 6272), the following meeting notices are provided:

I. A meeting of the Industry Working Party (IWP) of the International Energy Agency (IEA) will be held on April 5 and 6, 1983, at the offices of Standard Oil Company of California, 575 Market Street, San Francisco, California, beginning at 9:30 a.m. on April 5.

The agenda for the meeting is as follows:

1. The status of activities of the IWP and of the Standing Group on the Oil Market (SOM).
2. Review of the IEA's financial information system.
3. Review of Questionnaire C.
4. Arrangements for future meetings of the SOM and IWP.

II. On March 7, 1983, notice was published of two meetings of the IEA Group of Reporting Companies, to be held at Castelgandolfo, Italy, on March 17 and 18, 1983, and at White Plains, New York, on March 29, 182 (48 FR 9577). Since it does not appear that any participants in the Voluntary Agreement and Plan of Action, or any affiliates of such participants who have been designated pursuant to Paragraph 9(b)(3) of the Voluntary Agreement and Plan of Action will be represented at the March 17–18 meeting at Castelgandolfo, Italy, notice of that meeting hereby is cancelled. The other notice of a meeting of the IEA Group of Reporting Companies at White Plains, New York, on March 29, 1983, remains in effect.

As provided in section 252(c)(1)(A)(ii) of the Energy Policy and Conservation Act, these meetings will not be open to the public.

Issued in Washington, D.C., March 9, 1983.

Samuel M. Bradley,

Deputy Assistant General Counsel, International Trade and Emergency Preparedness.

Economic Regulatory Administration

AD Energy, Inc. and Allen L. Dwight; Proposed Remedial Order

Pursuant to 10 CFR 205.192(c), the Economic Regulatory Administration (ERA) of the Department of Energy hereby gives notice of a Proposed Remedial Order which was issued to AD Energy, Inc. and Allen L. Dwight at 12700 St. Andrews, Oklahoma City, Oklahoma 73120. This Proposed Remedial Order alleges pricing violations in the amount of $1,804,574.81 plus interest in connection with the resale of crude oil at prices in excess of those permitted by 10 CFR Parts 205, 210, and 212, Subparts F and L during the time period May 1979 through December 1980.

A copy of the Proposed Remedial Order, with confidential information deleted, may be obtained from James F. Murphy, Manager, Crude Reseller Program, Economic Regulatory Administration, Department of Energy, P.O. Box 35228, Dallas, Texas 75235, or by calling (214) 767–7432. Within fifteen (15) days of publication of this notice, any aggrieved person may file a Notice of Objection with the Office of Hearings and Appeals, Federal Building, Room 3304, 12th and Pennsylvania Ave., NW., Washington, D.C. 20461, in accordance with 10 CFR 205.193.

Issued in Dallas, Texas, on the 18th day of February 1983.

Ben L. Lemos,

Director, Dallas Office, Economic Regulatory Administration.

[FR Doc. 83-6471 Filed 3-11-83; 8:45 am]

Echo Drilling, Inc.; Proposed Remedial Order

Pursuant to 10 CFR 205.192(c), the Economic Regulatory Administration of the Department fo Energy hereby gives Notice of a Proposed Remedial Order which was issued to Echo Drilling, Inc. of Zanesville, Ohio. This Proposed Remedial Order alleges violations in the pricing of crude oil of 10 CFR 212.93, 212.10 and 212.183. The total violation alleged during November 1973 through January 1981 is $354,450.18.

A copy of the Proposed Remedial Order, with confidential information deleted, may be obtained from: U.S. Department of Energy, Economic Regulatory Administration, Attn: John W. Sturges, Director, 440 S. Houston, Room 306, Tulsa, Oklahoma 74127.

Within 15 days of publication of this Notice any aggrieved person may file a Notice of Objection with the Office of Hearings and Appeals, U.S. Department of Energy, 12th and Pennsylvania Avenue, NW., Washington, D.C. 20461, in accordance with 10 CFR 205.193.

Issued in Tulsa, Oklahoma on the 28th day of February 1983.

John W. Sturges,

Director, Tulsa Office, Economic Regulatory Administration.

[FR Doc. 83-6470 Filed 3-11-83; 8:45 am]

BILLING CODE 6450-01-M

Gary Energy Corp.; Proposed Consent Order

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Notice of proposed consent order and opportunity for comment.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) announces a proposed Consent Order with Gary Energy Corporation and provides an opportunity for public comment on the terms and conditions of the proposed Consent Order.

DATE: Comments by April 13, 1983.

ADDRESS: Send comments to: James O. Neet, Jr., Chief Counsel, Dallas ERA Office, Economic Regulatory Administration, Department of Energy, 1341 W. Mockingbird Lane, Suite 200–E, Dallas, Texas 75247.

FOR FURTHER INFORMATION CONTACT: James O. Neet, Jr., Chief Counsel, Dallas ERA Office, Economic Regulatory Administration, Department of Energy, 1341 W. Mockingbird Lane, Suite 200–E, Dallas, Texas 75247; 214/767–7404. (Copies of the Consent Order may be obtained free of charge by writing or calling this office.)

SUPPLEMENTARY INFORMATION: On February 16, 1983, the ERA executed a proposed Consent Order with Gary Energy Corporation at 115 Inverness Drive, Englewood, Colorado 80112. Under 10 CFR 205.199J(b), a proposed Consent Order which involves the sum of $500,000 or more, excluding interest and penalties, becomes effective no sooner than thirty days after publication of a notice in the **Federal Register** requesting comments concerning the

proposed Consent Order. Although the ERA has signed and tentatively accepted the proposed Consent Order, the ERA may, after consideration of the comments it receives, withdraw its acceptance and, if appropriate, attempt to negotiate a modification of the Consent Order or issue the Consent Order as signed.

I. The Consent Order

Gary Energy Corporation (Gary), with its home office located in Englewood, Colorado, is a refiner and gas plant owner and operator engaged in the refining of crude oil and the processing of natural gas liquids (NGLs) and natural gas liquid products (NGLPs) and the sale of covered petroleum products as well as other petroleum related activities, and was subject to the Mandatory Petroleum Price and Allocation Regulations at 10 CFR Parts 210, 211, and 212 during the period covered by this Consent Order. To resolve certain potential civil liability arising out of the Mandatory Petroleum Allocation and Price Regulations and related regulations, 10 CFR Parts 205, 210, 211, and 212, in connection with Gary's transactions involving petroleum products during the period January 1, 1973 through January 27, 1981 ("the period covered by this Consent Order"), the ERA and Gary Energy Corporation entered into a Consent Order, the significant terms of which are as follows:

A. This Consent Order is intended by the signatories to settle the civil issues between DOE and the Consenting Firm relating to the Consenting Firm's compliance with the Federal petroleum price and allocation regulations during the period from January 1, 1973 through January 27, 1981.

B. ERA has conducted a thorough audit to determine Gary's compliance during the period covered by this Consent Order with the Federal petroleum price and allocation statutes, regulations and requirements. ERA and Gary disagree in several respects concerning the proper application of such Federal petroleum price and allocation statutues, regulations and requirements to Gary's activities during the settlement period. Gary and ERA each believes that its respective positions on the legal issues underlying such disagreements are meritorious. Neither Gary nor ERA disavows any position it has taken with respect to such legal issues.

C. Notwithstanding the above, Gary maintains that it has calculated all of its costs, determined all of its prices, and operated in all other respects in accordance with all applicable statutes, regulations and other requirements. Execution of the Consent Order constitutes neither an admission by the company nor a finding by ERA of any violation by the company of any statute or regulation.

II. Refunds

A. *Disposition of Refunds.* Under this Consent Order, Gary Energy Corporation will refund the sum of $000,000.00 which sum includes interest to the effective date of timely refund, to DOE for ultimate disposition. Payment is to be made commencing June 1, 1983 and if payment is not made within the specified period of time, Gary agrees to pay installment interest on the unpaid balance. Upon full satisfaction of the terms and conditions of this Consent Order by Gary Energy Corporation, the DOE releases Gary Energy Corporation from any civil claims that the DOE may have arising out of the matters covered by this Consent Order.

III. Submission of Written Comments

Interested persons are invited to submit written comments concerning the terms and conditions of this Consent Order to the address given above. Comments should be identified on the outside of the envelope and on the documents submitted with the designation, "Comments on Gary Energy Corporation Consent Order." The ERA will consider all comments it receives by 4:30 p.m., local time, on 30 days after the date of publication of this notice. Any information or data considered confidential by the person submitting it must be identified as such in accordance with the procedures in 10 CFR 205.9(f).

Issued in Dallas, Texas on the 22nd day of February 1983.

Ben L. Lenox,

Director, Dallas Office, Economic Regulatory Administration.

[FR Doc. 83-6403 Filed 3-11-83; 8:45 am]

BILLING CODE 6450-01-M

Allegheny Petroleum Corporation and Gerome R. Smith; Proposed Remedial Order

Pursuant to 10 CFR 205.192(c), the Economic Regulatory Administration (ERA) of the Department of Energy (DOE) hereby gives Notice of a Proposed Remedial Order which was issued to Allegheny Petroleum Corporation and Gerome R. Smith, 14700, Memorial Drive, Suite 307, Houston, Texas 77069. This Proposed Remedial Order alleges violations in the pricing of crude oil of 10 CFR §§ 212.186, 210.62(c), and 205.202. The principal amount of the alleged violations for the period August through December 1980 is $344,199.23.

A copy of the Proposed Remedial Order, with confidential information deleted, may be obtained from: U.S. Department of Energy, Economic Regulatory Administration, ATTN: Sandra K. Webb, Director, One Allen Center, Suite 610, 500 Dallas Street, Houston, Texas 77002.

Within fifteen (15) days of publication of this Notice any aggrieved person may file a Notice of Objection with the Office of Hearings and Appeals, U.S. Department of Energy, Room 3304, Federal Building, 12th and Pennsylvania Avenue, NW., Washington, D.C. 20461, in accordance with 10 CFR 205.193.

Issued in Houston, Texas on the 16th day of February 1983.

Sandra K. Webb,

Director, Houston Office, Economic Regulatory Administration.

[FR Doc. 83-6404 Filed 3-11-83; 8:45 am]

BILLING CODE 6450-01-M

Energy Information Administration

[Form EIA-119M]

Monthly Report of Electric Energy, Capability and Peak Load; Cancellation

AGENCY: Energy Information Administration, DOE.

ACTION: Notice of the cancellation of the Form EIA-119M, "Monthly Report of Electric Energy, Capability and Peak Load," and solicitation of comments.

SUMMARY: The Energy Information Administration (EIA) of the U.S. Department of Energy (DOE) announces the cancellation of the "Monthly Report of Electric Energy, Capability and Peak Load," Form EIA-119M, as of the end of the reporting period for December 1982, and the proposed consolidation of the electric energy, capability, peak load data on the "Annual Utility Operations Report," Form EIA-714, Schedule 5, currently being developed by EIA. (A copy of the proposed Form EIA-714, Schedule 5, is shown on the following page.) If the Form EIA-714, Schedule 5, is not approved for use by the Office of Management and Budget, then these data for the 12 months of 1983 will be collected on the annual Form EIA-119A, "Annual Projection of System Changes."

DATES: Written comments must be sent to Ms. Carol L. French at the address listed immediately below no later than 30 days following the publication of this notice.

FOR FURTHER INFORMATION CONTACT: Ms. Carol L. French, EI-541, Energy

Information Administration, U.S. Department of Energy, Mail Station: 2F-021, 1000 Independence Avenue, SW., Washington, D.C. 20585; (202) 252-5311.

SUPPLEMENTARY INFORMATION:

I. *Current Action.*

II. *Request for Comments.*

I. *Current Action.* The EIA announces the cancellation of the "Monthly Report of Electric Energy, Capability, and Peak Load" (Form EIA-119M) as of the end of the reporting period for December 1982. The annual respondent burden associated with the Form EIA-119M is 7,392 hours.

The EIA will collect the monthly electric energy, capability and peak load data on an annual basis on the proposed Form EIA-714, Schedule 5, If the Form EIA-714, Schedule 5, is not approved for use by the Office of Management and Budget, then these data for the 12 months of 1983 will be collected on the annual Form EIA-119A.

II. *Request for Comments.* EIA invites the public to comment on the cancellation of the Form EIA-119M and consolidation of the data into Schedule 5, of the proposed Form EIA-714.

Issued in Washington, D.C. March 9, 1983.

Yvonne M. Bishop,

Director, Office of Statistical Standards, Energy Information Administration.

Draft-Form EIA-714—Draft Annual Utility Operations Report, Schedule 5

Net Generation, Energy Receipts and Deliveries and System Peaks by Months for the Year

General Instructions

1. In column 2, show the total net generation of system plants as the case may be.

2. In columns 3, 4, 5, and 6 give a monthly accounting of all energy transfers to and from the facilities of other systems during the year, including gross sales for resale, purchases, interchanges and transfers for resale, whether on a firm interchange or any other basis, and all energy received from small power producers, cogenerators, other industrial power, or off-system share of jointly owned units.

Energy Transfer Instructions Parts A & B

Part A is for the recording of "in-load", other systems' in-load, and borderline energy transfers; and Part B is for the recording of all other energy transfers.

Part A:

A1. Show in column 3 the amounts of energy received as firm purchases and reported as firm sales for resale by the other system. Firm sales for resale are full or partial requirement power intended to meet the full customer load requirement of another system or the partial customer load of another system taking into account the other system's generation resources. If customers of respondent received energy directly from another system for the account of the respondent (border-line receipts), such transfers should be included in column 3. If part of the energy deliveries to systems were delivered as firm sales and reported in column 4 are received back into the reporting system through another interconnection, such receipts should also be entered in column 3. All other receipts should be entered in column 5.

A2. show in column 4 the amounts of energy delivered as firm sales for resale. If the respondent's system delivered energy to customers of another system ("border-line customers"), such deliveries should be included in column 4.

Part B:

B1. Report in column 5 all energy (except that reported in column 3) received from each utility system, small power producer, cogenerator, or off-system generating plant or unit.

B2. Report in column 6 the amounts of energy delivered for resale except those amounts reported in column 4. Do not report sales to industrial customers.

3. In column 10, enter the total maximum load which a generating unit, generating station, or other apparatus can carry under specific conditions without exceeding approved limits of temperature and stress at the time of the monthly peak load which were owned or operated by the respondent regardless of whether they were available or unavailable for load at the time of the peak load. This should be the respondent's best estimate of the net generating capability of the system at the time of the monthly peak load.

4. In column 11, enter the capability of respondent-owned or respondent-operated generating units that were unavailable at the time of the peak load due to scheduled maintenances, full forced outages, and other outages. These other outages may be partial outages, legal restriction on generating unit or plant output, or derating not considered in the determination of generating unit capability according to the system's rating criteria.

5. In column 12, show the maximum megawatt load on the system for each month of the year. Load data in this column should be the maximum integrated demand based on net energy for load as computed in column 7 for 60-minute clock-hour intervals. Enter the numerical day of the reporting month and hour of the day in columns 13 and 14, respectively. Where integrated demands for 60-minute clock-hour intervals are not available, it is desired that available data be adjusted to approximate such intervals. Adjustments made should be explained in notes. Where such adjustments cannot be made, load data should be furnished in the form available.

6. In column 15, the minimum hourly loads experienced during each month should be based on net energy for load as computed in column 7.

Alabama-Tennessee Natural Gas Co.; Compliance Filing

March 8, 1983

Take notice that on March 1, 1983, Alabama-Tennessee Natural Gas Company (Alabama-Tennessee), in compliance with the Commission's letter order of February 8, 1983 in the above-referenced matter, submitted for filing revised tariff sheets to its FPC Gas Tariff, Third Revised Volume No. 1:

Fifth Revised Sheet No. 34
superseding
Fourth Revised Sheet No. 34
and
Third Revised Sheet No. 34–A
superseding
Second Revised Sheet No. 34–A

Alabama-Tennessee states that these revised tariff sheets clarify the tariff to show that storage gas costs are a component of Alabama-Tennessee's total purchased gas costs utilized in computing the current and deferred account adjustments of the PGA adjustments. The proposed revised tariff sheets are to become effective January 1, 1983. Alabama-Tennessee requests waiver of the Commissions' regulations regarding notices.

Copies of the filing have been mailed to Alabama-Tennessee's purchasers and interested state commissions. The above-described tariff sheets are also available for public inspection in Alabama-Tennessee's business offices.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with the Sections 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such petitions or protests should be filed on or before March 17, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,
Secretary.

BILLING CODE 6717-01-M

[Docket No. RP82-115-003]

Algonquin Gas Transmission Co.; Rate Filing Under Rate Schedule STB and Rate Schedule ST–T

March 8, 1983.

Take notice that on February 9, 1983, Algonquin Gas Transmission Company (Algonquin) tendered for filing Revised Substitute Eighth Revised Sheet No. 10–C, Alternate Revised Substitute Eighth Revised Sheet No. 10–C, Substitute Second Revised Sheet No. 10–D and Alternate Substitute Second Revised Sheet No. 10–D to its FERC Gas Tariff, First Revised Volume No. 1.

Algonquin states that Revised Substitute Eighth Revised Sheet No. 10–C and Substitute Second Revised Sheet No. 10–D are being filed to reflect in Algonquin's Rate Schedules STB and ST–T, decreases in Texas Eastern Transmission Corporation's (Texas Eastern) underlying Rate Schedules SS–II and ISS–II. Texas Eastern's decreases reflect Consolidated Gas Supply Corporation's decrease in rates, as modified pursuant to the Commission's order of July 28, 1982, under its Rate Schedule GSS to become effective January 1, 1983, in Docket No. RP82–115.

Algonquin Gas further states that Alternate Revised Substitute Eighth Revised Sheet No. 10–C and Alternate Substitute Second Revised Sheet No. 10–D are being filed to coincide with Texas Eastern's filing of an alternate sheet to be placed into effect if the Stipulation and Agreement filed on December 29, 1982, is not approved.

Algonquin Gas requests that the Commission accept the appropriate tariff sheets filed herein based on its decision with respect to Texas Eastern's rates and that the propolsed effective date be January 1, 1983.

Algonquin Gas States that it proposes to make the reduced rates effective retroactively to January 1, 1983, by crediting the appropriate amount to the next billing following Commission's acceptance of the filing.

Algonquin notes that a copy of this filing is being served upon such affected party and interested state commission.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with the Sections 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such petitions or protests should be filed on or before March 17, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,
Secretary.

BILLING CODE 6717-01-M

[Docket No. TA83-2-31-001 (PGA83-2, IPR83-2)]

Arkansas Louisiana Gas Co.; Filing of Revised Tariff Sheets Reflecting Tariff Adjustment

March 8, 1983.

Take notice that on February 28, 1983, Arkansas Louisiana Gas Company (Arkla) tendered for filing Thirty-third Revised Sheet No. 4 and Seventh Revised Sheet No. 4A to its FERC Gas Tariff First Revised Volume No. 1, Rate

Schedule No. G–2, to become effective April 1, 1983.

Arkla states that the purpose of Thirty-third Revised Sheet No. 4 is to: (1) Reflect the cost of purchased gas for the six month period commencing April 1, 1983, (2) recover the accumulated deferred gas costs as of December 31, 1983, and (3) set forth the reduced PGA and estimated incremental pricing surcharges to be billed during the PGA period as contained on Seventh Revised Sheet No. 4A effective April 1, 1983.

Arkla also states that copies of the revised tariff sheet and supporting data are being mailed to Arkla's jurisdictional customers and other interested parties affected by this tariff change.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with the Section 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such petitions or protests should be filed on or before March 17, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. TA83-2-31-000)PGA83-2, IPR83-2)]

Arkansas Louisiana Gas Co.; Filing of Revised Tariff Sheets Reflecting Tariff Adjustment

March 8, 1983.

Take notice that on February 28, 1983 Arkansas Louisiana Gas Company (Arkla) tendered for filing 32nd Revised Sheet No. 185 and 7th Revised Sheet No. 185A to its FERC Gas Tariff Original Volume No. 3, Rate Schedule No. X–26, to become effective April 1, 1983.

Arkla states that the purpose of 32nd Revised Sheet No. 185 is to: (1) Reflect the cost of purchased gas for the six months period commencing April 1, 1983, (2) recover the accumulated deferred gas costs as of December 31, 1983, and (3) set forth the reduced PGA and estimated incremental pricing surcharges to be billed during the PGA period as contained on 7th Revised Sheet No. 185A effective April 1, 1983.

Arkla also states that copies of the revised tariff sheet and supporting data are being mailed to Arkla's jurisdictional customers and other interested parties affected by this tariff change.

Any person desiring to be heard or to protest said filing should file a Petition to Intervene or Protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Sections 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such petitions or protests should be filed on or before March 17, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a Petition to Intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Project No. 6353–001]

Big Rivers Electric Corp.; Surrender of Preliminary Permit

March 9, 1983.

Take notice that Big Rivers Electric Corporation, Permittee for the proposed Newburgh Hydroelectric Project No. 6353, has requested that its preliminary permit be terminated. The permit was issued on August 11, 1982, and would have expired on July 31, 1984. The project would have been located on the Ohio River in Henderson County, Kentucky.

The Permittee filed its request on February 15, 1983, and the surrender of the preliminary permit for Project No. 6353 is deemed accepted as of the date of this notice.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. RP81-67-004]

Black Marlin Pipeline Co.; Filing of Service Agreement

March 8, 1983.

By order dated August 27, 1982 (Order), the Commission approved a "Stipulation and Agreement in Settlement of Rate Proceedings" (Settlement) in the above-referenced matter. The Settlement provided, *inter alia*, for a reduction in the rate which Black Marlin Pipeline Company (Black Marlin) charges Lone Star Gas Company (Lone Star) for transportation service pursuant to Section 311(a)(1) of the Natural Gas Policy Act of 1978; for Commission approval of a new FERC Gas Tariff for Black Marlin, including a new Rate Schedule T–2 applicable to Lone Star; and for the tender, by Black Marlin to Lone Star, of a new Service Agreement covering service to Lone Star under said Rate Schedule T–2. The Settlement became effective September 1, 1982.

Take notice that on February 25, 1983, Black Marlin tendered for filing pursuant to Section 154.62 of the Commission's Regulations under the Natural Gas Act (Regulations) an executed transportation Service Agreement between Black Marlin and Lone Star for service under Rate Schedule T–2. Black Marlin proposes that such Service Agreement be made effective September 1, 1982, the effective date of the Settlement, so that the reduced rate for service to Lone Star will be effective on the earliest date contemplated by the Settlement. To that end, Black Marlin requests waiver of the 30 day notice requirement, and avers that good cause for such waiver exists.

The Settlement constituted resolution of a general rate investigation into the rates of Black Marlin. Accordingly, Black Marlin requests special permission to incorporate herein by reference the relevant portions of the record of the Docket No. RP81–67–000 rate investigation proceedings, the Settlement and the Commission's August 27, 1982 order approving the Settlement as satisfactory compliance with the requirement of the Regulations that actual and estimated billing determinants and related revenues be supplied for the twelve months immediately preceding and succeeding the proposed effective date.

A copy of the filing was mailed to Lone Star Gas Company and a copy was made available for public inspection at Black Marlin's general offices in Houston, Texas.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with the Sections 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such petitions or protests should be filed

on or before March 17, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. TA83-1-44-003 (PGA83-2)]

Commercial Pipeline Company, Inc.; filing

March 8, 1983.

Take notice that on February 25, 1983, Commercial Pipeline Company Inc. (Commercial) submitted a supplement to its filing of January 28, 1983, in the above proceeding, in response to an informal request from the Commission's Staff. The filing included certain information in response to Paragraph (B) of the Commission's Order of January 17, 1983, which asked for information supporting the sales and purchase volumes used in Commercial's PGA adjustment.

A copy of the schedule previously submitted by Commercial demonstrating the development of its 1.06 sales ratio is attached to the filing as Schedule A.

Also attached to the filing as Schedule B is a two page document entitled "Calculated Over/Under Recovery—Six and Four Months Average Purchase Sales Ratio." Commercial states that Schedule B shows that Commercial's use of its sales and purchase volumes in its December 14, 1982 filing was appropriate.

Commercial also states that the 1.06 purchase/sales ratio used by Commercial in the calculation of its current PGA adjustment approximates the purchase/sales factor of 1.0633 utilized in calculating Commercial's most recent semi-annual PGA adjustment which went into effect on October 23, 1982.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with the Sections 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such petitions or protests should be filed on or before March 17, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. CP83-177-000]

Consolidated Gas Supply Corp.; Application

March 9, 1983.

Take notice that on January 31, 1983, Consolidated Gas Supply Corporation (Applicant), 445 West Main Street, Clarksburg, West Virginia 26301, filed in Docket No. CP83-177-000 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of certain compression and related facilities at the Borger Compressor Station in Tompkins County, New York, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to install a 5,800 horsepower turbine-driven centrifugal compressor unit to replace four 1,000 reciprocating compressors at the Borger Station in 1983 and to install in a 1984, a 5,800 horsepower turbine-driven centrifugal compressor unit to replace two 1,100 turbine-driven centrifugal compressors. Applicant further proposes to retain the six existing 1,100 compressor units until December 1, 1986, to provide stand-by or emergency capacity at Borger Station and to retire them to stock after that date. It is asserted that the proposed construction would complete Applicant's upgrading of its Borger Compressor Station begun in 1983.

Applicant states that the estimated cost of the proposed facilities is $7,217,000 to be financed from funds on hand or to be obtained from Applicant's parent corporation, Consolidated Natural Gas Company. Applicant avers that the proposed facilities are needed to meet normal growth in the peak flow requirements in its markets in the State of New York during the 1983-1984 winter and thereafter.

Any person desiring to be heard or to make any protest with reference to said application should on or before March 30, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[Project No. 5624-000]

Zoes J. Dimos and James C. Katsekas; Surrender of Preliminary Permit

March 9, 1983.

Take notice that Zoes J. Dimos and James C. Katsekas, Permittees for the Cotton Mill Dam Power Project No. 5624 located on the Winnipesaukee River in Belknap and Merrimack Counties, New Hampshire, have requested that their preliminary permit be terminated. The preliminary permit was issued on June 28, 1982, and would have expired on December 31, 1983. The Permittees state that the Cotton Mill Dam Power Project potential has been incorporated into the downstream Clement Dam Project No. 2966 by virtue of the amended license application filed with the Commission on July 12, 1982; therefore, it is no longer

necessary for the preliminary permit for Project No. 5624 to be maintained.

Zoes J. Dimos and James C. Katsekas' request was filed January 28, 1983. The Surrender of the permit for Project No. 5624 is accepted as of the date of issuance of this notice.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. CP83-172-000]

El Paso Natural Gas Co.; Application

March 9, 1983.

Take notice that on January 6, 1983, El Paso Natural Gas Company (Applicant), P.O. Box 1492, El Paso, Texas 79978, filed in Docket No. CP83-172-000 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the transportation and delivery of natural gas for Cominco American Incorporated (Cominco) as well as the retention and operation of a tap and value facility, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

It is asserted that under the terms of an excess gas sales contract dated January 7, 1983, between Cominco and Southern Union Gathering Company (Gathering Company) Cominco would purchase natural gas supplies which are in excess of the requirements of the intrastate and interstate markets of Gathering Company. It is further asserted that Cominco has entered into a transportation arrangement with Applicant and Gas Company of New Mexico (GASCO) whereby GASCO would receive volumes of natural gas purchased by Cominco from Gathering Company on a thermal basis and would transport and deliver equivalent quantities to Applicant at certain existing points of interconnection between the facilities of GASCO and Applicant in Eddy, Lea, San Juan, and Valencia Counties, New Mexico. It is further stated that Applicant would transport and deliver the gas received at such points of interconnection to Cominco at its Borger, Texas, fertilizer plant in Hutchinson, County. Applicant further proposes that deliveries to Cominco in Borger, Texas, would be accomplished through the retention and operation of its tap and valve assembly on its El Paso-Schafer plant to Dumas plant pipeline in Hutchinson County.

It is asserted that Applicant would transport no more than 45,000 Mcf of natural gas per day for Cominco. It is further asserted that Cominco would pay Applicant for each Mcf of natural gas delivered at Hutchinson County the "Back Haul Charge" rate in effect from time to time as set forth on Sheet No. 1-D.2 of Applicant's FERC Gas Tariff, Third Revised Volume No. 2. The currently effective "Back Haul Charge" for this service is 8.65 cents per Mcf, it is asserted.

It is stated that Cominco would use the natural gas as feed stock in the production of anhydrous ammonia at its Borger plant.

Any person desiring to be heard or to make any protest with reference to said application should on or before March 30, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Energenics Systems, Inc.; Surrender of Preliminary Permits

March 9, 1983.

Take notice that Energenics Systems, Inc., Permittee for the proposed Ohio River Lock and Dam No. 52, and Green River Lock and Dam Nos. 3, 4, and 6 has requested that its preliminary permits be terminated. The permit for Project No. 5941 was issued on July 9, 1982, and would have expired on July 9, 1984. Project No. 5941 would have been located on the Ohio River in Massac County, Illinois and McCracken County, Kentucky. The permits for Projects Nos. 6080 and 6081 were issued on July 26, 1982, and would have expired on January 1, 1984. Project Nos. 6080 and 6081 would have been located on the Green River in Ohio and Butler County respectively, Kentucky. The permit for Project No. 6078 was issued on July 28, 1982, and would have expired on January 1, 1984. Project No. 6078 would have been located on the Green River in Edmonson County, Kentucky.

The Permittee filed its request on December 28, 1982, and the surrender of the preliminary permit for Projects Nos. 5941, 6078, 6080, and 6081 are deemed accepted as of the date of this notice.

BILLING CODE 6717-01-M

[Docket No. CP83-161-000]

Gas Company of New Mexico; Application

March 9, 1983.

Take notice that on January 19, 1983, Gas Company of New Mexico (Applicant), 1800 First International Building, Dallas, Texas 75270, filed in Docket No. CP83-161-000 an application pursuant to Section 284.127 of the Commission's Regulations for approval of a transportation arrangement providing for the transportation of natural gas on behalf of El Paso Natural Gas Company (El Paso), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

It is asserted that Applicant proposes to engage in a transportation service on behalf of El Paso which is part of a

larger transportation service which El Paso plans to render on behalf of Cominco American Incorporated (Cominco). It is stated that pursuant to an excess gas sales contract of January 7, 1983, between Cominco and Southern Union Gathering Company (Gathering Company) Cominco would purchase natural gas for use in its Borger, Texas, plant from Gathering Company. It is further stated that such gas would be delivered by Gathering Company into the pipeline system of Applicant. It is asserted that Applicant would receive such gas on behalf of El Paso and transport and redeliver such gas to El Paso at existing interconnections between the facilities of Applicant and those of El Paso in San Juan, Valencia, Eddy, or Lea Counties, New Mexico. It is submitted that El Paso would then transport the gas to Cominco's Borger, Texas, plant for use by Cominco as feed stock in the production of anhydrous ammonia.

It is estimated that Applicant would transport between 36,000 and 45,000 million Btu per day. It is further asserted that Applicant would charge a transportation rate equal to the approved rate contained in its Rate Schedule 61 on file with the New Mexico Public Service Commission. It is further stated that the term of the proposed service would extend for six months from the date of initial deliveries following authorization. It is submitted that the service may continue for an indefinite period thereafter, subject to interruption by either party, not to exceed two years.

Any person desiring to be heard or to make any protest with reference to said application should on or before March 30, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

BILLING CODE 6717-01-M

[Docket No. ST83-242-000]

Louisiana Intrastate Gas Corp.; Application

March 9, 1983.

Take notice that on February 4, 1983, Louisiana Intrastate Gas Corporation (Applicant), P.O. Box 1352, Alexandria, Louisiana 71301, filed in Docket No. ST 83-242-000 an application pursuant to Section 284.123(b)(2)(i) of the Commission's Regulations for approval of its rates and charges for the transportation of natural gas for Texas Eastern Transmission Corporation (Tetco), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Pursuant to a transportation agreement with Tetco dated January 3, 1983, Applicant proposes to transport gas for Tetco for two years. Applicant would receive the gas for Tetco's account at a point of delivery in East Baton Rouge Parish, Louisiana, as well as other such points to which Applicant and Tetco may mutually agree. Applicant would redeliver the gas, less Tetco's *pro rata* share for compressor fuel, company use and unaccounted-for gas, at the points of redelivery in Natchitoches, Assumption, Terrebonne, Lincoln, St. Mary, Claiborne, St. Landry and Iberville Parishes, Louisiana, and such other points to which Applicant and Tetco may mutually agree.

Applicant proposes a transportation rate of 20.0 per million Btu delivered to Tetco or for Tetco's account by Applicant. Applicant states that it would be reimbursed by Tetco for all taxes which may be levied upon and/or paid by Applicant with respect to the transportation service performed. Applicant asserts that this rate is both fair and equitable.

Any person desiring to be heard or to make any protest with reference to said application should on or before March 30 1983, file with the Federal Energy Regulatory Commission, Washington, D.C., 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211). All protests filed with the Commissioin will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to a proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing there in must file a motion to intervene in accordance with the Commission's Rules.

BILLING CODE 6717-01-M

[Docket No. CP83-194-000]

Natural Gas Pipeline Company of America; Application

March 9, 1983.

Take notice that on February 10, 1983, Natural Gas Pipeline Company of America (Applicant), 122 South

Michigan Avenue, Chicago, Illinois 60603, filed in Docket No. CP83–194–000 an application pursuant to Section 7 of the Natural Gas Act for permission and approval to abandon approximately 46.0 miles of its Amarillo No. 1 line in Iowa and Illinois and for a certificate of public convenience and necessity authorizing the construction and operation of 10.45 miles of loop line as part of its Amarillo No. 4 line in Iowa and Illinois, all as more fully set forth in the application which is on file with the Commission and open for public inspection.

Applicant states that its Amarillo system consists of three pipelines (Nos. 1, 2 and 3), and in places looping that has been termed the Amarillo No. 4 line. Applicant further states that the No. 1 line is Applicant's original pipeline and that it was placed in service in 1931. The No. 1 line traverses 901 miles from Fritch, Texas, to Joliet, Illinois, and is predominantly of 24-inch pipe. The pipeline construction techniques used at the time of construction involved the mechanical coupling of alternative joints of pipe. Applicant states that since about 1940 the use of couplings has been replaced by the welding of all pipe points. Applicant claims that certain of the compressor stations along the Amarillo Line also have compressor units that are old, inefficient and expensive to maintain and operate. Applicant plans in a long-range program to replace the No. 1 line from Beatrice, Nebraska, to Joliet, Illinois, and certain of the compressor units along that segment of the Amarillo Line.

Applicant proposes herein to retire approximately 46.0 miles of No. 1 line in Louisa and Muscatine Counties, Iowa, and Rock Island County, Illinois, including 0.51 mile of a six-parallel-line 12-inch river crossing, 9.96 miles of two-parallel-line 18-inch pipeline and 35.51 miles of 24-inch pipeline. Applicant states that when practical, the line would be removed and sold for scrap. Applicant proposes to install 10.45 miles of new 36-inch loop as part of its No. 4 line, including 0.85 mile of pipeline in Louisa County, Iowa, and 9.60 miles in Rock Island County, Illinois. Applicant states that the capacity of the Amarillo System would be unchanged by the proposal and that the estimated cost of retirement and installation of replacement facilities is $8,600,000, which cost would initially be financed with funds on hand.

Any person desiring to be heard or to make any protest with reference to said application should on or before March 30, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any persn wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate and permission and approval for the proposed abandonment are required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83–6610 Filed 3–11–83; 8:45 am]

BILLING CODE 6717–01–M

[Docket No. CP82–156–001]

Natural Gas Pipeline Company of America; Proposed Changes in FERC Gas Tariff

March 8, 1983.

Take notice that on February 28, 1983, Natural Gas Pipeline Company of America (Natural) tendered for filing, to be a part of its FERC Gas Tariff, Second Revised Volume No. 2, six copies of initial Rate Schedule X–132, consisting of Original Sheet Nos. 1841 through 1862.

Natural states that Rate Schedule X–132 sets out the provisions of a gas transportation agreement dated May 18, 1981 between Natural and Southern Natural Gas Company. This initial rate schedule is being submitted in compliance with the Commission's order issued January 31, 1983, at Docket No. CP82–156–000.

Natural also states that, in compliance with the Commission's order issued January 31, 1983, the transportation rates for this service has been revised to reflect U–T Offshore System's settlement rates at Docket No. RP81–20.

Natural requests waiver of the Commission's regulations to the extent necessary to permit Rate Schedule X–132 to become effective January 31, 1983, the date certificate authorization in Docket No. CP82–156–000 was granted by the Commission.

A copy of this filing has been mailed to Southern Natural Gas Company.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with the Sections 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such petitions or protests should be filed on or before March 17, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83–6609 Filed 3–11–83; 8:45 am]

BILLING CODE 6717–01–M

[Docket No. GT83–6–002]

Natural Gas Pipeline Company of America; Proposed Changes in FERC Gas Tariff

March 8, 1983.

Take notice that on March 2, 1983, Natural Gas Pipeline Company of America (Natural) tendered for filing the following tariff sheets to be part of its FERC Gas Tariff:

Third Revised Volume No. 1
- Substitute Third Revised Sheet No. 2B

Second Revised Volume No. 2
- Substitute Third Revised Sheet No. 1B
- Original Sheet No. 1126
- Second Revised Sheet No. 1145

Natural states that the tariff sheets are submitted as a second supplement to the above referenced filing, in response to a second request by the Commission's tariff review section. The purpose of Substitute Third Revised Sheet Nos. 2B and 1B is to update the Table of

Contents of the Second Revised Volume No. 2 of Natural's FERC Gas Tariff. The purpose of Original Sheet No. 1128 and Second Revised Sheet No. 1145 is to indicate that certain sheets are reserved for future use.

Natural requests waivers of the Commission's regulations to the extent necessary to permit the sheets submitted to become effective January 1, 1983.

Copies of this filing have been mailed to Natural's jurisdictional customers and interested state regulatory agencies.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with the Sections 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such petitions or protests should be filed on or before March 17, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-6495 Filed 3-11-83; 8:45 am]

BILLING CODE 6717-01-M

[Project No. 5736-001]

New England Energy Development, Inc.; Surrender of Preliminary Permit

March 9, 1983.

Take notice that New England Energy Development, Inc. Permittee for the proposed Millers River Project No. 5736, has requested that its preliminary permit be terminated. The permit was issued on May 27, 1982, and would have expired on May 31, 1985. The project would have been located on the Millers River in Franklin County, Massachusetts.

The Permittee filed its request on February 11, 1983, and the surrender of the preliminary permit for Project No. 5736 is deemed accepted as of the date of this notice.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-6521 Filed 3-11-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP83-201-000]

Northern Natural Gas Co.; Application

March 8, 1983.

Take notice that on February 17, 1983, Northern Natural Gas Company, Division of InterNorth, Inc. (Applicant), 2223 Dodge Street, Omaha, Nebraska 68102, filed in Docket No. CP83-201-000 an application pursuant to Section 7(b) of the Natural Gas Act for permission and approval to abandon certain compressor facilities located in Morton County and Finney County, Kansas, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant asserts that the station suction and discharge pressure at the Morton County No. 2 Gathering Station must be reduced in order to meet the volume requirements from the Morton County No. 1 Field Subsystem. Therefore, Applicant requests permission and approval to abandon in place the 773 horsepower compressor unit at the Morton County No. 2 Gathering Station. Applicant states that it would replace the unit with one 200 horsepower compressor unit and one 400 horsepower compressor unit. The new units, it is asserted, would be installed pursuant to Applicant's blanket authority granted on September 1, 1982, in Docket No. CP82-401-000. The installation of the two compressors along with the proposed abandonment of the 773 horsepower compressor unit would provide the horsepower required to meet pressure conditions at the station, it is explained.

Applicant states that it also has determined that the station suction pressure at the Finney County No. 1 Gathering Station must be reduced to meet volume requirements from the Finney County No. 1 Subsystem for the 1983/84 heating season and thereafter. To achieve the required station suction pressure at the Finney County No. 1 Gathering Station, Applicant asserts that the most economical solution is to two-stage Units 1 and 2, abandon Unit 3, and install two additional compressor units at the Finney County No. 1 Gathering Station. Applicant asserts that the proposed abandonment of the units along with their subsequent replacement would allow for the more efficient utilization of horsepower at

Any person desiring to be heard or to make any protest with reference to said application should on or before March 30 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that permission and approval for the proposed abandonment are required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-6512 Filed 3-11-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP77-533-005]

Panhandle Eastern Pipe Line Co. and Trunkline Gas Co.; Amendment

March 9, 1983.

Take notice that on February 9, 1983, Trunkline Gas Company (Trunkline) P.O. Box 1642, Houston, Texas 77001, and Panhandle Eastern Pipe Line Company (Panhandle) P.O. Box 1642 Houston, Texas 77001, filed in Docket No. CP77-533-005 an amendment to the petition to amend filed August 16, 1982, in Docket No. CP77-533-004 pursuant to Section 7 of the National Gas Act so as to reduce contract volumes by 50 percent pursuant to amendments to contracts between Petitioners and between Petitioners and Northern Natural Gas Company, Division of Internorth, Inc. (Northern), all as more fully set forth in the amendment which is on file with the Commission and open to public inspection.

Petitioners' filing in Docket No. CP77–533–004 seeks authorization to alter the transportation service that the Petitioners perform on behalf of Northern and each other. Petitioners propose herein, pursuant to contract amendments with Northern and with each other, to reduce contract demand volumves by 50 percent from 50,000 Mcf per day to 25,000 Mcf per day. This reduction is in keeping with the original agreements that allowed such reductions after 5 contract years, it is asserted. Petitioners request an effective date of October 1, 1982 for the volume reductions, and request that the Commission grant authorization for the requested volume reductions on a retroactive basis.

Trunkline would reduce the volumes it transports for Northern from 50,000 to 25,000 Mcf of gas per day. Since Panhandle has a purchase option of 20 percent, or 5,000 Mcf of gas per day, the monthly charge to Northern of $112,600 would be based upon the remaining 20,000 Mcf of gas per day. Therefore, the charge is reduced from the $225,200 charge as filed in Docket No. CP77–553–004. There is an excess or deficiency charge of 18.52¢ per Mcf. Panhandle would pay Trunkline a monthly charge of $55,400, based on 5,000 Mcf of gas when and if it chooses to exercise its option to purchase 20 percent of Northern's gas. Therefore, the charge is reduced from the $110,800 charge as filed in Docket No. CP77–533–004. The excess or deficiency charge for this transportation is 26.43¢ per Mcf.

Any person desiring to be heard or to make any protest with reference to said amendment should on or before March 30, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein, must file a motion to intervene in accordance with the Commission's Rules. All persons who have heretofore filed need not file again.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-6482 Filed 3-11-83; 8:45 am]
BILLING CODE 6717-01-M

[Docket No. CP77-92-004]

Panhandle Eastern Pipe Line Co. and Trunkline Gas Co.; Amendment

March 9, 1983.

Take notice that on February 9, 1983, Trunkline Gas Company (Trunkline), P.O. Box 1642, Houston, Texas 77001, and Panhandle Eastern Pipe Line Company (Panhandle), P.O. Box 1642, Houston, Texas 77001, filed in Docket No. CP77–92–004 an amendment to the petition to amend filed August 16, 1982, in Docket No. CP77–92–003, pursuant to Section 7 of the Natural Gas Act so as to reduce contract volumes by 50 percent pursuant to amendments to contracts between Petitioners and between Petitioners and Northern Natural Gas Company, Divison of Internorth, Inc. (Northern), all as more fully set forth in the amendment which is on file with the Commission and open to public inspection.

The Petitioners' filing in Docket No. CP77–92–003 seeks authorization to alter the transportation service that the Petitioners perform on behalf of Northern and each other. Petitioners propose herein, pursuant to contract amendments with Northern and with each other, to reduce the contract demand volumes by 50 percent from 13,000 Mcf per day to 6,500 Mcf per day. This reduction is in keeping with the original agreements that allowed such reductions after 5 contract years, it is asserted. Petitioners request an effective date of February 1, 1982, for the volume reductions, and request that the Commission grant the requested volume reductions on a retroactive basis.

Trunkline would reduce the volumes it transports for Northern from 13,000 to 6,500 Mcf of gas per day. Since Panhandle has a purchase option of 20 percent, or 1,300 Mcf of gas per day, the monthly charge to Northern of $28,434 would be based upon the remaining 5,200 Mcf of gas per day. This charge is said to have been increased to $29,276 in Docket No. CP77–92–003 due to the change of delivery points. Panhandle would pay Trunkline a monthly charge of $14,404, based on 1,300 Mcf of gas per day when and if it chooses to exercise its option to purchase 20 percent of Northern's gas.

Any person desiring to be heard or to make any protest with reference to said amendment should on or before March 30, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C., 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules. All persons who have heretofore filed need not file again.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-6481 Filed 3-11-83; 8:45 am]
BILLING CODE 6717-01-M

[Docket No. CP77-17-013]

Panhandle Eastern Pipe Line Co. and Trunkline Gas Co.; Amendment

March 9, 1983.

Take notice that on February 9, 1983, Trunkline Gas Company (Trunkline), P.O. Box 1642, Houston, Texas 77001, and Panhandle Eastern Pipe Line Company (Panhandle), P.O. Box 1642, Houston, Texas 77001, filed in Docket No. CP77–17–013 a joint amendment to the petition to amend filed August 16, 1982, in Docket No. CP77–17–012 pursuant to Section 7 of the Natural Gas Act so as to reduce contract volumes by 50 percent pursuant to amendments to contracts between Petitioners and between Petitioners and Northern Natural Gas Company, Division of Internorth, Inc. (Northern), all as more fully set forth in the amendment which is on file with the Commission and open to public inspection.

The Petitioners' filing in Docket No., CP77–17–012 seeks authorization to alter the transportation service that the Petitioners perform on behalf of Northern and each other. Prior to entering into the contract amendments that resulted in the filing in Docket No. CP77–17–012, Petitioners assert, they entered into contract amendments with Northern and with each other which reduced contract demand volumes by 50 percent from 11,000 Mcf per day to 5,500 Mcf per day. It is submitted that this reduction is in keeping with the original agreements that allowed such reductions after 5 contract years. Petitioners request an effective date of February 1, 1982, for the volume reductions and request that the Commission grant authorization for the requested volume reductions on a retroactive basis.

Trunkline would reduce the volumes it transports for Northern from 11,000 to 5,500 Mcf of gas per day. Since

Panhandle has a purchase option of 20 percent, or 1,100 Mcf of gas per day, the monthly charge to Northern of $500 would be based upon the remaining 4,400 Mcf of gas per day. This charge is said to have been increased to $4,444 in Docket No. CP77–17–012 due to the change in delivery points. Panhandle would pay Trunkline a monthly charge of $7,095, based on 1,1002 Mcf per day of gas when and if it chooses to exercise its option to purchase 20 percent of Northern's gas.

Any person desiring to be heard or to make any protest with reference to said amendment should on or before March 30, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules. All persons who have heretofore filed need not file again.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. RP83-54-000]

South Georgia Natural Gas Co.; Proposed Changes in FERC Gas Tariff

March 8, 1983.

Take notice that on March 1, 1983, South Georgia Natural Gas Company (South Georgia) tendered for filing proposed changes in its FERC Gas Tariff, First Revised Volume No. 1. The proposed changes are based on the twelve month period ending December 31, 1982, as adjusted, and would increase jurisdictional revenues by $1,531,525.

United states that the principal reasons for the proposed rate increase are to reflect: (1) Increased rate base and depreciation expense due to new facilities, (2) increased operation and maintenance expenses, and (3) a reduction in the sales volumes for the test year.

Copies of the filing have been served upon South Georgia's jurisdictional customers and interested state public service commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with the Sections 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such petitions or protests should be filed on or before March 17, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-6439 Filed 3-11-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP83-190-000]

Tennessee Gas Pipeline Co.; Application

March 9, 1983.

Take notice that on February 9, 1983, Tennessee Gas Pipeline Company, a Division of Tenneco Inc. (Tennessee), P.O. Box 2511, Houston, Texas 77001, filed in Docket No. CP83–190–000 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing a transportation service for Consolidated Gas Supply Corporation (Con Gas), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Tennessee states that pursuant to a gas transportation agreement dated April 13, 1980, it would receive and transport for Con Gas up to 5,000 Mcf of natural gas per day. It is asserted that the gas would be transported from the interconnection of the Project 321 pipeline and Tennessee's jointly-owned 30-inch Triple T pipeline, Eugene Island-Block 302, offshore Louisiana, and delivered to Columbia Gulf Transmission Company for the account of Con Gas at an existing interconnection in Ship Shoal Block 198, offshore Louisiana. It is stated that the service would be performed on a best-efforts basis.

It is stated that Con Gas would pay Tennessee for the proposed transportation service a volume charge equal to the product of 2.67 cents multiplied by the total volume in Mcf of gas received by Tennessee during the month, less fuel. Tennessee states that the gas transportation agreement also contains a provision for a minimum monthly bill and a provision that Con Gas would provide Tennessee 1.2 percent of the volumes of natural gas received by Tennessee to compensate Tennessee for its fuel and use requirements.

Any person desiring to be heard or to make any protest with reference to said application should on or before March 30, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Tennessee to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-6463 Filed 3-11-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP83-191-000]

Tennessee Gas Pipeline Co.; Application

March 9, 1983.

Take notice that on February 9, 1983, Tennessee Gas Pipeline Company, a Division of Tenneco Inc. (Tennessee), P.O. Box 2511, Houston, Texas 77001, filed in Docket No. CP83-191-000 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing a transportation service for Consolidated Gas Supply Corporation (Con Gas), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Tennessee states that pursuant to a gas transportation agreement dated December 31, 1980, as amended April 13, 1981, it would receive and transport for Con Gas up to 35,000 Mcf of natural gas per day. It is asserted that the gas would be transported from a point located on Tennessee's Project 349 line, Eugene Island Block 278, offshore Louisiana, and delivered to Columbia Gulf Transmission Company for the account of Con Gas at an existing interconnection in Ship Shoal Block 198, offshore Louisiana. Tennessee states that the service would be performed on a best-efforts basis.

It is further stated that Con Gas would pay Tennessee for the proposed transportation service a volume charge equal to the product of 2.15 cents multiplied by the total volume in Mcf of gas delivered by Con Gas to Tennessee during the month, less fuel. It is explained that the gas transportation agreement also contains a provision for a minimum monthly bill and a provision that Con Gas would provide Tennessee 1.2 percent of the volumes of natural gas received by Tennessee to compensate Tennessee for its fuel and use requirements.

Any person desiring to be heard or to make any protest with reference to said application should on or before March 30, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Tennessee to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. RP83-52-000]

United Gas Pipe Line Co.; Proposed Changes in FERC Gas Tariff

March 8, 1983.

Take notice that on March 1, 1983, United Gas Pipe Line Company (United) tendered for filing proposed changes in its FERC Gas Tariff, First Revised Volume No. 1. The proposed changes are based on the twelve month period ending November 30, 1982, as adjusted, and would increase jurisdictional revenues by $88,053,188.

United states that the proposed rate increase is necessary to permit it to recover its jurisdictional cost of service for the test period of twelve months ended November 30, 1982, as adjusted. The cost of service reflects increases in all levels of cost, except gas costs which are reflected in the cost of service on the basis of the average unit cost of gas purchased as contained in United's PGA rate change which became effective January 1, 1983, as reflected on Sixty-first Revised Sheet No. 4 to United's FERC Gas Tariff.

Copies of the filing have been served upon United's jurisdictional customers and the public service commissions of the States of Alabama, Florida, Louisiana and Mississippi, and the Texas Railroad Commission.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with the Sections 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such petitions or protests should be filed on or before March 17, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Project No. 4284-002]

Vidler Tunnel Water Co.; Surrender of Preliminary Permit

March 9, 1983.

Take notice that Vidler Tunnel Water Company, Permittee for the proposed Georgetown Project No. 4284, has requested that its preliminary permit be terminated. The permit was issued on August 28, 1981, and would have expired on July 31, 1983. The project would have been located on South Clear Creek in Clear Creek County, Colorado.

Vidler Tunnel Water Company has determined that the lack of flow at the site and the difficulty of construction and operation of this project make the economics very poor. It was concluded that this project would be economically unfeasible at this time.

Permittee filed its request on February 10, 1983. The surrender of the preliminary permit for Project No. 4284 is deemed accepted as of the date of this notice.

Kenneth F. Plumb,

Secretary.

[Docket No. RP83-57-000]

West Texas Gathering Co.; Proposed Changes in FERC Gas Tariff

March 8, 1983.

Take notice that on March 1, 1983, West Texas Gathering Company (West Texas) tendered for filing Fourth Revised Sheet Nos. 51-A, 51-B, 51-C

and 51–D to FPC Gas Tariff Original Volume No. 1, showing the proposed tariff with Northern Natural Gas Company, Division of Inter-North, Inc. for the period of April 1, 1983 to April 1, 1984.

Arkla also includes in the filing: (1) A financial statement for the year ending December 31, 1982; (2) computation of cost of Service for 1982, Federal Income Tax data, Depreciation Schedule and Revenue credited to Cost of Service; (3) a statement that no major adjustments were made at the end of 1982; and (4) Statement N–O, showing estimated costs and estimated volume of gas to be gathered for the year 1983, and estimated Cost of Service per Mcf.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with the Sections 211 and 214 of the Commission's Rules of practice and Procedure (18 CFR 385.211, 385.214). All such petitions or protests should be filed on or before March 17, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. QF83-201-000]

Foss Manufacturing Co. of New Hampshire; Application for Commission Certification of Qualifying Status of Cogeneration Facility

March 9, 1983

On February 23, 1983, Foss Manufacturing Co. of New Hampshire (Applicant), Foss Lane, Hampton, New Hampshire 03842, filed with the Federal Energy Regulatory Commission (Commission) an application for certification of a facility as a qualifying cogeneration facility pursuant to § 292.207 of the Commission's rules.

The topping cycle cogeneration facility is located at Applicant's address. The facility consists of four diesel generating sets and waste heat recovery boilers. The total electric power production capacity of the facility is 2.4 megawatts. Steam is used in heating and cooling applications. The primary energy source to the facility is No. 2 Fuel Oil. Installation of the facility began in September 1976. No electric utility, electric utility holding company or any combination thereof has any ownership interest in the facility.

Any person desiring to be heard or objecting to the granting of qualifying status should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such petitions or protests must be filed within 30 days after the date of publication of this notice and must be served on the applicant. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Manville Forest Production Corp.; Application for Commission Certification of Qualifying Status of a Small Power Production Facility

March 9, 1983.

On February 3, 1983, Manville Forest Production Corp. of P.O. Box 488, West Monroe, Louisiana 71291, filed with the Federal Energy Regulatory Commission (Commission) an application for certification of a facility as a qualifying small power production facility pursuant to § 292.207 of the Commission's rules.

The facility is located in West Monroe, Louisiana. The generating capacity of the facility is 72.5 megawatts. The primary energy source is biomass in the form of wood. There are no other biomass fueled small power production facilities owned by the applicant located within one mile of the site. No electric utility, electric utility holding company or any combination thereof has any ownership interest in the facility.

Any person desiring to be heard or objecting to the granting of qualifying status should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such petitions or protests must be filed within 30 days after the date of publication of this notice and must be served on the applicant. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. QF83-172-000]

2013 Corp.; Application for Commission Certification of Qualifying Status of Cogeneration Facility

March 9, 1983.

On January 24, 1983, 2013 Corporation of 1500 E. Duarte Rd., Duarte, California 91010, filed with the Federal Energy Regulatory Commission (Commission) an application for certification of a facility as a qualifying cogeneration facility pursuant to § 292.207 of the Commission's rules.

The Bottoming cycle facility will be located at Hope National Medical Center, 1500 E. Duarte Rd., Duarte, California 91010. The primary energy source to the facility will be natural gas. The electric power production capacity will be 2,115 kilowatts. Thermal output in the form of steam will be used in the hospital for laundry facilities, hospital steam use, environmental conditioning and other thermal needs. The facility will operate in parallel with the Southern California Edison utility to optimize the thermal tracking. Installation of the facility will be completed by July 1983. No electric utility, electric utility holding company or any combination thereof has any ownership interest in the facility.

Any person desiring to be heard or objecting to the granting of qualifying status should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such petitions or protests must be filed within 30 days after the date of publication of this notice and must be served on the applicant. Protests will be considered by the Commission in determining the appropriate action to be taken but will

not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Ultrapower, Inc. (Westwood); Application for Commission Certification of Qualifying Status of Small Power Production Facility

March 9, 1983.

On February 22, 1983, Ultrapower Inc. of 2400 Michelson Drive, Irvine, California 92715, filed with the Federal Energy Regulatory Commission (Commission) an application for certification of a facility as a qualifying small power production facility pursuant to § 292.207 of the Commission's rules.

The facility will be located in Westwood, California. The generating capacity of the facility will be 10 megawatts. The primary energy source will be biomass in the form of wood waste. There are no other biomass fueled small power production facilities owned by the applicant located within one mile of the site. No electric utility, electric utility holding company or any combination thereof has ownership interest in the facility.

Any person desiring to be heard or objecting to the granting of qualifying status should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with rules 211 and 214 of the Commission's Rules of Practice and Procedure. BILLING CODE 6717-01-M

Office of Hearings and Appeals

Issuance of Decisions and Orders; Week of January 3 Through January 7, 1983

During the week of January 3 through January 7, 1983, the decisions and orders summarized below were issued with respect to applications for exception and other relief filed with the Office of Hearings and Appeals of the Department of Energy. The following summary also contains a list of submissions that were dismissed by the Office of Hearings and Appeals.

Requests for Exception

Energy Cooperative, Inc.; Mobil Oil Corporation, January 4, 1983, BSG-0009, BEE-0508, BEE-1298, BES-0136, BET-0135

Energy Cooperative, Inc. filed a Petition for Special Redress requesting that its certified refining capacity be substituted for the base period runs to stills for purposes of determining the firm's eligibility for an allocation under the crude oil Buy/Sell Program, 10 CFR 211.65, as it existed prior to decontrol. The firm also filed Applications for Exception requesting that it be granted an allocation of crude oil under the Buy/Sell Program for January through June 1980 and July 1980 through March 1981. In the alternative, the firm requested that it be granted an amount of entitlement exception relief sufficient to precisely equalize its crude oil acquisition costs with the national average refiners' cost of crude oil during the same period. In a proposed decision and order issued in November 1980, OHA determined that the firm was experiencing a gross inequity and serious hardship caused by the DOE regulations and granted the firm an allocation of 5,663,624 barrels of crude oil for the period October 1980 through March 1981. This proposed relief was immediately implemented by an interim order and the firm purchased a substantial portion of the crude oil allotted. Because the issues raised by the firm in its Petition for Special Redress could be considered within the context of its Applications for Exception the petition was dismissed. In the context of the firm's second Application for Exception, a proposed decision had determined that the firm was experiencing a serious hardship attributable in part to the operation of the DOE regulations. ECI was therefore granted entitlement exception relief worth approximately $6,699,572, which was immediately implemented through the November 1980 Entitlement Notice. The level of relief granted, however, was sufficient to effectively equalize the firm's access to the benefits of price-control crude oil with the national average. The OHA refused to grant additional entitlement exception relief designed to fully equalize ECI's crude oil acquisition cost with the national average. Nevertheless, Mobil Oil Corporation filed Requests for Stay and Temporary Stay of the Interim Decision implementing the entitlement exception relief.

In the final Decision and Order, the OHA affirmed the level of Buy/Sell and entitlement relief previously granted to ECI, dismissed the Petition for Special Redress, and dismissed Mobil's stay requests as moot, since the relief had been implemented.

Hilo Coast Processing Company; Ka'u Sugar Company, Inc.; Davies Hamakua Sugar Company; Mauna Loa Macadamia Nut Corp.; Olokele Sugar Company, January 5, 1983, BEE-1697, BEE-1698, BEE-1699, BEE-1700, BEE-1701

On September 19, 1981, Hilo Coast Processing Company and four other Hawaiian firms that burn agricultural wastes as fuel filed Applications for Exception from the provisions of 10 CFR 212.87(a)(5) in which they sought to be designated producers of petroleum substitutes in order that they may receive entitlements benefits under the provisions of the Petroleum Substitutes Entitlements Program. In considering their requests, the DOE found that the applicants had failed to demonstrate any gross inequity or serious hardship as result of the amendment of the Program which precluded firms from receiving entitlements benefits unless they had received orders from the Economic Regulatory Administration prior to January 28, 1981. The DOE further found that the firm's claims did not warrant class action treatment, Accordingly, exception relief was denied.

Interlocutory Orders

Atlantic Richfield Co.; Gulf Oil Corp.; Marathon Oil Co.; Texaco, Inc.; Louisiana Land and Exploration Co., January 5, 1983, HRZ-0080, HRZ-0081, HRZ-0082, HRZ-0084, HRZ-0085

Atlantic Richfield Company, Gulf Oil Corporation, Marathon Oil Company, Texaco Inc., and Louisiana Land and Exploration Company (collectively "the producers") filed a motion to compel the Office of Special Counsel (OSC) to produce certain documents which OSC had identified as responsive to the discovery order in *Atlantic Richfield Co.*, 5 DOE ¶ 82,521 (1980), for which OSC asserted claims of privilege. In considering the producers' motion, the DOE determined that 32 of the OSC's privilege claims should be upheld. In three instances, the OSC's privilege claims were rejected. In sixteen instances, the OSC was ordered to submit documents to OHA for *in camera* review. Accordingly, the producers' motion was granted in part.

Office of Special Counsel, January 3, 1983, HRZ-0104

The Office of Special Counsel moved for an order resolving a legal dispute concerning the original regulatory definition of "property" in connection with an enforcement proceeding involving Texaco Inc. OSC noted in its motion that the Temporary Emergency Court of Appeals (TECA) had rejected a collateral challenge to the validity of applicable agency rulings by Texaco and noted that its holding will be binding upon Texaco in all other proceedings. The Office of Hearings and Appeals followed the TECA precedent and issued the requested order. OHA held that prior to September 1, 1976, the existence of

multiple reservoirs on a premises subject to a single right to produce crude oil, state recognition of separate reservoirs, or state recognition of units that comprised a portion of a single right to produce crude oil but did not aggregate multiple rights to produce or portions thereof (multi-lease units), or any combination thereof did not confer upon Texaco multiple rights to produce crude oil.

Office of Special Counsel for Compliance, January 3, 1983, HRZ-0091

The Office of Special Counsel for Compliance (OSC) filed Motions to Compel Testimony and to Implement Sanctions. These Motions related to a prior Decision in which OHA granted a Motion for Discovery filed by OSC directed Texaco Inc. to make two of its officials available for questioning by OSC. In its Motions, OSC stated that Texaco refused to let one of the ordered depositions go forward, and claimed that Texaco was engaging in deliberate delay tactics. OSC requested that OHA order Texaco to reimburse OSC for expenses it incurred during its unsuccessful attempt to depose one of the Texaco officials. OSC also asked OHA to order Texaco to make its officials available for depositions at OSC's Dallas, Texas office. In response to OSC's Motions, Texaco filed a Motion for Reimbursement, claiming that the depositions were cancelled because OSC failed to arrange for a competent court reporter, attempted to use non-stenographic methods to record the deposition sessions, and refused to question the Texaco official under oath.

After evaluating the record of this proceeding, the DOE rejected Texaco's claims that the court reporter hired by OSC to record the depositions was incompetent, and that only stenographic means should be used to record the ordered depositions. The DOE also expressed doubt as to the accuracy of Texaco's statements regarding the refusal of OSC to question the Texaco offical under oath. The DOE noted that OSC had every reason to favor deposing Texaco's officials while they are under oath and absolutely nothing to gain by refusing to do so. In view of these considerations, the DOE expressed its displeasure at Texaco's delay in permitting the depositions. Nevertheless, the DOE found that no sanctions or reimbursements were appropriate at this time and denied the ERA's Motion. The parties were directed to reschedule promptly the postponed depositions at the originally agreed upon locations.

Sun Company, Inc., January 3, 1983, HRZ-0117

Sun Company, Inc. filed a Motion for Partial Dismissal of a Proposed Remedial Order that was issued to Mapco, Inc. Sun maintained that the amount of overcharges alleged in the PRO should be reduced by Sun's working interest in the crude oil produced from one of the properties operated by Mapco, because the issue of any overcharges attributable to Sun had already been settled by a consent order between DOE and Sun. DOE found that if Mapco had a right against Sun for contribution as a result of any liability resulting from the enforcement proceeding, the proceeding would violate the terms of the consent order. On the other hand the DOE found that, since Mapco had received no benefit from the sale of Sun's share of the crude oil production, it would be unfair to Mapco to require it to refund any overcharges attributable to Sun's interest in the crude oil if it did not have a right to contribution from Sun. DOE therefore found that Sun's motions should be granted. Accordingly, the potential liability pursuant to the Mapco PRO was reduced by the amount attributable to Sun's share of the crude oil production.

Supplemental Order

Office of Enforcement Economic Regulatory Administration: In the matter of C. K. Smith & Company, Inc., January 5, 1983, HFX-0068

The DOE issued a supplemental order providing for the disbursement of money remaining in an escrow account funded pursuant to a consent order with C. K. Smith & Company. That money represented the refund shares of seven C. K. Smith customers who had been allegedly overcharged, but whose current addresses the DOE had been unable to ascertain. Since the amount of money involved was relatively small, the DOE found that it would be both practical and equitable to deposit it into the United States Treasury.

Refund Applications

Armstrong & Associates/City of San Antonio; Armstrong & Associates/City Water Board; Office of Enforcement, ERA: In the matter of Armstrong & Associates, January 6, 1983, RF17-1, RF17-2, HFX-0069

The City of San Antonio (the City) and the City Water Board of San Antonio (the Water Board) filed applications for refunds from the money obtained by the DOE through a Consent Order with Armstrong & Associates (Armstrong). In considering the applications, the DOE found that the City and the Water Board were purchasers of diesel fuel from Armstrong during the Consent Order period and met the standards for eligibility set forth in the Decision and Order instituting special refund procedures for the distribution of the Armstrong Consent Order fund pursuant to 10 CFR Part 205, Subpart V. Accordingly, the DOE concluded that the applications should be approved, and the refunds should be paid to the City and the Water Board based on each applicant's pro rata share of the Consent order fund as determined by its purchases of diesel fuel from Armstrong during the Consent Order period. In addition, the DOE determined that the remaining Armstrong Consent order funds should be distributed to the City, the State of Texas, and the Defense Fuel Supply Center in order to effectuate restitution for the alleged regulatory violations in Armstrong's sales of diesel fuel to residents and businesses in San Antonio and Texas generally and to federal installations. The level of each entity's refund was computed using a modified volumetric method.

Palo Pinto Oil & Gas/Gulf Oil Corporation; Palo Pinto Oil & Gas/Controller of the State of California, January 4, 1983, RF5-1, RF5-3

Gulf Oil Corporation (Gulf) filed an Application for Refund pursuant to the provisions of 10 CFR Part 205, Subpart V. In its application, Gulf claimed a portion of the $529,000 remitted to the DOE through a consent order with Palo Pinto Oil & Gas (Palo Pinto), a gas plant operator which had been cited for possible pricing violation in its sales natural gas liquid products (NGLPs). Gulf claimed 94.4% of the consent order pool on the basis that it had purchased 94.4% of the NGLP volumes involved in the consent order. The firm asserted it was injured by the full amount of the alleged overcharges because its banks of unrecouped costs during the relevant period exceeded the amount of the refund claim. Gulf maintained that its selling prices were not affected by the alleged overcharges and that its profit would have been higher if not for Palo Pinto's alleged violations.

In considering the firm's request, the DOE determined that in an equitable proceeding, a first purchaser must affirmatively demonstrate it was injured in order to qualify for a refund. Accordingly, the DOE rejected Gulf's assertion that as a first purchaser from Palo Pinto, it was automatically entitled to all of the refund monies. The DOE further found that the existence of sizeable cost banks was a necessary but not sufficient condition for showing injury. To determine whether Gulf had been injured by the alleged overcharges, the DOE compared the prices at which Gulf purchased NGLPs from Palo Pinto with prevailing market prices. The DOE reasoned that if Gulf had purchased NGLPs at prices above the market average, the firm was at a disadvantage, and thus had experienced a real injury. On the other hand, if Gulf had purchased at below-market prices, the firm enjoyed a competitive advantage in the market and had not been injured in any meaningful sense. After performing calculations to gauge the extent to which Gulf had experienced a competitive disadvantage due to its purchases from Palo Pinto, the DOE determined that Gulf was eligible to receive $262,096, or approximately 50 percent, of the consent order fund. The remaining funds are to be distributed upon the implementation of second-stage refund proceedings.

The Controller of the State of California also filed an Application for Refund in this proceeding. The DOE determined that California was an appropriate recipient of monies to be refunded for the benefit of end-users within its jurisdiction, and that other qualifying state governments would similarly be proper refunds recipients. However, the DOE found that indirect refunds for the benefit of end-users were not appropriate during first-stage proceedings. Accordingly the DOE stated that it will consider California's claim during second-stage refund proceedings.

Panhandle Eastern Pipeline Co./I. V. Cole Petroleum Company, January 6, 1983, RF15-1

I. V. Cole Petroleum Company (Cole), filed an Application for Refund seeking a portion of the fund obtained by the DOE through a consent order entered into by the agency and Panhandle Eastern Pipeline Company (Panhandle). Cole is a reseller-retailer of

gasoline which purchased product from Panhandle and four other firms during the consent order period. In analyzing the Cole application, the DOE found that the firm had sufficient banks of unrecouped product cost increases to support its claim for a refund. The data established that Cole paid higher than average prices for Panhandle product during 3 of the 10 months in which the firm made purchases, thus establishing a competitive injury in purchases totalling 107,510 gallons. However, the DOE noted that Cole could have made a small-case, threshhold claim for 50,000 gallons per month in each month in which it had purchased Panhandle poduct without a further showing of competitive injury. It therefore authorized a refund based upon threshhold purchases of 50,000 gallons per month for ten months, which resulted in a refund of $2,987 plus a proportionate share of the accrued interest.

Protective Order

The following firms filed an Application for Protective Order. The application, if granted, would result in the issuance by the DOE of the proposed Protective Order submitted by the firms. The DOE granted the following application and issued the requested Protective Order as an Order of the Department of Energy:

Names	Case No.
Mobile Oil Corp.; Little America Refining Co.	HEJ-0029

Dismissias

The following submissions were dismissed:

Name	Case No.
Conoco, Inc.	BRO-1150 BRH-1150 BRO-1448 BRO-1446 BRO-1455 BRO-1445 HRH-0005 HRO-0002 HRH-0001 HRO-0002 BRO-1451 BRH-1448

Copies of the full text of these decisions and orders are available in the Public Docket Room of the Office of Hearings and Appeals, Room 1111, New Post Office Building, 12th and Pennsylvania Ave., NW., Washington, D.C. 20461, Monday through Friday, between the hours of 1:00 p.m. and 5:00 p.m., except federal holidays. They are also available in *Energy Management: Federal Energy Guidelines*, a commercially published loose leaf reporter system.

George B. Breznay,

Director, Office of Hearings and Appeals.

BILLING CODE 6450-01-M

Western Area Power Administration

Salt Lake City Area; Post-1989 Marketing Plan

AGENCY: Western Area Power Administration, DOE.

ACTION: Extension of the submittal date for applicant profile data.

SUMMARY: The Western Area Power Administration (Western) has been developing a post-1989 marketing plan for the Colorado River Storage Project (CRSP), Collbran, Provo River, and Rio Grande Projects since the initial public information forum was held on May 22, 1980, in Salt Lake City, Utah. Western's Salt Lake City Area Office requested applicant profile data to evaluate alternate allocation methods and to complete the development of a post-1989 marketing plan for these resources in a **Federal Register** notice dated February 4, 1983. Western has now determined that a 30-day extension in the submittal date for that applicant profile data is desirable.

DATE: The submittal date for applicant profile data is now extended to on or before April 15, 1983.

ADDRESS: Applicant profile data should be sent to: Mr. Albert M. Gabiola, Area Manager, Salt Lake City Area Office, Western Area Power Administration, P.O. Box 11606, Salt Lake City, UT 84147, telephone (801) 524-6372. Further information concerning the request for applicant profile data may be obtained from Mr. Gabiola.

SUPPLEMENTARY INFORMATION: To expedite the development of the post-1989 marketing plans, Western requests applicants to submit the applicant profile data as early as it is available rather than waiting until April 15, 1983.

Issued at Washington, D.C. March 8, 1983.

Ronald K. Greenhalgh,

Assistant Administrator.
